The board is hereby authorized to use moneys from hail insurance levies for the purchase of such reinsurance whenever it appears to the board that such reinsurance is necessary and advisable.

80-2-222. Board to establish amount of levy — disposition of funds. (1) The board of hail insurance may, when it considers it advisable, establish as many districts as it considers advisable and may maintain maximum rates in various parts of the state, which rates shall be commensurate with the risk incurred as nearly as it can determine from past experiences or from any records available.

(2) Notice of the various rates established for any year shall be plainly printed on the application for hail insurance, and the rates for the year shall be determined and levied by the board of hail insurance for each of the various

districts as established, in such proportions as will in its judgment be fair and equitable.

(3) In making the levy provided in this section and 80-2-223, the board of hail insurance shall provide for:

(a) the payment of all expenses of administration, together with all interest owed or to be owing on registered warrants;

(b) that portion of the losses incurred during the current year which are not paid from funds drawn from the reserve;

(c) the maintenance of the reserve, a part or all of which may be used in any one year for the purpose of paying the costs of administration, interest on the warrants, and losses as the same shall be settled and adjusted by the board, including the losses sustained in any prior year or years under the hail insurance law that have not been paid.

(4) If at the end of any hail insurance season the board determines and finds that more funds are accumulating from the current year's levies than were estimated when the levy was made and are in excess of the need for the payment of losses and expenses and maintenance of the reserve, the board may, at its discretion, refund the excess to the farmers insured for the year, on a pro rata or percentage basis.

(5) The board of hail insurance may direct the board of investments to invest funds from the expendable trust fund pursuant to the provisions of the unified investment program for state funds. The income from such investments shall be credited to the board of hail insurance account in the expendable trust fund.

When any crop insured under this part shall have been destroyed by any other cause than hail, the applicant may, by furnishing the proof required by the board of hail insurance, cause the crop to be withdrawn from the regular levy of the board for the current year. Such proof shall be submitted to the board of hail insurance in accordance with its rules. Said rules shall be plainly printed on the applications and policies issued by the department. 80-2-230. Collection of levies — release of lien. (1) The county treasurer in each county in the state shall collect all levies made under this part in the same manner as other property taxes are collected and shall keep all moneys collected by him or for him for hail insurance in a separate fund to be known as the hail insurance fund and remit the same to the state treasurer in the same manner as provided by law for the remittance of other moneys due to the state. All county treasurers shall use due diligence in making the collections of the levies provided herein. Also the board may furnish assistance needed at any time in making collections or may take over the collection of any levy at any time, depositing any collections therefrom with the treasurer of the county where the levy therefor was made.

(2) All insurance levies, whether levied against land or in the form of special assessments secured by crop liens, shall be payable in full and not in semiannual payments on or before November 30 of each year in which such levies are made.

(3) Whenever the amount due on any hail insurance secured by a crop lien is paid, the treasurer shall promptly endorse on the lien on file in the office of the county clerk and recorder the amount paid thereon with the date of payment and such endorsement shall be a satisfaction and release of such lien.

80-2-232. State treasurer's duty — warrants — transfers to county and state general fund. (1) The state treasurer shall receive all moneys paid to him under this part and shall place same to the credit of the expendable trust fund. All moneys collected by the board shall be deposited in the expendable trust fund, and all losses shall be paid from that fund. All other costs are administrative expenses and shall be paid from the board's expendable trust fund. If registered warrants be presented and there be no money to pay the same, such warrants shall be registered and thereafter bear interest at the rate of 4% per annum until called for payment by the state treasurer.

(2) Upon warrants drawn by order of the board, the state treasurer shall pay out of the board's expendable trust fund to the county treasurer of each county where state hail insurance coverage is in force 2% of the gross annual levies made and collected in such county under this part for the use of the county as the board of county commissioners may determine.

(3) Upon authorization from the board of hail insurance, the state treasurer shall transfer out of the board's expendable trust fund to the general fund of the state of Montana 1.5% of the gross annual levies made and collected in the state of Montana.

80-2-233 through 80-2-240 reserved.

80-2-241. Report of losses. All losses by hail to crops insured under this part shall be reported within 14 days thereafter by the owner of such crops, his agent or attorney, to the board of hail insurance, which shall require the claimant to make a statement of the losses sustained, the cause thereof, and such other information as the board may require on the forms to be provided for such purpose. If a loss is reported more than 14 days after it occurs, the board shall charge the claimant for all costs incurred in making the adjustment.

History: En. Sec. 7, Ch. 169, L. 1917; re-en. Sec. 358, R.C.M. 1921; amd. Sec. 9, Ch. 40, L. 1923; re-en. Sec. 358, R.C.M. 1935; R.C.M. 1947, 82-1514; amd. Sec. 11, Ch. 691, L. 1983.

80-2-242. Appraisers — appointment — qualifications — duties. (1) The department of agriculture shall as soon as practicable each year retain a sufficient number of appraisers to appraise all losses by hail incurred under this part in the various counties. The persons so appointed shall be actively engaged in farming or shall have had practical experience in farming.

(2) The board may call on one or more of the duly appointed appraisers for the adjustment of each and every loss, and the said appraisers shall promptly report their findings to the board according to the rules provided by the board.

(3) No appraiser who shall be a relative, attorney, agent, employee, or creditor or in any manner interested by lien, mortgage, or otherwise in the crop injured or destroyed shall assist in adjusting any such loss.

(4) The board may send any duly appointed appraiser or appraisers into any county as the occasion may require.

History: En. Sec. 8, Ch. 169, L. 1917; amd. Sec. 5, Ch. 34, L. 1919; amd. Sec. 4, Ch. 141, L. 1921; re-en. Sec. 359, R.C.M. 1921; re-en. Sec. 359, R.C.M. 1935; amd. Sec. 1, Ch. 79, L. 1973; R.C.M. 1947, 82-1515; amd. Sec. 12, Ch. 691, L. 1983.

80-2-243. Disputed appraisal. (1) In case the party that has sustained the loss is dissatisfied with and refuses to accept the adjustment made by the official appraiser, then he shall have the right to appeal to the board of hail insurance. He shall make such appeal by registered or certified mail within 10 days after receiving the adjustment offer of the board in writing. Also the board may require the posting of a cash bond of $25 with the request for reappraisal of the first adjustment. In cases where the board requires the posting of the $25 bond, the board may retain it if no increase is allowed. If an increase is obtained, the board will return the bond to the claimant.

(2) In case the adjuster who makes the second appraisal fails to secure an agreement, the claimant may at his option submit the matter to arbitration as herein provided or sue the board in the district court of the county where the loss occurred, within 90 days from the date of receipt of written notice of the second appraisal. Such actions shall be trials de novo and the Montana Rules of Civil Procedure shall apply. Where any claimant demands arbitration, he shall, if required by the board, furnish a cash bond to the board in the sum of $50 which shall accompany his application. If there is not sufficient allowance made to any claimant after arbitration to cover the cost of arbitration without the use of the $50 bond, then the board may use a part or all of said cash bond. In cases where the claimant secures an increase, the bond shall be promptly returned to the claimant. If the claimant elects to submit the matter to arbitration, he shall then appoint one disinterested person as appraiser and the official appraiser shall appoint another person as appraiser and the two shall select a third disinterested person and the three shall then proceed to adjust the loss in the same manner as specified in 80-2-242. The judgment of the majority shall be the judgment of said appraisers and shall be binding upon both parties as the final determination of said loss.

(3) (a) If the insured does not recover a greater sum than allowed by the official appraiser in the first instance, he shall pay the expenses of the three appraisers and their witnesses in making said adjustment, but if he is awarded a larger sum, then the same shall be paid by the board.

(b) If the insured shall be required to pay the expenses of such reappraisement as above provided, the board is hereby authorized to deduct the amount of such expenses from the amount allowed said insured before making settlement for said loss.

(4) The board shall examine all reports of appraisers and verify the same and adjust all losses and for such purposes may order hearings, subpoena witnesses, conduct examinations, and do all things necessary to secure a fair and impartial appraisement of losses by hail.

History: En. Sec. 9, Ch. 169, L. 1917; amd. Sec. 6, Ch. 34, L. 1919; re-en. Sec. 360, R.C.M. 1921; amd. Sec. 10, Ch. 40, L. 1923; re-en. Sec. 360, R.C.M. 1935; amd. Sec. 4, Ch. 33, L. 1949; amd. 80-2-244. Payment of losses. (1) The board of hail insurance shall, as soon as practicable after the loss has been sustained, arrange for the payment of the loss in the following manner. From the amount of the loss as adjusted for each claimant, the board shall deduct the amount the claimant then owes as delinquent hail insurance tax and the maximum amount assessed as hail insurance tax for the current year.

(2) The board shall on or before November 1 order payment for the amount so deducted, which payment shall be remitted to the county treasurer of the county in which the tax was assessed. The board shall then order payment for the balance of the adjustment to be sent to the claimant, provided that in no case may the payment for loss exceed $24 per acre for grain crops on nonirrigated lands, $48 per acre on irrigated lands. No claimant may receive payment for any loss incurred where the loss does not equal or exceed 5% of the total value of the crop insured. If the losses in any year exceed the current levy plus the reserve, if any, then the payment of all losses shall be prorated, share and share alike, among all grain growers having loss claims adjusted and approved, and the unpaid balance of the losses shall be paid out of the reserve without interest in such order as the board directs, when in the judgment of the board there are sufficient moneys to provide for the payment of the same and other items payable out of the reserve. In any year the board may by resolution authorize its chairman and secretary to borrow as needed from any person, bank, or corporation such sum or sums of money as the board may consider necessary for the purpose of paying all warrants as issued.

(3) For any moneys borrowed under the provisions of this part, the board shall cause warrants to be drawn. The warrants shall bear interest at not to exceed 6% a year, and the warrants and the interest thereon shall be paid out of funds from the state hail insurance program as they are collected from the various counties in the state. The board may not at any time borrow a total sum greater than the amount of levies as made for taxes for the current year together with such delinquent taxes as remain unpaid on the books of the county treasurer.

Part 6

Produce Wholesalers

80-3-601. Definitions. Unless the context requires otherwise, in this part the following definitions apply:

(1) "Dealer at wholesale" means a person who buys to sell at wholesale or contracts to buy to sell at wholesale or who handles at wholesale on account of or as agent for another.

(2) "Person" means an individual, group of persons, exchange, firm, partnership, corporation, or association.

(3) "Produce" means the natural products of the farm and includes but is not limited to natural products of the orchard, vineyard, garden, and apiary, raw and manufactured (except grains, dairy products, livestock, poultry, and poultry products), when handled for the purpose of resale. The term "produce" does not include seed potatoes.

History: En. Sec. 3, Ch. 164, L. 1933; re-en. Sec. 2443.3, R.C.M. 1935; Sec. 84-3403, R.C.M. 1947; amd. and redes. 3-3301 by Sec. 160, Ch. 218, L. 1974; R.C.M. 1947, 3-3301; amd. Sec. 1, Ch. 406, L. 1981.

80-3-602. Produce wholesaler's license — exemptions. A person may not engage in or purport to be engaged in the business of a dealer at wholesale unless he is licensed by the department of agriculture. This part does not apply to a farmer or gardener selling his own products and who shall when called upon to do so by the department furnish a sworn statement that the goods handled by him were actually grown by him. Employees of the department may for the purpose of this section administer the oath. Also, this part does not apply to a trucker operating for hire under a license issued by the public service commission and not buying or selling produce to a dealer at retail or to a consumer or group of consumers cooperatively obtaining produce for their own use only and not for resale.

History: En. Sec. 2, Ch. 164, L. 1933; amd. Sec. 1, Ch. 173, L. 1935; re-en. Sec. 2443.2, R.C.M. 1935; Sec. 84-3402, R.C.M. 1947; amd. and redes. 3-3302 by Sec. 159, Ch. 218, L. 1974; R.C.M. 1947, 3-3302.

80-3-603. Application for license — bond — expiration date. (1) Licenses to engage in the business of a dealer at wholesale in this state shall be issued by the department to reputable persons who apply for a license and pay the prescribed fee.

(2) The application shall be in writing, accompanied by the prescribed fee, and under oath. It shall state:

(a) the place where the applicant intends to carry on the business for which the license is desired;

(b) the estimated amount of business to be done monthly;

(c) the full names of the persons constituting the firm, if the applicant is a partnership;

(d) the names of the officers and the place of incorporation, if the applicant is a corporation; and

(e) a financial statement showing in a general way the value and character of the assets and the amount of liabilities of the applicant.

(3) Before issuing a license, the department shall require the applicant to file with it a bond or its equivalent, as established by the department by rule, to the state in an amount to be fixed by the department based on the monthly business to be transacted by the applicant. The bond or its equivalent may not be for less than $1,000. The department may require, under penalty of revoking the license, additional bond or its equivalent if the business transacted warrants an increase. The bond or its equivalent shall cover all wholesale produce business transacted in this state. The bond shall be executed by the applicant as principal and a surety company authorized to do business in the state as surety. The form of the bond or its equivalent shall be fixed by the department, conditioned upon:

(a) faithful performance of his duties as a dealer at wholesale;

(b) observance of all laws relating to the business of a dealer at wholesale;

(c) payment, when due, of the purchase price of produce purchased by him;

(d) the prompt reporting of sales as required by law to all persons consigning produce to the dealer as licensee for sale on commission; and

(e) the prompt payment to persons entitled to the proceeds of the sales less lawful charges, disbursements, and commissions.

(4) All licenses expire December 31 of each year. The license or a certified copy of the license shall be kept posted in the office of the licensee at each place in this state where he transacts business. The fee for each license is $200 and for each certified copy of a license, $10. If a truck is the place of business, the license fee for the first truck is $200 and for each additional truck, $75.

(5) A separate license is required for each place of business. Each truck used for assembling and distributing produce, other than from a permanently established place of business through which all business of sales and accounts is handled, is a separate place of business and must be licensed.

(e) class 4—mixed cultivated tame mustard seed.

(2) Classes 1, 2, and 3 shall contain not more than 5% of other classes. Class 4 shall be any mixture of cultivated tame mustard seed having an admixture of other classes in excess of 5% and shall be graded according to the predominating class in the mixture.

(3) Grade requirements for cultivated tame mustard seed (percentage figures determined after the removal of dockage):

	GRADE NUMBER			
	Fancy	1	2	3
Sound cultivated mustard not less than	99%	98 ½%	97%	95%
Damaged kernels				
heat-damaged	0	0.1%	0.2%	0.5%
Total	1%	1 ½%	3 %	5 %
Other classes				
wild mustard	0	0.1%	0.2%	0.5%
Total	0	0.5%	2.0%	5.0%
Foreign material other than dockage				
Cockle seed	0	0.1%	0.2%	0.3%
Weed seed	0	0.3%	0.5%	0.7%
Total	0	1 %	1 ½%	2 %

Sample: Sample grade shall include mustard seed which does not come within the requirements of any of the grades, No. 1 to No. 3, inclusive, or which has any objectionable foreign odor or is sour, heating, hot, or is otherwise of distinctly low quality or contains small, inseparable stones or cinders.

History: En. Sec. 1, Ch. 35, L. 1941; amd. Sec. 1, Ch. 170, L. 1957; amd. Sec. 20, Ch. 13, L. 1977; R.C.M. 1947, 3-1901.

80-4-302. Definitions and specifications. The following definitions and specifications are hereby adopted and made legal:

(1) "Damaged seeds" include all seeds and pieces of seeds of mustard seed which are completely covered with mold, very green, sprouted, frosted, badly ground damaged, badly weather damaged, or otherwise distinctly damaged.

(2) "Heat damaged seeds" include seeds and pieces of seeds of mustard seed which have been distinctly discolored by external heat or as a result of heating caused by fermentation.

(3) "Dockage" includes sand, dirt, weed seeds, weed stems, chaff, straw, mustard seed other than tame mustard, and any other foreign material which can be removed readily from the mustard by the use of appropriate sieves, cleaning devices, or other practical means suited to separate the foreign material present. The term also includes undeveloped, shriveled, and small pieces of mustard seeds removed in properly separating the foreign material which cannot be recovered by properly rescreening or recleaning. The quantity of dockage shall be calculated in terms of percentage. When less than 1/2 of 1% it shall be disregarded. The percentage of dockage so determined and

stated shall be added to the grade designation. Dockage is to be calculated in gradients of 1/2 of 1%, that is to say, 0% to 0.4% will be designated as no dockage, 0.5% to 0.9% will be designated as 1/2 of 1% dockage, 1% to 1.4% will be designated as 1% dockage, 1.5% to 1.9% will be designated as 1.5% dockage, and so on.

(4) "Foreign material other than dockage" includes all matter other than tame cultivated mustard seed which is not separated in the proper determination of dockage. However, rapeseed, common wild mustards, and other seeds that blend with class 2 and class 3 mustard seed and thus are not readily identified and the total of which is not in excess of 2.5% shall not be considered foreign material and shall not be considered in grading such classes of mustard seed.

(5) Percentages, except in the case of moisture, shall be percentages ascertained by weight.

(6) Percentage of moisture shall be that ascertained by use of the equipment and procedure prescribed by the department.

(7) Percentage of dockage shall be that ascertained by use of the equipment and procedure prescribed by the department.

(8) The test weight per bushel shall be the weight per winchester bushel as determined by the testing apparatus and the method of use thereof prescribed by the department or as determined by any device and method which give equivalent results in the determination of test weight per bushel.

History: En. Sec. 2, Ch. 35, L. 1941; amd. Sec. 1, Ch. 31, L. 1971; amd. Sec. 21, Ch. 13, L. 1977; amd. Sec. 6, Ch. 315, L. 1977; R.C.M. 1947, 3-1902(1) thru (4), (6) thru (9).

80-4-303. Basis of determination. (1) Each determination of dockage, temperature, moisture, odor, and content of live weevil or other insects injurious to stored mustard seed shall be upon the basis of the seed as a whole.

(2) Determination of the percentage of damage, heat damage, sound cultivated mustard seed, and foreign material and determinations of all other factors not otherwise provided for shall be on the basis of a portion cut from the original sample and separated by handpicking.

History: En. Sec. 2, Ch. 35, L. 1941; amd. Sec. 1, Ch. 31, L. 1971; amd. Sec. 21, Ch. 13, L. 1977; amd. Sec. 6, Ch. 315, L. 1977; R.C.M. 1947, 3-1902(5), (10).

80-4-304. Weights per bushel. (1) Legal test weights per bushel are the weight per winchester bushel as determined by the testing apparatus and the method of use thereof prescribed by the department or as determined by any device and method which give equivalent results in the determination of test weight per bushel.

(2) Weight per bushel for tame yellow mustard seed shall be:

Fancy	56 lbs.
No. 1	54 lbs.
No. 2	52 lbs.
No. 3	50 lbs.

(3) Weight per bushel for tame brown and tame Montana oriental mustard seed shall be:

No. 1	52 lbs.
No. 2	51 lbs.
No. 3	50 lbs.

(4) All seeds weighing less than the above per bushel shall be graded as sample weight, provided that the percentage of damage, heat damage, sound cultivated mustard seed, and foreign material and determination of all other factors not otherwise provided for shall be on the basis of a portion cut from the original sample and separated by hand picking.

History: En. Sec. 3, Ch. 35, L. 1941; amd. Sec. 2, Ch. 170, L. 1957; amd. Sec. 22, Ch. 13, L. 1977; R.C.M. 1947, 3-1903.

"Tough" mustard seed shall be all mustard seed containing more than 11% moisture and shall be graded and designated according to the grade requirements of the standards applicable to such seed if it were not tough, and there shall be added to and made a part of the grade designation the word "tough".

80-4-427. Injunction. If a person without a license is found to have engaged in any business for which a license is required under parts 5 and 6 of this chapter, the court shall enjoin him from further business until he has been duly licensed. It is not necessary that the department show that an individual has been injured by the actions complained of in order to issue the injunction. The procedure for injunctive relief is the same as any other action for an injunction under Title 27. The injunction provided by this section is an additional remedy to the criminal penalty provided for in 80-4-428.

History: En. Sec. 18, Ch. 539, L. 1983; amd. Sec. 141, Ch. 370, L. 1987.

80-4-428. Penalty for operating without a license — misrepresentation. (1) A person acting as a warehouseman or a commodity dealer without a license or in any way representing by action or words that he is a warehouseman or a commodity dealer when not so licensed violates the provisions of parts 5 and 6 of this chapter, is guilty of a felony, and is punishable by imprisonment for not more than 10 years or by a fine of not more than $10,000, or both.

(2) A person who issues or aids in the issuance of a fraudulent receipt for any commodity is guilty of a felony and is punishable by imprisonment for not more than 10 years or by a fine of not more than $10,000, or both.

(3) A person who knowingly submits false information to or who knowingly withholds information from the department when that information is required to be submitted is guilty of a felony.

History: En. Sec. 19, Ch. 539, L. 1983.

80-4-429. Penalty. (1) Except as otherwise provided, any person who violates any provision of parts 4 through 6 of this chapter or rules promulgated thereunder or who impedes, obstructs, hinders, or otherwise prevents or attempts to prevent the director or his duly authorized representative in the performance of his duty under parts 4 through 6 of this chapter is guilty of a misdemeanor and is punishable by imprisonment in a county jail not to exceed 6 months or by a fine of not more than $1,000, or both.

(2) A person who refuses to permit inspection of licensed premises, books, accounts, records, or other documents required by parts 4 through 7 of this chapter or who uses a scale weight ticket or credit sale contract that fails to satisfy the requirements of parts 4 through 7 of this chapter is guilty of a misdemeanor.

(3) A person acting as a commodity dealer or warehouseman who knowingly sells warehouse-receipted agricultural commodities that he is not authorized to sell or who fails to pay for purchased agricultural commodities is guilty of a felony.

History: En. Sec. 20, Ch. 539, L. 1983; amd. Sec. 2, Ch. 299, L. 1991.

Compiler's Comments

1991 Amendment: Inserted (3) designating as felonies certain acts of commodity dealer or warehouseman.

80-4-430. Director's enforcement action. Nothing in parts 4 through 7 of this chapter may be construed to require the director or his authorized representative to report for prosecution or for the institution of civil action a violation if he believes that the public interest will best be served by a suitable warning.

History: En. Sec. 21, Ch. 539, L. 1983.

Part 5

Warehousemen of Agricultural Commodities

80-4-501. License necessary to operate public warehouse. (1) No person may act as a warehouseman without first having obtained an annual license from the department. This requirement does not apply to operators of warehouses that are federally licensed under the United States Warehouse Act.

(2) If a warehouseman operates two or more warehouses in the same city or immediately adjacent thereto or in the same immediate area, in conjunction with each other and with the same work force, and one set of books and records is kept for all such warehouses and cash slips, scale weight tickets, warehouse receipts, and checks of one series are used for agricultural commodities stored therein, only one warehouseman's license is required for the operation of all such warehouses.

History: En. Sec. 22, Ch. 539, L. 1983.

80-4-502. Licenses to warehouseman — issuance — renewal — conditions precedent. (1) The department is authorized to issue or renew, upon application, a license to any warehouseman for the conduct of a warehouse or warehouses in accordance with parts 5 and 6 of this chapter, provided the following conditions are met:

(a) Each applicant shall file and maintain satisfactory evidence of an effective policy of insurance issued by an insurance company authorized to do business in this state, insuring all agricultural commodities that are stored in the warehouse, including agricultural commodities owned by the warehouseman. The insurance shall insure the commodities for the full market value at the time of loss of such commodities against loss by fire, internal explosion, lightning, or tornado.

(b) Each warehouse must be found suitable for the proper storage of the particular agricultural commodity stored therein.

(c) A license fee must be submitted to the department as prescribed by 80-4-503.

(d) A current drawing of the warehouse, showing storage facilities and capacity of the warehouse, must be submitted to the department.

(e) A sufficient and valid bond must be filed and maintained as required by 80-4-504 and 80-4-505.

(f) The applicant has submitted to the department a current financial statement prepared by a licensed accountant according to generally accepted accounting principles, showing that the applicant has and does maintain current assets equal to or greater than current liabilities. Applicants not having adequate current assets equal to or greater than current liabilities may provide the department with additional bonding, or an equivalent in the form of a certificate of deposit or irrevocable letter of credit, in the amount of $2,000 for each $1,000 of deficit. The bond or equivalent must be in addition to the bond amount required in 80-4-505.

(g) The applicant must submit a sample warehouse receipt and subsequent revisions to the department for approval and filing.

(h) The applicant must have complied with the terms of this part and the rules prescribed thereunder.

(2) All documents required for renewal of a license must be received by the department prior to the expiration date of the warehouse license. An expired warehouse license may be reinstated by the department upon receipt of all required licensing documents and a penalty fee of $50 if the documents are filed within 30 days from the date of expiration of the warehouse license. All license applications received after the 30-day penalty period must be considered original applications and an initial license fee must be assessed according to 80-4-503.

History: En. Sec. 23, Ch. 539, L. 1983; amd. Sec. 1, Ch. 157, L. 1989.

80-4-503. Fees of department. (1) The department shall collect an annual warehouseman license fee, based on the number of warehouses owned by the warehouseman, according to the following schedule:

For each warehouse listed in the application:

Capacity in Hundredweight	Rate
0 to 25,000	$ 35
25,001 to 50,000	60
50,001 to 125,000	85
125,001 to 250,000	110
250,001 to 375,000	135
over 375,000	160

(2) The department shall collect a fee of $50 for each initial licensing inspection of a warehouse or station.

(3) The department shall collect a fee of $25 for each amendment of a license.

(4) The department shall collect a fee of $150 a day or fraction thereof for maintaining an employee of the department at a warehouse to supervise the correction of a deficiency.

(5) All fees must be deposited into the state treasury and credited to the general fund account.

History: En. Sec. 24, Ch. 539, L. 1983; amd. Sec. 4, Ch. 620, L. 1987.

80-4-504. Bond of applicant for license — additional bond — additional obligations. (1) Each applicant for a warehouseman's license shall file a bond or its equivalent, as established by department rule, with the department. The bond must be in such form and must contain such terms and conditions as the department may prescribe by rule to carry out the purpose of this section and 80-4-505.

(2) The department may demand an additional bond if the nature or volume of the business conducted by the warehouseman warrants an increase.

(3) The warehouseman may give a single bond to cover all warehouses operated by him.

(4) Any changes in the capacity of a warehouse or installation of any new warehouse involving a change in the bond liability under 80-4-505 must be reported in writing to the director, and an appropriate bond must be filed prior to the operation thereof.

History: En. Sec. 25, Ch. 539, L. 1983; amd. Sec. 2, Ch. 578, L. 1985.

80-4-505. Amount of bond — cancellation. (1) The amount of the bond to be furnished for each warehouse must be fixed at a rate of 20 cents per hundredweight for the first 500,000 hundredweight of licensed capacity; 15 cents per hundredweight for the next 500,000 hundredweight of licensed capacity; and 10 cents per hundredweight for all licensed capacity over 1 million hundredweight. The amount of the bond may not be less than $20,000 or more than the maximum prescribed in 80-4-405. The licensed capacity is the maximum number of hundredweight of agricultural commodities that the warehouse can accommodate.

(2) If a warehouseman is also operating as a commodity dealer, he shall also provide a bond as prescribed in 80-4-604.

(3) If there occurs a deficiency in net assets as required under 80-4-506, there shall be added to the amount of bond determined in accordance with subsection (1) an amount equal to that deficiency.

(4) Each warehouseman bond shall run continuously with the warehouseman license until canceled by the bonding company. The aggregate liability of the surety may in no event exceed the sum of the bond.

(5) A 60-day written notice must be given to the department by the bonding company before any bond is canceled; however, such cancellation does not terminate any liability of the surety incurred prior to the date of cancellation.

History: En. Sec. 26, Ch. 539, L. 1983; amd. Sec. 3, Ch. 578, L. 1985.

80-4-506. Net asset requirements. (1) Each licensee or applicant for a license shall maintain, above all exemptions and liabilities, total net assets liable for the payment of any indebtedness arising from the conduct of the warehouse or warehouses of at least 40 cents per hundredweight of all agricultural commodities that his warehouse or warehouses can accommodate.

(2) No person may be licensed as a warehouseman unless he has and maintains allowable net assets of at least $10,000.

(3) Assets must be valued at original cost less depreciation, except that upon written request filed with the department, the director may allow asset valuations in accordance with a competent appraisal.

(4) In determining total net assets, credit may be given for insurable property, such as buildings, machinery, equipment, and merchandise inventory, only to the extent that such property is protected by insurance against loss or damage by fire. The insurance must be in the form of lawful policies issued by one or more insurance companies authorized to do business and subject to service of process in suits brought in this state.

(5) If a warehouseman is licensed or applies for licenses to operate two or more warehouses, the maximum number of hundredweight which all such warehouses will accommodate must be considered in determining whether the warehouseman meets the net asset requirements specified in this section.

History: En. Sec. 27, Ch. 539, L. 1983; amd. Sec. 4, Ch. 578, L. 1985.

80-4-507 through 80-4-520 reserved.

80-4-521. Duties of warehouseman — content of records. (1) Each warehouseman shall maintain in a safe place current and complete records at all times with respect to all agricultural commodities stored, conditioned, handled, or shipped by him, including agricultural commodities owned by him. Such records must include but are not limited to a daily position record, showing the total quantity of each kind and class of agricultural commodity received and loaded out and the amount remaining in storage at the close of each business day and the warehouseman's total storage obligations for each kind and class of agricultural commodity at the close of each business day.

(2) Every warehouseman purchasing any agricultural commodity from a depositor thereof shall promptly make and keep for 5 years a correct record showing in detail the following information:

(a) the name and address of the depositor;

(b) the date purchased;
(c) the terms of the sale; and
(d) the quality and quantity purchased by the warehouseman and, where applicable, the dockage, tare, grade, size, and net weight.

History: En. Sec. 28, Ch. 539, L. 1983.

80-4-522. Schedule of charges — posting. (1) Before a license to conduct a warehouse is granted, the warehouseman shall file with the director a copy of the schedule of charges for storage and other services. The schedule must be posted in a conspicuous place in his warehouse.

(2) All charges made by any warehouseman for the handling and storage of agricultural commodities must be just and reasonable. However, the director may, upon the complaint of any person or upon his own motion, hold a public hearing and may declare any existing charges for handling or storage of any agricultural commodity to be unreasonable or unjust. After the hearing, the director shall determine and order what is a just and reasonable charge to be imposed or enforced in place of that found to be unreasonable or unjust.

(3) Failure to file and post scheduled charges for the current year will keep in full force the most recently posted and filed schedule rates.

(4) In all cases, the producers will receive the first 15 days of storage without charge.

History: En. Sec. 29, Ch. 539, L. 1983.

80-4-523. Required receipt of agricultural commodities according to capacity. A warehouseman shall receive for storage, conditioning, handling, or shipment without discrimination of any kind, so far as the capacity of his warehouse will permit, all agricultural commodities tendered him in the usual course of business in suitable condition for storage. However, a warehouseman may not be compelled to accept and hold agricultural commodities for storage in such quantities as to block his regular cash agricultural commodity business. A warehouseman may not be required to accept agricultural commodities for storage in excess of working capacity. However, his appointment of space may be modified by rule upon proof that such appointment operates to the disadvantage of either the public or the warehouseman.

History: En. Sec. 30, Ch. 539, L. 1983.

80-4-524. Discrimination in charge by warehouseman prohibited. A warehouseman may not directly or indirectly, by a special charge, rebate, drawback, or other device, collect from any person a greater or lesser compensation for any service rendered in the storage, conditioning, handling, or shipment of agricultural commodities than he collects from any other person for a similar circumstance or condition. A warehouseman may not make or give any advantage to any person, company, or corporation or subject any person, company, or corporation to any undue or unreasonable prejudice or disadvantage.

History: En. Sec. 31, Ch. 539, L. 1983.

80-4-525. Scale weight tickets — form — issuance. (1) Scale weight tickets must be bound in books of convenient size and must be numbered consecutively. The original scale weight ticket must be delivered to the person from whom the agricultural commodities are received. One carbon copy of each scale weight ticket must remain as a permanent record.

(2) A scale weight ticket must be issued for each load of agricultural commodity received by the warehouseman.

(3) A scale weight ticket may not be issued or held in lieu of a warehouse receipt. The retention of scale weight tickets in lieu of warehouse receipts by the owner of the grain is at the owner's risk.

(4) There must be plainly printed across the face of such scale weight ticket issued by the warehouseman, in bold type, the words "THIS IS NOT A WAREHOUSE RECEIPT. IT MUST BE EXCHANGED FOR A WAREHOUSE RECEIPT IF GRAIN IS HELD IN STORAGE".

(5) All scale weight tickets must be signed by the warehouseman or his agent.

(6) All scale weight tickets must be converted into cash or warehouse receipts on demand.

History: En. Sec. 32, Ch. 539, L. 1983; amd. Sec. 3, Ch. 299, L. 1991.

Compiler's Comments

1991 Amendment: Deleted former (5) concerning required wording on combination scale weight ticket and warehouse receipt; and deleted (7) concerning surrender of scale weight ticket exchanged for warehouse receipts.

80-4-526. Warehouse receipts — written terms. (1) Warehouse receipts under this part must contain in written terms:

(a) a statement that the warehouse is operated under a license issued by the department;

(b) a statement showing whether it is an original, duplicate, triplicate, or other copy;

(c) a statement showing the name of the warehouse;

(d) a statement showing the name of the city or town where the warehouse is located;

(e) the date the warehouse receipt is issued;

(f) the number of the warehouse receipt. All receipts must be numbered consecutively.

(g) a statement that the grain is "received in store" from the person named;

(h) a statement of gross weight, dockage, and net weight and the sample report used for grade and protein analysis;

(i) a statement of encumbrances, such as cash or other advances;

(j) a statement that, upon the return of the receipt properly endorsed by the person to whom the order was issued and the payment of the proper charges for storing and handling, delivery will be made in accordance with this part;

(k) a statement that the grain is properly insured for the benefit of the owner; and

(l) the name of the manager or agent of the warehouse.

(2) The face of the warehouse receipt may also provide for other statements, such as:

(a) the scale weight ticket numbers or the assembly sheet number;

(b) the grade; and

(c) the protein certificate used.

(3) The back of the warehouse receipt may include printed statements, such as:

(a) delivery provisions;

(b) actual-delivery-of-grain provisions;

(c) bailment provisions;

(d) act-of-God provisions;

(e) nonnegotiable provisions; and

(f) endorsements and other statements pertinent to bookkeeping data whenever such statements do not conflict with any state or federal law pertaining to public warehousing or the grading or testing of grain.

(4) A copy of the warehouse receipt issued by the warehouseman must accompany each application for a warehouseman's license.

History: En. Sec. 33, Ch. 539, L. 1983.

80-4-527. Warehouse receipt — issuance. (1) A warehouse receipt is a receipt issued by a licensed warehouseman on a form containing all the information required by 80-4-526.

(2) No warehouse receipt may be issued except for an agricultural commodity actually delivered to a warehouse for storage.

(3) All warehousemen are required to issue a warehouse receipt for each lot of agricultural commodity received for storage or make payment for the agricultural commodity.

(4) A warehouse receipt that does not in fact represent an agricultural commodity actually delivered into a warehouse for storage and the origin of which cannot be traced to the actual delivery of the grain represented:

(a) is not legal and is of no value;

(b) has no claim on the agricultural commodity stored in a warehouse; and

(c) has no claim on the warehouseman's bond.

(5) All agricultural commodities in a warehouse belong to the holder of outstanding warehouse receipts except those commodities that are in excess of the total of all outstanding storage obligations. An outstanding warehouse receipt is a warehouse receipt that has not been returned and paid in full on the basis of grade, quality, and quantity by the warehouseman issuing it.

(6) If for convenience the holder of two or more warehouse receipts covering like agricultural commodities wishes to combine them, the new receipt so issued must state the fact that it was issued in lieu of existing receipts. An assembly or recapitulation statement must be made whenever receipts are so combined, and the number or other identification of the statement must be referenced on the new combined receipt. The assembly sheet must be kept on file in the warehouse office. Each canceled receipt must have stamped across its face “Canceled by No. _“ (showing the number of the new combination receipt).

(7) A warehouseman who is a grower and conducts such an enterprise may receive his own grain and issue warehouse receipts for agricultural commodities, in the same manner and without discrimination, as though the warehouse and growing enterprises were of separate ownership. However, the warehouseman shall report to the department all warehouse receipts issued to himself as a grower.

(8) When warehouse receipts are prepared on duplicate or triplicate forms, the original copy is the warehouse receipt and must be given upon request to the person storing the agricultural commodity covered by such receipt. The other copies shall have plainly printed across the face the words "duplicate", "triplicate", or "nonnegotiable".

(9) Each warehouse receipt issued must show the amount of cash or value of any merchandise the warehouseman has advanced on the agricultural commodity represented by the receipt, but such notation may not be construed as fixing the date of sale of such grain.

(10) All warehouse receipts must be numbered consecutively as issued by each warehouseman.

(11) Warehouse receipts must be issued when storage is charged but no later than 30 days after delivery unless agreed to in writing by both parties.

History: En. Sec. 34, Ch. 539, L. 1983; amd. Sec. 4, Ch. 299, L. 1991.

Compiler's Comments

1991 Amendment: In (8), near middle of first sentence after "given", inserted "upon request"; and inserted (11) concerning issuance of warehouse receipts when storage is charged.

80-4-528. Penalty for unlawful issue of warehouse receipts. A person violating any of the provisions of 80-4-527 or a designated employee knowingly permitting any agricultural commodity to be delivered contrary to the provisions of 80-4-527 is guilty of a misdemeanor and punishable as provided in 80-4-429.

History: En. Sec. 35, Ch. 539, L. 1983.

80-4-529. Partial withdrawal of agricultural commodities — adjustment or substitution of receipt — duties of warehouseman. When partial withdrawal of his agricultural commodity is made by a depositor, the warehouseman shall make an appropriate notation thereof on the depositor's warehouse receipt or claim or shall cancel and replace it with a warehouse receipt showing the amount of the depositor's agricultural commodity remaining in the warehouse. The warehouseman is liable for the redelivery of all agricultural commodities specified on all outstanding warehouse receipts.

History: En. Sec. 36, Ch. 539, L. 1983.

80-4-530. Shipment of stored grain to a terminal grain warehouse outside the state. (1) Warehouse receipts or signed agreements from the owners of grain, on a form approved by the department and in an amount equal to the number of bushels the warehouseman has in a terminal grain warehouse outside the state, are required for all grain shipped out of state by a warehouseman.

(2) Warehouse receipts covering grain in terminal grain warehouses outside the state must have the words "Owner waives redelivery at point of origin of grain represented by this receipt" printed or stamped on the back.

(3) Waivers or agreements to accept terminal warehouse receipts must be signed in triplicate by the owner of the grain or his agent and by a duly authorized representative of the warehouse, with:

(a) the original to be mailed to the department;

(b) the duplicate copy to be retained by the warehouseman; and

(c) the triplicate copy to be given to the holder of the warehouse receipt.

(4) All grain must be held in bonded and approved terminal warehouses, fully insured for the benefit of the holder of Montana warehouse receipts.

(5) No grain held in terminal warehouses is subject to any lien, mortgage, or encumbrance.

History: En. Sec. 37, Ch. 539, L. 1983.

80-4-531. Duty to deliver stored agricultural commodities — weights and inspections — modifying agreements — damages. (1) The duty of the warehouseman to deliver agricultural commodities stored is governed by this part. Upon the return of a properly endorsed warehouse receipt to the warehouseman and upon payment or tender of all advances and legal charges, agricultural commodities of the grade and quantity named therein must be delivered to the holder of the warehouse receipt.

(2) The holder of the warehouse receipt is entitled to an official inspection, as specified by the federal grain inspection service in the regulations implementing the United States Grain Standards Act. Inspections other than official must be agreed to in writing by the warehouseman and the holder of the warehouse receipt.

(3) (a) The holder of a warehouse receipt is entitled to class X or Y weights or better, as specified by the federal grain inspection service in the regulations implementing the United States Grain Standards Act.

(b) In the event an approved class X or Y weight is unavailable at the warehouse of origin, the following weights take precedence in this order:

(i) destination official or certified class X or Y or better; or

(ii) railroad track scale weights.

(4) The parties to a storage agreement are bound by an agreement made under this section and intended to supplement or modify the optional sections of the warehouse receipt if the agreement offer is made in writing and the receiving party fails to reject the offer in writing within 10 days of receipt of the written offer. In order to be valid, the agreement offer must state in boldface type that the receiving party has 10 days to reject the offer.

(5) A warehouseman's duty to deliver any agricultural commodity is fulfilled if delivery is made pursuant to the contract with the depositor as rapidly as it can be done by ordinary diligence. When delivery is made within 48 hours from date of demand or as agreed upon in writing by all parties concerned, the delivery complies with the provisions of this section. An extension of the delivery period may be granted by the department upon written request.

(6) All redeliveries must be made at the warehouse or station where the agricultural commodity was received unless otherwise agreed.

(7) At the option of the depositor, the warehouseman shall deliver the agricultural commodity at a terminal or, if mutually agreed, shall pay to the depositor the equivalent market value of the agricultural commodity on that

date, less any freight and storage charges to the terminal and less other charges which may be allowed by the department.

(8) In addition to other penalties provided, a warehouseman failing to deliver agricultural commodities within the time provided in this section is subject to suit by the person entitled to delivery of the agricultural commodities and may be ordered by a court of competent jurisdiction to pay actual damages or liquidated damages of 1/2 of 1% of the value for each day's delay.

History: En. Sec. 38, Ch. 539, L. 1983; amd. Sec. 1, Ch. 297, L. 1989.

80-4-532. Delivery of grain from different warehouse. (1) Any warehouseman owning or operating more than one warehouse in this state may deliver grain from one warehouse in settlement of warehouse receipts issued for grain stored in another warehouse when grain for storage has been presented at any warehouse in excess of its available storage capacity.

(2) Nothing in subsection (1) confers upon the warehouseman a right to make delivery of grain of substantially lower value than that delivered for storage, though of the same technical grade, in settlement of warehouse receipts.

(3) The warehouseman shall at all times keep on hand in bonded warehouses grain of sufficient quality and quantity to settle all outstanding warehouse receipts.

(4) Freight and other charges must be determined at the point of receipt.

History: En. Sec. 39, Ch. 539, L. 1983.

80-4-533. Loss of receipts — conditions of reissue. While an original warehouse receipt is outstanding and uncanceled by the issuing warehouseman, no other or further receipt may be issued for the agricultural commodity or any part of it covered thereby. However, if a warehouse receipt is lost or destroyed, a new receipt may be issued upon giving satisfactory security in compliance with rules adopted by the department. The new receipt must contain the same terms and conditions and must bear on its face the number and date of the receipt in lieu of which it is issued.

History: En. Sec. 40, Ch. 539, L. 1983.

80-4-534. Cancellation of insurance — suspension of license. Upon cancellation of any policy of insurance required by 80-4-502 and 80-4-506, the insurance company involved shall give 30 days' advance notice to the department by certified mail, return receipt requested, of cancellation of the policy. If the policy is canceled, the department shall immediately suspend the license of such uninsured warehouseman without a hearing, pursuant to the Montana Administrative Procedure Act. The suspension may not be removed until satisfactory evidence of the existence of an effective policy of insurance complying with the requirements of 80-4-502 and 80-4-506 has been submitted to the department or until further order by the department or a court of competent jurisdiction.

History: En. Sec. 41, Ch. 539, L. 1983.

80-4-535. Date of termination of storage contracts evidenced by warehouse receipts. All storage contracts on grain in store in warehouses, as evidenced by a warehouse receipt, must terminate on the last day of the license period as prescribed by rule.

History: En. Sec. 42, Ch. 539, L. 1983.

80-4-536. Termination of storage contract — sale of agricultural commodities for charges — notice required. (1) Storage of agricultural commodities may be terminated by the depositor at any time by the payment or tender of all legal charges and the surrender of the warehouse receipt, together with a demand for delivery of the agricultural commodities or a notice to the warehouseman to sell the commodities.

(2) In the absence of a demand for delivery, order to sell, or mutual agreement for the renewal of the storage contract entered into prior to the expiration of the storage contract, the warehouseman shall, upon the expiration of the storage contract, sell so much of the stored agricultural commodities at the local market price at the close of business on that day as is sufficient to pay the accrued storage charges. He shall then issue new warehouse receipts for the balance of the agricultural commodity to the depositor upon the depositor's surrender of the original warehouse receipts. The warehouseman shall notify all warehouse receipt holders of the provisions of this section 30 days prior to the end of the storage period.

History: En. Sec. 43, Ch. 539, L. 1983.

80-4-537. Examination of stored agricultural commodities. A department inspector may examine at any reasonable time during ordinary business hours any stored agricultural commodity and all parts of any warehouse, provided the warehouse or the agricultural commodities stored therein are not endangered by such inspections. Every warehouseman or his agent shall furnish safe and reasonable access to facilities for such examination.

History: En. Sec. 44, Ch. 539, L. 1983.

80-4-538. Warehouse shortage — remedies. (1) For purposes of this section, whenever a warehouseman stores agricultural commodities of different kinds, a receipt holder has a claim against all commodities in storage, regardless of their kind, under his receipt.

(2) Whenever it appears, after an investigation, that a warehouseman does not have in his possession sufficient agricultural commodities to cover the outstanding warehouse receipts, scale weight tickets, or other evidence of storage liability issued or assumed by him or when a warehouseman refuses to submit his books, papers, or property to lawful inspection, the department may give notice to the warehouseman to comply with the following requirements:

(a) to cover such shortage;

(b) to give an additional bond as requested by the department; or

(c) to submit to such inspection as the department considers necessary.

(3) If the warehouseman fails to comply with the terms of such notice within 24 hours from the date of issuance of the notice or within such further time as the department may allow, the department may petition the district court of the first judicial district, Lewis and Clark County, or the district court

in the county where the licensee's principal place of business is located, as shown by the license application, for an order:

(a) authorizing the department to seize and take possession of any or all agricultural commodities in the warehouse or warehouses owned, operated, or controlled by the warehouseman and of all books, papers, and property of all kinds used in connection with the conduct or the operation of the warehouse business and any materials that pertain in any way to that business; and

(b) enjoining the warehouseman from interfering with the department in the discharge of its duties as required by this part.

(4) Upon taking possession, the department shall give written notice of its action to the surety on the bond of the warehouseman and may notify the holders of record, as shown by the warehouseman's record, of all warehouse receipts or scale weight tickets issued for agricultural commodities to present their warehouse receipts or other evidence of deposits for inspection or to account for the same. The department may thereupon cause an audit to be made of the affairs of the warehouse, including but not limited to the agricultural commodities of which there is an apparent shortage, to determine the amount of shortage and, if possible, to compute the shortage as to each depositor as shown by the warehouseman's records. The department shall notify the warehouseman and the surety on his bond of the amount of the shortage and notify each affected depositor by sending notices to the depositor's last-known address as shown by the records of the warehouseman.

(5) The department shall retain possession of the agricultural commodities in the warehouse or warehouses and the books, papers, and property of the warehouseman until such time as:

(a) the warehouseman or the surety on the bond has satisfied the claims of all holders of warehouse receipts or other evidence of deposits;

(b) the surety on the bond has satisfied all such claims pro rata, if the shortage exceeds the amount of the bond; or

(c) the department is ordered by the court to surrender possession.

(6) If during or after the audit provided for in this section or at any other time the department has evidence that the warehouseman is insolvent or is unable to satisfy the claims of all holders of warehouse receipts or other evidence of deposits, the department may petition the district court for the appointment of the department to operate or liquidate the business of the warehouse.

(7) At any time within 10 days after the department takes possession of any agricultural commodities or the books, papers, or property of any warehouse, the warehouseman may serve notice on the department to appear in the district court of the county in which the warehouse is located, at a time to be fixed by the court, and show cause why the agricultural commodities, books, papers, and other property should not be restored to his possession.

(8) All necessary expenses incurred by the department in carrying out the provisions of this section may be recovered in a separate civil action brought by the department in district court or recovered at the same time and as part of the seizure action filed under subsection (3)(a).

(9) As a part of the expenses so incurred, the department is authorized to include the cost of adequate liability insurance necessary to protect the department, its officers, and others engaged in carrying out this section.

(10) The department shall set by rule the time limits for:

(a) notification of its action on the surety bond of a warehouseman;

(b) the holders of warehouse receipts or scale weight tickets to provide to the department such evidence of deposit; and

(c) satisfaction of the claims of all holders of warehouse receipts or other evidence of deposits.

Part 6

Agricultural Commodity Dealers

80-4-601. Commodity dealer license requirements — financial responsibility. (1) A person may not engage in the business of a commodity dealer in this state without first having obtained a license issued by the department.

(2) An application for a license to engage in business as a commodity dealer must be filed with the department and must be on a form prescribed by the department.

(3) A license application must include the following:

(a) the name of the applicant;

(b) the names of the officers and directors if the applicant is a corporation;

(c) the names of the partners if the applicant is a partnership;

(d) the location of the principal places of business;

(e) a sufficient and valid bond as specified in 80-4-604;

(f) the number and description of trucks or tractor-trailer units owned or leased by the applicant that will be used in the transportation of agricultural commodities purchased pursuant to the provisions of this part;

(g) a complete financial statement prepared by a licensed accountant according to generally accepted accounting principles, setting forth the applicant's assets, liabilities, and net worth. The commodity dealer shall have and maintain current assets equal to or greater than current liabilities. Applicants not having adequate current assets equal to or greater than current liabilities may provide the department with additional bonding, or an equivalent in the form of a certificate of deposit or irrevocable letter of credit, in the amount of $2,000 for each $1,000 of deficit. The bond or equivalent must be in addition to the bond amount required in 80-4-604.

(h) any other reasonable information the department finds necessary to carry out the provisions and purpose of this part.

(4) In order to receive and retain a commodity dealer's license, a commodity dealer shall have and maintain net assets of at least $50,000 or maintain a bond in the amount of $2,000 for each $1,000 or fraction thereof of net assets deficiency. However, a minimum of $10,000 net assets is required by a commodity dealer to qualify for a license. Assets must be shown at original cost less depreciation, except that upon written request filed with the department, the director may allow asset valuations in accordance with a competent appraisal. In determining total net assets, credit may be given for insurable property, such as buildings, machinery, equipment, and merchandise inventory, only to the extent that such property is protected by insurance against loss or damage by fire. The insurance must be in the form of lawful policies issued by one or more insurance companies authorized to do business and subject to service of process in suits brought in this state. A bond submitted for purposes of this subsection is in addition to any bond otherwise required under this part.

(5) The department shall adopt rules relating to the form and time of filing of financial statements. The department may require additional information or verification regarding the financial resources of the applicant and the applicant's ability to pay producers for agricultural commodities purchased from them.

History: En. Sec. 47, Ch. 539, L. 1983; amd. Sec. 5, Ch. 578, L. 1985; amd. Sec. 2, Ch. 157, L. 1989.

80-4-602. License fees. (1) The department shall collect an annual fee for each commodity dealer license according to the following schedule:

Hundredweight (Previous license year cwt volume or estimated yearly cwt)	Rate (per facility)
0 to 25,000	$ 35
25,001 to 50,000	60
50,001 to 125,000	85
125,001 to 250,000	110
250,001 to 375,000	135
over 375,000	160

(2) Each applicant shall also pay a fee of $25 for each truck operated by it in the operation of its business as a commodity dealer.

(3) All fees collected under this section must be placed in the general fund.
History: En. Sec. 48, Ch. 539, L. 1983; amd. Sec. 5, Ch. 620, L. 1987.

80-4-603. License issuance — renewal — expiration. (1) The department shall issue a license when the applicant has filed the application and complied with the terms and conditions of this part and the rules of the department.

(2) A commodity dealer's license may be renewed annually by submitting all required licensing documents.

(3) A commodity dealer's license that has expired may be reinstated by the department upon receipt of all licensing documents required and a penalty fee in the amount of $50 if the document is filed within 30 days from the date of expiration of the commodity dealer's license. At no time during the 30-day period or thereafter may the person act as a commodity dealer. All license applications received after the 30-day penalty period must be considered original applications.

(4) A commodity dealer's license is not transferable.

(5) Any partnership with a partner or any corporation that has an officer, director, or majority stockholder owning at least 10% of issued stock who has had a license revoked under this part or the United States Warehouse Act is subject to the provisions of 80-4-421.

History: En. Sec. 49, Ch. 539, L. 1983.

80-4-604. Bonding requirement amounts — cancellation. (1) An applicant for a license to operate as a commodity dealer shall, before a license may be issued, file with the department a surety bond or its equivalent, as established by department rule, payable to the state. The aggregate liability of the surety may not exceed the sum of the bond.

(2) The bond for a commodity dealer may not exceed 2% of the value of the agricultural commodities purchased by the commodity dealer from the producer during the previous 12-month period. The bond for all new applicants is 2% of the estimated value of all agricultural commodities to be purchased during the coming 12-month period. The minimum amount of bond required by any commodity dealer is $20,000, and the maximum is prescribed in 80-4-405.

(3) A surety shall notify the commodity dealer and the department by certified mail at least 60 days prior to the cancellation of the bond. The liability of the surety covers purchases made by the commodity dealer during the time the bond is in force. A commodity dealer's bond filed with the department is continuous until canceled by the surety upon 60 days' notice; however, such cancellation does not terminate any liability of the surety incurred prior to the date of cancellation.

History: En. Sec. 50, Ch. 539, L. 1983; amd. Sec. 6, Ch. 578, L. 1985; amd. Sec. 6, Ch. 299, L. 1991.

80-4-606. Inspection of premises, books, and records. The department may at any reasonable time inspect the premises and records of any commodity dealer used in the conduct of his business. A commodity dealer shall, upon request of the director, furnish to the department at any reasonable time and place all books, accounts, records, and papers relating to agricultural commodity transactions within the state. If there exists good cause to believe that a person is doing business as a commodity dealer without a license, the department may inspect the books, papers, and records of the person that pertain to agricultural commodity purchases.

History: En. Sec. 52, Ch. 539, L. 1983.

80-4-607. Insufficient checks — prohibition. No person engaged in business as a commodity dealer may draw or deliver any check, draft, or order for payment of money upon any bank for the purchase of agricultural commodities when at the time of drawing or delivery the maker or drawer does not have sufficient funds or has failed to arrange for credit with the bank or depository for payment in full upon presentation of the check, draft, or order for payment of money. The word "credit" as used in this section means an arrangement or understanding with the bank or depository for payment of the check, draft, or order.

History: En. Sec. 53, Ch. 539, L. 1983.

80-4-608. Payment of purchase price — definitions. (1) A person required to be licensed as a commodity dealer shall pay 90% of the purchase price to the owner or his agent for agricultural commodities upon delivery and demand by the owner or agent and the remaining 10% not later than 30 days after delivery by the owner or agent unless otherwise agreed to in writing by the parties.

(2) As used in this section, the following definitions apply:

80-4-612. Commodity dealer defaults — remedies. (1) If the department finds that a commodity dealer has failed to comply with the terms of a written contract or has failed to pay for a commodity purchase under an oral agreement in the manner and within the time provided in 80-4-608, the department may petition the district court of the first judicial district, Lewis and Clark County, for an order authorizing the department to seize and take possession of:

(a) any agricultural commodities in the facilities owned, operated, or controlled by the commodity dealer;

(b) all books, papers, and property used in connection with the operation of the commodity dealer business; and

(c) any material that pertains in any way to that business.

(2) If during or after an audit or at any other time the department has evidence that the commodity dealer is insolvent or is unable to satisfy the claims of all commodity dealer creditors covered by the bond, the department may petition the district court of the first judicial district, Lewis and Clark County, for the appointment of the department to operate or liquidate the business of the commodity dealer.

History: En. Sec. 7, Ch. 299, L. 1991.

80-4-705. Rules governing dockage — sample inspection. The department shall adopt rules governing the dockage on inferior grades, which shall apply in all executory contracts entered into after their adoption. If the price or amount to be paid depends on terminal weight or grade, the rules shall control the dockage insofar as dockage affects the price to be paid. The department shall also provide for sample inspection of grain, adopt rules governing sample inspection, and provide that the sample inspection, when made, is final.

History: En. Sec. 59, Ch. 539, L. 1983.

80-4-706. Special inspection of grain. The person calling for the inspection shall pay a reasonable fee fixed by department rule.

(2) Grain that is shipped to points in this state where no inspection is maintained may be inspected on request of either the buyer or seller, and a

80-4-708. Examination of grain cars at destination. (1) An official grain inspector, sampler, or weigher, before opening the doors of a car containing grain upon its arrival at any of the places designated by the department for inspection, shall first ascertain the condition of the car and determine whether any leakages have occurred while the car was in transit, determine whether the doors were properly secured and sealed at the point of shipment, and make a record of those facts in all cases, giving seal numbers.

(2) After examinations have been made, the official grain inspector, sampler, or weigher shall securely close and reseal the opened doors, using the special seal of the department.

(3) A record must be kept by the official grain inspectors, samplers, or weighers of all original seals broken, the number of seals, and the date when broken. A 1-pint portion of the composite sample may be submitted to the department, and the balance must be held in the owner's container.

(2) If either the warehouseman or owner is dissatisfied with the results of the protein tests, he may appeal to the department. In case of an appeal, a

1-pint portion of the remainder of the owner's sample must be submitted to the department with a statement of facts of the appeal. A final test, in duplicate, must be made by the department. The department's certificate of the test is final and binding upon both parties in establishing the basis of the price paid by the warehouseman.

(3) A fee established by the department commensurate with the cost of each protein test must be deducted and paid at the time of final settlement.

(4) Upon written request of the owner, an official protein test must be made.

(5) Each warehouseman shall post in a conspicuous place a placard indicating that producers may request, in writing, an official grade and protein certificate. The department shall issue the placard.

(3) Those fees or proceeds are a lien upon the grain until paid.

(4) All fees and other charges fixed by rule, including fees for the inspection, grading, weighing, and protein testing of grain, shall reflect as nearly as possible the actual cost of the services.

(5) All those fees and charges must be paid to the department and deposited with the state treasurer. The state treasurer shall place all money in the state special revenue fund. Fees deposited in the state special revenue fund may be used to pay approved claims for expenses incurred in inspecting, grading, weighing, and protein testing of grain.

(6) The department may direct the board of investments to invest funds from the state special revenue fund pursuant to the provisions of the unified investment program for state funds. The income from such investments must be credited to the proper department account in the state special revenue fund.

80-4-722. Records of inspection. (1) The official grain inspectors, samplers, and weighers have exclusive control at places provided for state inspection of the weighing and grading of grain to be inspected. (4) Official grain inspectors and weighers shall also keep an accurate record of all appeals and decisions and a complete record of every official act, which books and records must be open to inspection by any party of interest.

History: En. Sec. 66, Ch. 539, L. 1983.

80-4-723. Appeals to department — hearing and order. (1) If an owner, consignee, shipper of grain, or warehouseman disagrees with the grade given by the department, he may appeal to the department from the decision within 5 days from the date of certificate by giving notice of appeal. A fee must be charged if the appeal supports the original grade. The notice of appeal may be given by letter stating that the party appeals from the decision of the official grain inspector and specifying the initials and numbers of the cars in which the grain was contained when inspected and graded.

(2) The appellant shall also file with the department a list containing the name and address of each party interested in the subject matter. The department, upon receiving the notice and list of interested parties, shall immediately notify the interested parties of the time and place designated by it for a hearing under the Montana Administrative Procedure Act. At the hearing, which must be 5 days from the date of receiving the notice, the department shall inquire into the reasonableness and correctness of the original grading. 80-4-727. Dispute as to grade or dockage — laboratory test to be made. If a disagreement arises between the party receiving and the party delivering the grain at any warehouse in this state as to the proper grade or dockage of grain in accordance with standards at terminal points, an agreed average sample of at least 1 quart of the grain in dispute may be taken by the interested parties and forwarded to the department in a suitable container, marked for identification by the interested parties, mail or express charges prepaid, with the names and addresses of the parties affixed thereto. The department shall examine the grain and determine the appropriate grade and dockage under the inspection rules. The findings of the inspection are binding upon both parties, subject to appeal as provided in 80-4-723. If the grain in question is damp, musty, or otherwise out of condition, this fact, with any other necessary information, must accompany the sample.

Part 1

Seed Labeling

Part Cross-References

Definitions relating to agricultural seed, 80-5-120.

80-5-101. Repealed. Sec. 19, Ch. 373, L. 1987.

History: En. Sec. 1, Ch. 361, L. 1969; amd. Sec. 1, Ch. 390, L. 1973; R.C.M. 1947, 3-802.1; amd. Sec. 1, Ch. 464, L. 1983.

80-5-102. Labeling of agricultural seeds. Any person offering for sale a package, parcel, or lot of agricultural seeds, as defined in 80-5-120, that contains 1 pound or more of agricultural seeds, whether in package or in bulk, must have affixed to it a label specifying:

(1) a lot number or other distinguishing mark;

(2) kind. The name of each kind of seed present in excess of 5% shall be shown on the label and need not be accompanied by the word "kind". When two or more kinds of seed are named on the label, the name of each kind shall be accompanied by the percentage of each. When only one kind of seed is present in excess of 5% and no variety name or type designation is shown, the percentage of that kind may be shown as "pure seed" and such percentage shall apply to seed of the kind named.

(3) variety, as follows:

(a) the following kinds of agricultural seeds shall be labeled to show the variety name or the words "variety not stated":

alfalfa
barley
bean, field
beet, field
brome, smooth
clover, crimson
clover, red
clover, white
corn, field
oat
pea, field
rye
safflower
sorghum
sorghum-sudan hybrid
soybean
sudan grass
sunflower

corn, pop
fescue, tall
flax
millet, foxtail
trefoil, birdsfoot
wheat, club
wheat, common
wheat, durum

(b) if the name of the variety is given, the name may be associated with the name of the kind with or without the words "kind and variety". The percentage in this case may be shown as "pure seed" and shall apply only to seed of the variety named. If separate percentages for the kind and the variety or hybrid are shown, the name of the kind and the name of the variety or the term "hybrid" shall be clearly associated with the respective percentages. When two or more varieties are present in excess of 5% and are named on the label, the name of each variety shall be accompanied by the percentage of each.

(4) that the seed is hybrid, if any one kind or kind and variety of seed present in excess of 5% is "hybrid" seed. The percentage that is hybrid shall be at least 95% of the percentage of pure seed shown unless the percentage of pure seed which is hybrid seed is shown separately. If two or more kinds or varieties are present in excess of 5% and are named on the label, each that is hybrid shall be designated as "hybrid" on the label. No one kind or variety of seed may be labeled as "hybrid" if the pure seed contains less than 75% hybrid seed. Any one kind or kind and variety that has pure seed which is less than 95% but more than 75% hybrid seed as a result of incompletely controlled pollination in a cross shall be labeled to show:

(a) the percentage of pure seed that is hybrid seed; or

(b) a statement such as "Contains from 75% to 95% hybrid seed";

(5) state or country of origin, if known, of alfalfa, red clover, white clover, native range grasses, and field corn other than hybrid. If the origin is unknown, the fact shall be stated.

(6) the approximate percentage of germination of agricultural seed, together with the date of test of germination. In all cases where hard seeds remain at the end of the germination test, the percentage of actual germination and the percentage of hard seeds shall be stated separately, with the provision that any portion or all of the percentage of hard seeds may be added to the percentage of germination and stated as "total germination and hard seed".

(7) the germination date that must include the calendar month and year in which the germination test was completed;

(8) a purity analysis that must include:

(a) the approximate percentage by weight of pure seed, meaning the freedom of agricultural seeds from inert matter and from other seeds;

(b) the approximate percentage by weight of sand, dirt, broken seeds, sticks, chaff, and other inert matter combined in agricultural seeds;

(c) the approximate total percentage by weight of weed seeds;

(d) the approximate percentage by weight of other crop seeds in agricultural seeds; and

(e) the name and approximate number of each kind or species of restricted noxious weed seeds occurring per pound of seed;

(9) the full name and address of the seedsman, importer, dealer or agent, or other person, firm, or corporation selling the seed;

(10) in the case of mixtures of agricultural seeds which contain two or more kinds of seed in excess of 5% by weight of each, when sold as mixtures:

(a) name of mixture;

(b) name and approximate percentage by weight of each kind of agricultural seed present in the mixture in excess of 5% by weight of the total mixture;

(c) approximate percentage by weight of broken seeds and other inert matter in the mixture of agricultural seeds;

(d) approximate percentage by weight of weed seeds as defined in 80-5-120;

(e) approximate percentage by weight of other crop seeds in the mixture of agricultural seeds;

(f) name and approximate number of each kind or species of restricted noxious weed seeds occurring per pound of mixtures of agricultural seeds, subject, however, to restrictions established by rule;

(g) approximate percentage of germination of each kind of agricultural seed present in the mixture in excess of 5% by weight, together with the month and year the seed was tested. In all cases where hard seeds remain at the end of the germination test, the percentage of actual germination and the percentage of hard seeds shall be stated separately, with the provision that any portion or all of the hard seed may be added to the percentage of germination and stated as "total germination and hard seed".

(h) full name and address of the vendor of the mixture.

History: En. Sec. 2, Ch. 361, L. 1969; amd. Sec. 2, Ch. 390, L. 1973; amd. Sec. 10, Ch. 13, L. 1977; R.C.M. 1947, 3-802.2(1); amd. Sec. 2, Ch. 464, L. 1983; amd. Sec. 2, Ch. 373, L. 1987.

80-5-103. Exchange of seed between labelers. (1) When seed is exchanged or transferred from one seed labeler to another, it shall be accompanied by a shipping document which clearly shows the kind(s) of seed and quantity of each kind. Each container of seed in a lot shall carry a lot number designation.

(2) While seed is in the possession of a licensed seed labeler, it must carry a lot number on each container at all times. When seed is made available for sale or sold, a complete label must be attached to each container of a lot.

When two or more kinds of seed are named on the label, the label shall specify the percentage of each. When only one kind of seed is present in excess of 5% and no variety name or type designation is shown, the percentage must apply to seed of the kind named. If the name of the variety is given, the name may be associated with the name of the kind. The percentage in this case may be shown as "pure seed" and must apply only to seed of the variety named.

1991 Amendment: Added bee parasites to definition of bee diseases; in definition of landowner, in first sentence before "use", deleted "actual"; and made minor changes in style. Amendment effective February 1, 1991.

80-6-102. Registration. (1) A person who owns or possesses an apiary in the state shall, before April 1 each year, register the apiary. There are four classes of apiary registration. The conditions under which the department may issue certificates of registration for each class are specified in 80-6-111 through 80-6-115.

(2) Applications shall be made to the department for registration application blanks.

(3) Registration application blanks shall be furnished by the department. The applicant shall provide the following information:

(a) a statement of the name and place of residence;

(b) the number of colonies of bees, hives, and equipment in the apiary;

(c) the location of the apiary, setting forth specifically the location by sectional division to the nearest quarter section, and the township and range and, if within the corporate limits of a town or city, the number of the lot and block in the town or city;

(d) the name of the owner, renter, or occupant of the land on which the apiary is located and, when the application is for a new apiary being registered for the first time, the application must also show that the owner, renter, or occupant of the land has consented to the apiary being located on his land;

(e) the date when the apiary was first established;

(f) the class of apiary registration for which application is being made; and

(g) other information the department may require under rules adopted by it for the protection, safety, and welfare of the public and the beekeeping industry.

(4) Upon receipt of the application and payment of the fees prescribed, the department may issue a certificate of registration for an apiary, setting forth the name of the owner, the specific location, the number of colonies of bees or size of the apiary authorized under the registration, and the class of apiary authorized by the registration.

(5) In issuing certificates of registration for apiaries, if there is a conflict between applicants with respect to location, the department shall give preference to the applicant having the oldest continuous registered apiary.

(6) Certificates of registration may not be issued for new apiaries which are within such close proximity to established registered apiaries that there is or may be danger of spread of disease or pests or that the proximity will or may interfere with the proper feeding and honey flow of established apiaries.

(7) Before registering new apiaries, the department shall give at least 10 days' notice by certified mail to all registered apiarists likely to be affected by the proposed new apiary so that any party affected may file written protests with the department against registering the new apiary. If a written protest is filed, the department may require a hearing. Notice of the time and place of the hearing shall be given all parties interested by certified mail at least 10 days before the date set for the hearing.

(8) Suitable evidence of registration furnished by the department shall be posted by the apiary registrant in a conspicuous place at or near the apiary. If an owner has more than one apiary, suitable evidence of registration furnished by the department shall be posted at each apiary.

(9) A registration not applied for by April 1 of each year is a late registration and incurs an added penalty of 10% of the regular registration fee or $10, whichever is greater. Registrants who fail to apply for reregistration by April

1 of each year shall be notified of their delinquency by the department. The notification shall be by certified mail and is sufficient if deposited in a United States post office or mail box and addressed to the registrant at his last address appearing in the apiary registration files of the department at least 10 days before May 1. The registration of an apiary for which application for reregistration is not made by May 1 of each year is forfeited and all rights under the registration terminate.

(10) Any person who owns or possesses any bees, hives, colonies, or beekeeping equipment in this state or who owns or possesses an apiary in this state and who fails or refuses to register the same as provided in this part is guilty of a misdemeanor and upon conviction thereof is subject to the penalties set forth in 80-6-303.

(11) Nothing contained in this section or in 80-6-111 through 80-6-115 shall be construed as invalidating, canceling, amending, terminating, or extending any certificate of registration issued by the department prior to October 1, 1981. All such previously issued certificates of registration remain in effect for the period for which they were issued; subject, however, to forfeiture, lapse, abandonment, and termination in the manner provided by law.

80-6-103. Changing locations — enlarging or selling apiaries. (1) An owner of an established registered apiary may not change the location of the apiary without first receiving from the department authorization to establish the new apiary. In making the application, he shall specify the location of the apiary with the same particularity as in the application for original registration. If the new apiary is not used within 60 days after a new certificate of registration is issued, the certificate of registration lapses and all rights under the registration terminate. Registrations for new apiaries may not be issued for greater areas than the applicant can show are reasonably necessary for his needs consistent with good beekeeping practice.

(2) A registered apiary may be sold or transferred to a purchaser subject to parts 1 through 3 if all bees and equipment on the apiary are sold to the purchaser.

(3) No person may increase the number of hives on an apiary to exceed the number of hives authorized by his certificate of registration for that apiary, except that a person may increase the number of hives on a general apiary beyond the number authorized by the certificate of registration in order to protect his bees during adverse weather or crop conditions or to protect his bees and hives from bears or other predators. A person may also enlarge a general apiary during the spring buildup and in the fall after the end of the honey season in order to gather his bees for shipment out of the state or to winter his bees on that apiary.

(4) A person enlarging an apiary so as to exceed the number of hives herein allowed is guilty of a misdemeanor and is subject to the penalties set forth in 80-6-303.

History: En. 3-3104 by Sec. 131, Ch. 218, L. 1974; amd. Sec. 3, Ch. 25, L. 1977; R.C.M. 1947, 3-3104; amd. Sec. 8, Ch. 125, L. 1981.

80-6-104. Apiaries — termination of rights — abandonment. (1) The registration of an apiary which is not stocked with bees during at least part of the normal build-up or honey-producing season is forfeited and all rights under the certificate of registration terminate.

(2) An apiary not regularly attended in accordance with good beekeeping practice, which comprises a hazard or threat to disease or pest control in the beekeeping industry or which by reason of its physical condition or construction cannot be inspected, or any apiary not registered in accordance with 80-6-102, may be considered an abandoned apiary and may be seized by the department. Any pest-infected or diseased equipment or equipment which by reason of its physical condition or construction cannot be inspected may be burned, and the remainder may be sold at public auction. Proceeds, after the cost of the sale is deducted, shall be returned to the former owner or his estate. Before burning or selling any equipment, the department shall give the owner or person in charge a written notice at least 5 days before the burning or sale. The notice shall be given by certified mail or personal service upon the owner or person in charge of the property. If the owner or person in charge cannot be located, a certified letter sent to the owner's last address registered with the department is sufficient notice under this section.

80-6-105. Registration fees. (1) Each year before a certificate of registration may be issued for an apiary, the owner or applicant for the certificate shall pay the department a registration fee in accordance with the following schedule of fees for the total number of colonies owned or possessed:

1 to 10 colonies of bees	$ 10.00
11 to 200 colonies	25.00
201 to 500 colonies	40.00
501 to 1,000 colonies	70.00

3,001 to 5,000 colonies	140.00
5,001 colonies and upward	200.00

(2) If, after registration, additional or new colonies are authorized for a registered apiary, fees shall be paid by the registrant in accordance with the schedule in subsection (1) for the total number of colonies for that year.

80-6-111. General apiary registrations. (1) In order to control, limit, and prevent the spread of bee diseases, pests, and other contagious or infectious diseases among bees, hives, and apiaries and to control, limit, and prevent interference with the proper feeding and honey flow of established apiaries, general apiaries registered to different persons on October 1, 1981, must be located 3 or more miles apart, except as otherwise provided in this part. The department shall not register or issue a certificate of registration for any general apiary that is located less than 3 miles from a general apiary registered to another person, except as otherwise provided in this section.

(2) A person may register a general apiary that is situated less than 3 miles from another general apiary he has registered so long as the location of the general apiary being applied for is 3 or more miles from general apiaries registered to other persons.

(3) A general apiary may be registered even though it is less than 3 miles from any registered pollination apiary, landowner apiary, or hobbyist apiary.

(4) A person with an existing apiary that is located less than 3 miles from an existing general apiary registered to another person may register his apiary as a general apiary under the following conditions:

(a) his apiary was established and registered with the department as a general apiary under the department's rules in effect prior to July 1, 1981;

(b) his apiary is registered with the department as a general apiary as of July 1, 1981; and

(a) (i) the applicant must own, lease, or rent the land upon which the pollination apiary is to be located and the applicant must use the land for the purpose of growing a commercial seed, fruit, or other crop which is dependent upon bees or other insects for pollination;

(ii) the applicant does not own the bees or the hives which are to be placed upon the pollination apiary; and

(iii) the only purpose of the apiary is to pollinate a commercial agricultural crop.

(b) The applicant shall provide the department with all pertinent information necessary to determine if pollination apiaries are needed to pollinate the applicant's crop adequately.

(c) The department may refuse to register a pollination apiary based upon its own investigation of the matter, but if the department approves the application, it shall specify the number and location of pollination apiaries needed for the purpose of pollinating the applicant's commercial agricultural crop adequately.

(2) A pollination apiary registration is valid only for the time period specified by the department, and all pollination apiaries must be removed within 2 weeks after the full bloom period of the crop to be pollinated.

(3) No certificate of registration of a pollination apiary may be leased, assigned, or transferred and no person other than the pollination apiary registrant may exercise any rights or privileges, directly or indirectly, authorized by the certificate of registration.

History: En. Sec. 4, Ch. 125, L. 1981.

80-6-113. Landowner apiary registrations. (1) The department may grant landowner apiary registrations under the following conditions:

(b) The applicant must own the bees and the hives and must personally manage and operate the bees and the hives.

(c) Only one hobbyist registration is allowed an applicant and only two hobbyist apiary registrations are allowed a family unit.

(d) If the department determines that too many hobbyist apiaries are being registered within too close proximity of each other or of other established apiaries so that there is or may be danger of the spread of bee diseases, pests, or other contagious or infectious diseases among bees or apiaries or that there will be interference with the proper feeding and honey flow of established apiaries, the department may refuse to grant any further hobbyist registrations in the locality and area of the danger, in accordance with 80-6-102(6).

(2) No certificate of registration of a hobbyist apiary may be leased, assigned, or transferred, and no person other than the hobbyist apiary registrant may exercise any rights or privileges, directly or indirectly, authorized by the certificate of registration.

Inspection and Certification — Apis Bees

80-6-201. Apiaries — powers and duties of the department. (1) To prevent the spread of pests and contagious and infectious disease among bees and apiaries, the department may:

(a) order the transfer of colonies of bees from hives or containers that cannot be properly examined for brood or other diseases to other hives or containers;

(b) order disinfection of any bee, beehive, brood comb, or any other equipment that is infected or contaminated with disease or pests and burn any infected or contaminated bee, beehive, brood comb, or any other equipment if, in its judgment, disinfection will not remove the infection or contamination. Before burning any property, the department shall give the owner or person in charge a written notice at least 5 days before the date the property will be burned. The notice must be given by certified mail or personal service upon the owner or person in charge of the property.

(c) quarantine any apiary where pests, foulbrood, or any contagious or infectious diseases are present and, during the quarantine, prevent the removal from the apiary of any bees or equipment except under a special permit issued by the department permitting the removal under conditions prescribed by it. A person may not sell or offer for sale any apiary, bees, or equipment under quarantine unless a permit authorizing the sale or removal is issued by the department. Written notice of quarantine must be posted by the department, owner, or person in charge at the quarantined apiary at a conspicuous place, and a copy must be personally served or sent by certified mail to the owner of the apiary or person in charge. The quarantine continues in effect until it is ordered removed and a copy of the removal order served in the same manner.

(d) establish by rule interior and exterior quarantines to prevent the entry or spread of diseases or pests that are not known to occur in Montana;

(e) inspect apiaries, hives, equipment, or premises for the presence of disease or pests;

(f) promulgate and enforce rules adopted pursuant to parts 1 through 3.

(2) A person failing to comply with a rule, order, or provision of a quarantine pursuant to this section is subject to penalties provided for in 80-6-303.

(3) The department may provide disease and pest inspection, sampling, and laboratory analysis services for a fee. The department shall adopt rules setting the fee commensurate with costs and establishing procedures for sampling and analysis.

(4) The department may enter into agreements with the United States department of agriculture, other federal agencies, other states, municipal authorities, and individual Montana beekeepers in carrying out the provisions of this part.

1991 Amendment: Inserted (4) allowing Department to enter into agreements in carrying out Montana bee policy; and made minor changes in style. Amendment effective February 1, 1991.

80-6-202. Inspection of bees or used beekeeping equipment transported interstate. (1) A person may not transport or bring into the state bees or used beekeeping equipment or containers, including honey to be extracted, unless under a compliance agreement or certified and duly marked as being apparently pest- and disease-free by an official responsible for apiary regulations of the state from which they are being moved. The department must be advised in advance of the date of entry and the destination of the bees or material. Used equipment or bees transported into the state may be quarantined by the department, in accordance with 80-6-201(1)(c), from the time they enter the state until they have been inspected and found to be apparently free of pests and diseases or until they have been in use while under quarantine for a minimum of 90 days and at least until the following July 1. The beekeeping materials are also subject to quarantine as provided in this section. The department may also inspect and certify as being apparently pest- and disease-free bees or beekeeping equipment to be transported from Montana to a state that requires an inspection in the state of origin.

(2) (a) The costs of making the inspections provided for in subsection (1) must be paid in advance by the owner of the bees or equipment.

(b) Inspection fees for persons without a valid Montana compliance agreement must include:

(i) per diem pursuant to Title 2, chapter 18, part 5;

(ii) necessary traveling expenses;

(iii) an hourly rate established by department rule; and

(iv) a fee of $50 for the issuance of a certificate of health.

(c) Persons transporting bees interstate with a valid Montana compliance agreement shall pay inspection fees that include:

(i) per diem pursuant to Title 2, chapter 18, part 5;

(ii) necessary traveling expenses; and

(iii) a fee of $50 for the issuance of a certificate of health.

(d) If inspection by an official of any other state is considered insufficient for the protection of the Montana bee industry by the department, the department shall so state by public statement. Importation of bees or beekeeping materials, including honey for extracting, from that other state must be denied unless the materials, bees, or honey is first inspected by the department and there is obtained from it a certificate of inspection showing that the materials, bees, or honey is apparently free from pests and contagious or infectious disease. The costs of making the inspection must be paid by the person requesting it, and inspection may be made at any point outside this state convenient to the person making the inspection. The department may require that the costs of making the inspection be paid in advance, and the costs must include:

(i) per diem pursuant to Title 2, chapter 18, part 5;
(ii) necessary traveling expenses;
(iii) an hourly rate established by department rule; and
(iv) a fee of $50 for the issuance of the certificate of inspection.

This permission must be based on management practices rather than personal factors. This permission must be reported to the committee by June 1 and before the movement of bees, equipment, and nesting material. Once permission is granted, the custom pollinator qualifies as a registered bee grower within that area for as long as he pollinates in that area. If permission is denied, the requestor may petition the committee to determine if the denial was based on management practices. This determination must be made by the committee in accordance with Title 2, chapter 4, part 6.

(2) Between June 1 and September 1, a person may move his bees in an emergency situation by reporting the emergency situation to the committee by phone. He shall give proof of written permission within 10 days.

80-7-201. Destruction of fruit pests — use of crates. (1) The department of agriculture may adopt rules to prevent the spread of contagious disease among fruit and fruit trees; to prevent, treat, and destroy fruit pests and diseases of fruit and fruit trees; and to disinfect grafts, scions, and orchard debris, empty fruit boxes or packages, or other suspected material or transportable articles dangerous to orchards, fruit, and fruit trees. The rules shall be circulated in printed form by the department among fruit growers and fruit dealers of the state, shall be published at least 10 days in two newspapers of general circulation in the state, and shall be posted in three conspicuous places in each county in the state, one of which shall be at the county courthouse.

(2) No person may use a second time any crate, box, barrel, package, or wrapping which previously contained nursery stock. However, at the written

request of a nurseryman, the department may permit boxes or packages which previously contained nursery stock to be thoroughly fumigated in the presence of an inspector, at the expense of the nurseryman. The department shall give a receipt and mark the box or package. Otherwise, the box or package must be destroyed in its entirety, and possession of the crate, box, barrel, package, or wrapping by a person or dealer, other than the consignee, is prima facie evidence of a violation of this part.

(3) The department may seize and destroy by burning, without breaking, an infected or unlawfully used crate, box, barrel, package, or wrapping wherever found and prosecute the violator.

Inspectors shall visit the nurseries, orchards, stores, packinghouses, warehouses, and other places where horticultural products and fruits are kept and shall see that the rules of the department and the laws of the state pertaining to the disinfection of fruits, trees, plants, grafts, orchard debris, and empty fruit boxes and other material are complied with. Inspectors shall have access at all times to all orchards or places where horticultural products or supplies are kept or handled. They shall enforce the rules of the department and may order the destruction and disinfection of infected trees, plants, fruits, or horticultural products or supplies.

A person may not import into this state, sell, barter, or otherwise dispose of, offer for sale, or possess for sale or barter any fruit or vegetable which is or has been infested with San Jose scale or the larvae of the coddling moth or other insect pest or disease dangerous to agriculture. The fact that any fruit or vegetable bears the mark of any such insect or is worm-eaten by the larvae of the coddling moth or shows the effect of disease is conclusive evidence that the fruit or vegetable is infected. Infected fruit or vegetables may be condemned and confiscated by the department. Nothing in this section prevents the growers of the infected fruit or vegetable from manufacturing it into a byproduct or selling and shipping it to a byproduct factory after obtaining a written permit from the department.

(5) consider whether an alternative control program would be as efficient as spraying on a ratio of total costs to total benefits and provide the county with a summary of its findings prior to conducting or approving any cropland spraying program. If the alternative control program is considered adequate, the department may conduct or approve such a program.

Prior to the implementation of any state or county control program, the department and the governing body of any county for which the program is proposed shall enter into an interlocal or management agreement on the maximum amount of moneys each shall appropriate or provide toward the proposed program. If either party does not sign and approve the agreement, the program may not be conducted.

(2) Individual farm and ranch landowners may formally petition by written affidavit protesting their inclusion within the proposed cropland spraying program. The department or local governing body shall refrain from spraying any land petitioned to be excluded. Such excluded land remains subject to assessment under 80-7-505. The governing body of any county for

which a control program is intended shall proceed as provided by local government statutes.

Each owner of cropland benefited under a cropland spraying program is liable for such portion of the landowner's share of the program costs as his cropland is a portion of all cropland within the boundaries of the program. The county treasurer shall compute each landowner's liability and mail a special assessment therefor to each owner or occupier of land within the boundaries of the program. Unless otherwise mutually agreed upon, this assessment is due and payable within 32 days of mailing or 30 days of receipt if receipt is shown to be more than 2 days after mailing. (1) There is imposed a surcharge of 1 cent per dollar of the retail value of all registered herbicides sold for consumer use in the state. The volume of sales of each registered herbicide must be determined by the department from records required of pesticide dealers and retailers.

(2) The surcharge must be collected by the department on an annual calendar basis from the registrant of the herbicide and is due and payable within 30 days after notice of the amount has been given to the registrant.

(3) No registrant may be allowed to reregister a herbicide if he has failed to pay in full the surcharge on his product.

(4) The department may expend or commit not more than one-half of the annual proceeds of the surcharge as provided in 80-7-814(2) and (3). All remaining annual proceeds of the surcharge and any interest income collected must be deposited into the noxious weed management trust fund.

(5) The surcharge imposed on retail sales of herbicides in subsection (1) is terminated after the state treasurer has certified to the department that the noxious weed management trust fund has reached $2,500,000, subject to the applicable provisions of subsection (5)(a) or (5)(b).

(a) If the fund reaches $2,500,000 on or before December 31, 1993, the surcharge proceeds from the sale of herbicides for calendar year 1992 must be collected and deposited in the fund, and the surcharge is terminated on December 31, 1993.

(b) If the fund reaches $2,500,000 after December 31, 1993, the surcharge is terminated after the surcharge proceeds from the sale of herbicides for the calendar year preceding the year in which the fund reaches $2,500,000 have been collected and deposited in the fund.

(6) The termination of the surcharge on retail sales of herbicides does not:

(a) prevent the department from expending one-half of the annual herbicide surcharge proceeds as provided in this section within or for the fiscal year following the termination of the surcharge;

(b) prevent the department from expending the proceeds as provided in 80-7-814 within or for the fiscal year following the termination of the surcharge;

(c) prevent the deposit of other funds or proceeds authorized by this chapter into the noxious weed management trust fund; or

(d) prevent the department from expending the interest or revenue generated by the trust fund as provided in 80-7-814.

Compiler's Comments

1991 Amendment: Inserted (5) concerning termination of surcharge on retail sales of herbicides upon noxious weed management fund reaching $2,500,000 and establishing cutoff date for depositing fees into fund depending on whether the $2,500,000 is reached before or after December 31, 1993; and inserted (6) concerning termination of surcharge not preventing Department from expending one-half surcharge proceeds as provided in section within or for fiscal year following termination, from expending proceeds as provided in 80-7-814 for fiscal year within or following termination, from expending interest or revenue generated by trust fund, or from depositing other funds or proceeds into noxious weed management trust fund. Amendment effective July 1, 1991.

80-7-813. Acceptance and expenditure of gifts and other funds. The department may accept gifts, grants, contracts, or other funds designated for noxious weed management. Such funds may be expended to support any weed management project or may be deposited in the noxious weed management trust fund.

History: En. Sec. 4, Ch. 577, L. 1985.

80-7-814. Administration and expenditure of funds. (1) Money deposited in the noxious weed management trust fund may not be committed or expended until the principal reaches $2,500,000, except as provided by 80-7-815 in case of a noxious weed emergency. Once this amount is accumulated, any interest or revenue generated by the trust fund and by other funding measures provided by this part must be deposited in the special revenue fund and may be expended for noxious weed management projects in accordance with this section, so long as the principal of the trust fund remains at least $2,500,000.

(2) The department may expend funds under this section through grants or contracts to communities, weed control districts, or other entities it considers appropriate for noxious weed management projects. A project is eligible

to receive funds only if the county in which the project occurs has funded its own weed management program with a levy in an amount not less than 1.6 mills or an equivalent amount from another source or by an amount of not less than $100,000 for first class counties, as defined in 7-1-2111.

(3) The department may expend funds without the restrictions specified in subsection (2) for the following:

(a) employment of a new and innovative noxious weed management project or the development, implementation, or demonstration of any noxious weed management project that may be proposed, implemented, or established by local, state, or national organizations, whether public or private. Such expenditures must be on a cost-share basis with such organizations.

(b) cost-share noxious weed management programs with local weed control districts;

(c) special grants to local weed control districts to eradicate or contain significant noxious weeds newly introduced into the county. These grants may be issued without matching funds from the district.

(d) costs of collecting the surcharge imposed by 80-7-812, not to exceed 3% of the total surcharge proceeds;

(e) administrative expenses incurred by the noxious weed management advisory council;

(f) any project recommended by the noxious weed management advisory council, if the department determines the project will significantly contribute to the management of noxious weeds within the state; and

(g) grants to the agricultural experiment station and the cooperative extension service for crop weed management research, evaluation, and education.

(4) The agricultural experiment station and cooperative extension service shall submit annual reports on current projects and future plans to the noxious weed management advisory council.

(5) In making expenditures under subsections (2) and (3), the department must give preference to weed control districts and community groups.

(6) If the noxious weed management trust fund is terminated by law, the money in the fund must be divided between all counties according to rules adopted by the department for that purpose.

History: En. Sec. 5, Ch. 577, L. 1985; amd. Sec. 3, Ch. 639, L. 1987; amd. Sec. 76, Ch. 83, L. 1989; amd. Sec. 1, Ch. 440, L. 1991.

(2) If such expenditure causes the principal of the trust fund to fall below $2,500,000, it must be replenished by proceeds of the surcharge imposed in 80-7-812 or, if the surcharge has been terminated as provided in 80-7-812(5), by the interest or revenue generated by the trust fund, by the other revenue provided by this part, or by revenue obtained from the fee imposed by 61-3-510, as determined by the department.

Vertebrate pests are defined as jackrabbits, prairie dogs, ground squirrels, pocket gophers, rats, mice, skunks, raccoons, bats, and the following depredatory and nuisance birds: blackbirds, cowbirds, starlings, house sparrows, and feral pigeons, when they are injurious to agriculture, other industries, and the public. (d) in the case of a desiccant, an ingredient which will artificially accelerate the drying of plant tissue.

(2) "Adulterated" applies to a pesticide if its strength of purity falls below the professed standard or quality as expressed on labeling or under which it is sold or if any substance has been substituted wholly or in part for the pesticide or if any valuable constituent of the pesticide has been wholly or in part abstracted.

(b) a statement of the chemical name and common name of each active ingredient, together with the name of each and total percentage of the inert ingredients, if any, in the pesticide. However, subsection (20)(a) of this section applies if the preparation is highly toxic to man, determined as provided in 80-8-105; and if the pesticide contains arsenic in any form, the ingredient statement shall also include a statement of the percentage of total and water-soluble arsenic, each calculated as elemental arsenic.

(21) “Insect” means any of the numerous small invertebrate animals generally having the body more or less obviously segmented, for the most part belonging to the class insecta, comprising six-legged, winged and wingless forms, such as beetles, bugs, wasps, flies, and keds, and to other classes of arthropods whose members are wingless and usually have more than six legs, such as spiders, mites, ticks, centipedes, and wood lice.

Compiler's Comments

1991 Amendment: Inserted definition of waste pesticide. Amendment effective July 1, 1991.

80-8-103. Purpose. The control of pesticides and their use is essential for the protection of man and his environment. Pesticides are currently considered valuable and necessary to provide sufficient quantity of quality foods and for the protection of humans from vectorborne diseases. However, the protection of man and his essential needs—water, air, food, animals, vegetation, pollinating insects, and shelter from pesticides which are potentially dangerous—is in the public interest now and in the future. Therefore, it is deemed necessary to provide for the control of pesticides.

History: **En. Sec. 2, Ch. 403, L. 1971; R.C.M. 1947, 27-214.**

80-8-104. Administration. This chapter shall be administered by the department.

History: **En. Sec. 3, Ch. 403, L. 1971; R.C.M. 1947, 27-215.**

80-8-105. Rules. (1) The department may adopt by reference without a public hearing regulations adopted under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. The department may, after a public hearing, adopt all rules necessary to carry out this chapter.

(2) The rules may prescribe methods of:

(a) registration, suspension or cancellation of registration, application, use or restricting use, prohibiting use, offering or exposing for sale of any pesticide;

(b) determining whether pesticides are highly toxic to man;

(c) determining standards of coloring or discoloring for pesticides and subjecting pesticides to the requirements of 80-8-202;

(d) licensing commercial applicators, operators, and dealers, establishing methods of recordkeeping for applicators, operators, and dealers, and providing for the review of the records by the department's authorized agent and the submission of the records to the department upon written request;

(e) issuing farm applicator special-use permits and the maintenance and submission of records by farm applicators issued special-use permits;

(f) collection, examination, and standard deviation from guarantee analysis and umpire analysis of pesticides and devices;

(g) operating and maintaining equipment used by applicators;

(h) developing examinations which shall be held periodically throughout the state;

(i) establishing the form and content of all applications for licenses and permits;

(j) designating pesticides that may be sold at retail for home, yard, garden, and lawn use. The department may also limit retail sale of pesticides, up to a specific number of pounds or gallons and concentration which would be sublethal to humans and animals if small amounts of it were accidentally swallowed, inhaled, sprayed, or dusted on the skin.

(k) revoking licenses and permits;

(l) registering or controlling any spray adjuvant, such as a wetting agent, spreading agent, deposit builder, adhesive, emulsifying agent, deflocculating agent, water modifier, or similar agent with or without toxic properties of its own intended to be used with any other pesticide as an aid to the application or effect of that other pesticide, whether or not distributed in a package or container separate from that of a pesticide with which it is to be used;

(m) registering pesticide-fertilizer and other chemical blends or, instead of registration, establishing licensing, inspection, and fees for blending plants;

(n) establishing registration procedures for devices, with a fee not to exceed $5 per type of device, specifying classes of devices to be registered and providing for additional requirements;

(o) imposing conditions for renewal of dealer, applicator, and operator licenses and permits, including requalification training;

(p) establishing procedures for implementing and administering the civil penalties under 80-8-306; and

(q) establishing fees for training courses and materials.

(3) (a) Consistent with the provisions of Title 80, chapter 15, whenever the department finds that those rules are necessary to carry out the purposes and intent of this chapter, the rules may relate to the time, place, manner, and method of registration, suspension or cancellation of registration, application, or selling of the pesticides, may restrict or prohibit use of pesticides in the state or in designated areas during specified periods of time, and shall encompass all reasonable factors which the department considers necessary to prevent damage or injury to:

(i) persons, animals, crops, or pollinating insects from the effect of drift or careless application;

(ii) the environment;

(iii) plants, including forage plants;

(iv) wildlife;

(v) fish and other aquatic life.

(b) In issuing the rules, the department shall give consideration to pertinent research findings and recommendations of other agencies of this state or of the federal government.

(4) If the department finds that an emergency exists which requires immediate action with regard to the registration, use, or application of pesticides, the department may, without notice or hearing, issue necessary orders or rules to protect the public health, welfare, and safety. An order or rule issued under this subsection is effective for the period prescribed by the Montana Administrative Procedure Act. If the department determines that the emergency order or rule should remain in effect, a public hearing under 80-8-106 shall be held within the above period to determine whether the order or rule should be adopted by the department.

(5) All rules and orders issued by the department shall be in writing, shall be entered in full in books to be kept by the department for that purpose, shall be indexed, and shall be public records open for inspection at all times during reasonable office hours. Except for orders establishing or changing rules of practice and procedure, all orders made and published by the department shall include and be based upon written findings of fact. A copy of any rule or order certified by the department shall be received in evidence in all courts of this state with the same effect as the original.

80-8-201. Registration. (1) Every pesticide distributed, sold, or offered for sale within this state or delivered for transportation or transported in intrastate commerce or between points within this state shall be registered with the department. The registration shall be renewed annually by the manufacturer, formulator, or distributor of the pesticide. The department shall register all federally approved pesticides, and those registered are subject to registration fees and all other provisions of this chapter. All registrations of pesticides expire on December 31 following the date of issuance unless otherwise terminated.

(2) The applicant for registration shall file with the department a statement including:

(a) the name and address of the applicant and the name and address of the person whose name will appear on the label, if other than the registrant;

(b) a complete copy of the label of the pesticide, the United States environmental protection agency registration number if the pesticide is so registered, and a statement of all claims to be made for it, including directions for use;

(c) the trade and chemical name of the pesticide;

(d) if requested by the department, a full description of tests made and the results upon which the claims are based. In the case of renewal of registration, a statement shall be required only with respect to information which is different from that furnished when the pesticide was registered or last reregistered.

(3) Any pesticide imported into this state which is subject to the provisions of any federal act providing for the registration of pesticides and has been registered under the provisions of a federal act shall be registered in the state. However, the state may restrict the sale or use and application of the pesticide by type of dealer, applicator, time, and place and may establish special registrations of pesticides as outlined in subsection (8) of this section and 80-8-105(3). The annual registration fee must also be paid, and registration information required by the department must be provided.

(4) The applicant shall pay an annual fee of $70 for each pesticide registered. A registration fee is not required to register a federally approved experimental use permit.

(5) The department may require the submission of the complete formula and certified analytical standards of any pesticide. If it appears to the

department that the composition of the article warrants the proposed claims for it and if the article and its labeling and other material required to be submitted comply with the requirements of 80-8-202, it shall register the article.

(6) If it does not appear to the department that the article warrants the proposed claims for it or if the article and its labeling and other material required to be submitted do not comply with this chapter, it shall notify the applicant of the manner in which the article, labeling, or other material required to be submitted fails to comply with the chapter so as to afford the applicant an opportunity to make the necessary corrections. If the applicant does not make the corrections upon receipt of the notice, the department may refuse to register the article. The department may suspend or cancel the registration of a pesticide whenever it does not appear that the article or its labeling comply with this chapter or whenever scientific evidence proves that the article endangers man or the general environment afforded protection under 80-8-105(3)(a). When an application for registration is refused or the department proposes to suspend or cancel a registration, the registrant may pursue administrative remedies under the Montana Administrative Procedure Act and rules of the department.

(7) Registration is not required in the case of a pesticide shipped from one plant in this state to another plant in this state by the same person.

(8) (a) The departments of health and environmental sciences, agriculture, and fish, wildlife, and parks shall review all applications for registration of an experimental-use permit or a registration for special local needs. The applicant shall pay a one-time fee of $70 for a special local need or experimental-use permit registration. The departments shall utilize the same requirements and standards for reviewing registrations established by the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, and regulations adopted thereunder. The department of agriculture shall provide the departments of health and environmental sciences and fish, wildlife, and parks with a complete copy of the application, related correspondence, and a statement of the department of agriculture's proposed action on the application. The departments of health and environmental sciences and fish, wildlife, and parks shall approve or disapprove the application within 10 days after the receipt of the application. If the departments of health and environmental sciences, agriculture, and fish, wildlife, and parks are in agreement with the proposed registration, the department of agriculture shall issue the registration.

(b) The department of agriculture shall establish a time and place for an interagency conference for the purposes of resolving the registration of any pesticide or device. If two of the departments approve the proposed registration, the department of agriculture shall issue the registration.

(c) The registrant applying for registration shall be notified as to proposed changes in registration. If the departments cannot resolve the proposed registration following the interagency conference, the registrant may request a joint administrative hearing before the departments of agriculture, health and environmental sciences, and fish, wildlife, and parks.

(d) Following the interagency conference and, if requested, the administrative hearing, if the proposed registration of a pesticide or device has not been resolved, the department of agriculture shall appoint an advisory council as outlined in 80-8-108 to resolve by majority vote the registration of any pesticide. The advisory council's recommendations on the registration shall be accepted by the departments and implemented by the department of agriculture.

(9) Pesticides registered under any federal law when canceled for sale and use in total or in part by a federal agency responsible for registration are considered canceled in total or in part for sale and use in Montana. The cancellation is effective on the final date of sale or use allowed under the federal law and rules or orders of the federal agency. If the federal cancellation allows existing stock to be used past the final date of cancellation, such sale or use in this state may not exceed 2 years. The department shall provide technical assistance to any person in possession of such products to insure their proper disposal, relabeling, or removal.

(a) any pesticide which has not been registered pursuant to the provisions of 80-8-201 or any pesticide if any of the claims made for it or any of the directions for its use differ in substance from the representations made in connection with its registration or if the composition of a pesticide differs from its composition as represented in connection with its registration or if registration or reregistration has been refused, revoked, canceled, or suspended. The department of agriculture may allow a change in the labeling or formula of a pesticide within a registration period without requiring reregistration of the product when such change does not adversely affect the product for its intended use and if proper application therefor is made.

(b) any pesticide unless it is in the registrant's or the manufacturer's unbroken immediate container and there is affixed to such container and to the outside container or wrapper of the retail package, if there be one, through which the required information on the immediate container cannot be clearly read, a label bearing:

(i) the name and address of the manufacturer, registrant, or person for whom manufactured;

(ii) the trade and chemical name, brand, or trademark under which said article is sold;

(iii) the net weight or measure of the content, subject to such reasonable variations as the department may permit;

(c) any pesticide which contains any substance or substances in quantities highly toxic to man, determined as provided in 80-8-105, unless the label shall bear, in addition to any other matter required by this chapter:

(i) the skull and crossbones;

(ii) the word "poison" prominently in red on a background of distinctly contrasting color;

(iii) a statement of an antidote for the pesticide;

(d) the pesticides commonly known as standard lead arsenate, basic lead arsenate, calcium arsenate, magnesium arsenate, zinc arsenate, zinc arsenite, sodium fluoride, sodium fluosilicate, and barium fluosilicate unless they have been distinctly colored or discolored, as provided by regulations issued in accordance with this chapter, or any other white powder pesticide which the department, after investigation of and after public hearing on the necessity for such action for the protection of the public health and the environment and the feasibility of such coloration or discoloration, shall by regulations require to be distinctly colored or discolored, unless it has been so colored or discolored. The department may exempt any pesticide to the extent that it is intended for a particular use from the coloring or discoloring required or authorized by this section if it determines that such coloring or discoloring for such use is not necessary for the protection of the public health and the environment.

(e) any pesticide which is adulterated or misbranded, or any device which is misbranded.

(2) It is unlawful for any person to:

(a) detach, alter, deface, or destroy, in whole or in part, any label or labeling provided for in this chapter or rules promulgated hereunder or to add any substance to or take any substance from a pesticide in a manner that may defeat the purpose of this chapter;

Pesticide fieldmen or salesmen employed directly out of the same location or outlet and under a licensed dealer shall not be required to obtain a license. The dealer shall furnish the department the names and addresses of its fieldmen and salesmen selling pesticides within the state.

(2) The application for a license shall be accompanied by a fee of $45. Dealers applying for renewal of license shall do so on or before March 1 of that calendar year. Any dealer applying for renewal of license after March 1 shall be assessed a $25 late licensing fee.

The fee for the permit is $15. The special-use permit shall be effective for 5 calendar years. The department may establish a staggered years system of issuing permits.

(2) Restricted pesticides may not be utilized by farm applicators or their employees except for the purpose of producing or protecting any agricultural commodity on property owned, leased, or rented by such applicator.

(3) Farm applicators shall qualify for their first permit by either passing a graded written examination or attending a training course approved by the department and taking an ungraded written examination. The examinations and course shall require and demonstrate practical knowledge of the applicator's ability to:

(a) recognize common pests to be controlled and damage caused by them;

(b) read and understand the label and labeling information, including the common name of the pesticide(s) applied, pest(s) to be controlled, timing and methods of application, safety precautions, any preharvest or reentry restrictions, and any specific disposal procedures;

(c) apply pesticides in accordance with label instructions and warnings, including the ability to prepare the proper concentration of pesticides to be used under particular circumstances, taking into account such factors as area to be covered, speed at which application equipment will be driven, and the quantity dispersed in a given period of operation;

(d) recognize local environmental situations that must be considered during application to avoid contamination; and

(e) recognize poisoning symptoms and procedures to follow in case of a pesticide accident.

(4) The department may require farm applicators to attend a mandatory training session and pass a written examination for those restricted pesticides that are extremely toxic or for which an effective antidote is not available. The department may require farm applicators handling these pesticides to maintain use records.

(5) The department shall require farm applicators to requalify for renewal of the 5-year permit by attending a program consisting of 6 hours of training. The department shall establish by rule a uniform system of administering the requalification training program. The department may refuse to grant, renew, or may revoke or modify a license or permit, as the case may require, when the department is satisfied that the licensee or holder of a permit is not qualified to sell, use, or apply pesticides under the conditions in the locality in which he operates or has operated or that he has committed any of the following acts, each of which is declared to be a violation of this chapter:

(a) made false or fraudulent claims or recommendations through any media misrepresenting the effect of materials or methods to be utilized;

Only pesticides so designated may be sold at retail. The department may also limit the retail sale of such designated pesticides to quantities up to a specific number of pounds or gallons and of such concentrations as would be sublethal to humans and animals if small amounts thereof were accidentally swallowed, inhaled, sprayed, or dusted on the skin.

(2) Subject to the availability of funds, the department and the Montana state university extension service shall enter into a cooperative agreement to establish an education program for retailers and the general public on pests, pesticides, and alternative control methods.

(2) The department shall issue a limited commercial applicator's or dealer's license for an annual fee of $50, which shall be valid only when such applicator or dealer is applying or selling pesticides for such agencies, provided that the jurisdictional health officer, state veterinarian, their duly authorized representatives, or governmental research personnel are exempt from this licensing requirement when applying pesticides to experimental areas.

(3) A governmental agency shall pay the annual applicator's fee for its first four employee applicators. The agency shall pay an annual fee of $5 for each additional employee applicator.

Enforcement and Penalties

80-8-301. Report of loss or damage — effect of failure to report. (1) A person suffering loss or damage resulting from the use or application of any pesticide by any person shall, within 30 days from the time the occurrence of the loss became known to him, file with the department of agriculture a verified report of loss setting forth, so far as known to the claimant, the following:

(a) name and address of claimant;

(b) type, kind, and location of property alleged to be injured or damaged;

(c) date the alleged injury or damage occurred;

(d) name of person applying the pesticide and allegedly responsible for the loss or damage;

(e) name of the owner or occupant of the property for whom such pesticide application was made.

(2) The filing of such a report or the failure to file such a report shall not be alleged in any complaint which might be filed in a court of law, and the failure to file shall not of itself be considered any bar to the maintenance of any criminal or civil action.

(3) The failure to file such a report shall not be a violation of this chapter. However, if the person failing to file such report is the only one injured from such use or application of a pesticide by any person, the department may refuse to hold a hearing for the denial, suspension, or revocation of a license issued under this chapter until such report is filed. The filing of such report shall not constitute institution of a civil or criminal suit in any court, state or federal.

The department is authorized with a warrant or the consent of the inhabitant or owner to enter upon any public or private premises including any vehicle of transport in order to have access to pesticides or devices and to records relating to their distribution.

(2) The methods of sampling and analysis shall be those adopted by the department from sources such as the Journal of the Association of Official Analytical Chemists.

(3) In all administrative or legal actions involving the composition, identification, or quantification of a pesticide, a certified copy of the official analysis signed by the department's authorized chemist shall be accepted as prima facie evidence of the determinations set forth therein.

80-8-303. Embargo. (1) Whenever a duly authorized agent of the department of agriculture finds or has probable cause to believe that any pesticide or device is adulterated or misbranded, has not been registered under the provisions of 80-8-201(5), fails to bear on its label the information required by this chapter, or is a white powder pesticide and is not colored as required under this chapter, he shall affix to such article a tag or other appropriate marking giving notice thereof and stating that the article has been detained or embargoed and warning all persons not to remove or dispose of such article by sale or otherwise until permission for removal or disposal is given by such agent or the court. Any person who removes or disposes of such detained or embargoed article by sale or otherwise, without prior permission, or removes or alters the tag or marking, is guilty of a misdemeanor and may be charged accordingly or may be subjected to appropriate administrative proceedings, or both.

(2) When an article detained or embargoed under subsection (1) has been found by such agent to be in violation, if after 30 days the violation has not been resolved, he may petition the district court in whose jurisdiction the article is detained or embargoed for a condemnation of such article. When such agent has found that an article so detained or embargoed is not adulterated or misbranded, he shall remove the tag or other marking.

(3) If the court finds that a detained or embargoed article is in violation of this chapter or rules adopted thereunder, such article shall after entry of the decree be destroyed at the expense of the claimant thereof, under the supervision of such agent, and all court costs and fees and storage and other proper expenses shall be assessed against the claimant of such pesticide or device or his agent, provided that when the adulteration or misbranding can be corrected by proper labeling or processing of the article, the court, after entry of the decree and after such costs, fees, and expenses have been paid and a good and sufficient bond has been executed, conditioned upon the proper labeling or processing of such pesticide or device, may by order direct that such article be delivered to the claimant thereof for such labeling or processing under the supervision of an agent of the department. The expense of such supervision shall be paid by claimant. The article shall be returned to the claimant of the pesticide or device on the representation to the court by the department that the article is no longer in violation of this chapter and that the expenses of such supervision have been paid.

80-8-304. Investigation and enforcement authority. (1) In enforcing this chapter, the department or its duly authorized agents, upon reasonable cause, may enter upon private and public premises and property with a warrant or consent of the inhabitant or owner to inspect or investigate at reasonable times:

(a) equipment used for applying pesticides;

(b) actual or reported adverse effects caused by pesticides in humans, crops, animals, land, or other property;

(c) records on the selling or use of pesticides and the person's stock of pesticides;

(d) storage and disposal of pesticides by any person;

(e) pesticides being applied or to be applied and to sample the pesticides;

(f) the use and application of a pesticide; or

(g) the environment alleged to have been exposed to pesticides and to collect and analyze environmental samples.

(2) The department is authorized to investigate all incidents involving the application, introduction, or utilization of registered pesticides or compounds capable of acting in the manner of pesticides when the incidents have a reasonable potential to adversely affect the public environment or persons other than the applicator.

(3) The investigation authority provided for in this section may be exercised over persons not possessing a required license or permit only upon receipt of a complaint or report of an incident.

History: En. Sec. 31, Ch. 403, L. 1971; amd. Sec. 16, Ch. 462, L. 1977; R.C.M. 1947, 27-243; amd. Sec. 8, Ch. 184, L. 1981.

80-8-305. General violations — compliance orders. (1) Consistent with the provisions of Title 80, chapter 15, it is unlawful for any person:

(a) to discard any pesticide or pesticide container in such a manner as to cause injury to humans, domestic animals, or wildlife, or to pollute any waterway in a way harmful to any wildlife therein or to the environment;

(b) to handle, transport, store, display, or distribute pesticides or pesticide containers in such a manner as to endanger man or the environment or to endanger food or any other products that may be transported, stored, displayed, or distributed with such pesticides;

(c) to handle, apply, or attempt to apply any registered pesticide for which he does not have an appropriate, complete, or legible label at hand;

(d) to apply or attempt to apply any registered pesticide in a manner inconsistent with the label, as defined in 80-8-102; or

(e) to use any unregistered chemical or biological agent that is required to be registered as a pesticide by the Montana Pesticides Act.

(2) It is unlawful for any person to manufacture, formulate, or store any registered pesticide or component or byproduct thereof in such a manner that the pesticide or any component or byproduct cannot be contained or confined within the boundaries of the lands owned by or under the appropriate control of the person involved. Odor is specifically exempted from the provisions of this subsection.

(3) The department may issue a compliance order to any person violating the provisions of this section, 80-8-211, or any other requirement established pursuant to this chapter. The compliance order may be issued to any person, including the person's employees, agents, or subcontractors.

(4) A compliance order may require the cleanup of any pesticide that a person has accidentally or purposely dumped, spilled, misused, or unlawfully used in violation of this section. The department shall allow the recipient of

a compliance order to spread, treat, or dispose of soils contaminated by a pesticide if the person can document and prove to the satisfaction of the department that the soil will be beneficially used or that the pesticide in the soil will physically, chemically, or biologically degrade and that neither the beneficial use of the soil nor degradation of the pesticide in the soil will adversely affect agriculture, human health, or the environment. Prior to issuing a compliance order requiring cleanup of a pesticide, the department shall consult with the department of health and environmental sciences to ensure that the provisions of Title 75, chapter 10, part 4, are considered. If a pesticide or soil contaminated by a pesticide is subject to the provisions of Title 75, chapter 10, part 4, and there is no beneficial use of the soil as determined by the department, the department of health and environmental sciences is responsible for regulating the cleanup and disposal of the pesticide and the soil contaminated by the pesticide. The department may not allow a person to spread, treat, or dispose of soils contaminated by a canceled or suspended pesticide without the specific approval of the department of health and environmental sciences or the U.S. environmental protection agency, or both, as required on a case-by-case basis.

(5) When issuing a compliance order, the department may require a person who has violated a provision of this chapter to conduct monitoring to assist in determining the presence or level of concentration of pesticides in the environment and the effectiveness of cleanup efforts. The department shall specify criteria in the compliance order for determining the duration of monitoring.

(6) A compliance order must specify the requirement of this chapter that has been violated and establish a time schedule for compliance. In establishing a time schedule for compliance, the department shall take into account the seriousness of the violation and any good faith efforts that the person has made to comply with the requirement that has been violated. A compliance order issued under this section must be served either by a person qualified to perform service under the Montana Rules of Civil Procedure or by certified mail.

Compiler's Comments

1991 Amendment: Inserted (3) concerning Department issuing compliance order to any person, employee, agent, or subcontractor violating requirements of chapter; inserted (4) concerning compliance order requiring violator to clean up and dispose of contaminated soil, requiring Department of Health and Environmental Sciences to regulate cleanup and disposal, and requiring on a case-by-case basis approval by Department of Health and Environmental Sciences or U.S. Environmental Protection Agency, or both, of disposal of soils contaminated by a canceled or suspended pesticide; inserted (5) concerning Department requiring violator to conduct monitoring of presence or level of concentration of pesticides; and inserted (6) concerning compliance order specifying violation and setting time schedule for compliance and concerning service of compliance order. Amendment effective July 1, 1991.

80-8-306. Penalties. (1) Any person convicted of violating any of the provisions of this chapter or the rules issued thereunder or who may misrepresent, impede, obstruct, hinder, or otherwise prevent or attempt to prevent the department or its duly authorized agent in performance of its duty in connection with the provisions of this chapter shall be adjudged guilty of a misdemeanor and shall be fined not less than $100 but not more than $1,500.

(2) The department or its authorized representative is hereby authorized to apply to the district court of the county or any county wherein a violation is about to occur or has occurred to grant a temporary or permanent injunction restraining any person from violating or continuing to violate any of the provisions of this chapter or any rule promulgated under the chapter notwithstanding the existence of other remedies of law. When a person makes pesticide applications in more than one county on a commercial basis without a license or permit or operates in violation of a lawful written order of the department in more than one county, the district court of Lewis and Clark County has concurrent jurisdiction with the district court of any other county wherein a violation has occurred or is about to occur, and the department may select and proceed in the court most appropriate under the circumstances. The injunction is to be issued without bond.

(3) Nothing in this chapter is to be construed as requiring the department or its authorized agent to report minor violations of the chapter for prosecution or for the institution of seizure proceedings when it believes the public interest will be best served by other remedial action, by a suitable notice of warning in writing, or by a lawful written order; nor is any part of this chapter to be construed to apply to common carriers transporting shipments tendered to them by the general public.

(4) Any person who with intent to defraud uses or reveals information relative to formulas of products acquired under the authority of 80-8-201 shall, upon conviction, be fined not more than $500 or imprisoned for not more than 1 year, or both.

(5) (a) Any registrant, applicator, dealer, retailer, or other person who commits a major violation of this chapter as defined in subsection (5)(d) may be assessed a civil penalty by the department of not more than $1,000 for each offense. However, farm applicators possessing a permit may not be assessed a civil penalty over $200 for the first offense. Assessment of a civil penalty may be made in conjunction with any other department warning, order, or administrative action authorized by this chapter.

(b) No civil penalty may be assessed unless the person charged was given notice and opportunity for a hearing pursuant to the Montana Administrative Procedure Act.

(c) In determining an appropriate penalty, the department shall consider the effect on the person's ability to continue in business, the gravity of the violation which occurred, the degree of care exercised by the offender, and whether significant harm resulted to health, environment, agricultural crops, or livestock.

(d) A major violation of this chapter includes:

(i) misuse of a pesticide which results in proven harm to human health, the environment, or agricultural crops or livestock;

(ii) selling of a restricted pesticide to a person not certified or authorized to purchase such pesticides;

(iii) use or sale of unregistered pesticides;

(iv) failure to maintain any individual pesticide application and sales records;

(v) using or selling pesticides without having obtained the required license or permit; or

(vi) reoccurrence of any identical violation of this chapter within the same calendar year.

(e) If the department is unable to collect such civil penalty or if any person fails to pay all or a set portion of the civil penalty as determined by the department, it may recover such amount by action in the appropriate district court.

(6) Any person against whom the department has assessed a civil penalty under this section may, within 30 days of the final agency action making the assessment, appeal the assessment to the district court of the county in which the violation is alleged by the department to have occurred. Appeal is by trial de novo, and a jury trial must be granted if requested. Where the provisions of this subsection conflict with 2-4-702 through 2-4-704, the provisions of this subsection govern.

(1) The department may adopt those rules for commercial feeds and pet foods which are specifically authorized in this chapter and those other reasonable rules necessary for the efficient enforcement of this chapter. Unless it determines that they are inconsistent with this chapter or are not appropriate to conditions which exist in this state, the department, in the interest of uniformity, shall adopt:

(a) the official definitions of feed ingredients and official feed terms adopted by the association of American feed control officials and published in the official publication of that organization; and

(b) any rules adopted under the Federal Food, Drug, and Cosmetic Act as long as the department has the authority under this chapter to adopt that rule.

Part 2

Production and Distribution

80-9-201. Permits and registration. (1) (a) No person may manufacture for distribution or distribute a commercial feed in this state unless he has obtained a permit by filing with the department, on forms provided by the department, his name, place of business, and location of manufacturing facility, distribution point, or point of invoicing. All new applicants or those failing to renew a permit by January 1 of each year shall pay a nonrefundable fee of $25 per calendar year for each facility, distribution point, or point of invoicing. A permit will remain in force until the end of the calendar year for which it is issued or until canceled by the permit holder or canceled for cause by the department. No refund may be made at the time of cancellation. No transfer of permits will be made. A distributor who distributes only pet foods or specialty pet foods is exempt from this provision.

(b) Feed permit renewals received by the department prior to January 1 of each year must be accompanied by a nonrefundable renewal fee of $25 for each permit.

(2) (a) No person may distribute in this state a commercial feed, except a custom-mixed feed, which has not been registered under this section by the manufacturer. The application for registration must be accompanied by a nonrefundable fee of $6.50 for each product other than a pet food or specialty pet food and a nonrefundable fee of $25 for each pet food or specialty pet food.

(b) The registration of commercial feeds and specialty pet food is for a period of 1 year commencing October 1 and ending September 30 of each year.

(3) An applicant for registration shall file with the department the following information:

(a) his name and address;

(b) a complete copy of the label or label facsimile that will appear on the product;

(c) when requested by the department, promotional material and claims made about the product; and

(d) any other necessary information requested by the department.

(4) The department may refuse registration of any commercial feed not in compliance with this chapter and may cancel any registration subsequently found not to be in compliance with this chapter. No registration may be refused or canceled unless the registrant has been given an opportunity to be heard before the department and to amend his application in order to comply with this chapter.

History: En. Sec. 3, Ch. 356, L. 1973; R.C.M. 1947, 3-2027; amd. Sec. 1, Ch. 36, L. 1985; amd. Sec. 1, Ch. 38, L. 1989.

80-9-202. Labeling. (1) A commercial feed, except a custom-mixed feed, shall be accompanied by a label containing:

(a) the net weight;

(b) the product name and any brand name under which the commercial feed is distributed;

(c) the guaranteed analysis stated in terms the department by rule determines are required to advise the user of the composition of the feed or to support claims made in the labeling. The substances or elements guaranteed must be determinable by laboratory methods such as the methods published by the association of official analytical chemists.

(d) the common or usual name of each ingredient used in the manufacture of the commercial feed. The department by rule may permit the use of a collective term for a group of ingredients which perform a similar function or it may exempt commercial feeds or any group of them from this requirement of an ingredient statement if it finds that the statement is not required in the interest of consumers.

(e) the name and principal mailing address of the manufacturer or the person responsible for distributing the commercial feed;

(f) adequate directions for use for all commercial feeds containing drugs. The department may by rule require directions for the use of other commercial feeds when necessary for their safe and effective use.

(g) precautionary statements which the department by rule determines are necessary for safe and effective use of the commercial feed.

(2) A custom-mixed feed shall be accompanied by a label, invoice, delivery slip, or other shipping document containing:

(a) the name and address of the manufacturer;

(b) the name and address of the purchaser;

(c) the date of delivery;

(d) the specific agreed to composition of the feed or a list of the ingredients, but not necessarily the percentage of each ingredient;

(e) adequate directions for use for all custom-mixed feed containing drugs. The department may by rule require directions for the use of other custom-mixed feeds when necessary for their safe and effective use.

(f) precautionary statements which the department by rule determines are necessary for safe and effective use of the custom-mixed feeds.

History: En. Sec. 4, Ch. 356, L. 1973; R.C.M. 1947, 3-2028.

80-9-203. Misbranded feed. A commercial feed is misbranded if:

(1) its labeling is false or misleading in any particular;

(2) it is distributed under the name of another commercial feed;

(3) it is not labeled as required in 80-9-202;

(4) it purports to be or is represented as containing a commercial feed ingredient, unless the commercial feed or feed ingredient conforms to any definition prescribed by rule of the department;

(5) any word, statement, or other information required by this chapter to appear on the label is not prominently placed there with a conspicuousness (as compared with other words, statements, designs, or devices in the labeling) and in terms which render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use.

History: En. Sec. 5, Ch. 356, L. 1973; R.C.M. 1947, 3-2029.

80-9-204. Adulterated feed. A commercial feed is adulterated if:

(1) it contains any poisonous or deleterious substance which may render it injurious to health. However, if the substance is not an added substance, the commercial feed shall not be considered adulterated under this subsection if the quantity of the substance in the commercial feed does not ordinarily render it injurious to health.

(2) it contains any added poisonous, deleterious, or nonnutritive substance which is unsafe within the meaning of section 406 of the Federal Food, Drug, and Cosmetic Act (other than one which is a pesticide chemical in or on a raw agricultural commodity or a food additive);

(3) it is or it contains any food additive which is unsafe within the meaning of section 409 of the Federal Food, Drug, and Cosmetic Act;

(4) it is a raw agricultural commodity and it contains a pesticide chemical which is unsafe within the meaning of section 408(a) of the Federal Food, Drug, and Cosmetic Act. However, where a pesticide chemical has been used in or on a raw agricultural commodity in conformity with an exemption granted or a tolerance prescribed under section 408 of the Federal Food, Drug, and Cosmetic Act and that agricultural commodity has been processed by canning, cooking, freezing, dehydrating, or milling, the residue of the pesticide chemical remaining in or on the processed feed shall not be deemed unsafe if such residue in or on the raw agricultural commodity has been removed to the extent possible in good manufacturing practice and the concentration of the residue in the processed feed is not greater than the tolerance prescribed for the raw agricultural commodity, unless the feeding of the processed feed is likely to result in the pesticide residue in the edible product of the animal, which is unsafe within the meaning of section 408(a) of the Federal Food, Drug, and Cosmetic Act;

(5) it is or contains any color additive which is unsafe within the meaning of section 706 of the Federal Food, Drug, and Cosmetic Act;

(6) any valuable constituents have been in whole or in part omitted or abstracted therefrom or any less valuable substance substituted therefor;

(7) its composition or quality falls below or differs from that stated on its label;

(8) it contains a drug and the methods used in or the facilities or controls used for its manufacture, processing, or packaging do not conform to current good manufacturing practice rules adopted by the department to assure that the drug meets the requirement of this chapter as to safety and has the identity and strength and meets the quality and purity characteristics which it is represented to possess. In formulating these rules, the department shall adopt the current good manufacturing practice regulations for medicated feed premixes and for medicated feeds established under the Federal Food, Drug, and Cosmetic Act unless it determines that they are not appropriate to the conditions which exist in this state;

(9) it contains viable weed seeds in amounts exceeding the limits which the department established by rule.

History: En. Sec. 6, Ch. 356, L. 1973; R.C.M. 1947, 3-2030.

80-9-205. Prohibitions. No person may:

(1) manufacture or distribute any commercial feed that is adulterated or misbranded;

(2) adulterate or misbrand a commercial feed;

(3) distribute agricultural commodities such as whole seed, hay, straw, stover, silage, cobs, husks, and hulls which are adulterated within the meaning of subsections (1) through (5) of 80-9-204;

(4) remove or dispose of a commercial feed in violation of an order under 80-9-302;

(5) fail to register or obtain a permit in accordance with 80-9-201;

(6) violate 80-9-304;

(7) fail to pay inspection fees and file reports as required by 80-9-206.

History: En. Sec. 7, Ch. 356, L. 1973; R.C.M. 1947, 3-2031.

80-9-206. Inspection fees — filing of annual statement. (1) An inspection fee must be paid on all commercial feeds, including custom-mix feeds, except pet foods and specialty pet foods, distributed in this state as follows:

(a) The inspection fee must be set by rule on a cents-per-ton basis, except that the first 10 tons are exempt. The department may adjust the fee by rule to adequately fund the administration of this chapter. Adjustments may be made only after holding a public hearing on the proposed changes as required in 80-9-103 and must remain within the limits of 5 cents to 25 cents per ton. The effective date of any rule adjusting fees is January 1 of the calendar year following the issuance of the rule. All permit holders are to be notified immediately of any changes in fees.

(b) The feed manufacturer has primary responsibility for paying inspection fees. However, the distributor is responsible for inspection fees if the manufacturer has not paid them.

(c) Inspection fees must be paid on each commercial feed, including custom-mix feeds and feed ingredients that are defined as commercial feeds even though they are used in the manufacture of other commercial feeds. However, premixes prepared and used within a feed plant are exempt but not premixes or ingredients transferred from one plant to another even within the same organization.

(d) A person producing a commercial feed with a feed mixing plant at a feed lot or a poultry, swine, or dairy operation may not be required to pay inspection fees on the commercial feeds produced and used in his feeding operation at the site, but he is responsible for any unpaid inspection fees on commercial feed purchased by him and on any commercial feed he produces and distributes other than in his feeding operations at the site.

(2) Each person who holds a permit as required in 80-9-201(1) shall:

(a) file, not later than January 31 of each year, an annual statement setting forth the number of tons of commercial feeds distributed in this state during the preceding calendar year (January 1 through December 31) and upon filing the statement shall pay the inspection fee at the rate stated in subsection (1). Inspection fees that have not been remitted to the department on or before January 31 have a penalty fee of 10% with a minimum of $10 added to the amount due. The assessment of this penalty fee does not prevent the department from taking other action as provided in this chapter.

(b) keep those records that are necessary or are required by the department to indicate accurately the tonnage of commercial feed distributed in this state. The department may examine the records to verify statements of tonnage.

(c) make accurate and prompt reports as required. Failure to do so is sufficient cause for the department to cancel or refuse to reissue a permit.

1991 Amendment: In (2)(a), before "before January 31", inserted "on or"; and made minor changes in style.

80-9-207. Deposit of fees. (1) All fees collected for permits, registration, and inspection shall be deposited in the state treasury to the credit of the state special revenue fund for the purpose of administering this chapter, including the cost of equipment and facilities and the cost of inspecting, analyzing, and examining commercial feeds manufactured or distributed in this state and the cost of developing better analytical methods and means of evaluating the value or the potential toxic qualities of a feed.

(2) The department may direct the board of investments to invest funds from the state special revenue fund pursuant to the provisions of the unified investment program for state funds. The income from such investments shall be credited to the proper department account in the state special revenue fund.

History: En. Sec. 9, Ch. 356, L. 1973; amd. Sec. 5, Ch. 16, L. 1977; R.C.M. 1947, 3-2033; amd. Sec. 1, Ch. 277, L. 1983.

Enforcement and Penalties

80-9-301. Enforcement — inspection — notice — sampling and analysis. (1) To enforce this chapter, the department upon presenting appropriate credentials and a written notice to the owner, operator, or agent in charge may enter, during normal business hours, any factory, warehouse, or establishment within the state in which commercial feeds are manufactured, processed, packed, or held or enter any vehicle being used to transport or hold commercial feeds. The department may inspect at reasonable times and within reasonable limits and in reasonable manner any factory, warehouse, establishment, or vehicle and all pertinent equipment, finished and unfinished materials, containers, and labeling found in them. The inspection may include the verification of only those records and production and control procedures necessary to determine compliance with the good manufacturing practice rules adopted under 80-9-204(8).

(2) A separate notice shall be given for each inspection, but a notice is not required for each entry made during the period covered by the inspection. Each inspection shall be commenced and completed with reasonable promptness. Upon completion of the inspection, the person in charge of the facility or vehicle shall be so notified.

(3) If the officer or employee making the inspection of a factory, warehouse, or other establishment has obtained a sample in the course of the inspection, upon completion of the inspection and prior to leaving the

premises, he shall give the owner, operator, or agent in charge a receipt describing the sample obtained.

(4) If the owner of a factory, warehouse, or establishment described in subsection (1) or his agent refuses to allow an inspection, the department may obtain from the district court a warrant directing the owner or his agent to allow inspection of the premises described in the warrant.

(5) To enforce this chapter the department may enter upon any public or private premises, including any vehicle of transport, during regular business hours to obtain samples and examine records relating to distribution of commercial feeds.

(6) Sampling and analysis shall be conducted in accordance with methods published by the association of official analytical chemists or with other generally recognized methods.

(7) The results of all analyses of official samples shall be forwarded by the department to the person named on the label and to the purchaser. When the inspection and analysis of an official sample indicates a commercial feed has been adulterated or misbranded, the department shall upon request within 30 days following receipt of the analysis furnish the registrant a portion of the sample.

(8) The department, in determining for administrative purposes whether a commercial feed is deficient in any component, shall be guided by the official sample as defined in 80-9-101(12) and obtained and analyzed as provided for in subsections (3), (5), and (6) of this section.

(9) All chemical analyses shall be performed cooperatively by the department and the agricultural experiment station at Montana state university.

History: En. Sec. 11, Ch. 356, L. 1973; R.C.M. 1947, 3-2035.

80-9-302. Enforcement — embargo order — condemnation. (1) When the department has reasonable cause to believe any lot of commercial feed is in violation of this chapter or a rule adopted by the department, it may issue and enforce a written or printed embargo order requiring the person holding the commercial feed not to dispose of it in any manner until written permission is given by the department or the court. The department shall release the feed when this chapter and the rules of the department have been complied with. If compliance is not obtained within 30 days, the department may begin or, upon the request of the registrant or the person holding the commercial feed, shall begin proceedings for condemnation.

(2) Commercial feed not in compliance with this chapter or the rules of the department may be seized on complaint of the department to a district court in the area in which the commercial feed is located. If the court finds the commercial feed in violation of this chapter and orders its condemnation, it shall be disposed of in any manner consistent with the quality of the commercial feed and state law. The disposition of the commercial feed may not be ordered by the court without first giving the owner or person from whom the feed was seized an opportunity to apply to the court for release of the commercial feed or for permission to process or relabel the commercial feed to bring it into compliance with this chapter.

History: En. Sec. 12, Ch. 356, L. 1973; R.C.M. 1947, 3-2036.

80-9-303. Violation — penalty — injunction — appeal. (1) A person who violates this chapter or who obstructs, prevents, or attempts to obstruct or prevent the department in the performance of its duty under this chapter is guilty of a misdemeanor and shall be fined not less than $100 or more than $300 for the first violation and not less than $500 or more than $1,000 for a subsequent violation.

(2) Nothing in this chapter requires the department to prosecute, begin seizure proceedings, or issue an embargo order as a result of minor violations or when it believes the public interest will best be served by suitable notice of warning in writing.

(3) A county attorney to whom a violation is reported shall prosecute in a court of competent jurisdiction without delay. Before the department reports a violation for prosecution, an opportunity shall be given the distributor to present his view to the department.

(4) The department may apply for and the court may grant a temporary or permanent injunction restraining any person from violating this chapter or any rule adopted under this chapter notwithstanding the existence of other remedies at law. The injunction shall be issued without bond.

(5) Any person adversely affected by an act, order, or ruling made pursuant to the provisions of this chapter may within 30 days seek judicial review in the district court where the person resides or has his place of business.

80-9-304. Disclosure of information prohibited. A person who uses to his own advantage or reveals to persons other than officers of the department or to the courts when relevant in a judicial proceeding any information acquired under this chapter concerning any method, records, formulations, or processes which as a trade secret is entitled to protection is guilty of a misdemeanor and shall be fined not more than $300 or imprisoned for not more than 1 year, or both. However, the department may exchange information of a regulatory nature with the proper officials of the United States government or of other states who are similarly prohibited by law from revealing that information.

Part 1

General Provisions

80-10-101. Definitions. As used in this chapter, the following definitions apply:

(1) "Brand" means a term, design, or trademark used in connection with one or several grades of commercial fertilizer.

(2) "Commercial fertilizer" includes any substance containing one or more recognized plant nutrients which is used for its plant nutrient content and which is designed for use or claimed to have value in promoting plant growth, yield, or quality of the crop.

(a) "Bulk fertilizer" is commercial fertilizer (dry or liquid) distributed in nonpackage form or in containers of greater than 1,000 pounds.

(b) "Fertilizer materials" is a commercial fertilizer which either:

(i) contains important quantities of not more than one of the primary plant nutrients (nitrogen, phosphoric acid, and potash);

(ii) has approximately 85% of its plant nutrient content present in the form of a single chemical compound; or

(iii) is derived from a plant or animal residue or byproduct or a natural material deposit which has been processed in such a way that its content of primary plant nutrients has not been materially changed except by purification and concentration.

(c) "Mixed fertilizers" is a commercial fertilizer (dry or liquid) containing any combination or mixture of fertilizer materials.

(d) "Packaged fertilizer" is commercial fertilizer (dry or liquid) distributed in sealed containers of 1,000 pounds or less.

(e) "Specialty fertilizer" is a commercial fertilizer (dry or liquid) distributed primarily for nonfarm use, such as home gardens, lawns, shrubbery, flowers, golf courses, municipal parks, cemeteries, greenhouses, and nurseries and includes commercial fertilizers used for research or experimental purposes.

(3) "Distribute" means to offer for sale, sell, barter, or otherwise supply commercial fertilizers.

(4) "Distributor" means any person who distributes.

(5) "Grade" means the percentages of total nitrogen, available phosphorus or phosphoric acid, and soluble potassium or soluble potash stated in whole numbers in the same terms, order, and percentages as in the guaranteed analysis. However, fertilizer materials, bone meal, manures, and similar raw materials may be guaranteed in fractional units.

(6) "Licensee" means any person who has obtained a license from the department so he may legally distribute commercial fertilizer other than specialty fertilizers or soil amendment in this state.

(7) "Manipulated manures" means substances composed primarily of excreta, plant remains, or mixtures of such substances which have been processed in any manner, including the addition of plant nutrients, drying, grinding, and other means.

(8) "Manufacture" means the formulation, mixing, blending, or further processing of commercial fertilizers or soil amendments.

(9) "Manufacturer" is a person who manufactures commercial fertilizer or soil amendments.

(10) "Official sample" means any sample of commercial fertilizer taken by the department and so designated by the department.

(11) "Percent or percentage" means the percentage by weight.

(12) "Person" means an individual, partnership, association, firm, or corporation.

(13) "Registrant" means the person who registers commercial fertilizer and/or soil amendment.

(14) "Soil amendment" means any material not included under commercial fertilizer or those products subject to the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, which is added to soil or to plants for purposes of influencing the growth, yield, or quality of the crop, soil flora or fauna, or other soil characteristics.

(15) "Ton" means a net weight of 2,000 pounds avoirdupois.

History: En. 3-1714.2 by Sec. 1, Ch. 279, L. 1975; R.C.M. 1947, 3-1714.2; amd. Sec. 2, Ch. 197, L. 1985.

80-10-102. Guaranteed analysis. (1) Until the department prescribes the alternative form under subsection (2) of this section, "guaranteed analysis" means the minimum percentage of plant nutrients claimed in the following order and form:

(a) The following plant nutrients shall be guaranteed:

Total nitrogen (N) ---%
Available phosphoric acid (P_2O_5) ---%
Soluble potash (K_2O) --%

(b) For unacidulated mineral phosphatic materials and basic slag, bonemeal, tankage, and other organic phosphatic materials, the total phosphoric acid and degree of fineness may also be guaranteed.

(c) Guarantees for plant nutrients other than nitrogen, phosphorus, and potassium may be permitted or required by rules adopted by the department. The guarantees for other nutrients shall be expressed in the form of the element. The sources of other nutrients, including but not limited to oxides, salt, and chelates, may be required to be stated on the application for registration and may be included as a parenthetical statement on the label. Other beneficial substances or compounds, determinable by laboratory methods, also may be guaranteed by permission of the department.

(d) Potential basicity or acidity expressed in terms of calcium carbonate equivalent in multiples of 100 pounds per ton shall be guaranteed when required by regulation.

(2) If the department finds, after public hearing, that the requirement for expressing the guaranteed analysis of phosphorus and potassium in elemental form would not impose an economic hardship on distributors and users of fertilizer by reason of conflicting labeling requirements among the states, it may require by department rule that the guaranteed analysis be in the following form:

Total nitrogen (N) ---%
Available phosphorus (P) ---%
Soluble potassium (K) --%

(3) The effective date of the rule may not be less than 6 months following the adoption of the rule. For a period of 2 years following the effective date of the rule, the equivalent of phosphorus and potassium may also be shown in the form of phosphoric acid and potash. However, after the effective date of a rule requiring that phosphorus and potassium be shown in the elemental form, the guaranteed analysis for nitrogen, phosphorus, and potassium is the grade for those elements.

(4) Soil amendments shall guarantee the minimum quantity of each active ingredient in terms approved by the department or in terms as set forth in rules issued by the department. They shall also meet any other requirements established by rule by the department.

80-10-205. Misbranding and adulteration prohibited. No person shall distribute a misbranded or adulterated fertilizer or soil amendment. A commercial fertilizer or soil amendment is misbranded if it:

(1) carries any false or misleading statement upon or attached to the container or if false or misleading statements concerning its agricultural

value are made on the container or in any advertising matter accompanying or associated with the product;

(2) is distributed under the name of another product;

(1) The department, in cooperation with the agricultural experiment station of Montana state university, shall sample, inspect, analyze, and test commercial fertilizers and soil amendments distributed in this state at a time and place and to an extent necessary to determine whether the commercial fertilizers or soil amendments are in compliance with this chapter. The department may enter upon any public or private premises during regular business hours in order to have access to commercial fertilizers or soil amendments subject to this chapter.

(2) The methods of analysis and sampling shall be those adopted by the department from sources such as those of the association of official analytical chemists. The results of analysis, together with additional information the department considers advisable, shall be transmitted promptly to the manufacturer and to the dealer or person in whose possession the product was sampled.

(3) The department, in determining whether any commercial fertilizer is deficient in plant food or soil amendment is deficient, shall be guided solely by the official sample obtained and analyzed as provided for in subsections (1) and (2) of this section.

(4) If on the basis of an inspection or the analysis of the official sample a commercial fertilizer or soil amendment is found to be subject to penalty or other legal action, the department shall forward to the registrant notification of the violation at least 10 days before its report is made public. If during that period no adequate evidence to the contrary is made available to the department, the report becomes official. Upon request, the department shall furnish to the registrant a portion of any sample found subject to penalty or other legal action.

80-10-207. Fees. (1) (a) A manufacturer registering under 80-10-201(1) shall pay to the department fees on all commercial fertilizer distributed in this state, except specialty fertilizers and unmanipulated animal and vegetable manures, provided that sales to manufacturers or exchanges between them are exempt. The fees are:

(i) inspection of fertilizers other than anhydrous ammonia, 20 cents per ton. The department may by rule after hearing adjust the inspection fee not to exceed a maximum of 25 cents per ton to maintain adequate funding for the administration of this part. Any change in fee becomes effective on the first day of a reporting period. All manufacturers shall be given notice of any change in fees before the effective date.

(ii) inspection of anhydrous ammonia, 20 cents per ton. The department may by rule after hearing adjust the anhydrous ammonia inspection fee not to exceed a maximum of 65 cents per ton to maintain adequate funding for the administration and enforcement of part 5 of this chapter. Any change in fee becomes effective on the first day of a reporting period. All registrants and manufacturers of anhydrous ammonia shall be given notice of any change in fees before the effective date of the fee adjustment.

(iii) assessment, the fee prescribed in 80-10-103. The assessment fee shall be used to fund educational and experimental programs as provided in 80-10-103 through 80-10-106.

(b) If fertilizer or soil amendment material is added to fertilizer for which a fee has been paid under subsection (1)(a), a fee must be paid under that subsection, but only on the added fertilizer or soil amendment.

(2) There shall be paid to the department on all soil amendments distributed in this state an inspection fee of 10 cents per ton subject to the following provisions:

(a) sales to manufacturers or exchanges between them are exempt; and

(b) when less than 50 tons of registered soil amendment is sold per 6-month period, there shall be paid to the department a fee of $5 per soil amendment per 6-month period in lieu of the 10 cents per ton fee. Inspection fees shall be used by the department for administration of this part.

(3) (a) (i) Every licensee who distributes a soil amendment or commercial fertilizer, except specialty fertilizer and unmanipulated manures, to an unlicensed or unregistered person in this state shall file with the department on forms furnished or approved by the department a semiannual statement for the periods ending June 30 and December 31 setting forth the number of net tons of each commercial fertilizer and/or soil amendment distributed in this state during the 6-month period. The report is due on or before the 30th day of the month following the close of each period.

(ii) Every manufacturer who registers a soil amendment or commercial fertilizer in this state or a person who registers on the manufacturer's behalf, except specialty fertilizer and unmanipulated manures, shall file with the department on forms furnished or approved by the department a monthly statement setting forth the number of net tons of each registered commercial fertilizer and soil amendment distributed in this state during the month and to whom it was distributed. The report is due on or before the 30th day of the following month. The manufacturer or person registering on behalf of the manufacturer shall pay the fees set forth in subsection (1) at that time.

(b) If the tonnage report required by subsection (3)(a)(ii) is not filed and the payment of fees is not made within 30 days after the end of the period, a collection fee amounting to 10% of the amount due but not less than $10 shall be assessed against the manufacturer and the amount of fees due shall constitute a debt and become the basis of a judgment against the manufacturer.

(4) Except as provided in subsection (5), all fees collected for licenses, registration, and inspection and moneys collected as penalties shall be deposited in the state treasury to the credit of the state special revenue fund for the purpose of administering this chapter, including the cost of equipment and facilities and the cost of inspecting, analyzing, and examining commercial fertilizer and soil amendments manufactured or distributed in this state. Reserve funds may be invested by the department with interest credited to the state special revenue fund.

(5) All fees collected under subsection (1)(a)(ii) shall be deposited in the state treasury to the credit of the state special revenue fund, anhydrous ammonia account, for the administration and enforcement of part 5 of this chapter and the rules adopted thereunder.

(a) if the analysis shows that a commercial fertilizer is deficient in one or more of its guaranteed primary plant foods (NPK) beyond the investigational allowance as established by regulation; or

(b) if the overall index value of the fertilizer is below the level established by regulation.

(2) When a commercial fertilizer is subject to a penalty under both (1)(a) and (1)(b), the larger penalty applies.

(3) Deficiencies beyond the investigational allowances as established by regulation in any other constituent covered under subsections (1)(b),(1)(c), and (1)(d) of 80-10-102 which the registrant is required to or may guarantee shall be evaluated, and penalties shall be assessed at two times the commercial value of the deficiency as determined by the dealer's retail price on the date of sampling.

(4) Nothing contained in this section shall prevent any person from appealing the department's decision to a court of competent jurisdiction.

(5) All penalties assessed under this section shall be paid to the consumer of the lot, not to exceed 100 tons, of commercial fertilizer represented by the sample analyzed within 3 months after the date of notice from the department to the registrant or licensee. If at the end of the 3-month period the consumer cannot be found, receipts shall be taken and promptly forwarded to the department for deposit in the state special revenue fund as provided in 80-10-207.

Summary data published by the department shall be in a form that will not disclose details of any operation or business.

(2) The department may inspect and audit, during normal business hours, each licensee's records for the purpose of verifying tonnage reports.

80-10-211. Cancellation or refusal of registration or licenses. (1) The department may cancel the registration of any commercial fertilizer or soil amendment and may refuse to register any commercial fertilizer or soil amendment upon satisfactory evidence that the registrant has used fraudulent or deceptive practices in the evasion or attempted evasion of this chapter or any rules adopted under it. However, no registration may be revoked or refused until the registrant is given the opportunity to amend his application or correct other practices.

(2) The department may cancel any license or refuse to license any person when it has satisfactory evidence that the person has used fraudulent or deceptive practices in the evasion or attempted evasion of this chapter or any rules adopted under it. However, no license may be revoked or refused until the person involved is given the opportunity to appear for a hearing by the department.

80-10-212. Exchanges between manufacturers. Nothing in this chapter shall be construed to restrict or avoid sales or exchanges of commercial fertilizers or soil amendment to each other by importers, manufacturers, or manipulators who mix fertilizer materials for sale or as preventing the free and unrestricted shipments of commercial fertilizer or soil amendment to manufacturers or manipulators who have registered their brands and grades or licensed their facilities as required by the provisions of this chapter.

Part 3

Enforcement

80-10-301. Rules — adoption by department. (1) The department may adopt those rules for commercial fertilizer and soil amendment which are specifically authorized in this chapter and those other reasonable rules necessary for the efficient enforcement of this chapter.

(2) In adopting rules the department shall follow procedures prescribed in the Montana Administrative Procedure Act.

History: En. 3-1723.1 by Sec. 10, Ch. 279, L. 1975; R.C.M. 1947, 3-1723.1.

80-10-302. Enforcement — embargo order — condemnation. (1) When the department has reasonable cause to believe any lot of commercial fertilizer or soil amendment is in violation of this chapter or a rule adopted by the department, it may issue and enforce a written or printed embargo order requiring the person holding the commercial fertilizer or soil amendment not to dispose of it in any manner until written permission is granted by the department or the court. The department shall release the product when this chapter and the rules of the department have been complied with. If compliance is not obtained within 30 days, the department may begin or, upon the request of the registrant or the person holding the product, shall begin proceedings for condemnation.

(2) Commercial fertilizer or soil amendment not in compliance with this chapter or the rules of the department may be seized on complaint of the department to a district court in the area in which the product is located. If the court finds the product in violation of this chapter and orders its condemnation, the fertilizer or amendment shall be disposed of in any manner consistent with the quality of the product and state law. The disposition of the product may not be ordered by the court without first giving the owner or person from whom the product was seized an opportunity to apply to the court for release of the product or for permission to process or relabel the product to bring it into compliance with this chapter.

History: En. 3-1725.1 by Sec. 12, Ch. 279, L. 1975; R.C.M. 1947, 3-1725.1.

80-10-303. Violations — enforcement proceedings — judicial review. (1) If it appears from the examination of any commercial fertilizer or from the inspection of any anhydrous ammonia facility that this chapter or the rules adopted under this chapter have been violated, the department shall give notice of the violations to the registrant, licensee, distributor, or possessor from whom the sample was taken. A person notified shall be given an opportunity to be heard under rules of the department. If it appears after a hearing, either in the presence or absence of the person notified, that this chapter or rules issued under this chapter have been violated, the department may certify the facts to the proper prosecuting attorney.

(2) A person who violates this chapter or the rules adopted under this chapter or who obstructs, prevents, or attempts to prevent the department from performing its duty under this chapter is guilty of a misdemeanor and shall be fined not less than $300 or more than $500 for the first violation and not less than $300 or more than $1,000 for a subsequent violation. In all prosecutions under this chapter involving the composition of a lot of commercial fertilizer, a certified copy of the official analysis of the department is prima facie evidence of the composition.

(3) Nothing in this chapter requires the department to report for prosecution or for the beginning of seizure proceedings minor violations of this chapter when it believes that the public interest will be best served by a suitable notice of warning in writing.

(4) A prosecuting attorney to whom a violation is reported shall prosecute the violator in a court of competent jurisdiction without delay.

(5) The department may apply for and the court may grant a temporary or permanent injunction restraining any person from violating or continuing to violate any of the provisions of this chapter or any rule adopted under the chapter notwithstanding the existence of other remedies at law. The injunction shall be issued without bond.

(6) If a person adversely affected by an act, order, or ruling made by the department under this chapter is not entitled to a hearing before the department to determine his rights, he may within 45 days sue in the district court of any county where the alleged violation giving rise to the department's act, order, or ruling occurred, for new trial of the issues bearing upon the act, order, or ruling. After the trial the court may issue and enforce those orders, judgments, or decrees it considers proper, just, and equitable.

(1) The authority may guarantee and make commitments to guarantee payment required by a loan funded under this chapter or any other agricultural loan for which a guaranty has been approved by the authority upon such terms and conditions as the authority may prescribe in accordance with this chapter. In administering the guaranty program, the authority may require the payment of a fee or premium, establish application fees, and prescribe application, notification, contract and guaranty forms, rules, and guidelines.

(2) Guaranties by the authority under this chapter must:

(a) be made for a loan that the authority finds meets the policies and objectives of this chapter;

(b) be made to an applicant for a guaranty approved by the authority;

(c) contain amortization provisions satisfactory to the authority; and

(d) be in such principal amount, be in such form, and contain such terms and provisions with respect to payment of property insurance, repairs, alterations, taxes, assessments, delinquency charges, and default remedies as the authority determines to be necessary.

(3) The authority is authorized from time to time to enter into guaranties, insurance contracts, or any other agreements or contracts with respect to the agricultural loan guaranty fund and any guaranteed loan or other credit agreement. Such an agreement or contract may contain terms and provisions necessary or desirable in connection with the guaranty program, subject to the requirements established, including without limitation terms and provisions relating to loan documentation, review, approval procedures, origination and servicing rights and responsibilities, default obligations, procedures and obligations, and obligations with respect to guaranty contracts made under this chapter.

(4) Any contract of guaranty made by the authority under the authorization of this chapter must provide that claims payable thereunder must be paid from amounts available in the agricultural loan guaranty fund and from amounts available under the terms of any applicable contract or agreement with the financial institution that originated the guaranteed loan. The obligation of the authority to make payments under such a contract is limited solely to such sources and does not constitute a debt or liability of the state. A guaranty contract and any rule or guideline of the authority implementing the guaranty program may contain such other terms, provisions, or conditions as the authority considers necessary or appropriate, including without limitation those relating to the payment of guaranty premiums, the giving of notice, claim procedure, the sources of payment for claims, the priority of competing claims for payment, the release or termination of loan security and borrower liability, the timing of payment, the maintenance and disposition of projects and the use of amounts received during periods of loan delinquency or upon default, and any other provision concerning the rights of insured parties or conditions to the payment of guaranty claims. Any premiums for the guarantee of loan payments under the provisions of this chapter may be determined on such basis and be payable by such person in such amounts and at such times as the authority determines, and the amount of the premium need not be uniform among the various loans, leases, or other credit agreements guaranteed.

The authority may borrow from and deposit in the agricultural loan guaranty fund up to $20,000,000 from any available state fund, including funds of the Montana board of housing.

(2) The amounts in the fund must be used to satisfy any claim resulting from a defaulted loan or other credit agreement. The amounts in the fund may also be used for any other purpose prescribed by the authority in accordance with guaranty contracts with financial institutions entered into pursuant to this chapter, including without limitation the protection of the interest of the authority in loans during periods of delinquency or upon default.

(3) The minimum reserve requirement for the agricultural loan guaranty fund must be such amount as may be provided in an agreement, resolution, or indenture with the holders of bonds issued under this chapter, but not in excess of the aggregate annual payments due under the loans or other credit agreements guaranteed by the authority. No loan or other credit agreement may be guaranteed by the authority if the amount of money available in the agricultural loan guaranty fund would be less than the miniumum reserve requirement.

(4) In order to assure the maintenance of the agricultural loan guaranty fund, the authority shall, on or before September 1 in each year preceding the convening of the legislature, deliver to the governor a certificate stating the sum, if any, required to restore the agricultural loan guaranty fund to the minimum reserve requirement. The governor shall include in the executive budget submitted to the legislature the sum required to restore the agricultural loan guaranty fund to the minimum reserve requirement. Nothing contained herein shall obligate the legislature to make an appropriation for this purpose.

(5) All amounts remitted to the authority under this section constitute loans to the authority and must be repaid to the state treasury without interest from available operating revenues of the authority in excess of amounts required for the guarantee of loans.

(9) vesting in a trustee, as the authority determines, property, rights, powers, and duties in trust;

Compiler's Comments

1991 Amendment: Near beginning, after "governor", inserted "at least 30 days before each regular legislative session", inserted reference to 5-11-210, before "the legislature" deleted "each member of", and after "the legislature" deleted "at least 30 days before each regular legislative session". Amendment effective March 20, 1991.

80-12-403. Legislative review required. The agricultural loan authority program must be reviewed by the legislature at the third regular legislative session following the first sale of bonds under the provisions of 80-12-301 to determine whether the program should continue. However, this section does not, in itself, terminate the program, and any existing commitments incurred by the authority are not affected by this review.

Part 2

Control

80-15-201. Ground water standards. (1) The board shall adopt standards and, as applicable, interim numerical standards for agricultural chemicals in ground water. The standards must be the same as any promulgated or nonpromulgated federal standard established by EPA, although the board may determine, pursuant to the requirements of subsection (4), that an interim numerical standard different from either a promulgated or nonpromulgated federal standard is justified. Promulgated federal standards must receive preference. Except as provided in subsections (3) and (4), if more than one nonpromulgated federal standard exists for an agricultural chemical, the board must adopt the most recently established nonpromulgated federal standard.

(2) The board is not required to adopt a standard or interim numerical standard for every agricultural chemical registered in the state. The only standards and interim numerical standards required are for those agricultural chemicals:

(a) that are addressed by promulgated and nonpromulgated federal standards;

(b) the presence of which has been verified in ground water as provided in 80-15-202; or

(c) that the department and the department of health and environmental sciences predict may appear in ground water, in accordance with the procedures and determinations specified in 80-15-202 and 80-15-203.

(3) If no promulgated federal standard has been adopted or no nonpromulgated federal standard has been published for an agricultural chemical for which the board is required to establish a standard or interim numerical standard as specified in subsections (2)(b) and (2)(c), the department of health and environmental sciences shall request EPA to establish a promulgated or nonpromulgated federal standard. If the department of health and environmental sciences determines that EPA cannot comply with the request within 15 days, the board shall adopt an interim numerical standard, provided that the board shall review the interim numerical standard whenever EPA adopts a promulgated federal standard or publishes a nonpromulgated federal standard for the agricultural chemical in question.

(4) The board may adopt an interim numerical standard that is different from either a promulgated or nonpromulgated federal standard if there is significant new and relevant technical information available that is scientifically valid. The board shall review the interim numerical standard when EPA establishes or revises the promulgated or nonpromulgated federal standard for the agricultural chemical in question.

(5) The board shall consider the following in adopting any interim numerical standard under either subsection (3) or (4):

(a) effects on a person weighing 70 kilograms and drinking 2 liters of water per day over a lifetime; and

(b) EPA's conclusions regarding the no observable effect level, including the margin of safety identified by EPA, when scientific data indicates oncogenic potential for the agricultural chemical and EPA has determined that a numerical risk assessment is not justified, is inappropriate, or does not serve as the primary toxicological basis for regulation.

(6) Nothing in this section may interfere with the board's responsibility to adopt rules and standards under Title 75, chapter 6.

History: En. Sec. 9, Ch. 668, L. 1989.

80-15-202. Monitoring programs. (1) The department or the department of health and environmental sciences shall conduct monitoring programs to determine:

(a) whether residues of agricultural chemicals are present in ground water; and

(b) the likelihood of an agricultural chemical to enter ground water, if either department determines that sufficient valid scientific data is available to reasonably predict the behavior of a particular agricultural chemical in the soil.

(2) Any person who receives a chemical analysis indicating the presence of an agricultural chemical in ground water shall notify the department of health and environmental sciences.

(3) The department and the department of health and environmental sciences shall evaluate all information relating to this section that is received from any person, based upon standard procedures, protocols, and confirmatory procedures established by rule. Information found to be insufficient based on the adopted procedures and protocols, including analytical results, may be used only for informational purposes.

History: En. Sec. 10, Ch. 668, L. 1989.

80-15-203. Evaluation and use of monitoring results. (1) When providing preliminary monitoring results or confirmed monitoring results to ground water users or the public, the departments shall also provide any applicable standard or interim numerical standard.

(2) When monitoring results reveal the presence of an agricultural chemical in ground water:

(a) the department of health and environmental sciences is the lead department for determining health risks; and

(b) the department is the lead department for determining compliance with agricultural chemical ground water management plans authorized by 80-15-211 through 80-15-218 and with agricultural chemical registration, use, and labeling requirements and conditions pursuant to Title 80, chapters 8 and 10.

(3) The department and the department of health and environmental sciences shall cooperatively evaluate the results of monitoring programs authorized by 80-15-202.

(4) Based on the results of monitoring, the department and the department of health and environmental sciences shall implement appropriate actions specified in this chapter to mitigate any existing impacts of an agricultural chemical found in ground water and to prevent future impacts of an agricultural chemical that may be found in ground water, in relation to human health, agriculture, and the environment.

(5) The department may not undertake compliance and enforcement actions authorized by this chapter and the department of health and environmental sciences may not undertake compliance and enforcement actions authorized by Title 75, chapter 5, unless there is sufficient evidence collected through:

(a) monitoring at a point of standards application that reveals that a person using an agricultural chemical or introducing or discharging the chemical into ground water has violated a provision of 80-15-402 or Title 75, chapter 5;

(b) other investigations that reveal that a person using an agricultural chemical or introducing or discharging the chemical into ground water has violated a provision of 80-15-402 or Title 75, chapter 5; or

(c) monitoring that reveals a significant probability for an agricultural chemical to enter ground water.

(a) when the level of an agricultural chemical found in ground water is at 50% of the standard or interim numerical standard at a point of standards application and is scientifically validated;

(b) when a definite trend of increased presence of the agricultural chemical in ground water at a point of standards application is scientifically validated;

(c) when agricultural chemicals have been determined to have migrated in the ground water from the point of detection;

(d) when EPA proposes to suspend or cancel registration of an agricultural chemical, prohibits or restricts the chemical's sale or use in the state, or otherwise initiates action against a chemical because of ground water concerns and when EPA's action, restriction, or prohibition will be implemented unless the state develops an adequate management plan; or

(e) when agricultural chemicals that possess or are suspected of possessing properties that indicate potential to migrate to ground water are being applied on areas underlaid by ground water that is vulnerable to impairment.

(2) Any person using an agricultural chemical that is addressed by a specific agricultural chemical ground water management plan in the geographical region that is addressed by the plan shall comply with the plan. The department may specifically identify and designate persons who are under the plan and may inform any person about the plan.

(3) The department shall prioritize preparation of specific agricultural chemical ground water management plans in consideration of the specific circumstances of each area and within available resources.

80-15-213. Beneficial use to be considered in developing management plans — water classification. (1) In developing general and specific agricultural chemical ground water management plans, the department shall consider the current and potential beneficial use of the ground water included in or affected by the plans. If the ground water has not been classified, the department shall consider it to be included in the classification representing the highest quality of ground water until such time as the ground water is classified by the department of health and environmental sciences, and the department may proceed to develop an agricultural chemical ground water management plan as required by 80-15-212(1).

(2) The department may request the department of health and environmental sciences to classify certain ground water and may collect the data and information required by the department of health and environmental sciences to classify the ground water. If adequate technical data and financial resources are available as determined by the department of health and environmental sciences, the department of health and environmental sciences shall classify ground water at locations as requested by the department.

(2) Both accounts named in subsection (1) may receive funds from any source as gifts, grants, cost-share funds, or other funds designated for agricultural chemical ground water protection purposes.

(3) The department and the department of health and environmental sciences may individually or jointly spend funds received by their respective accounts for the purposes authorized by this chapter.

History: En. Sec. 14, Ch. 668, L. 1989.

80-15-302. Special funding. (1) A fee of $80 is assessed for the registration of pesticides in addition to the fee imposed by 80-8-201(4).

(2) The money collected from the registration fee established by subsection (1) must be deposited in the state special revenue fund as follows:

(a) Each of the following state agencies must be credited $15,000 for purposes of administering or assisting the department in administering this chapter:

(i) department of health and environmental sciences; and

(ii) Montana state university extension service.

(b) The department must be credited with the remainder of the registration fee money to use in administering this chapter.

(3) A fee of $10 is assessed for the registration of fertilizers in addition to the fee imposed by 80-10-201(1). The additional fee must be used for the ground water protection responsibilities of the department relating to fertilizers. Revenues collected from this fee must be credited to the commercial fertilizer agricultural chemical ground water account within the state special revenue fund for the administration of this chapter.

(4) The department may direct the board of investments to invest the portion of the money collected under this section that is credited to the department pursuant to the provisions of 17-6-201. Part 4

Enforcement

80-15-401. Authority to investigate and inspect. Authorized representatives of the department, consistent with the responsibilities set forth in this chapter and upon presentation of department-issued credentials, may at reasonable times or under emergency conditions enter upon any public or private property to:

(1) investigate conditions relating to compliance with agricultural chemical labels, agricultural chemical ground water management plans, monitoring requirements, or ground water protection requirements and to investigate violations of plans or compliance orders;

(2) gain access to and copy any records required by the department in the administration of this chapter;

(3) establish and inspect monitoring equipment; and

(4) sample ground water, including drinking water supply sources such as wells and similar structures.

History: En. Sec. 16, Ch. 668, L. 1989.

80-15-402. Prohibited activity. It is unlawful for a person to:

(1) violate any provision of a specific agricultural chemical ground water management plan;

(2) violate any lawful order issued pursuant to this chapter; or

(3) violate any provision of this chapter.

History: En. Sec. 17, Ch. 668, L. 1989.

80-15-403. Compliance orders. (1) In furtherance of 80-15-402, the department may issue a compliance order to any person violating a standard, an interim numerical standard, or any other requirement established pursuant to this chapter. The department shall coordinate its proposed actions pursuant to this section with proposed actions of the department of health and environmental sciences pursuant to 75-5-613, if any. Issuance of a compliance order under this chapter precludes the department from taking other enforcement actions for the same violation under Title 80, chapter 8 or 10.

(2) The department may issue a compliance order to any person, including the person's employees, agents, and subcontractors, whether or not the person is subject to a specific management plan, to require the cleanup of any agricultural chemical that the person has accidentally or purposely dumped, spilled, or misused or unlawfully used that has a significant probability of entering ground water.

(3) When issuing a compliance order, the department may require a person who has violated a provision of 80-15-402 to conduct monitoring to

assist in determining the presence or level of concentration of an agricultural chemical in ground water and the effectiveness of cleanup efforts. The department shall specify criteria in the compliance order for determining the duration of monitoring.

(4) A compliance order must specify the requirement violated and must set a time for compliance. In establishing a time for compliance, the department shall take into account the seriousness of the violation and any good-faith efforts that the person has made to comply with the requirement that has been violated. A compliance order issued under this section must be served either personally by a person qualified to perform service under the Montana Rules of Civil Procedure or by certified mail.

History: En. Sec. 18, Ch. 668, L. 1989.

80-15-404. Injunctions authorized. The department may commence a civil action seeking appropriate relief, including a permanent or temporary injunction pursuant to 80-8-306 or 80-10-303, as applicable, for a violation that is subject to a compliance order under 80-15-403.

History: En. Sec. 19, Ch. 668, L. 1989.

80-15-405. Emergencies. Notwithstanding any other provisions of this chapter, if the department finds that an emergency exists that requires immediate action to protect ground water from agricultural chemicals or to prevent use of ground water impaired or likely to be impaired by agricultural chemicals, the department may, without notice or hearing, issue necessary orders or adopt rules to protect public health, welfare, and safety. The duration of an emergency order or rule is limited to the emergency provisions of the Montana Administrative Procedure Act as specified in 2-4-303.

History: En. Sec. 20, Ch. 668, L. 1989.

80-15-406 through 80-15-410 reserved.

80-15-411. Violators subject to penalties. (1) A person found to be in violation of this chapter or a rule established pursuant to this chapter is subject to the penalty provisions of 80-15-412 through 80-15-414.

(2) For the purpose of this section, the term "person" means, in addition to the definition in 80-15-102, any responsible corporate officer.

(3) Nothing in this chapter may be construed as requiring the department or an authorized agent of the department to report minor violations of this chapter for prosecution when the department or a duly authorized agent believes that the public interest will be best served by other remedial action, by a suitable notice of warning in writing, or by a lawful written order.

(4) Action under 80-15-412 through 80-15-414 does not bar the department from enforcement of this chapter or of rules or orders issued under this chapter by injunction or other appropriate remedy.

(5) The department and the department of health and environmental sciences shall coordinate actions when a violator is subject to the penalties authorized by 80-15-412 through 80-15-414 and penalties authorized by Title 75, chapter 5, for the same violation.

History: En. Sec. 21, Ch. 668, L. 1989.

80-15-412. Administrative civil penalty. (1) A person who commits a violation of this chapter may be assessed an administrative civil penalty by either the department or the department of health and environmental sciences, consistent with their respective responsibilities, of not more than $1,000 for each offense. Farm applicators possessing a pesticide permit or using a fertilizer may not be assessed an administrative civil penalty of more than $500 for the first offense. Assessment of a civil penalty may be made in conjunction with any other warning, order, or administrative action authorized by this chapter or Title 75, chapter 5, that is issued or undertaken by either the department or the department of health and environmental sciences.

(2) No administrative civil penalty may be assessed unless the person charged is given notice and opportunity for a hearing pursuant to Title 2, chapter 4, part 6, of the Montana Administrative Procedure Act.

(3) In determining an appropriate administrative civil penalty, the responsible department shall consider the effect on the person's ability to continue in business, the gravity of the violation that occurred, the degree of care exercised by the offender, and whether significant harm resulted to public health, agricultural crops, livestock, or the environment.

(4) If the responsible department is unable to collect the administrative civil penalty or if a person fails to pay all or a set portion of the administrative civil penalty as determined by the responsible department, the department may seek to recover the amount in the appropriate district court.

(5) A person against whom the department or the department of health and environmental sciences has assessed an administrative civil penalty may, within 30 days of the final agency action making the assessment, appeal the assessment to the district court of the county in which the violation is alleged to have occurred. A jury trial must be granted when demanded under Rule 38 of the Montana Rules of Civil Procedure.

History: En. Sec. 22, Ch. 668, L. 1989.

80-15-413. Judicial civil penalty. A person who commits a violation as specified in 80-15-402 shall be subject to a judicial civil penalty not to exceed $10,000. Each occurrence constitutes a separate violation.

History: En. Sec. 23, Ch. 668, L. 1989.

80-15-414. Criminal penalties. (1) A person who intentionally commits a violation as specified in 80-15-402 is guilty of an offense and subject to a fine not to exceed $25,000 for each day the violation continues or imprisonment for not more than 1 year, or both. Following an initial conviction under this section, a subsequent conviction subjects a person to a fine of not more than $50,000 for each day the violation continues or imprisonment for not more than 2 years, or both.

(2) Except as otherwise provided in this chapter, a person convicted of violating any of the provisions of this chapter or rules issued under this chapter or who misrepresents, impedes, obstructs, hinders, or otherwise prevents or attempts to prevent the department from performance of its duties in connection with the provisions of this chapter is guilty of a misdemeanor and shall be fined not less than $100 but not more than $1,500.

(3) A person who knowingly makes any false statement, representation, or certification in any record, report, or other document filed or required to be maintained under this chapter or who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under this chapter shall, upon conviction, be punished by a fine of not more than $5,000 or by imprisonment for not more than 6 months, or both.

(4) A person who with intent to defraud uses or reveals confidential information and data provided under this chapter or rules issued under this chapter shall, upon conviction, be fined not more than $5,000 or imprisoned for not more than 1 year, or both.

81-2-109. Expenses, how paid — lien and foreclosure. (1) If there is no violation of law or department rule, the expense of inspecting, testing, supervision of quarantine, supervision of dipping, supervision of disinfection, and supervision of other treatment of diseased or exposed livestock by the department and the sanitary inspection of dairies, packinghouses, meat depots, slaughterhouses, milk depots, and other premises shall be paid for by the department. However, the owner of the livestock or property is liable for all expenses, except the salary of the designated supervising officer representing the department, when the owner, agent, or person in charge of the livestock or property has violated the law or rules of the department.

(2) The expenses for which an owner, agent, or person in charge is liable under subsection (1) include:

(a) all investigatory expenses, including travel, meals, and lodging of all investigating officers representing the department; and

(b) all other expenses, extraordinary or otherwise, that in the judgment of the department are reasonably necessary to ensure that there has been or will be compliance with all applicable laws and rules.

(3) The department, at the conclusion of an investigation of a violation, shall serve notice on the violator, informing him of all expenses for which he is liable. The notice must state that if a response is not sent within 30 days of receipt of the notice, the notice is prima facie evidence of the reasonableness of the expenses and of the violator's liability for them.

(4) A showing by the department that a response to the notice required by subsection (3) was not received within 30 days of receipt of the notice is prima facie evidence of the reasonableness of the expenses stated and of the liability of the violator for those expenses.

(5) These expenses are a lien on the livestock or other property, and the department may retain possession of the livestock until the charges and expenses are paid. The lien is not dependent on possession and may be foreclosed in the name of the agent of the department by sale at public auction of the stock or as many as may be necessary to pay the sum of the costs, after 10 days' notice by posting in three public places in the county. The lien may also be foreclosed by an action in a court of competent jurisdiction against the owner of the livestock to recover the amount of charges and expenses.

When the application of other remedies has been insufficient to compel action to control, extirpate, or prevent the spread of disease or upon a showing that an animal disease emergency exists and that other remedies probably would be insufficient to compel action to control the emergency, the department may apply for and the court may grant mandatory injunctive relief.

Part 2

Indemnity

Part Cross-References
Indemnity, Title 28, ch. 11, part 3.

81-2-201. Classification of animals as to compensation for slaughter. Animals slaughtered under the direction of the department by order of the board are divided into two classes for the purposes of compensation:

(1) Animals determined by the department to be affected with an incurable disease, which are destroyed by order of the board, are designated as animals of class 1, and unless otherwise provided each of the animals shall be paid for on the basis of 75% of its appraised value. The county in which the animal was owned at the time it was determined to be affected with an incurable disease is liable in part, as later provided, for an indemnity to be paid for the animal. The ownership and county are determined by an affidavit of the owner of the animal or his agent. Each animal directed to be destroyed shall be appraised by a representative or an authorized agent of the department with the owner agreeing in writing as to the value of the animal. When appraised, due consideration shall be given to its breeding value as well as its dairy or meat value and the condition of the animal as to the disease and the present and probable effect of the disease on the animal. In the absence of an agreement, there shall be appointed three competent, disinterested parties, one appointed by the department, one by the owner, and a third by the first two, to appraise each animal, taking into consideration its breeding value as well as its dairy or meat value and the condition of the animal as to the disease and the present probable effect of the disease on the animal. The judgment of the majority is the judgment of the appraisers and is binding on both parties as the final determination of indemnity to be paid for each animal. The total compensation of each group of appraisers is limited to $5 for the group appraisal, one-half of which shall be paid by the department. The total amount of indemnity paid by the state and a county for an animal may not exceed the actual sound value of an animal of its class, and the total combined amount of indemnity paid for the animal by the state and a county may not exceed the sum of $100 for a registered purebred animal or the sum of $50 for a grade animal. Animals presented for appraisal as purebreds shall be accompanied by their registration papers at the time of appraisal or they shall be appraised as grades. If purebreds are less than 3 years old and not registered, the department may grant a reasonable time for their registration and presentation of their registration papers to the appraiser. Registration papers shall accompany the claim for indemnity.

(2) Animals of class 1 shall be paid for on the basis of their full appraised value as determined in this section if no evidence of incurable disease is disclosed by autopsy, bacteriologic, serologic, microscopic, or other findings. The total combined amount of indemnity paid by the state and a county for an animal may not exceed the actual sound value of an animal of its class. The total combined amount of indemnity paid by the state and a county for the animal may not exceed $100 for a registered purebred animal or $50 for a grade animal.

(3) Animals which are determined by the department to be affected with or exposed to foot-and-mouth disease, rinderpest, contagious pleura pneumonia, surra, or other infectious, contagious, communicable, or dangerous disease, which is not of its nature necessarily fatal, and are destroyed by order of the department as a sanitary safeguard, are designated as animals of class 2 and each animal shall be paid for on the basis of its full appraised value. The appraised value shall be determined in the manner set out in subsection (1) of this section. The appraisal of the animals shall be based on the meat, dairy, or breeding value of the animal, but where appraisal is based on breeding value of the animal, no appraisal may exceed three times its meat or dairy value. The total amount of indemnity paid by the state for an animal may not exceed the actual sound value of an animal in its class. No indemnity for a class 2 animal may be paid by a county. In the case of destruction of an animal afflicted with brucellosis (Bang's disease), no indemnity shall be paid for the animal unless the board, in its discretion, determines the best interests of this state will be served by payment of an indemnity. In this event, the board shall set out standards of indemnity by rules and may not pay in excess of $100 for a registered purebred animal or $50 for a grade animal. In all cases where the federal government or agency other than the state compensates the owner in whole or in part for livestock destroyed as a sanitary safeguard, the amount of compensation from the state shall be determined under 81-2-210.

(4) Animals which are injured or killed while they are being inspected or tested under an order of the department or its agent, which do not come within either class 1 or class 2, may be paid for at their full appraised value if the claim for the animal is recommended for payment at a meeting of the board. Where it is shown that the injury or death of the animal was not proximately due to the negligence of the owner or his agent, the whole claim, when approved, shall be paid out of department funds. The limit of indemnity for an animal paid for by the state may not exceed that fixed by this section for animals of class 2.

81-2-202. Payment for other personal property. Personal property other than livestock destroyed by order of the department shall be paid for on the basis of its appraised value. The appraised value is determined in the manner specified in 81-2-201 for the determination of the appraised value of animals.

81-2-203. Indemnity — from what funds paid. In payment for animals or property destroyed by order of the department, the state shall pay one-half of the indemnity out of the money at the disposal of the department. The county liable in part for the indemnity shall pay one-half of the total indemnity out of the general fund of the county.

81-2-204. Presentation of claims for indemnity. Claims against the state and county which arise from the destruction of animals or property by order of the department shall be made on forms provided by the department. They must contain an affidavit by the owner or his agent with knowledge of the animal or property, certifying to the ownership of the animal or property, the county in which they are owned, and that the animal or property has been destroyed under the law and the rules of the department. These claims must be accompanied by a certificate from the department that the animal or property was ordered destroyed. The claims shall also be accompanied by a certificate of appraisement as appraisal is determined under 81-2-201, together with an account of sale showing the net proceeds from the sale of the animal, if any, paid to the owner of the animal.

81-2-205. Indemnity for class two animals in state less than one hundred twenty days. Indemnity for animals of class 2 shall be paid out of department funds when the animals have not been in this state for at least 120 days and the payment is authorized by the department under 81-2-209(1)(e).

81-2-208. Sale of condemned carcasses — disposition of proceeds. Where the carcass of an animal ordered destroyed under this chapter is found on official postmortem inspection to be fit for human consumption, the owner shall receive the net proceeds from the sale of the carcass. The proceeds shall be deducted from his claim against the state and county for the slaughter. A representative of the department may, when considered advisable or necessary or when it is desired by the owner, sell the carcass on terms he considers to be in the best interests of this state, and the net proceeds obtained from the sale shall be paid to the owner. This procedure does not invalidate the owner's claim for indemnity for any balance due him.

81-2-209. When no indemnity. (1) The owner of an animal or property destroyed under this chapter is entitled to indemnity, except in the following cases:

(a) animals belonging to the United States;

(b) animals brought into this state which violate this chapter or rules of the department;

(c) animals which the owner or claimant knew to be diseased or had notice of the disease at the time they came into his possession;

(d) animals which had the disease for which they were slaughtered or which were destroyed because of exposure to the disease at the time of their arrival in this state. However, a class 2 animal shipped into this state under department rules and accompanied by the proper certificate of health from a recognized state or federal veterinarian may be paid for when payment is authorized by the department.

(e) animals which have not been in this state for at least 120 days before the discovery of the disease; however, class 2 animals which have not been in the state 120 days may be paid for when payment is authorized by the department;

(f) when the owner or agent has not used reasonable diligence to prevent disease or exposure to disease;

(g) when the owner or agent has not complied with the rules of the department with respect to animals condemned;

(h) when animals condemned are not destroyed within 60 days after they are determined to be affected with or exposed to a disease which requires them to be destroyed by order of the department.

(2) No compensation or indemnity will be paid for the destruction of livestock affected with tuberculosis or other infectious, contagious, communicable, or dangerous disease unless the entire herd or band of affected livestock is under the supervision of the department for the eradication of the disease.

(1) If the federal government or an agency other than the state or county compensates the owner for livestock or property destroyed by order of the department, the amount of the compensation from the federal government or other agency shall be deducted from the owner's claim as filed against the state and county, that is, from the balance that remains after the net salvage price received from the sale or other disposal of the condemned animal has been deducted from the appraised value.

(2) If the owner or agent of the livestock or property destroyed by order of the department forfeits an indemnity, which the owner would otherwise be entitled to from the federal government or compensating agency other than the state or county, by violation of the rules of the federal government or other agency, an amount equal to the indemnity which would have been paid by the federal government or other indemnifying agency but for the forfeiture shall also be deducted from the owner's claim; that is, the balance that remains after the net salvage price received from the sale or other disposal of the condemned animal has been deducted from the appraised value.

(2) In any circumscribed disease control area as established under this section by the department, no other livestock of the species designated by the department to be inspected, tested, treated, or vaccinated may enter the disease control area unless inspected, tested, treated, or vaccinated under the direction of the department or accompanied by a satisfactory health certificate or except under special permit and restrictions provided by the department.

(3) When 75% or more of the school districts in any county in Montana are established under this section by the department as disease control areas,

81-3-211. Inspection of livestock before change of ownership or removal from county — transportation permits. (1) For the purposes of this section:

(a) "Members of the same family" means a group whose membership is determined by including an individual, his spouse, and his parents, children, grandchildren, and the spouses of each.

(b) "Family business entity" means:

(i) a corporation whose stock is owned solely by members of the same family;

(ii) a partnership in which the partners are all members of the same family;

(iii) an association whose members all are members of the same family; or

(iv) any other entity owned solely by members of the same family.

(c) "Rodeo producer" means a person who produces or furnishes livestock that is used for rodeo purposes.

(2) Except as otherwise provided in this part, it is unlawful to remove or cause to be removed from a county in this state any livestock or to transfer ownership by sale or otherwise or for an intended purchaser or his agent to take possession of any such animal subject to title passing upon meeting or satisfaction of any conditions, unless the livestock has been inspected for brands by a state stock inspector or deputy state stock inspector and a certificate of the inspection has been issued in connection with and for the purpose of the transportation or removal or of such change of ownership as provided in this part. The inspection must be made in daylight. However, the change of ownership inspection requirements of this subsection do not apply when the change of ownership transaction is accomplished without the livestock changing premises, involves part of a herd to which no livestock have been added other than by natural increase or after brand inspection, and is between:

(a) members of the same family;

(b) a member of one family and the same family's business entity; or

(c) the same family's business entities.

(3) (a) It is unlawful to sell or offer for sale at a livestock market any livestock originating within any county in this state in which a livestock market is maintained or transported under a market consignment permit until the livestock has been inspected for marks and brands by a state stock inspector, as provided in this part.

(b) It is unlawful to slaughter livestock at a licensed livestock slaughterhouse unless the livestock has been inspected for marks or brands by a state or deputy state stock inspector.

(4) It is unlawful to remove or cause to be removed any livestock from the premises of a livestock market in this state unless the livestock has been released by a state stock inspector and a certificate of release for the livestock has been issued in connection with and for the purpose of the removal from the premises of the livestock market. The release obtained pursuant to this subsection will permit the movement of the livestock so released directly to the destination shown on the certificate.

(5) The person in charge of livestock being removed from a county in this state, where inspection thereof is required by this section or where change of ownership has occurred or when moved under a market consignment permit or a market release certificate, shall have in his possession the certificate of inspection, market consignment permit, transportation permit, or market release certificate issued in connection therewith and shall exhibit the certificate to any sheriff, deputy sheriff, constable, highway patrol officer, state

stock inspector, or deputy state stock inspector upon request. Section 81-3-204 shall be extended to livestock transported or sold under the above-mentioned permits.

(6) The following transportation permits may be issued:

(a) If a saddle, work, or show horse is being transported from county to county in this state by the owner for his personal use or business or where a purebred cow is being transported from county to county in this state by its owner for show purposes and where there is no change of ownership, the inspection certificate required by this section may be endorsed, as to the purpose and extent of transportation, by the inspector issuing the certificate in order to serve as a travel permit in this state for a period not to exceed 1 year for the horse or cow described thereon. The permit becomes void upon any transfer of ownership or if the horse or cow is to be removed from the state. In such instances an inspection must be secured for removal and the endorsed certificate surrendered.

(b) The owner of a saddle, work, or show horse may apply for a permanent transportation permit valid for both interstate and intrastate transportation of the horse until there is a change of ownership. To obtain a permit a horse must have either a registered brand that has been legally cleared or a lip tattoo or the owner must present proof of ownership to a state stock inspector. A written application, on forms to be provided by the department, must be completed by the owner and presented to a state stock inspector, together with a permit fee established by the department, for each horse. The application shall contain a thorough physical description of the horse and list all brands and tattoos carried by the horse. Upon approval of the application by a state stock inspector, a permanent transportation permit shall be issued by the department to the owner for each horse, and such permit shall be valid for the life of the horse. If there is a change of ownership in a horse, the permit shall automatically become void. The permit must accompany the horse for which it was issued at all times while the horse is in transit. This permit shall be in lieu of other permits and certificates required under the provisions of this section. The state of Montana shall recognize as valid permanent transportation permits issued in other jurisdictions to the owner of a saddle, work, or show horse subsequently entering the state. Such a permit shall be automatically void upon a change of ownership.

(c) When livestock owned by and bearing the registered brand of a bona fide rodeo producer is being transported from county to county in this state by the owner for rodeo purposes and where there is no change of ownership, the inspection certificate required by this section may be endorsed, as to the purpose and extent of transportation, by the inspector issuing the certificate in order to serve as a travel permit in this state for the livestock described thereon. The certificate is effective for the calendar year for which it is issued. The certificate shall be issued by a state stock inspector.

(d) An owner of livestock or his agent may be issued a transportation permit allowing the movement of his livestock into an adjoining county and return when the livestock is being moved for grazing purposes and when it is being moved to and from land owned or controlled by the owner of the livestock or his agent. The permit is valid for the period from March 31 through

November 30 of the calendar year in which it is issued and must be issued by a state stock inspector. The permit may be issued only if the livestock is branded with the permittee's brand, which must be registered in Montana. The department shall establish a fee for the permit, to be paid to the state stock inspector at the time the permit is issued and remitted by him to the department for deposit in the state treasury to the credit of the state special revenue fund for the use of the department. This permit may be used in lieu of the inspection and certificate required by this section for movement of livestock across a county line.

(7) Before any removal or change of ownership may take place, the seller of livestock shall request all required inspections and shall pay the required fees.

Herd Districts

81-4-301. Herd districts — creation, size, and location. (1) Herd districts may be created in any county in the state of Montana upon petition of owners or possessors of 55% of the land in such district and providing 25% or more of the land in such district is in actual cultivation or being used for residential purposes. Such districts must contain 12 square miles or more, lying not less than 1 mile in width, outside of the incorporated cities, except that herd districts may be created containing not less than 6 or more than 54 square miles, lying not less than 2 miles in width, when such territory joins and is contiguous with the boundaries of a city having a population of 10,000 or more and such territory so to be created in a herd district has a suburban population of not less than 200 people.

(2) In formation of such a district the entire holding of any owner or lessee must be included unless such owner or lessee consents that less than his entire contiguous holdings be included in the petition.

(3) Such petition shall designate the months of the year when the herd district is effective, and upon presentation and filing of such petition, properly signed, giving the outside boundaries and description of the proposed district and the post-office address of the signers thereto, with the clerk and recorder in the county in which the said district is being created, the county commissioners of such county, upon receipt thereof, shall set a date for hearing protests and verifying the signatures thereto and shall give not less than 20 days' notice of the same by three publications in a newspaper of general circulation in the county of the proposed district. At the hearing held pursuant to such notices, the county commissioners shall examine the petition and shall cause a map to be made in order to determine the shape and regularity of the boundaries of the proposed district. The commissioners may then establish the district, but such district shall be established only in such manner that the district will be reasonably regular and symmetrical in shape or practicable in relation to the geographical features of such district. It is not required that the boundaries of any district follow section lines to meet the requirement of reasonably regular and symmetrical boundaries.

(4) Should it appear to such county commissioners after such hearing that the signatures attached to such petition were genuine, they shall immediately declare such herd district created and established; after which the county commissioners must give notice by four weekly publications in some newspaper nearest the district of the creation of such districts, also stating the period such districts will be in effect. Such districts shall not be in effect until 30 days have expired after the order.

(5) Upon petition of any owner or possessor of lands lying contiguous and adjoining any herd district theretofore created and upon like hearing and notice as hereinabove provided for, such lands shall be included in said herd district and become a part thereof. Should the signature of lessee appear on the petition creating or abolishing any herd district, the owner or owners of said land may appear either in person or agent and enter their protest and the board of county commissioners shall remove the name of the lessee from said petition, and no person shall be permitted to withdraw his name after the hour set for hearing same.

At said meeting by its order the board shall set such petition for hearing at a specified time on a day certain of which notice shall be given by publication at least once in each week for 3 successive weeks in some newspaper of general circulation in the county.

(2) At the time fixed for hearing, the board of county commissioners shall first require proof of publication of the notice of said hearing to be made and thereafter shall consider the petition and hear all interested parties. At the conclusion of any such hearing, if the board of county commissioners shall find that notice of hearing has been given in the manner and for the time prescribed herein and that the owners or possessors of 55% or more of the lands lying within such herd district have signed the petition and request that such district be dissolved and that less than 25% of the lands included in such district are in actual cultivation, then the board shall forthwith spread such findings upon its minutes and thereupon shall enter an order in terms that by reason of such findings and of the proceedings had upon such petition the herd district is thereby dissolved. (1) Any person who is the owner or entitled to the possession of any horses, mules, cattle, sheep, llamas, bison, asses, hogs, or goats, who willfully permits such animals to run at large within any herd district, is guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not less than $50 or more than $250 for each offense. Each day that each five head or less of such horses, mules, cattle, sheep, llamas, bison, asses, hogs, or goats are willfully permitted to run at large constitutes a separate offense.

81-4-307. Trespassing animals in herd district — retention for damages and keep. (1) If any such animal or animals wrongfully enter upon premises of any person within such district, the owner or person in control of such animal or animals shall be liable for care and feed and for any damages occasioned by such livestock to the landowner. The owner or occupant of the land upon which such wrongful entry is made may take into his possession such animal or animals and reasonably care for the same and may retain possession thereof and be entitled to a lien thereon as security for the payment of damages and charges occasioned by such livestock. If the owner of such livestock or the person entitled to the possession thereof can be found or is known to the person who takes it up for trespass, it shall be his duty to notify the owner, owners, or persons in charge thereof within 48 hours after taking possession thereof by a notice in writing, duly mailed as a registered or certified letter, directed to such owner or person in charge at his post-office address or by serving such notice on him personally. The notice shall give a particular description of the livestock and state the amount of damages claimed and demand that within 48 hours after receipt of such notice the damages and costs be paid and that the animal or animals be taken away from the property of the complainant.

(2) Upon demand and upon payment of the damages and charges, the owner or occupant of the land shall release and deliver possession of such stock to the owner or person entitled thereto. If the parties cannot agree upon the amount, then the owner or person entitled to said stock shall give a receipt to the owner or occupant of the land having possession of the same, which receipt shall fully describe the animal or animals so that they may at any time be easily identified, and thereupon the owner or occupant of the land shall give possession of such livestock to the owner or person entitled thereto, making claim therefor. The owner or person so receiving possession of such livestock shall not dispose of the same but shall retain and keep the same in his possession as the legal custodian thereof in order to meet and pay the amount of the lien thereon for damages and charges due in consequence of any such trespass.

(3) The party entitled to such damages or charges shall within 10 days after delivery of possession of such livestock commence an action in any court having jurisdiction to recover such damages and charges, and such livestock shall be held for the payment of any judgment as effectually as though held under a writ of attachment. At any time after such action is commenced, the owner or person entitled to the stock, to whom delivery of possession was made, may furnish and file a bond conditioned to pay the damages, charges, and costs incurred in the action, and upon approval of the bond by the justice of the peace, if the action is commenced in a justice court, or by the judge or clerk of the district court, if the action is commenced in the district court, the lien and claim upon the livestock shall thereupon be discharged.

(4) If the owner or person entitled to such livestock does not furnish such a bond within 10 days after the service of summons in the action, an order may be issued authorizing and directing the constable or sheriff to take possession and hold the stock to satisfy any judgment which may be recovered in the action, and such stock, when so taken possession of by the officer, shall be held, treated, and sold under execution the same as though seized and held in the first instance by writ of attachment.

(5) The owner or person entitled to the stock may, in lieu of furnishing a bond, deposit an amount of money sufficient to pay any judgment which may be recovered in such action, the amount to be determined by the justice or judge of the court in which the action is pending. If the owner or person entitled to the livestock, after delivery of possession to him without payment of damages and charges herein provided for, shall sell or dispose of the same or any part thereof or permit the same to be taken from his possession or shall in any manner prevent the seizure of the same by the constable or sheriff, as herein provided, before the lien thereon is fully discharged, he shall be guilty

of a misdemeanor and in addition thereto shall be liable to the party entitled to such damages and charges in double the value of the stock. At the time of delivery or possession of such stock [to] the owner or person entitled thereto, a written statement of the amount of the damages and charges shall be furnished to the owner or person entitled to the possession of the stock by the person claiming such damages and charges.

(6) If the owner or claimant of such stock is not known to the person taking up such stock, he shall give notice thereof within 48 hours by posting a notice at the nearest post office and serving a like notice on the stock inspector of the district, which notice shall describe each animal or animals, the brand thereon, and give a minute description thereof, together with the date of the trespass.

(3) "Person" includes an individual, partnership, association, union, or corporation.

The department of livestock may make use of an outline map of the state of Montana and the word "Montana", printed, lithographed, inscribed, engraved, or otherwise impressed on the labels, tags, seals, or containers of agricultural or food products, by a person who has availed himself of the continuous official inspection service offered by the department of livestock, as an indication that the product has been inspected by the officers, agents, or licensed inspectors of the department and that the products are of the quality and description as indicated on the label, tag, seal, or container. The outline map with the word "Montana", when made use of under this part, shall be known as the "Montana quality label". When an authorized department, agent, or officer of the United States collaborates with the department of livestock in the inspection of a product, the Montana quality label may, with the consent of the appropriate department, agency, or officer of the United States, be superimposed on an outline map of the United States on the label, tag, seal or container, indicating inspectional collaboration between the department of livestock and the department, agency, or officer of the United States.

The department may furnish labels, tags, and seals at reasonable prices to a producer, processor, packer, or dresser who has availed himself of the continuous official inspection service. This part, however, does not preclude the department from permitting, under its rules, a producer, processor, packer, or dresser to make, prepare, or cause to be made or prepared the labels, tags, or seals to be used on his own product or to print, stamp, or otherwise place or cause to be placed the Montana quality label on products or containers which have been subject to continuous inspection, if the labels, tags, seals, stamps, or other devices are of a design which the department prescribes. The department of livestock may, in cooperation with the United States department of agriculture or otherwise, make use of available and appropriate means to disseminate information concerning the Montana quality label and the products which may lawfully bear it and to popularize its use. All moneys derived from furnishing the labels, tags, and seals or from permitting the use of the Montana quality label shall be deposited in the state treasury to the credit of the general fund.

81-9-217. Definitions. As used in 81-9-216 through 81-9-220 and 81-9-226 through 81-9-236, the following definitions apply:

(1) "Adulterated" means the term applied to meat if:

(a) it bears or contains a poisonous or deleterious substance that may render it injurious to health, except that if the substance is not an added substance, the product may not be considered adulterated if the quantity of the substance is insufficient to ordinarily render it injurious to health;

(b) it bears or contains, by reason of administration of any substance to the meat, an added poisonous or added deleterious substance other than a color additive, a food additive, or a pesticide chemical in or on a raw agricultural commodity, any of which may in the board's judgment make the meat unfit for human food;

(c) it is in whole or in part a raw agricultural commodity and bears or contains a pesticide chemical that is unsafe as provided in the Federal Food, Drug and Cosmetic Act;

(d) it bears or contains a food additive that is unsafe as provided in the Federal Food, Drug and Cosmetic Act;

(e) it bears or contains a color additive that is unsafe as provided in the Federal Food, Drug and Cosmetic Act; provided that the meat that is not otherwise considered adulterated under subsection (1)(c), (1)(d), or (1)(e) of this section is considered adulterated if use of the pesticide chemical, food additive, or color additive in or on the article is prohibited by rule of the board;

(f) it consists in whole or in part of any filthy, putrid, or decomposed substance or is for any other reason unsound, unhealthful, unwholesome, or otherwise unfit for human food;

(g) it has been prepared, packed, or held under unsanitary conditions whereby it may have become contaminated with filth or rendered injurious to health;

(h) it is in whole or in part the product of an animal, including poultry, that has died otherwise than by slaughter;

(i) its container is composed in whole or in part of any poisonous or deleterious substance that may render the contents injurious to health;

(j) it has been intentionally subjected to radiation, unless the use of the radiation was in conformity with a regulation or exemption in effect pursuant to 21 U.S.C. 348; or

(k) any valuable constituent has been in whole or in part omitted or abstracted therefrom, any substance has been substituted wholly or in part therefor, damage or inferiority has been concealed in any manner, or any substance has been added to it or mixed or packed with it so as to increase its bulk or weight, or make it appear better or of greater value than it is.

(2) "Chief" means the chief meat inspector appointed as provided in 81-9-226.

(3) "Federal Food, Drug and Cosmetic Act" means 21 U.S.C. 301 through 392, as that law reads on October 1, 1987.

(4) "Livestock" means cattle, buffalo, sheep, swine, goats, rabbits, horses, mules or other equines, and game farm animals as defined in 87-4-406 whether alive or dead.

(d) if its container is so made, formed, or filled as to be misleading;

(e) if it does not bear a label showing:

(i) the name and place of business of the manufacturer, packer, or distributor; and

(ii) an accurate statement of the quantity of the product in terms of weight, measure, or numerical count. The board may adopt rules exempting small meat packages, meat not in containers, and other reasonable variations.

(f) if any word, statement, or other information required by 81-9-216 through 81-9-220 and 81-9-226 through 81-9-236 to appear on the label is not prominently placed thereon, as compared with other words, statements, designs, or devices in the labeling, and is not stated in terms that render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use;

(g) if it is represented as a food for which a definition and standard of identity or composition has been prescribed by the rules of the board, unless:

(i) it conforms to the definition and standard; and

(ii) its label bears the name of the food specified in the definition and standard and, insofar as required by the rules, the common names of optional ingredients present in such food, other than spices, flavoring, and coloring;

To the extent that compliance with the requirements of this subsection (ii) is impracticable or results in deception or unfair competition, exemptions must be established by rules promulgated by the board.

(j) if it purports to be for special dietary uses, unless its label bears such information concerning its vitamin, mineral, and other dietary properties as the board, after consultation with the U.S. secretary of agriculture, by rule prescribes as necessary in order to fully inform purchasers as to its value for such uses;

(k) if it bears or contains an artificial flavoring, artificial coloring, or chemical preservative, unless it bears labeling stating that fact, provided that to the extent that compliance with the requirements of this subsection (k) is impracticable, exemptions must be established by rules promulgated by the board; or

(l) if it fails to bear directly thereon and on its containers, as the board may by rule prescribe, the official inspection legend and establishment number of the establishment where the product was prepared and other information as the board may require to assure that it will not have false or misleading labeling and that the public will be informed of the manner of handling required to maintain the meat in a wholesome condition.

(1) It shall be unlawful for any person to operate a manufactured dairy products plant, concentrated, condensed, or evaporated milk and/or cream plant, milk and cream buying station, creamery, dairy producing milk for manufacturing purposes, water ice manufacturing plant, cheese plant including cottage cheese, and cream cheese, sour cream, yogurt, or frozen dessert manufacturing plant without first obtaining a license from the department.

(2) Any manufactured dairy products plant or dairy which undergoes a change of ownership shall be considered a new plant or dairy for relicensing purposes, provided that changes of ownership shall not be construed to include changes of stockholders.

History: En. Sec. 20, Ch. 413, L. 1971; R.C.M. 1947, 3-24-107.

81-22-202. Licensing of persons engaged in production of milk. (1) The department may license persons engaged in the production of milk for manufacturing purposes and license persons who manufacture dairy products or products made in their semblance or imitation when the products are made in a manufactured dairy products plant.

(2) The department may examine and license weighers, graders, samplers, and milk and cream testers in order to establish the qualifications of these persons to perform those operations or tests for which the licenses are issued.

History: En. Sec. 3, Ch. 413, L. 1971; amd. Sec. 11, Ch. 310, L. 1974; R.C.M. 1947, 3-2490.

81-22-203. Renewal, suspension, or revocation of license — grounds — hearing — appeal to district court. (1) The department may deny renewal of, suspend, or revoke a license issued under this part or its rules for cause or failure to comply with this chapter or with the rules, testing procedures, or methods adopted under this chapter or when the department has reason to believe that the licensee's products may be detrimental to or jeopardize the health and welfare of the public.

(2) Before revoking, denying renewal of, or suspending a license, the department shall give written notice of its intention to revoke, deny, or

suspend the license and its reasons therefor. The department shall give the licensee a time limit of 10 days from receipt of the notice during which the licensee may request a hearing to show cause why his license should not be revoked, denied, or suspended. The notice shall be sent by certified mail, or personal service may be made on the licensee by a representative of the department. Failure of the licensee to request a hearing within the time allowed by the department is considered as his desire not to contest the department's reasons for suspending, denying, or revoking the license.

(3) If the licensee does request a hearing, the department shall appoint a time and place for an administrative hearing in the county where the licensee is licensed.

(4) The date established for the hearing must be not less than 10 days or more than 30 days after receipt of the licensee's request for the hearing. A request for a hearing shall serve as a bar to prosecution until a decision from the department becomes final. The licensee at the hearing may testify or present evidence having a bearing on the denial, suspension, or revocation of his license, and after hearing all the evidence, the department shall make a determination. If a license is suspended, denied, or revoked, it may not be reinstated until examination or inspection by the department shows that the cause for suspension, denial, or revocation has been eliminated or corrected.

(5) It is unlawful for a licensee to carry on the business or operations for which he was licensed, during the term of suspension or revocation, and if he does so, the licensee is subject to the penalties provided in the chapter.

(6) A licensee who is aggrieved by the decision of the department in matters pertaining to suspension, denial, or revocation of a license may appeal, within 30 days after the date of determination by the department, to the district court of the county in which he was licensed, if in the state, or in the case of a business firm of any nature in the state, of the county of its principal place of business.

(7) If a license is revoked a new license must be obtained from the department, but a new license may be issued only when the cause for revocation has been corrected.

81-22-205. Examination and licensing of persons engaged in testing. (1) A person may not operate a butterfat, protein, solids, or other component content test where milk or cream is bought and paid for on the basis of these values without first passing an appropriate examination and obtaining the license required by the department. A person desiring to operate these tests shall apply to the department for permission to take the butterfat, protein, solids, or other component content test operator's examination. The examination shall be given to the applicant by the department. On passing the examination to the satisfaction of the department, the applicant shall be issued a license authorizing him to conduct these tests in this state. The department shall establish a fee to be paid for each license and for each renewal.

(2) Milk and cream tester's licenses may be revoked, suspended, or denied where testing is not conducted under official test procedures or under department rules. If the tester regularly or habitually reports results below the actual values of the butterfat, protein, solids, or other compound component values, the licensee is subject to the penalties provided in this chapter. A person who alters the results of an official test is subject to the penalties provided in this chapter.

(d) grader-weigher-sampler, tester, and hauler; however, a separate grader-weigher-sampler, tester, and hauler license is required whether a person performing these activities owns and operates the plant, is employed by the plant, or is self-employed.

(2) A license is valid on the date issued through December 31 of that year unless suspended or revoked by the department. A license must be renewed by the first January 31 following the expiration date of December 31. A license renewal application form may be supplied by the department. When the license renewal application form is returned to the department, it shall be accompanied by the correct license fee. A license shall be posted in conspicuous view at the place of business. A license is not transferable from place to place or from person to person. Milk or cream purchased for use in milk plants or for use in a manufactured dairy product in this state shall be graded by licensed graders, weighers, and samplers. It is unlawful to sell, purchase, or use milk or cream for a food purpose if the milk or cream is found to be musty, adulterated, rancid, dirty, with marked undesirable odors or flavors, or to contain foreign objects, fragments, substances, or excessive bacteria. (1) nothing in this requirement shall be construed as prohibiting higher temperatures which are necessary for curing, ripening, or aging of certain cheeses and cultured products; and

(2) this section does not apply to manufactured dairy products packaged in hermetically sealed containers or sterile manufactured dairy products which do not require refrigeration for their safekeeping.

(2) If a manufactured dairy product is packaged in a plant other than that of the plant whose name appears on the package or wrapper, the package or wrapper shall also show the name of the plant at which the product was packaged or wrapped.

(3) This section does not prevent the use of codes or numbers which designate the packaging or wrapping plant if these codes or numbers are registered with the department.

History: En. Sec. 32, Ch. 413, L. 1971; amd. Sec. 33, Ch. 310, L. 1974; R.C.M. 1947, 3-24-119; amd. Sec. 14, Ch. 14, L. 1979.

81-22-409. Adulterating milk or cream unlawful. (1) It shall be unlawful for any person to adulterate milk or cream produced or sold for manufacturing purposes or for any manufactured dairy product to contain an adulterant. For purposes of this chapter, the presence of any antimicrobial substance, pesticide residuals, unapproved coloring, food additives, or foreign substances added directly to or assimilated into such products which are not explicitly allowed in the Code of Federal Regulations, except for the addition of adulterants for rejection purposes, shall be deemed adulterated. Violations of this subsection shall be misdemeanors and shall be punishable by fine or imprisonment, or both, as provided in this chapter.

(2) It shall be unlawful for any person to sell, manufacture, exchange, display, or offer or expose for sale or exchange, as milk or cream, any impure, colored, adulterated, or unwholesome milk or cream or any substance in the semblance or imitation of milk or cream, nor shall any such impure, colored, adulterated, or unwholesome milk or cream be used in the manufacture of any article of food for human beings.

It shall be unlawful for any person to manufacture, mix, compound with, or add to milk, cream, or any manufactured dairy products or to transport into Montana any manufactured dairy product containing foreign animal fats or foreign animal or vegetable oils or products containing nonapproved ingredients with the intent to sell the same as milk, cream, or manufactured dairy products except as allowed under the law and/or regulations of Montana, nor shall any person possess, solicit orders for display, or sell any such article, substance, or compound as or for milk, cream, or manufactured dairy products.

History: En. Sec. 34, Ch. 413, L. 1971; R.C.M. 1947, 3-24-121.

81-22-411. Filled dairy products unlawful — exceptions. (1) Filled dairy products resemble genuine dairy products so closely that they lend themselves readily to substitution for and confusion with such dairy products and in many cases cannot be distinguished from genuine dairy products by the ordinary consumer or ordinary laboratory procedures. The manufacture, sale, exchange, purveying, transportation, possession, or offering for sale or exchange or purveyance of filled dairy products lends itself to substitution, confusion, deception, and fraud and if permitted, tends to interfere with the orderly and fair marketing of foods essential to the well-being of the people of this state. It is hereby declared to be the purpose of this chapter to:

(a) correct, prevent, and eliminate the condition above referred to;

(b) protect the public from confusion, fraud, and deception;

(c) prohibit practices inimical to the general welfare; and

(d) promote the orderly and fair marketing of essential foods.

(2) It is unlawful:

(a) for any person to manufacture, sell, exchange, display, purvey, transport, or possess any filled dairy product or to offer or expose for sale or exchange or to be purveyed any such product in intrastate commerce;

(b) for any person owning or operating a bakery, confectionery shop, factory, or other place where food products are prepared or manufactured for sale, exchange, or purveyance to the public in intrastate commerce to utilize any filled dairy product as an ingredient in any food product so manufactured or prepared;

(c) for any person knowingly to sell, exchange, purvey, transport, or possess any food product in intrastate commerce in which any filled dairy product is an ingredient.

(3) The term "filled dairy product" does not mean or include:

(a) oleomargarine;

(b) any distinctive proprietary food compound not readily mistaken for a dairy product where such compound is customarily used on the order of a physician and is prepared and designed for medicinal or special dietary use and prominently so labeled;

(c) any frozen dessert containing animal fat (other than butterfat) or vegetable fat when the container is properly labeled;

(d) any dairy product flavored with chocolate or cocoa where the fats or oils other than milk fat contained in such product do not exceed the amount of cacao fat naturally present in the chocolate or cocoa used; or

(e) any dairy product in which the vitamin content has been increased and food oil utilized as a carrier of such vitamins provided the quantity of such food oil does not exceed 1/100 of 1% of the weight of the finished dairy product.

History: En. Sec. 35, Ch. 413, L. 1971; amd. Sec. 6, Ch. 12, L. 1977; R.C.M. 1947, 3-24-122.

81-22-412. Manufactured products to conform to standards of identity. 81-22-413. Pasteurization required. All milk and cream used in the manufacture of any dairy product or products made in semblance or imitation of dairy products sold, offered for sale, purveyed, stored, displayed, or transported in Montana must be pasteurized. However, cheese held, stored, or aged for at least 60 days at not less than 35 degrees F is not required to be made from pasteurized milk or cream but must be labeled "made from raw or unpasteurized milk or unpasteurized cream", as the case may be. Other cultured raw or unpasteurized dairy products that can be made safe by aging must be similarly aged and labeled as required above.

History: En. Sec. 39, Ch. 413, L. 1971; R.C.M. 1947, 3-24-126; amd. Sec. 15, Ch. 14, L. 1979.

81-22-414. Pasteurization apparatus and records. (1) The department may adopt rules which it considers necessary to assure proper control and use of all equipment used in the process of pasteurization. The department may require the operation of devices and apparatus which are needed to accurately record and indicate temperatures to which and the length of time for which the pasteurized product has been heated, including those periods and temperatures when the equipment is cleaned and sanitized by C.I.P. method. A person using pasteurizing equipment in this state shall properly record and have available to the department for the preceding 2 months all records pertaining to the pasteurization of any product. These records shall at all times be open to the inspection of the department of livestock, the department of health and environmental sciences, and all other state, county, and municipal officers charged with the enforcement of laws and ordinances respecting dairy products or the public health.

History: En. Sec. 40, Ch. 413, L. 1971; amd. Sec. 34, Ch. 310, L. 1974; amd. Sec. 7, Ch. 12, L. 1977; R.C.M. 1947, 3-24-127.

81-22-415. Pasteurization labeling. It is unlawful for a person to sell, offer for sale, exchange, or to have in his possession for these purposes milk, cream, or a manufactured dairy product in a container or package marked, labeled, or in any way designating the contents of the container or package as "pasteurized", unless it has been treated by an approved process of pasteurization as required by the department.

History: En. Sec. 41, Ch. 413, L. 1971; amd. Sec. 35, Ch. 310, L. 1974; R.C.M. 1947, 3-24-128.

A violator is guilty of a misdemeanor and is punishable under 81-22-601.

History: En. Sec. 4, Ch. 93, L. 1929; amd. Sec. 1, Ch. 39, L. 1931; re-en. Sec. 2620.4, R.C.M. 1935; amd. Sec. 1, Ch. 68, L. 1937; amd. Sec. 8, Ch. 310, L. 1974; amd. Sec. 1, Ch. 12, L. 1977; R.C.M. 1947, 3-2404(18).

81-22-418. Posting prices of butterfat required. All persons who buy milk or cream for manufacturing purposes shall post the current prices for butterfat or other component content of milk or cream in a conspicuous place in the factory or place of business. Such price schedule may be based upon butterfat, protein, solids, or other components of milk or cream and shall indicate upon which of such basis payment is made.

History: En. Sec. 45, Ch. 413, L. 1971; R.C.M. 1947, 3-24-132.

81-22-419. Requirements for containers and equipment. All containers and equipment used in the manufacture, storage, holding display, and transportation of any manufactured dairy product shall be nontoxic, easily cleanable, and free from dents, cracks, crevices, rust, and any other condition which would prevent cleaning and sanitizing.

History: En. Sec. 47, Ch. 413, L. 1971; R.C.M. 1947, 3-24-134.

81-22-420. Labeling of animal or vegetable fat contents on frozen desserts. (1) Any frozen dessert made in the semblance of or in imitation of ice cream in this chapter, which contains any amount of animal fat (other than milk fat) or vegetable fat or oil (other than any such fat or oil which is naturally present in any flavoring ingredient), shall be labeled as an animal fat product or vegetable fat product, or a combination of both, as the case may be. Such animal fat or vegetable fat products shall be manufactured from a pasteurized mix which has been processed in a licensed manufacturing dairy product plant. All persons manufacturing, offering for sale or exchange, or selling such animal fat or vegetable fat frozen desserts shall be subject to the sanitary, reporting, and licensing regulations of this chapter and of the regulations promulgated under the authority of this chapter.

(2) No representation shall be made by statement, word, grade designation, design, symbol, device, or in any other manner on any container, package, or wrapper or on any advertising media that such animal fat or vegetable fat product, or combination thereof, is ice cream, sherbet, or any of their low-fat counterparts or derivatives or any other products which are prohibited from containing animal or vegetable fats.

(3) The container, package, or wrapper containing such animal fat or vegetable fat frozen dessert shall be clearly and plainly marked, labeled, or printed on the outside in boldfaced letters with the words, "animal fat product", "vegetable fat product", "animal-vegetable fat product", or "vegetable-animal fat product", as the case may be, and shall bear thereon the common or usual name of each of the ingredients therein, including the fats or oils, except that spices, flavorings, or colorings may be designated as such without naming each.

History: En. Sec. 48, Ch. 413, L. 1971; R.C.M. 1947, 3-24-135.

81-22-421. Labeling on manufactured dairy products to conform to requirements. 81-23-102. Policy. (1) It is hereby declared that:

(a) milk is a necessary article of food for human consumption;

(b) the production and maintenance of an adequate supply of healthful milk of proper chemical and physical content, free from contamination, is vital to the public health and welfare;

(c) the production, transportation, processing, storage, distribution, and sale of milk in the state of Montana is an industry affecting the public health and interest;

(d) unfair, unjust, destructive, and demoralizing trade practices have been and are now being carried on in the production, transportation, processing, storage, distribution, and sale of milk and products manufactured therefrom, which trade practices constitute a constant menace to the health and welfare of the inhabitants of this state and tend to undermine the sanitary regulations and standards of content and purity of milk;

(e) health regulations alone are insufficient to prevent disturbances in the milk industry and to safeguard the consuming public from further inadequacy of a supply of this necessary commodity;

(f) it is the policy of this state to promote, foster, and encourage the intelligent production and orderly marketing of milk and cream and products manufactured therefrom, to eliminate speculation and waste, to make the distribution thereof between the producer and consumer as direct as can be efficiently and economically done, and to stabilize the marketing of such commodities;

(g) investigations have revealed and experience has shown that, due to the nature of milk and the conditions surrounding the production and marketing of milk and due to the vital importance of milk to the health and well-being of the citizens of this state, it is necessary to invoke the police powers of the state to provide a constant supervision and regulation of the milk industry of the state to prevent the occurrence and recurrence of those unfair, unjust, destructive, demoralizing, and chaotic conditions and trade practices within the industry which have in the past affected the industry and which constantly threaten to be revived within the industry and to disrupt or destroy an adequate supply of pure and wholesome milk to the consuming public and to the citizens of this state;

(h) milk is a perishable commodity which is easily contaminated with harmful bacteria, which cannot be stored for any great length of time, which must be produced and distributed fresh daily, and the supply of which cannot be regulated from day to day but, due to natural and seasonal conditions, must be produced on a constantly uniform and even basis;

(i) the demand for this perishable commodity fluctuates from day to day and from time to time making it necessary that the producers and distributors shall produce and carry on hand a surplus of milk in order to guarantee and insure to the consuming public an adequate supply at all times, which surplus must of necessity be converted into byproducts of milk at great expense and ofttimes at a loss to the producer and distributor;

(j) this surplus of milk, though necessary and unavoidable, unless regulated, tends to undermine and destroy the milk industry, which causes producers to relax their diligence in complying with the provisions of the health authorities and ofttimes to produce milk of an inferior and unsanitary quality;

(k) investigation and experience have further shown that, due to the nature of milk and the conditions surrounding its production and marketing, unless the producers, distributors, and others engaged in the marketing of milk are guaranteed and insured a reasonable profit on milk, both the supply and quality of milk are affected to the detriment of and against the best interest of the citizens of this state whose health and well-being are thereby vitally affected;

(l) where no supervision and regulation are provided for the orderly and profitable marketing of milk, past experience has shown that the credit status of both producers and distributors of milk is adversely affected to a serious degree, thereby entailing loss and hardship upon all within the community with whom these producers and distributors carry on business relations;

(m) due to the nature of milk and the conditions surrounding its production and distribution, the natural law of supply and demand has been found inadequate to protect the industry in this and other states and in the public interest it is necessary to provide state supervision and regulation of the milk industry in this state.

(2) The general purpose of this chapter is to protect and promote public welfare and to eliminate unfair and demoralizing trade practices in the milk industry. It is enacted in the exercise of the police powers of the state.

History: (1)En. Sec. 1, Ch. 204, L. 1939; amd. Sec. 1, Ch. 4, L. 1967; Sec. 27-401, R.C.M. 1947; (2)En. Sec. 2, Ch. 204, L. 1939; amd. Sec. 2, Ch. 4, L. 1967; amd. Sec. 88, Ch. 431, L. 1975; Sec. 27-402, R.C.M. 1947; R.C.M. 1947, 27-401, 27-402.

81-23-103. General powers of the department. (1) The department shall supervise, regulate, and control the milk industry of this state, including the production, processing, storage, distribution, and sale of milk sold for consumption in this state. Nothing in this chapter abrogates or affects the status, force, or operation of any provision of public health laws or the law under which the department of livestock is constituted together with the department of livestock rules, county board of health rules, or municipal ordinances for the promotion or protection of the public health. The department may cooperate with the department of health and environmental sciences, the board of livestock, any county or city board of health, or the department of agriculture in enforcing this chapter.

(2) The department shall investigate all matters pertaining to the production, processing, storage, distribution, and sale of milk in this state and conduct hearings upon any subject pertinent to the administration of this chapter. The department may subpoena milk dealers, their records, books, and accounts, and any other person from whom information may be desired or considered necessary to carry out the purposes and intent of this chapter and may take depositions of witnesses who are sick or absent from the state or who cannot otherwise appear in person before the department at its offices. The department shall give at least 10 days' notice to the proposed witness.

81-23-104. Rules and orders. The department may adopt and enforce rules and orders necessary to carry out the provisions of this chapter and any orders adopted under it by the department or the board. A rule or order shall be posted for public inspection in the main office of the department for 30 days, and a copy shall be filed in the office of the department. A copy shall also be sent by registered or certified letter to the secretary of each area, except in the case of an order directed only to a person or persons named in it, which shall be served by personal delivery of a copy or by mailing a copy to each person to whom the order is directed or, in the case of a corporation, to any officer or agent of the corporation upon whom a summons may be served in accordance with laws of this state. The posting, in the main office of the department, of a rule or order not required to be personally served as provided in this section and the filing in the office of the department is sufficient notice to all persons affected by the rule or order. A rule or order when properly posted and filed or served, as provided in this section, has the force of law.

81-23-105. Testing of milk. (1) For the purpose of determining the value of milk supplied by producers during routine audits of milk processing plants which receive raw milk directly from producers, the department of commerce may establish a program of testing such raw milk.

(2) The department of commerce may levy an assessment on licensed producers to secure the necessary funds to administer this program. This assessment is in addition to those provided in 81-23-202.

(3) All personnel employed in the sampling and testing program shall be licensed by the animal health division of the department of livestock.

(4) The department of commerce may conduct all types of sampling, grading, and testing techniques which it considers necessary to carry out the intent of this section.

81-23-106. Application. This chapter does not apply to foreign or interstate commerce except insofar as it may be effective in compliance with the United States constitution and with the laws of the United States. It is the intention of the legislature, however, that the instant, whenever that may be, that the handling within the state by a dealer of milk produced outside of the state becomes the subject of regulation by the state in the exercise of its police powers, the provisions of this chapter affecting intrastate milk immediately apply and the powers conferred by this chapter attach thereto.

81-23-201. Licenses to producers, producer-distributors, distributors, and jobbers. In any market where the provisions of this chapter apply, it is unlawful for a producer, producer-distributor, distributor, or jobber to produce, transport, process, store, handle, distribute, buy, or sell milk unless the dealer is properly licensed as provided by this chapter. It is unlawful for a person to buy, sell, handle, process, or distribute milk which he knows or has reason to believe has been previously dealt with or handled in violation of any provision of this chapter. The department may decline to grant a license or may suspend or revoke a license already granted, upon due cause and after hearings.

81-23-202. Licenses — disposition of income. (1) A producer, producer-distributor, distributor, or jobber may not engage in the business of producing or selling milk subject to this chapter in this state without first having obtained a license from the department of livestock or, in the case of milk entering this state from another state or foreign nation, without complying with the requirements of the Montana Food, Drug, and Cosmetic Act and without being licensed under this chapter by the department. The annual fee for the license from the department is $2 and is due before July 1 and shall be deposited by the department to the credit of the general fund. The license required by this chapter is in addition to any other license required by state law or any municipality of this state. This chapter shall apply to every part of the state of Montana.

(2) In addition to the annual license fee, the department shall, in each year, before April 1, for the purpose of securing funds to administer and enforce this chapter, levy an assessment upon producers, producer-distributors, and distributors as follows:

(a) a fee per hundredweight on the total volume of all milk subject to this chapter produced and sold by a producer-distributor;

(b) a fee per hundredweight on the total volume of all milk subject to this chapter sold by a producer;

(c) a fee per hundredweight on the total volume of all milk subject to this chapter sold by a distributor, excepting that which is sold to another distributor.

(3) The department shall adopt rules fixing the amount of each fee. The amounts may not exceed levels sufficient to provide for the administration of this chapter. The fee assessed on a producer or on a distributor may not be more than one-half the fee assessed on a producer-distributor.

(4) The assessment upon producer-distributors, producers, and distributors shall be paid quarterly before January 15, April 15, July 15, and October 15 of each year. The amount of the assessment shall be computed by applying the fee designated by the department to the volume of milk sold in the preceding calendar quarter.

(5) Failure of a producer, producer-distributor, or distributor to pay an assessment when due is a violation of this chapter and his license under this chapter automatically terminates and is void. A license so terminated shall be reinstated by the department upon payment of a delinquency fee equal to 30% of the assessment which was due.

(6) All assessments required by this chapter shall be deposited by the department in the state special revenue fund. All costs of administering this chapter, including the salaries of employees and assistants, per diem and expenses of board members, and all other disbursements necessary to carry out the purpose of this chapter, shall be paid out of control board moneys in that fund.

(7) The department may, if it finds the costs of administering and enforcing this chapter can be derived from lower rates, amend its rules to fix the rates at a less amount on or before April 1 in any year.

An applicant for license to operate as a producer, producer-distributor, distributor, or jobber shall file a signed application upon a blank prepared under authority of the department, and an applicant shall state facts concerning his circumstances and the nature of the business to be conducted which in the opinion of the department are necessary for the administration of this chapter. The application shall certify the applicant to be the holder of all licenses required by the department of livestock for the conduct of his business or, in the case of milk entering this state from another state or foreign nation, compliance with the requirements of the Montana Food, Drug, and Cosmetic Act. The application shall be accompanied by the license fee required to be paid.

81-23-204. Declining, suspending, and revoking licenses — penalties in lieu of suspension or revocation. (1) The department may refuse to grant a license or may suspend or revoke a license already granted for due cause upon due notice and after hearing. The violation of any provisions of this chapter or of any lawful order or rule of the board or department, the failure or refusal to make required statements or reports, or failure to pay license or assessment fees are causes for which the department may suspend or revoke a license.

(2) In place of suspension or revocation of a license, the department may assess a civil penalty not to exceed $500 per day for each daily failure to comply with or each daily violation of the provisions of this chapter or of any lawful order or rule of the department or board. If the person against whom a civil penalty is assessed fails to pay the civil penalty immediately, the department shall collect the civil penalty by a civil proceeding in the district court of the first judicial district. This penalty shall be construed as civil and not criminal in nature. Any moneys received by the department as a result of collection of civil penalties shall be paid into the state special revenue fund as provided by 81-23-403.

Regulation of Milk Prices

81-23-301. Repealed. Sec. 7, Ch. 23, L. 1983.

History: En. Sec. 6, Ch. 204, L. 1939; amd. Sec. 4, Ch. 192, L. 1959; amd. Sec. 2, Ch. 107, L. 1971; amd. Sec. 91, Ch. 431, L. 1975; R.C.M. 1947, 27-406.

81-23-302. Establishment of minimum prices. (1) The board shall fix minimum producer, wholesale, jobber, and retail prices for class I milk and minimum producer prices only for class II and class III milk by adopting rules in a manner prescribed by the Montana Administrative Procedure Act.

(2) The board shall establish such prices by means of flexible formulas which shall be devised so that they bring about such automatic changes in all minimum prices as are justified on the basis of changes in production, supply, processing, distribution, and retailing costs.

(3) The board shall consider the balance between production and consumption of milk, the costs of production and distribution, and prices in adjacent and neighboring areas and states so that minimum prices which are fair and equitable to producers, distributors, jobbers, retailers, and consumers may result.

(4) The board shall, when publishing notice of proposed rulemaking under authority of this section, set forth the specific factors which shall be taken into consideration in establishing the formulas and in particular in determining costs of production and distribution and of the actual dollars and cents costs of production and distribution which preliminary studies and investigations of auditors or accountants in its employment indicate will or should be shown at the hearing so that all interested parties will have opportunity to be heard and to question or rebut such considerations as a matter of record.

(5) Such specific factors may include but shall not be limited to the following items:

(a) current and prospective supplies of milk in relation to current and prospective demands for such milk for all purposes;

(b) the ability and willingness of consumers to purchase, which shall include among other things per capita disposable income statistics, consumer price indexes, and wholesale price indexes;

(c) the cost factors in producing milk, which shall include among other things the prices paid by farmers generally (as used in parity calculations of the United States department of agriculture), prices paid by farmers for dairy feed in particular, and farm wage rates in this state;

(d) the alternative opportunities, both farm and nonfarm, open to milk producers, which shall include among other things prices received by farmers for all products other than milk, prices received by farmers for beef cattle, and the percentage of unemployment in the state and nation as determined by appropriate state and federal agencies;

(e) the prices of butter, nonfat dry milk, and cheese;

(f) the cost factors in distributing milk, which shall include among other things the prices paid by distributors for equipment of all types required to process and market milk and prevailing wage rates in this state;

(g) the cost factors in jobbing milk, which shall include among other things raw product and ingredient costs, carton or other packaging cost, processing cost, and that part of general administrative costs of the supplying distributor which may properly be allocated to the handling of milk to the point at which such milk is at the supplying distributor's dock, equipment of all types required to market milk, and prevailing wage rates in the state;

(h) the need, if any, for freight or transportation charges to be deducted by distributors from producer prices for bulk milk.

(6) If the board at any time proposes to base all or any part of any official order establishing or revising any milk pricing formulas upon facts within its own knowledge, as distinguished from evidence which may be presented to it by the consuming public or the milk industry, the board shall, when publishing notice of proposed rulemaking under authority of this section, cause notice to be given to the consuming public and the milk industry of the specific facts within its own knowledge which it will consider, so that all interested parties will have opportunity to be heard and to question or rebut such facts as a matter of record.

(7) The board, after consideration of the evidence produced, shall make written findings and conclusions and shall fix by official rule the formula whereby minimum:

(a) producer prices for milk in classes I, II, and III shall be computed;

(b) wholesale prices for milk in class I shall be computed;

(c) jobber prices for milk in class I shall be computed;

(d) retail prices for milk in class I shall be computed.

(8) This section shall not be construed as requiring the board to promulgate any specific number of formulas, but shall be construed liberally so that the board may adopt any reasonable method of expression to accomplish the objective set forth in subsection (7). If the evidence presented to the board at any public hearing for the establishment or revision of milk pricing formulas is found by the board to require the establishment of separate and varying wholesale prices for any particular uses, the board shall designate the reasons therefor and establish such separate formulas.

(9) Each rule establishing or revising any milk pricing formulas shall classify milk by forms, classes, grades, or uses as the board may deem advisable and shall specify the minimum prices therefor.

(10) The board shall adopt rules after notice and hearing in the manner prescribed by the Montana Administrative Procedure Act to regulate transportation rates which distributors, contract haulers, and others charge producers for both farm-to-plant and interplant transportation of milk. No allowance for transportation of milk between plants may be permitted unless it is found by the board to be necessary to permit the movement of milk in the public interest.

(11) All milk purchased by a distributor shall be purchased on a uniform basis. The basis to be used shall be established by the board after the producers and the distributors have been consulted.

(12) The board may amend any official rule in the same manner provided herein for the original establishment of milk pricing formulas. The board may in its discretion, when it determines the need exists, give notice of and hold statewide public hearings affecting establishment or revision of milk pricing formulas.

(13) Upon petition of a distributor or a majority of his producers, the board shall hold a hearing to receive and consider evidence regarding the advisability and need for a base or quota plan as a method of payment by that distributor of producer prices; and if the board finds that the evidence adduced at such hearing warrants the establishment of a base or quota plan, the board shall proceed by official order to establish the same.

(14) (a) Upon petition by 10% or 20 of the licensed producers in Montana, whichever is less, or upon petition by any licensed producer-distributor or distributor, the board shall hold a hearing to receive and consider evidence regarding the advisability and need for a statewide pooling arrangement as a method of payment of producer prices, provided that at such hearing the board shall among other things specifically receive and consider evidence concerning production and marketing practices which have historically prevailed statewide. If the board finds that the evidence adduced at such hearing warrants the establishment of a statewide pooling arrangement, the board shall proceed by official order to establish the same; but such official order shall be of no force or effect until it is approved in a referendum conducted by the board by mail and by secret ballot among affected producers, producer-distributors, and distributors. The board shall keep confidential the vote of each producer, producer-distributor, and distributor voting in the referendum. The official order must be approved by a majority of the producers, producer-distributors, and distributors voting, representing more than 50% of the milk produced in Montana that is to be included in the proposed pool, based on each producer's average monthly production for the 12 months immediately preceding the referendum. If the board finds it necessary, the board may conduct more than one referendum on any order.

(b) The order of the board establishing the statewide pooling arrangement may include other provisions as the board considers necessary for the proper and efficient operation of the pool. These provisions may include but are not limited to:

(i) a statewide base or quota plan contemplated in subsection (13);

(ii) the establishment of a pool settlement fund to be administered by the department for the purpose of receiving payments from pool distributors or making payments to them as necessary in order to operate and administer the statewide pool; and

(iii) the establishment of a pool expense fund for the purpose of offsetting the costs to the department of administering the pool, funded by a special levy assessed against each pool producer.

(c) During the initial startup of a statewide pool, the department may draw from existing cash reserves to fund a pool settlement fund and a pool expense fund, but any withdrawals from the cash reserve must be reimbursed.

(d) An order of the board establishing a statewide pooling arrangement that has been approved in a referendum may be rescinded in the same manner as provided for approval of the order under subsection (14)(a). Such order may be amended without a referendum if, prior to amending the order, the board gives written notice of its intended action and holds a public hearing as required under the Montana Administrative Procedure Act.

(15) The requirements hereinabove set forth concerning notices of hearings for the establishment of milk pricing formulas shall apply to any hearings regarding base or quota plans or statewide pooling arrangements or abandonment thereof.

(16) Rules adopted pursuant to this section shall be enforced and audited for compliance by the milk control bureau of the department of commerce.

81-23-303. Rules of fair trade practices. The department may adopt reasonable rules governing fair trade practices as they pertain to the transaction of business among licensees under this chapter and among licensees and the general public. Those rules shall contain but are not limited to provisions prohibiting the following methods of doing business which are unfair, unlawful, and not in the public interest:

(1) the payment, allowance, or acceptance of secret rebates, secret refunds, or unearned discounts by a person, whether in the form of money or otherwise;

(2) the giving of milk, cream, dairy products, services, or articles of any kind, except to bona fide charities, for the purpose of securing or retaining the fluid milk or fluid cream business of a customer;

81-23-404. Cooperation with other governmental agencies. In order to secure a uniform system of milk control, the department shall confer and cooperate with the proper authorities of other states and of the United States, including the secretary of agriculture of the United States, and for those purposes, the department may conduct joint hearings, issue joint or concurrent orders, and exercise all its powers under this chapter.

Each day's violation is a separate offense.

(2) The district courts have original jurisdiction in all criminal actions for violations of this chapter and in all civil actions for the recovery or enforcement of penalties provided for in this chapter. All of those actions, both criminal and civil, shall be tried in the district court.

The department may begin any proceeding at law or in equity as may appear necessary to enforce compliance with this chapter or to enforce compliance with an order or rule of the board or department adopted under this chapter or to obtain a judicial interpretation of any of them. In addition to any other remedy, the department may apply to the district court of the district where the action arises for relief by injunction, mandamus, or any other appropriate remedy in equity without being compelled to allege or prove that an adequate remedy at law does not otherwise exist. The department may not be required to post bond in an action to which it is a party whether upon appeal or otherwise. All legal actions may be brought by or against the board or department in the name of the department of commerce, and it is not necessary in an action to which the department is a party that the action be brought by or against this state on relation of the department. The department may sue by its own attorney, and it may also call upon a county attorney to represent it in the district court of his county or the attorney general to represent it on appeal to the supreme court, or it may associate its own attorney with either in any court.

82-1-202. Action to compel release — procedure without court action. (1) If the lessee or assignee thereof neglects or refuses to execute a release as provided by this part, the owner of the leased premises may sue in any court of competent jurisdiction to obtain the release, and in such action he also may recover from the lessee, his successor, or assigns the sum of $100 as damages, all costs, together with a reasonable attorney's fee for preparing and prosecuting the suit, and any additional damages that the evidence in the case warrants. Writs of attachment may issue as in other cases. If in the action the plaintiff fails to establish the forfeiture of the lease, an attorney's fee must be allowed to the lessee or assignee of the lease. Issues in regard to attorney's fees shall be determined in the same manner as other issues in such actions.

(2) When, by its terms, an oil or gas lease has expired and is subject to forfeiture for nonperformance and more than 3 years have elapsed since the expiration, the owner of the leased premises, in addition to all other remedies, may serve a written notice on the lessee or on the assignee thereof, which notice shall state:

(a) the names of the lessor, lessee, and assignee thereof if assigned;
(b) the date of the lease and the date of the expiration thereof;
(c) the description of the lands leased;
(d) the place, book, and page where the lease is recorded; and
(e) that if the lessee or assignee fails to execute a release of record of the lease or abstract of the lease, the lease shall be terminated and of no effect and shall cease to be a lien upon the lands described therein, unless the lessee or the assignee thereof, within 60 days from the date of service of the notice, files, in the county clerk's office in the county where the lease or abstract of such lease is recorded, an affidavit stating that the lease is in effect and delivers a copy thereof to the owner of the leased lands.

(3) If the lessee or the assignee thereof resides in the county where the lease or abstract of the lease is recorded, the notice shall be personally served on that person. If the lessee or the assignee thereof does not reside in that county but his address appears on the records in that county clerk's office or is otherwise known, the notice shall be mailed by certified mail to that person at that address, and in addition thereto the notice shall be published once a week for 2 consecutive weeks in a newspaper of general circulation in the county in which the lands are situated. If the address of the lessee or assignee is unknown, the notice shall be published in the manner provided above. The date of service of the notice, if served personally, the date of mailing, if served by mail, and the first date of publication of the notice, if published, must be at least 60 days before the date of termination referred to in the notice.

(4) Upon the expiration of the time mentioned in the notice, if the affidavit of the lessee or assignee has not been filed as herein provided, the owner of the leased lands shall file an affidavit of service of the notice in the county clerk's office of the county in which the lands are located, and the affidavit shall be kept as a permanent file in his office, and this proof of notice when so filed is prima facie evidence of the sufficiency of the notice, and from the filing thereof the lease is terminated and the lands released from the lien thereof.

At least 20 days before bringing the action provided for in this part, the owner of the leased land, either by himself or by his agent or attorney, shall demand of the holder of the lease, if such demand by ordinary diligence can be made in this state, that said lease or abstract of such lease be released of record. 82-1-204. Joinder of plaintiffs in actions concerning oil and gas leases. (1) In an action for the cancellation of an oil and/or gas lease or leases or quieting title against the claims thereunder, two or more plaintiffs may join in a single action against a common lessee and any one claiming by, through, or under such lessee as an assignee or otherwise. In the complaint in such action the cause or causes of action of each plaintiff shall be set forth separately and there shall be designated the lease or leases or claims or interests sought to be canceled or quieted. It shall be no defense to such an action that the lands of the plaintiffs are noncontiguous or that there is a lack of mutuality of interest between the plaintiffs in the subject of the action or in the relief sought, and the decree in such action shall specify the lease, leases, claims, or interests canceled or quieted.

(2) This procedure shall be in addition to and not in substitution of any existing remedies now allowed by law.

History: En. Sec. 6, Ch. 513, L. 1979.

82-1-302. Creation of trust for unlocatable mineral, leasehold, or royalty interest owners. (1) Any person who owns an interest in minerals underlying a tract of land may petition the district court of the county in which the tract or a portion of the tract is located to declare a trust in favor of a person or persons also owning or claiming an interest in the minerals underlying the tract if their place of residence and present whereabouts is unknown and cannot reasonably be ascertained.

(2) In requesting the appointment of a trustee, the petitioner must show that:

(a) a diligent but unsuccessful effort to locate the absent owner or claimant has been made; and

(b) appointment of a trustee will be in the best interest of all owners of interest in the minerals.

(3) After determining that the conditions of subsection (2) have been met, the court shall appoint the clerk of court as a trustee and shall authorize him to execute and deliver an oil, gas, or other mineral lease, a ratification, division order, or other related document or instrument on such terms and conditions as the court may approve.

(2) No trustee or attorney fees may be paid from the trust proceeds.

(3) All bonuses, rental payments, royalties, and other income shall be paid to the trustee until the trust is terminated and notice of its termination given to all interested parties. The trustee shall distribute all money held in the trust to the person or persons entitled to it upon the order of the district court.

(4) A trust in favor of unlocatable owners shall be in force until the unlocatable owners of the mineral interest in question have successfully claimed the share of funds held in trust and filed the notice provided in 82-1-306.

(5) The trustee shall invest funds under his management in the manner of a prudent man, as provided in 72-34-114. Fifty percent of the interest earned on each trust shall be credited to the general fund of the county in which the mineral interest is located to defray the costs of administration.

(6) Funds held in the trusts are subject to the provisions governing abandoned property contained in Title 70, chapter 9.

An accounting for the funds, any related documents, and any instrument creating a trust must be filed with the funds.

(2) No person may personally hold for longer than 6 months any bonuses, rental payments, royalties, and other income for unlocatable owners or claimants of an interest in minerals, but in such case must petition the district court for creation of a trust as provided in 82-1-302.

(3) If any person fails to comply with subsections (1) or (2), he is liable for all attorney fees and court costs and interest on such funds at twice the current average passbook account rate paid by financial institutions in that district.

History: En. Sec. 4, Ch. 513, L. 1979.

82-1-306. Filing of addresses. Upon the payment of a $5 fee, any person claiming an interest in minerals underlying a tract of land which is the subject of a trust proceeding under 82-1-302 may file with the clerk and recorder of each county wherein the mineral interests lie a notice of his address and the legal description of his interest and thereby establish a rebuttable presumption that such person owns the interest claimed.

Part 1

Location and Record of Claims

82-2-101. Manner of locating claim. Any person who discovers upon the public domain of the United States, within the state of Montana, a vein, lode, or ledge of rock in place bearing gold, silver, cinnabar, lead, tin, copper, or other valuable deposits or a placer deposit of gold or other deposit of minerals having a commercial value which is subject to entry and patent under the mining laws of the United States may, if qualified by the laws of the United States, locate a mining claim upon such vein, lode, ledge, or deposit in the following manner:

(1) He shall post conspicuously at the point of discovery a written or printed notice of location containing the name of the claim, the name of the locator or locators, if there be more than one, the date of the location, which shall be the date of posting such notice, and the approximate dimensions of area of the claim intended to be appropriated.

(2) Within 30 days after posting the notice of location, he shall distinctly mark the location on the ground so that its boundaries can be readily traced. It shall be prima facie evidence that the location is properly marked if the boundaries are defined by a monument at each corner or angle of the claim, consisting of any one of the following kinds:

(a) a tree at least 8 inches in diameter and blazed on four sides;

(b) a post at least 4 inches square by 4 feet 6 inches in length, set 1 foot in the ground, unless solid rock should occur at a less depth, in which case the post should be set upon such rock and surrounded in all cases by a mound of earth or stone at least 4 feet in diameter by 2 feet in height. A squared stump of the requisite size, surrounded by such mound, shall be deemed the equivalent of a post and mound.

(c) a stone at least 6 inches square by 18 inches in length, set two-thirds of its length in the ground, with a mound of earth or stone alongside at least 4 feet in diameter by 2 feet in height; or

(d) a boulder at least 3 feet above the natural surface of the ground on the upper side. Where other monuments or monuments of lesser dimensions than those above described are used, it shall be a question for the jury or for the court where the action is tried without a jury as to whether the location has been marked upon the ground so that its boundaries can be readily traced. Whatever monument is used, it must be marked with the name of the claim and the designation of the corner, either by number or cardinal point.

(3) Within 60 days after posting such notice, the locator shall comply with the United States mining laws.

History: En. Sec. 3610, Pol. C. 1895; en. Sec. 1, Ch. 16, L. 1907; Sec. 2283, Rev. C. 1907; re-en. Sec. 7365, R.C.M. 1921; Cal. Civ. C. Sec. 1426; re-en. Sec. 7365, R.C.M. 1935; amd. Sec. 1, Ch. 4, Ex. L. 1971; R.C.M. 1947, 50-701.

82-2-102. Record of certificate of location. (1) Within 60 days after posting the notice of location, the locator shall record his location in the office of the county clerk of the county in which the mining claim is situated. The record shall consist of a certificate of location for each claim containing:

(a) the name of the lode or claim and whether located as a lode or placer claim;

(b) the name of the locator or locators, if there be more than one, together with the post-office address of such locator or locators;

(c) the date of location and the description of the claim, with reference to some natural object or permanent monument, as will identify the claim and the section, township, and range wherein the claim is situated by projected survey lines, if located in unsurveyed country;

(d) the directions and distances from the discovery point which describe the claim.

(2) The certificate of location must be verified before some officer authorized to administer oaths by the locator or one of the locators, if there be more than one, or by authorized agent. In the case of a corporation, the verification may be made by any officer thereof or by an authorized agent. When the verification is made by an agent, the fact of the agency shall be stated in the affidavit. A certificate of location so verified or a certified copy thereof is prima facie evidence of all facts properly recited therein. Failure of the locator or locators to record a certificate of location as herein required shall create a prima facie presumption of intent to abandon. However, recordation after the 60-day period but before the ground is located by another renews the location and saves the rights of the original locator. Nothing contained in 82-2-112 affects the prima facie presumption created by this section.

When the verification is made by an agent, the fact of the agency shall be stated in the affidavit. Such affidavit or a certified copy thereof is prima facie evidence of the facts therein stated. The failure to file such affidavits within the period allowed therefor shall be prima facie evidence that such labor has not been performed and that the owner of the claim or claims has abandoned and surrendered same.

The rights of a relocator of any abandoned or forfeited mining claim hereafter relocated shall date from the posting of his notice of location thereon, and while he is duly performing the acts required by law to perfect his location, his rights shall not be affected by any reentry or resumption of work by the former locator or claimant.

Where a locator or claimant amends or relocates his own claim, such amendment or relocation shall not be construed as a waiver of any right or title acquired by him by virtue of the previous location or record thereof, except as to such portions of the previous location as may be omitted from the boundaries of the claim as amended or relocated. As to the portion of ground included both in the original location and the location as amended or relocated, he may rely either upon the original location or the location as amended or relocated or upon both; provided that nothing herein contained shall be construed as permitting the locator or claimant to hold a tract which does not include a valid discovery.

In determining the amount of the bond within the above limits, the board shall take into consideration the character and nature of the surface and subsurface disturbances, the future suitable use of the land involved, and the cost of removing or burying facilities, subsidence stabilization, water controls, backfilling, grading, topsoiling, and reclamation to be required. Notwithstanding the above limits, the bond may not be less than the total estimated cost to the state of completing the work described in the reclamation plan.

This decision is binding on the department with regard to strip-mining or underground-mining permit applications as specified in part 2 of this chapter unless:

(1) new information is submitted or obtained in compliance with part 2 of this chapter which indicates a situation not existing or known at the time of the issuance of a permit under this part;

(2) an application under this part misrepresented information related to the criteria;

The notice or order shall be handed to the operator in person or served by certified or registered mail addressed to the permanent address shown on the application for a permit. The notice of noncompliance or order of suspension shall specify in what respects the operator has failed to comply with this part or the rules or orders of the department and the board. If the operator has not complied with the requirement set forth in the notice of noncompliance or order of suspension within time limits set therein, the permit may be revoked by order of the board and the performance bond forfeited to the department.

(2) Any additional strip-mining or underground-mining or mine-site location permits held by an operator whose mine-site location permit has been revoked shall be suspended and the operator is not eligible to receive another permit or to have the suspended permits reinstated until he has complied with all the requirements of this part in respect to former permits issued him. An operator who has forfeited a bond is not eligible to receive another permit unless the land for which the bond was forfeited has been reclaimed without cost to the state or the operator has paid into the reclamation account a sum together with the value of the bond the board finds adequate to reclaim the lands. The department may not issue any additional permits to an operator who has repeatedly been in noncompliance or violation of this part.

82-4-202. Policy — findings. (1) It is the declared policy of this state and its people to:

(a) maintain and improve the state's clean and healthful environment for present and future generations;

(b) protect its environmental life-support system from degradation;

(c) prevent unreasonable degradation of its natural resources;

(d) restore, enhance, and preserve its scenic, historic, archaeologic, scientific, cultural, and recreational sites;

(e) demand effective reclamation of all lands disturbed by the taking of natural resources and maintain state administration of the reclamation program;

(f) require the legislature to provide for proper administration and enforcement, create adequate remedies, and set effective requirements and standards (especially as to reclamation of disturbed lands) in order to achieve the aforementioned objectives; and

(g) provide for the orderly development of coal resources through strip or underground mining to assure the wise use of these resources and prevent the failure to conserve coal.

(2) The legislature hereby finds and declares that:

(a) in order to achieve the aforementioned policy objectives, promote the health and welfare of the people, control erosion and pollution, protect domestic stock and wildlife, preserve agricultural and recreational productivity, save cultural, historic, and aesthetic values, and assure a long-range dependable tax base, it is reasonably necessary to require, after March 16, 1973, that all strip-mining and underground-mining operations be limited to those for which 5-year permits are granted, that no permit be issued until the operator presents a comprehensive plan for reclamation and restoration and a coal conservation plan, together with an adequate performance bond, and the plan is approved, that certain other things must be done, that certain remedies are available, that certain lands because of their unique or unusual characteristics may not be strip-mined or underground-mined under any circumstances, all as more particularly appears in the remaining provisions of this part, and that the department be given authority to administer and enforce a reclamation program that complies with Public Law 95-87, the Surface Mining Control and Reclamation Act of 1977, as amended;

(b) this part be deemed to be an exercise of the authority granted in the Montana constitution, as adopted June 6, 1972, and, in particular, a response to the mandate expressed in Article IX thereof and also be deemed to be an exercise of the general police power to provide for the health and welfare of the people.

82-4-203. Definitions. Unless the context requires otherwise, in this part the following definitions apply:

(1) "Abandoned" means an operation where no mineral is being produced and where the department determines that the operation will not continue or resume.

(2) "Alluvial valley floor" means the unconsolidated stream-laid deposits holding streams where water availability is sufficient for subirrigation or flood irrigation agricultural activities; but the term does not include upland areas which are generally overlain by a thin veneer of colluvial deposits composed chiefly of debris from sheet erosion, deposits by unconcentrated runoff or slope wash, together with talus, other mass movement accumulation, and windblown deposits.

(3) "Aquifer" means any geologic formation or natural zone beneath the earth's surface that contains or stores water and transmits it from one point to another in quantities which permit or have the potential to permit economic development as a water source.

(4) "Area of land affected" means the area of land from which overburden is to be or has been removed and upon which the overburden is to be or has been deposited and includes all land overlying any tunnels, shafts, or other excavations used to extract the mineral, lands affected by the construction of new railroad loops and roads or the improvement or use of existing railroad loops and roads to gain access and to haul the mineral, processing facilities at or near the mine site or other mine associated facilities, waste deposition areas, treatment ponds, and any other surface or subsurface disturbance associated with strip mining or underground mining, and all activities necessary and incident to the reclamation of such operations.

(5) "Bench" means the ledge, shelf, table, or terrace formed in the contour method of strip mining.

(6) "Board" means the board of land commissioners provided for in Article X, section 4, of the constitution of this state.

(7) "Coal conservation plan" means the planned course of conduct of a strip- or underground-mining operation to include plans for the removal and utilization of minable and marketable coal located within the area planned to be mined.

(8) "Coal preparation" means the chemical or physical processing of coal and its cleaning, concentrating, or other processing or preparation. The term does not mean the conversion of coal to another energy form or to a gaseous

or liquid hydrocarbon, except for incidental amounts that do not leave the plant, nor does the term mean processing for other than commercial purposes.

(9) "Coal preparation plant" means a commercial facility where coal is subject to coal preparation. The term includes commercial facilities associated with coal preparation activities but is not limited to loading buildings, water treatment facilities, water storage facilities, settling basins and impoundments, and coal processing and other waste disposal areas.

(10) "Commissioner" means the commissioner of state lands provided for in 2-15-3202.

(11) "Contour strip mining" means that strip-mining method commonly carried out in areas of rough and hilly topography in which the coal or mineral seam outcrops along the side of the slope and entrance is made to the seam by excavating a bench or table cut at and along the site of the seam outcropping with the excavated overburden commonly being cast down the slope below the mineral seam and the operating bench.

(12) "Degree" means from the horizontal and in each case is subject to a tolerance of 5% error.

(13) "Department" means the department of state lands provided for in Title 2, chapter 15, part 32.

(14) "Failure to conserve coal" means the nonremoval or nonutilization of minable and marketable coal by an operation, provided that the nonremoval or nonutilization of minable and marketable coal in accordance with reclamation standards established by the department shall not be considered failure to conserve coal.

(15) "Fill bench" means that portion of a bench or table which is formed by depositing overburden beyond or downslope from the cut section as formed in the contour method of strip mining.

(16) "Imminent danger to the health and safety of the public" means the existence of any condition or practice or any violation of a permit or other requirement of this part in a strip- or underground-coal-mining and reclamation operation that could reasonably be expected to cause substantial physical harm to persons outside the permit area before such condition, practice, or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same conditions or practices giving rise to the peril, would not expose himself or herself to the danger during the time necessary for abatement.

(17) "Marketable coal" means a minable coal that is economically feasible to mine and is fit for sale in the usual course of trade.

(18) "Method of operation" means the method or manner by which the cut, open pit, shaft, or excavation is made, the overburden is placed or handled, water is controlled, and other acts are performed by the operator in the process of uncovering and removing the minerals that affect the reclamation of the area of land affected.

(19) "Minable coal" means that coal which can be removed through strip- or underground-mining methods adaptable to the location that coal is being mined or is planned to be mined.

(20) "Mineral" means coal and uranium.

(21) "Operation" means all of the premises, facilities, railroad loops, roads, and equipment used in the process of producing and removing mineral from and reclaiming a designated strip-mine or underground-mine area, including coal preparation plants, and all activities, including excavation incident thereto, or prospecting for the purpose of determining the location, quality, or quantity of a natural mineral deposit.

(22) "Operator" means a person engaged in strip mining or underground mining who removes or intends to remove more than 10,000 cubic yards of mineral or overburden or a person engaged in coal mining who removes or intends to remove more than 250 tons of coal from the earth by mining within 12 consecutive calendar months in any one location or a person engaged in operating a coal preparation plant.

(23) "Overburden" means all of the earth and other materials which lie above a natural mineral deposit and also means such earth and other material after removal from their natural state in the process of mining.

(24) "Person" means a person, partnership, corporation, association, or other legal entity or any political subdivision or agency of the state or federal government.

(25) "Prime farmland" means that land previously prescribed by the United States secretary of agriculture on the basis of such factors as moisture availability, temperature regime, chemical balance, permeability, surface-layer composition, susceptibility to flooding, and erosion characteristics and which historically has been used for intensive agricultural purposes and as defined in the Federal Register.

(26) "Prospecting" means the removal of overburden, core drilling, construction of roads, or any other disturbance of the surface for the purpose of determining the location, quantity, or quality of a natural mineral deposit and, on areas designated unsuitable for coal mining pursuant to 82-4-227 and 82-4-228, the gathering of surface or subsurface geologic, physical, or chemical data by mapping, trenching, geophysical, or other techniques necessary to determine the quality and quantity of overburden and coal in an area and the gathering of environmental data to establish the conditions of an area before beginning strip- or underground-coal-mining and reclamation operations under this part.

(27) "Reclamation" means backfilling, subsidence stabilization, water control, grading, highwall reduction, topsoiling, planting, revegetation, and other work to restore an area of land affected by strip mining or underground mining under a plan approved by the department.

(29) "Strip mining" means any part of the process followed in the production of mineral by the opencut method, including mining by the auger method or any similar method which penetrates a mineral deposit and removes mineral directly through a series of openings made by a machine which enters the deposit from a surface excavation or any other mining method or process in which the strata or overburden is removed or displaced in order to recover the mineral. For the purposes of this part only, strip mining also includes

remining and coal preparation. The terms "remining" and "coal preparation" are not included in the definition of "strip mining" for purposes of Title 15, chapter 35, part 1.

(30) "Subsidence" means a vertically downward movement of overburden materials resulting from the actual mining of an underlying mineral deposit or associated underground excavations.

(31) "Surface owner" means a person who holds legal or equitable title to the land surface and whose principal place of residence is on the land or who personally conducts farming or ranching operations upon a farm or ranch unit to be directly affected by strip-mining operations or who receives directly a significant portion of his income, if any, from such farming or ranching operations or the state of Montana where the state owns the surface.

(32) "Topsoil" means the unconsolidated mineral matter naturally present on the surface of the earth that has been subjected to and influenced by genetic and environmental factors of parent material, climate, macroorganisms and microorganisms, and topography, all acting over a period of time, and that is necessary for the growth and regeneration of vegetation on the surface of the earth.

(33) "Underground mining" means any part of the process followed in the production of a mineral such that vertical or horizontal shafts, slopes, drifts, or incline planes connected with excavations penetrating the mineral stratum or strata are utilized and includes mining by in situ methods.

(34) "Unwarranted failure to comply" means the failure of a permittee to prevent the occurrence of any violation of his permit or any requirement of this part due to indifference, lack of diligence, or lack of reasonable care, or the failure to abate any violation of such permit or this part due to indifference, lack of diligence, or lack of reasonable care.

(35) "Waiver" means any document which demonstrates the clear intention to release rights in the surface estate for the purpose of permitting the extraction of subsurface minerals by strip-mining methods.

(36) "Written consent" means such written statement as is executed by the owner of the surface estate, upon a form approved by the department, demonstrating that such owner consents to entry of an operator for the purpose of conducting strip-mining operations and that such consent is given only to such strip-mining and reclamation operations which fully comply with the terms and requirements of this part.

82-4-221. Mining permit required. (1) An operator may not engage in strip or underground mining without having first obtained from the department a permit designating the area of land affected by the operation, which designation shall include all lands reasonably anticipated to be mined or otherwise affected during the applicable 5-year period. The permit shall authorize the operator to engage in strip or underground mining upon the area of land described in his application and designated in the permit for a period of 5 years from the date of its issuance. Such permit shall be renewable upon each 5-year anniversary thereafter upon application to the department at least 120 but not more than 150 days prior to the renewal date so long as the operator is in compliance with the requirements of this part, the rules hereunder, and the reclamation plan provided for in 82-4-231 and agrees to comply with all applicable laws and rules in effect at the time of renewal. Such renewal shall further be subject to the denial provisions of 82-4-227, 82-4-234, and 82-4-251. On application for renewal, the burden shall be on the opponents of renewal to demonstrate that the permit should not be renewed. A permit shall terminate if the permittee has not commenced strip- or underground-mining operations pursuant to the permit within 3 years of the issuance of the permit. However, the department may grant reasonable extensions of time upon a showing that such extensions are necessary by reason of litigation precluding the commencement or threatening substantial economic loss to the permittee or by reason of conditions beyond the control and without the fault or negligence of the permittee. With respect to coal to be mined for use in a synthetic fuel facility or specific major electric generating facility, the permittee is considered to have commenced strip- or underground-mining operations at such time as the construction of the synthetic or generating facility is initiated.

(2) As a condition to the issuance of every permit issued under this part, an authorized representative of the department shall, without advance notice, have the right of entry to, upon, or through a strip- or underground-mining operation or any premises in which any records required to be maintained under this part are located and may, at reasonable times and without delay, have access to copy any records and inspect any monitoring equipment or method of operation required under this part. When an inspection results from information provided to the department by any person, the department shall notify that person when the inspection is proposed to be made and that person shall be allowed to accompany the inspector during the inspection.

(3) During the term of the permit, the permittee may submit an application for a revision of the permit, together with a revised reclamation plan, to the department. The department may not approve the application unless it finds that reclamation in accordance with this part would be accomplished. Application for minor revision shall be approved or disapproved within a

reasonable time, depending on the scope and complexity, but in no case longer than 120 days. Applications for major revisions are subject to all the permit application requirements and procedures.

If so, the applicant shall certify the fact.

(ii) whether any of the parties or persons specified in subsection (1)(g)(i) have ever had a strip-mining or underground-mining license or permit issued by any other state or federal agency revoked or have ever forfeited a strip-mining or underground-mining bond or a security deposited in lieu of a bond. If test borings or core samplings are submitted, each permit application must contain two copies each of two sets of geologic cross sections accurately depicting the known geologic makeup beneath the surface of the affected land. Each set must depict subsurface conditions at intervals the department requires across the surface and must run at a 90-degree angle to the other set. The department may not require intervals of less than 500 feet. Each cross section must depict the thickness and geologic character of all known strata, beginning with the topsoil. In addition, each application for an underground-mining permit must be accompanied by cross sections and maps showing the proposed underground locations of all shafts, entries, and haulageways or other excavations to be excavated during the permit period. These cross sections must also include all existing shafts, entries, and haulageways.

(m) be certified as follows: "I, the undersigned, hereby certify that this map is correct and shows to the best of my knowledge and belief all the information required by the mining laws of this state." The certification must be signed and notarized. The department may reject a map as incomplete if its accuracy is not attested.

(n) contain other or further information as the department may require.

(3) If the department finds that the probable total annual production at all locations of any strip-mining or underground-coal-mining operation applied for will not exceed 100,000 tons, any determination of probable hydrologic consequences that the department requires and the statement of result of test borings or core samplings must, upon written request of the operator, be performed by a qualified public or private laboratory designated by the department. The department shall assume the cost of the determination and statement to the extent that it has received funds for this purpose.

(4) In addition to the information and maps required by this section, each application for a permit must be accompanied by detailed plans or proposals showing the method of operation, the manner, time or distance, and estimated cost for backfilling, subsidence stabilization, water control, grading work, highwall reduction, topsoiling, planting, and revegetating, and a reclamation plan for the area affected by the operation, which proposals must meet the requirements of this part and rules adopted under this part. (5) Each applicant for a coal mining permit shall submit as part of the application a certificate issued by an insurance company authorized to do business in the state, certifying that the applicant has in force for the strip-mining or underground-mining and reclamation operations for which the permit is sought a public liability insurance policy, or evidence that the applicant has satisfied other state or federal self-insurance requirements. This policy must provide for personal injury and property damage protection in an amount adequate to compensate any persons damaged as a result of strip-mining or underground-coal-mining and reclamation operations, including use of explosives, and entitled to compensation under applicable provisions of state law. The permittee shall maintain the policy in full force and effect during the term of the permit and any renewal until all reclamation operations have been completed.

(6) Each applicant for a strip-mining or underground-mining reclamation permit shall file a copy of his application for public inspection with the clerk and recorder at the courthouse of the county in which the major portion of mining is proposed to occur.

82-4-223. Permit fee and surety bond. (1) An application fee of $100 shall be paid before the permit required in this part shall be issued.

(2) Before a permit may be issued, the operator shall file with the department a bond payable to the state of Montana with surety satisfactory to the department in the penal sum to be determined by the board, on the recommendation of the commissioner, of not less than $200 for each acre or fraction thereof of the area of land affected, with a minimum bond of $10,000, conditioned upon the faithful performance of the requirements set forth in this part and of the rules of the board. The operator may elect to deposit cash, negotiable bonds, or negotiable certificates of deposit of any bank organized or transacting business in the United States. The cash deposit or market value of such securities shall be equal to or greater than the amount of the bond required for the bonded area. The level of bonding shall be relative to the degree of disturbance projected by the original permit and the annual report. A political subdivision or agency of the state need not file a bond unless required to do so by the board. The board shall adjust the amount of bond required if the cost of reclamation changes.

(3) In determining the amount of the bond, the board shall take into consideration the character and nature of the overburden, the future suitable use of the land involved, and the cost of backfilling, grading, highwall

reduction, subsidence stabilization, water control, topsoiling, and reclamation to be required, but in no event shall the bond be less than the total estimated cost to the state of completing the work described in the reclamation plan.

The department may increase or reduce the area of land affected by an operation under a permit on application by an operator, but an increase may not extend the period for which an original permit was issued. An operator may, at any time, apply to the department for an amendment of the permit so as to increase or reduce the acreage affected by it. The operator shall file an application and map in the same form and with the same content as required for an original application under this part and shall pay an application fee of $50 and shall file with the department a supplemental bond in the amount to be determined under 82-4-223 for each acre or fraction of an acre of the increase approved. All procedures of this part pertaining to original applications apply to applications for the increase of the area of land affected, except for incidental boundary revisions. If the department approves a reduction in the acreage covered by the original or supplemental permit, it shall release the bond for each acre reduced, but in no case shall the bond be reduced below $10,000, except as provided in 82-4-223.

History: En. Sec. 7, Ch. 325, L. 1973; amd. Sec. 2, Ch. 352, L. 1977; R.C.M. 1947, 50-1040; amd. Sec. 8, Ch. 550, L. 1979.

82-4-226. Prospecting permit. (1) On and after March 16, 1973, prospecting by any person on land not included in a valid strip-mining or underground-mining permit shall be unlawful without possessing a valid prospecting permit issued by the department as provided in this section. No prospecting permit shall be issued until the person submits an application, the application is examined, amended if necessary, and approved by the department, and adequate reclamation performance bond is posted, all of which prerequisites must be done in conformity with the requirements of this part.

(2) An application for a prospecting permit shall be made in writing, notarized, and submitted to the department in duplicate upon forms prepared and furnished by it. The application shall include among other things a prospecting map and a prospecting reclamation plan of substantially the same character as required for a surface-mining or underground-mining map and reclamation plan under this part. The department shall determine by rules the precise nature of such required prospecting map and reclamation plan. Any applicant who intends to prospect by means of core drilling shall specify the location and number of holes to be drilled, methods to be used in sealing aquifers, and such other information as may be required by the department. The applicant must state what types of prospecting and excavating techniques will be employed on the affected land. The application shall also include any other or further information the department may require.

(3) The application shall be accompanied by a fee of $100. This fee shall be used as a credit toward the strip-mining or underground-mining permit fee provided by this part if the area covered by the prospecting permit becomes covered by a valid surface-mining or underground-mining permit obtained before or at the time the prospecting permit expires.

(4) Before the department gives final approval to the prospecting permit application, the applicant shall file with the department a reclamation and revegetation bond in a form and in an amount as determined in the same manner for strip-mining or underground-mining reclamation and revegetation bonds under this part.

(5) In the event that the holder of a prospecting permit desires to strip mine or underground mine the area covered by the prospecting permit and has fulfilled all the requirements for a strip-mining or underground-mining permit, the department may permit the postponement of the reclamation of the acreage prospected if that acreage is incorporated into the complete reclamation plan submitted with the application for a strip-mining or underground-mining permit. Any land actually affected by prospecting or excavating under a prospecting permit and not covered by the strip-mining or underground-mining reclamation plan shall be promptly reclaimed.

(6) The prospecting permit shall be valid for 1 year and shall be subject to renewal, suspension, and revocation in the same manner as strip-mining or underground-mining permits under this part.

(7) The holder of the prospecting permit shall file with the department the same progress reports, maps, and revegetation progress reports as are required of strip-mining or underground-mining operators under this part.

History: En. Sec. 8, Ch. 325, L. 1973; amd. Sec. 20, Ch. 441, L. 1975; R.C.M. 1947, 50-1041; amd. Sec. 2, Ch. 196, L. 1979.

82-4-227. Refusal of permit. (1) An application for a prospecting, strip-mining, or underground-mining permit or major revision shall not be approved by the department unless, on the basis of the information set forth in the application, an on-site inspection, and an evaluation of the operation by the department, the applicant has affirmatively demonstrated that the requirements of this part and rules will be observed and that the proposed method of operation, backfilling, grading, subsidence stabilization, water control, highwall reduction, topsoiling, revegetation, or reclamation of the affected area can be carried out consistently with the purpose of this part. The applicant for a permit or major revision has the burden of establishing that his application is in compliance with this part and the rules adopted under it.

(2) The department shall not approve the application for a prospecting, strip-mining, or underground-mining permit where the area of land described in the application includes land having special, exceptional, critical, or unique characteristics or that mining or prospecting on that area would adversely affect the use, enjoyment, or fundamental character of neighboring land having special, exceptional, critical, or unique characteristics. For the purposes of this part, land is defined as having such characteristics if it possesses special, exceptional, critical, or unique:

(a) biological productivity, the loss of which would jeopardize certain species of wildlife or domestic stock;

(b) ecological fragility, in the sense that the land, once adversely affected, could not return to its former ecological role in the reasonable foreseeable future;

(c) ecological importance, in the sense that the particular land has such a strong influence on the total ecosystem of which it is a part that even temporary effects felt by it could precipitate a system-wide reaction of unpredictable scope or dimensions; or

(d) scenic, historic, archaeologic, topographic, geologic, ethnologic, scientific, cultural, or recreational significance. (In applying this subsection, particular attention should be paid to the inadequate preservation previously accorded Plains Indian history and culture.)

(3) The department may not approve an application for a strip- or underground-coal-mining permit or major revision unless the application affirmatively demonstrates that:

(a) the assessment of the probable cumulative impact of all anticipated mining in the area on the hydrologic balance has been made by the department and the proposed operation thereof has been designed to prevent material damage to the hydrologic balance outside the permit area; and

(b) the proposed strip- or underground-coal-mining operation would not:

(i) interrupt, discontinue, or preclude farming on alluvial valley floors that are irrigated or naturally subirrigated, excluding undeveloped rangelands that are not significant to farming on alluvial valley floors and those lands as to which the regulatory authority finds that if the farming that will be interrupted, discontinued, or precluded is of such small acreage as to be of negligible impact on the farm's agricultural production; or

(ii) materially damage the quantity or quality of water in surface water or underground water systems that supply these valley floors in subsection (3)(b)(i).

(4) Subsection (3)(b) does not affect those strip- or underground-coal-mining operations that in the year preceding the enactment of Public Law 95-87 produced coal in commercial quantities and were located within or

adjacent to alluvial valley floors or had obtained specific permit approval by the department to conduct strip- or underground-coal-mining operations within alluvial valley floors. If coal deposits are precluded from being mined under this subsection, the commissioner shall certify to the secretary of interior that the mineral owner or lessee may be eligible for participation in coal exchange programs pursuant to section 510(5) of Public Law 95-87.

(5) If the area proposed to be mined contains prime farmland, the department may not grant a permit to mine coal on the prime farmland unless it finds in writing that the applicant has the technological capability to restore the mined area, within a reasonable time, to equivalent or higher levels of yield as nonmined prime farmland in the surrounding area under equivalent levels of management and can meet the soil reconstruction standards of 82-4-232(3). Nothing in this subsection applies to any permit issued prior to August 3, 1977, or to any revisions or renewals thereof, or to any existing strip- or underground-mining operations for which a permit was issued prior to August 3, 1977.

(6) If the department finds that the overburden on any part of the area of land described in the application for a prospecting, strip-mining, or underground-mining permit is such that experience in the state with a similar type of operation upon land with similar overburden shows that substantial deposition of sediment in streambeds, subsidence, landslides, or water pollution cannot feasibly be prevented, the department shall delete that part of the land described in the application upon which the overburden exists. The burden is on the applicant to demonstrate that any area should not be deleted under this subsection.

(7) If the department finds that the operation will constitute a hazard to a dwelling house, public building, school, church, cemetery, commercial or institutional building, public road, stream, lake, or other public property, the department shall delete those areas from the prospecting, strip-mining, or underground-mining permit application before it can be approved. In no case may strip- or underground-coal-mining be allowed within 300 feet of any occupied dwelling, unless waived by the owner, nor within 300 feet of any public building, school, church, community, or institutional building, or public park; nor within 100 feet of a cemetery; nor within 100 feet of the outside right-of-way line of any public road, except where mine access roads or haulage roads join such right-of-way line. The department may permit such roads to be relocated or the area affected to lie within 100 feet of the road if, after public notice and opportunity for public hearing in the locality, a written finding is made that the interests of the public and the landowners affected will be protected.

(8) No strip- or underground-mining may be conducted within 500 feet of active or abandoned underground mines in order to prevent breakthroughs and to protect health or safety of miners. The department shall permit an operator to mine near, through, or partially through an abandoned underground mine or closer to an active underground mine if:

(a) the nature, timing, and sequencing of specific strip-mine activities and specific underground-mine activities are jointly approved by the department and the regulatory authority concerned with the health and safety of underground miners; and

(b) such operations will result in improved resource recovery, abatement of water pollution, or elimination of hazards to the health and safety of the public.

(9) The department may not approve an application for a strip- or underground-coal-mining operation if the area proposed to be mined is included within an area designated unsuitable for strip or underground coal mining or within an area under review for this designation under an administrative proceeding, unless in such an area as to which an administrative proceeding has commenced pursuant to this part, the operator making the permit application demonstrates that prior to January 1, 1977, he made substantial legal and financial commitments in relation to the operation for which he is applying for a permit.

(10) No permit or major permit revision for a strip- or underground-coal-mining operation may be issued unless the applicant has affirmatively demonstrated by its coal conservation plan that no failure to conserve coal will occur. The department may require the applicant to submit any information it considers necessary for review of the coal conservation plan.

(11) Whenever information available to the department indicates that any strip- or underground-coal-mining operation owned or controlled by the applicant is currently in violation of Public Law 95-87, as amended, or any state law required by Public Law 95-87, as amended, or any law, rule, or regulation of the United States or of any department or agency in the United States pertaining to air or water environmental protection, the department shall not issue a strip- or underground-coal-mining permit or major revision until the applicant submits proof that the violation has been corrected or is in the process of being corrected to the satisfaction of the administering agency.

(12) The department may not issue a strip- or underground-coal-mining permit or major revision to any applicant which it finds, after an opportunity for hearing, owns or controls any strip- or underground-coal-mining operation which has demonstrated a pattern of willful violations of Public Law 95-87, as amended, or any state law required by Public Law 95-87, as amended, of such a nature and duration and with such resulting irreparable damage to the environment to indicate an intent not to comply with the provisions of this part.

(13) Subject to valid existing rights, no strip- or underground-coal-mining operations except those which existed as of August 3, 1977, may be conducted on private lands within the boundaries of units of the national park system, the national wildlife refuge systems, the national wilderness preservation system, the wild and scenic rivers system, including study rivers designated under section 5(a) of the Wild and Scenic Rivers Act, or national recreation areas designated by act of congress.

82-4-228. Designation of land unsuitable for coal mining. (1) Any person having an interest that is or may be adversely affected may petition the department to have an area designated as unsuitable for strip- or underground-coal-mining operations or to have a designation terminated. The petition shall contain allegations of facts with supporting evidence which would tend to establish the allegations. Within 10 months after receipt of the petition, the department shall hold a public hearing in the locality of the affected area after giving appropriate notice and publication of the date, time, and location thereof. Before the hearing, any person may intervene by filing allegations of facts with supporting evidence which would tend to establish the allegations. Within 60 days after the hearing, the department shall issue and furnish to the petitioner and any other party to the hearing a written decision regarding the petition and the reasons therefor. The hearing need not be held if all petitioners reach agreement prior to the requested hearing and withdraw their request.

(2) If petitioned, the department shall review the area petitioned for pursuant to this section and:

(a) shall designate it as an area unsuitable for all or certain types of strip- or underground-coal-mining operations if it is determined that reclamation pursuant to the requirements of this part is not technologically and economically feasible; and

(b) may designate it as an area unsuitable for all or certain types of strip or underground coal mining if the proposed coal mining operations will:

(i) be incompatible with existing state or local land-use plans or programs to the extent they affect mining in the area; or

(ii) affect fragile or historic lands in which these operations could result in significant damage to important historic, cultural, scientific, and esthetic values and natural systems; or

(iii) affect renewable resource lands in which these operations could result in a substantial loss or reduction of long-range productivity of water supply or of food or fiber products, these lands to include aquifers and aquifer recharge areas; or

(iv) affect natural hazard lands in which these operations could substantially endanger life and property, these lands to include areas subject to frequent flooding and areas of unstable geology.

(3) Prior to designating any land areas as unsuitable for strip- or underground-coal-mining operations, the department shall prepare a detailed statement on:

(a) the potential coal resources of the area;

(b) the demand for coal resources; and

(c) the impact of this designation on the environment, economy, and supply of coal.

(4) A designation does not prevent mineral exploration pursuant to this part of any area so designated.

(5) The requirements of this section do not apply to lands on which strip- or underground-coal-mining operations are being conducted pursuant to a

permit issued under this part or where substantial legal and financial commitments in these operations were in existence prior to January 4, 1977.

82-4-231. Submission of and action on reclamation plan. (1) As rapidly, completely, and effectively as the most modern technology and the most advanced state of the art will allow, each operator granted a permit under this part shall reclaim and revegetate the land affected by his operation, except that underground tunnels, shafts, or other subsurface excavations need not be revegetated. Under the provisions of this part and rules adopted by the board, an operator shall prepare and carry out a method of operation, plan of grading, backfilling, highwall reduction, subsidence stabilization, water control, topsoiling, and a reclamation plan for the area of land affected by his operation. In developing a method of operation and plans of backfilling, subsidence stabilization, water control, grading, highwall reduction, topsoiling, and reclamation, all measures shall be taken to eliminate damages to landowners and members of the public, their real and personal property, public roads, streams, and all other public property from soil erosion, subsidence, landslides, water pollution, and hazards dangerous to life and property.

(2) The reclamation plan shall set forth in detail the manner in which the applicant intends to comply with this section and 82-4-232 through 82-4-234, as amended, and the steps to be taken to comply with applicable air and water quality laws and rules and any applicable health and safety standards.

(3) The application for permit or major revision of a permit, which shall contain the reclamation plan, shall be submitted to the department.

(4) The department shall determine whether the application is administratively complete. An application is administratively complete if it contains information addressing each application requirement in 82-4-222 and the rules implementing that section and all information necessary to initiate processing and public review. The department shall notify the applicant in writing of its determination no later than 90 days after submittal of the application. If the department determines that the application is not administratively complete, it shall specify in the notice those items which the application must address. The application shall be presumed administratively complete as to those requirements not specified in the notice.

(5) If the department determines that an environmental impact statement on the application is required, it shall notify the applicant in writing at the same time it gives the applicant notice pursuant to subsection (4).

(6) After the applicant receives notice that the application is administratively complete, he shall publish notice of filing of the application once a week for 4 consecutive weeks in a newspaper of general circulation in the locality of the proposed operation. The department shall notify various local

governmental bodies, planning agencies, sewage and water treatment authorities, and water companies in the locality in which the proposed mining will take place of the application and provide a reasonable time for them to submit written comments. Any person having an interest which is or may be adversely affected or the officer or head of any federal, state, or local governmental agency or authority shall have the right to file written objections to the proposed initial or revised application for permit or major revision within 30 days of the applicant's published notice. If written objections are filed and an objector requests an informal conference, the department shall hold an informal conference in the locality of the proposed operation within 30 days of receipt of the request. The department shall notify the applicant and all parties to the informal conference of its decision and the reasons therefor within 60 days of the informal conference. The department may arrange with the applicant upon request by any party to the administrative proceeding for access to the proposed mining area for the purpose of gathering information relevant to the proceeding.

(7) The filing of written objections or a request for an informal conference shall not preclude the department from proceeding with its review of the application as specified in subsection (8).

(8) (a) The department shall review each administratively complete application and determine the acceptability of the application. During the review, the department may propose modifications to the application or delete areas from the application in accordance with the requirements of 82-4-227. A complete application is considered acceptable when the application is in compliance with all of the applicable requirements of this part and the regulatory program pursuant to this part.

(b) If the applicant significantly modifies the application after the application has been determined administratively complete in accordance with subsection (4), the department shall under this section either deny the application or conduct a new review, including an administrative completeness determination, public notice, and objection period.

(c) If an environmental impact statement is determined to be necessary prior to making a permit decision, the department shall complete and publish the final environmental impact statement within 365 days of the date of notice provided pursuant to subsection (5).

(d) Within 120 days after it determines that an application is administratively complete, the department shall notify the applicant in writing whether the application is or is not acceptable. If the application is not acceptable, the department shall set forth the reasons why it is not acceptable, and it may propose modifications, delete areas, or reject the entire application. All items not specified as unacceptable in the department's notification are presumed to be acceptable. If the applicant revises the application in response to a notice of unacceptability, the department shall review the revised application and notify the applicant in writing within 120 days of the date of receipt whether the revised application is acceptable. If the revision constitutes a significant modification under subsection (8)(b), the department shall conduct a new review, beginning with an administrative completeness determination.

(e) When the application is determined to be acceptable, the department shall publish notice of its determination once a week for 2 consecutive weeks in a newspaper of general circulation in the locality of the proposed operation. Any person having an interest that is or may be adversely affected may file a written objection to the determination within 10 days of the department's last published notice. If a written objection is filed and an objector requests an informal conference, the department shall hold an informal conference in the locality of the proposed operation within 20 days of receipt of the request. The department shall notify the applicant and all parties to the informal conference of its decision and the reasons therefor within 10 days of the informal conference.

(f) The department shall prepare written findings granting or denying the permit or major revision application in whole or in part no later than 45 days from the date the application is determined acceptable or from the publication of the final environmental impact statement, whichever occurs later. However, if lands subject to the federal lands program are included in the application for permit or major revision, the department shall prepare and submit written findings to the federal regulatory authority. If the department's decision is to grant the permit, the department shall issue the permit on the date of its written finding or, if any federal concurrence is necessary, on the date when such concurrence is obtained. If the application is denied, specific reasons for the denial must be set forth in the written notification to the applicant.

(g) If the department fails to act within the times specified in this subsection (8), it shall immediately notify the board in writing of its failure to comply and the reasons for the failure to comply.

(9) The applicant, a landowner, or any person with an interest that is or may be adversely affected by the department's permit decision may within 30 days of that decision submit a written notice requesting a hearing by the board. The notice must contain the grounds upon which the requester contends that the decision is in error. The hearing shall be held within 30 days of the request. For purposes of a hearing, the board may order site inspections of the area pertinent to the application. The board shall within 20 days of the hearing notify the person who requested the hearing, by certified mail, and all other persons, by regular mail, of the findings and decisions. No person who presided at the informal conference may either preside at the hearing or participate in the decision thereon.

(10) In addition to the method of operation, grading, backfilling, subsidence stabilization, water control, highwall reduction, topsoiling, and reclamation requirements of this part and rules adopted under this part, the operator, consistent with the directives of subsection (1) of this section, shall:

(a) bury under adequate fill all toxic materials, shale, mineral, or any other material determined by the department to be acid producing, toxic, undesirable, or creating a hazard;

(b) as directed by rules seal off tunnels, shafts, or other openings or any breakthrough of water creating a hazard;

(c) impound, drain, or treat all runoff or underground mine waters so as to reduce soil erosion, damage to grazing and agricultural lands, and pollution of surface and subsurface waters;

(d) remove or bury all metal, lumber, and other refuse resulting from the operation;

(e) use explosives in connection with the operation only in accordance with department regulations designed to minimize noise, damage to adjacent lands, and water pollution and ensure public safety and for other purposes;

(f) adopt measures to prevent land subsidence unless the board approves a plan for inducing subsidence into an abandoned operation in a predictable and controlled manner with measures for grading, topsoiling, and revegetating the subsided land surface. In order for a controlled subsidence plan to be approved, the applicant must show that subsidence will not cause a direct or indirect hazard to any public or private buildings, roads, facilities, or use areas, constitute a hazard to human life or health, or constitute a hazard to domestic livestock or to a viable agricultural operation, or violate any other restrictions the board may consider necessary.

(g) stockpile and protect from erosion all mining and processing wastes until these wastes can be disposed of according to the provisions of this part;

(h) deposit as much stockpiled waste material as possible back into the mine voids upon abandonment in such manner as to prevent or minimize land subsidence. The remaining waste material shall be disposed of as provided by this part and the rules of the board.

(i) seal all portals, entryways, drifts, shafts, or other openings between the surface and underground mine workings when no longer needed;

(j) to the extent possible using the best technology currently available, minimize disturbances and adverse impacts of the operation on fish, wildlife, and related environmental values and achieve enhancement of such resources where practicable;

(k) minimize the disturbances to the prevailing hydrologic balance at the mine site and in associated offsite areas and to the quality and quantity of water in surface water and ground water systems both during and after strip- or underground-coal-mining operations and during reclamation by:

(i) avoiding acid or other toxic mine drainage by such measures as, but not limited to:

(A) preventing or removing water from contact with toxic-producing deposits;

(B) treating drainage to reduce toxic content which adversely affects downstream water upon being released to water courses;

(C) casing, sealing, or otherwise managing boreholes, shafts, and wells and keeping acid or other toxic drainage from entering ground and surface waters;

(ii) (A) conducting strip- or underground-mining operations so as to prevent, to the extent possible using the best technology currently available, additional contributions of suspended solids to streamflow or runoff outside the permit area but in no event shall contributions be in excess of requirements set by applicable state or federal law;

(B) constructing any siltation structures pursuant to (ii)(A) of this subsection prior to commencement of strip- or underground-mining operations, such structures to be certified by a qualified registered engineer to be constructed as designed and as approved in the reclamation plan;

(iii) cleaning out and removing temporary or large settling ponds or other siltation structures from drainways after disturbed areas are revegetated and stabilized and depositing the silt and debris at a site and in a manner approved by the department;

(iv) restoring recharge capacity of the mined area to approximate premining conditions;

(v) avoiding channel deepening or enlargement in operations requiring the discharge of water from mines;

(vi) preserving throughout the mining and reclamation process the essential hydrologic functions of alluvial valley floors in the arid and semiarid areas of the country; and

(vii) such other actions as the department may prescribe;

(l) conduct strip- or underground-mine operations in accordance with the approved coal conservation plan;

(m) stabilize and protect all surface areas, including spoil piles, to effectively control air pollution;

(n) seal all auger holes with an impervious and noncombustible material in order to prevent drainage except where the department determines that the resulting impoundment of water in such auger holes may create a hazard to the environment or the public health and safety;

(o) develop contingency plans to prevent sustained combustion;

(p) refrain from construction of roads or other access ways up a streambed or drainage channel or in such proximity to such channel so as to seriously alter the normal flow of water;

(q) meet such other criteria as are necessary to achieve reclamation in accordance with the purposes of this part, taking into consideration the physical, climatological, and other characteristics of the site;

(r) with regard to underground mines, eliminate fire hazards and otherwise eliminate conditions which constitute a hazard to health and safety of the public;

(s) locate openings for all new drift mines working acid-producing or iron-producing coal seams in such a manner as to prevent a gravity discharge of water from the mine.

(11) An operator may not throw, dump, pile, or permit the dumping, piling, or throwing or otherwise placing any overburden, stones, rocks, mineral, earth, soil, dirt, debris, trees, wood, logs, or any other materials or substances of any kind or nature beyond or outside of the area of land which is under permit and for which a bond has been posted under 82-4-223, as amended, or place the materials described in this section in such a way that normal erosion or slides brought about by natural physical causes will permit the materials to go beyond or outside of that area of land. An operator shall conduct the strip- or underground-mining operation in such a manner as to protect areas outside the permit area.

82-4-232. Area mining required — bond — alternative plan. (1) Area strip mining, a method of operation which does not produce a bench or fill bench, is required where strip mining is proposed. All highwalls must be reduced and the steepest slope of the reduced highwall shall be no greater than 20 degrees from the horizontal. Highwall reduction shall be commenced at or beyond the top of the highwall and sloped to the graded spoil bank. Reduction, backfilling, and grading shall eliminate all highwalls and spoil peaks. The area of land affected shall be restored to the approximate original contour of the land. When directed by the department, the operator shall construct in the final grading such diversion ditches, depressions, or terraces as will accumulate or control the water runoff. Additional restoration work may be required by the department according to rules adopted by the board.

(2) In addition to the backfilling and grading requirements, the operator's method of operation on steep slopes may be regulated and controlled according to rules adopted by the board. These rules may require any measure whatsoever to accomplish the purpose of this part.

(3) For coal mining on prime farmlands, the board shall establish by rule specifications for soil removal, storage, replacement, and reconstruction, and the operator shall as a minimum be required to:

(a) segregate the A horizon of the natural soil, except where it can be shown that other available soil materials will create a final soil having a greater productive capacity; and if not utilized immediately, stockpile this material separately from other spoil and provide needed protection from wind and water erosion or contamination by other acid or toxic material;

(b) segregate the B horizon of the natural soil, or underlying C horizon or other strata, or a combination of such horizons or other strata that are shown to be both texturally and chemically suitable for plant growth and that can be shown to be equally or more favorable for plant growth than the B horizon in sufficient quantities to create in the regraded final soil a root zone of comparable depth and quality to that which existed in the natural soil; and if not utilized immediately, stockpile this material separately from other spoil and provide needed protection from wind and water erosion or contamination by acid or toxic material;

(c) replace and regrade the root zone material described in subsection (3)(b) with proper compaction and uniform depth over the regraded spoil material; and

(d) redistribute and grade in a uniform manner the surface soil horizon described in (a) above.

(4) All available topsoil shall be removed in a separate layer, guarded from erosion and pollution, and kept in such a condition that it can sustain vegetation of at least the quality and variety it sustained prior to removal, provided that the operator shall accord substantially the same treatment to any subsurface deposit of material that is capable, as determined by the department, of supporting surface vegetation virtually as well as the present topsoil. After the operation has been backfilled and graded, the topsoil or the best available subsurface deposit of material which is best able to support vegetation shall be returned as the top layer.

(5) As determined by rules of the board, time limits shall be established requiring backfilling, grading, subsidence stabilization, water control, highwall reduction, topsoiling, planting, and revegetation to be kept current. All backfilling, subsidence stabilization, sealing, grading, and topsoiling shall be completed before necessary equipment is moved from the operation.

(6) (a) The permittee may file a request with the department for the release of all or part of a performance bond or deposit. Within 30 days after any application for bond or deposit release has been filed with the department, the permittee shall submit a copy of an advertisement notice placed at least once a week for 4 successive weeks in a newspaper of general circulation in the locality of the prospecting or mining operation. The notice is considered part of any bond release application and must contain a notification of the precise location of the land affected, the number of acres, the permit and the date approved, the amount of the bond filed and the portion sought to be released, the type and appropriate dates of reclamation work performed, and a description of the results achieved as they relate to the permittee's approved reclamation plan. In addition, as part of any bond release application, the permittee shall submit copies of letters that he has sent to adjoining property owners, local governmental bodies, planning agencies, and sewage and water treatment authorities or water companies in the locality of the operation, notifying them of his intention to seek release from the bond.

(b) Upon receipt of the request and copies of the notification made under subsection (6)(a), the department shall, within 30 days, conduct an inspection and evaluation of the reclamation work involved. In the evaluation, the department shall consider, among other things, the degree of difficulty in completing any remaining reclamation, whether pollution of surface and subsurface water is occurring, the probability of continuance or future occurrence of such pollution, and the estimated cost of abating such pollution. The department shall notify the permittee in writing of its decision to release or not to release all or part of the performance bond within 60 days of the filing of the request if no public hearing is held pursuant to subsection (6)(f) or, if a public hearing is held pursuant to that subsection, within 30 days thereafter.

(c) The department may release the bond or deposit in whole or in part if it is satisfied the reclamation covered by the bond or deposit or portion thereof has been accomplished as required by this part according to the following schedule:

(i) When the permittee completes the plugging, backfilling, regrading, and drainage control of a bonded area in accordance with his approved reclamation plan, the department shall release 60% of the bond or collateral for the applicable permit area.

(ii) After revegetation has been established on the regraded lands in accordance with the approved reclamation plan, the department shall, for the period specified for operator responsibility of reestablishing revegetation, retain that amount of bond for the revegetated area that would be sufficient for a third party to cover the cost of reestablishing revegetation. Whenever a silt dam is to be retained as a permanent impoundment, the portion of bond may be released under this subsection (6)(c)(ii) if provisions for sound future maintenance by the operator or the landowner have been made with the department. No part of the bond or deposit may be released under this subsection (6)(c)(ii):

(A) as long as the lands to which the release would be applicable are contributing suspended solids to streamflow or runoff outside the permit area in excess of the requirements of 82-4-231(10)(k); or

(B) before soil productivity for prime farm lands to which the release would be applicable has returned to equivalent levels of yield as nonmined land of the same soil type in the surrounding area under equivalent management practices, as determined from the soil survey.

(iii) When the permittee has successfully completed all prospecting, mining, and reclamation activities, the department shall release the remaining portion of the bond, but not before the expiration of the period specified for responsibility and not until all reclamation requirements of this part are fully met.

(d) If the department disapproves the application for release of the bond or portion thereof, it shall notify the permittee, in writing, stating the reasons for disapproval and recommending corrective actions necessary to secure the release and allowing opportunity for a public hearing.

(e) When an application for total or partial bond release is filed with the department, it shall notify the municipality in which a prospecting or mining operation is located by certified mail at least 30 days prior to the release of all or a portion of the bond.

(f) Any person with a valid legal interest that might be adversely affected by release of the bond or the responsible officer or head of any federal, state, or local governmental agency which has jurisdiction by law or special expertise with respect to any environmental, social, or economic impact involved in the operation or is authorized to develop and enforce environmental standards with respect to such operations has the right to file written objections to the proposed release from bond to the department within 30 days after the last publication of the notice provided for in subsection (6)(a). If written objections are filed and a hearing requested, the department shall inform all the interested parties of the time and place of the hearing and, within 30 days of the request for such hearing, hold a public hearing in the locality of the operation proposed for bond release. The date, time, and location of the public hearing must be advertised by the department in a newspaper of general circulation in the locality for 2 consecutive weeks, and the hearing must be held in the locality of the operation proposed for bond release or at the state capital, at the option of the objector, within 30 days of the request for such hearing.

(g) Without prejudice to the rights of the objectors or the permittee or the responsibilities of the department pursuant to this section, the department may establish an informal conference to resolve such written objections.

(h) For the purpose of the hearing under subsection (6)(f), the department may administer oaths; subpoena witnesses or written or printed materials; compel the attendance of witnesses or the production of materials; and take evidence, including but not limited to site inspections of the land affected and other operations carried on by the permittee in the general vicinity. A verbatim record of each public hearing required by this section must be made, and a transcript must be made available on the motion of any party or by order of the department.

(7) An operator may propose alternative plans other than backfilling, grading, highwall reduction, topsoiling, or seeding to a permanent diverse vegetative cover if the restoration will be consistent with the purpose of this part. These plans shall be submitted to the department, and after consultation with the landowner, if the plans are approved by the board and complied with within the time limits as may be determined by the board as being reasonable for carrying out the plans, the backfilling, grading, highwall reduction, topsoiling, or revegetation requirements of this part may be modified by the board. An operator who proposes alternative plans that will affect an existing permit shall comply with the notice requirement of 82-4-222(1)(k).

(8) If alternate revegetation is proposed, a management plan must be submitted showing how the area will be utilized and any data necessary to show that the alternate postmining land use can be achieved. Any plan must require the operation as a minimum to:

(a) restore the land affected to a condition capable of supporting the use which it was capable of supporting prior to any mining operation or to a higher or better use of which there is a reasonable likelihood, if the use or uses do not present any actual or probable threat of water diminution or pollution, and if the permit applicant's proposed land use following reclamation is not deemed to be impractical, unreasonable, or inconsistent with applicable land use policies and plans, would not involve unreasonable delay in implementation, and would not violate federal, state, or local law; and

(b) prevent soil erosion to the extent achieved prior to mining.

82-4-233. Planting of vegetation following grading of disturbed area. (1) After the operation has been backfilled, graded, topsoiled, and approved by the department, the operator shall prepare the soil and plant such legumes, grasses, shrubs, and trees as are necessary to establish on the regraded areas and all other lands affected a diverse, effective, and permanent vegetative cover of the same seasonal variety native to the area of land to be affected and capable of self-regeneration and plant succession at least equal in extent of cover to the natural vegetation of the area except that introduced species may be used in the revegetation process where desirable and necessary to achieve the approved postmining land use plan. The vegetative cover must be capable of:

(a) feeding and withstanding grazing pressure from a quantity and mixture of wildlife and livestock at least comparable to that which the land could have sustained prior to the operation;

(b) regenerating under the natural conditions prevailing at the site, including occasional drought, heavy snowfalls, and strong winds; and

(c) preventing soil erosion to the extent achieved prior to the operation.

(2) The seed or plant mixtures, quantities, method of planting, type and amount of lime or fertilizer, mulching, irrigation, fencing, and any other measures necessary to provide a suitable permanent diverse vegetative cover shall be defined by rules of the board.

(3) All underground shafts, tunnels, or other excavations are excluded from the provisions of subsection (1) of this section.

History: En. Sec. 12, Ch. 325, L. 1973; amd. Sec. 24, Ch. 441, L. 1975; R.C.M. 1947, 50-1045; amd. Sec. 2, Ch. 172, L. 1979.

82-4-234. Commencement of reclamation. The operator shall commence the reclamation of the area of land affected by his operation as soon as possible after the beginning of strip mining or underground mining of that area in accordance with plans previously approved by the department. Those grading, backfilling, subsidence stabilization, topsoiling, and water management practices that are approved in the plans shall be kept current with the operation as defined by rules of the board, and a permit or supplement to a permit may not be issued if, in the discretion of the department, these practices are not current. A permittee may not, without department approval, disturb any area that has been seeded pursuant to 82-4-233.

82-4-235. Inspection of vegetation — final bond release. Inspection and evaluation for permanent diverse vegetative cover shall be made as soon as it is possible to determine if a satisfactory stand has been established. If the department determines that a satisfactory permanent diverse vegetative cover has been established, it shall release the remaining bond held on the area reclaimed after public notice and an opportunity for hearing as provided in 82-4-232(6). In no event shall such remaining bond be released prior to a period of 10 years after the last year of augmented seeding, fertilizing, irrigation, or other work required under this part for those operations or portions of operations that were seeded after February 2, 1978, or prior to a period of 5 years after initial planting for all exploration activities and all other operations.

82-4-237. Operator to file annual reports. (1) An operator shall file an annual report with the department within 30 days of the anniversary date of each permit. In lieu of an annual report for each permit, the department may allow the operator to file an annual report for each operation on a date determined by the department. Included within an annual report shall be:

(a) the name and address of the operator and permit number or numbers;

(b) a report in such detail as the department shall require, supplemented with maps, cross sections, or other material indicating the extent to which mining operations have been carried out, the progress of all reclamation work, including the type of planting or seeding, mixture and amount of seed, date of planting or seeding, and area of land planted, the extent to which expectations and predictions made in the original application have been fulfilled and any deviation therefrom, and the number of acres affected; and

(c) a revised schedule or timetable of operations and reclamation and an estimate of the number of acres to be affected during the next 1-year period.

(2) Upon receipt of the annual report, the department may make further inquiry and request further information and, if it does so, shall allow a reasonable opportunity for the operator to respond.

(3) When problem situations are revealed by review of new information or as a result of field inspections, the department may order such changes in the mining and reclamation plans as are necessary to insure compliance with this part.

History: En. Sec. 6, Ch. 325, L. 1973; amd. Sec. 1, Ch. 221, L. 1975; amd. Sec. 19, Ch. 441, L. 1975; amd. Sec. 1, Ch. 352, L. 1977; R.C.M. 1947, 50-1039(2) thru (4); amd. Sec. 5, Ch. 196, L. 1979; amd. Sec. 1, Ch. 68, L. 1983.

82-4-238. Successor operator. Where one operator succeeds another at an uncompleted operation, either by sale, assignment, lease, or otherwise, the department may release the first operator from all liability under this part as to that particular operation if both operators have been issued a permit and have otherwise complied with the requirements of this part, and the successor operator assumes, as part of his obligation under this part, all liability for the reclamation of the area of land affected by the former operator.

History: En. Sec. 18, Ch. 325, L. 1973; R.C.M. 1947, 50-1051.

82-4-239. Reclamation by board. (1) The board may have reclamation work done by its own employees or by employees of other governmental agencies, soil conservation districts, or through contracts with qualified persons. The board may construct, operate, and maintain plants for the control and treatment of water pollution resulting from mine drainage.

(2) Any funds or any public works programs available to the board shall be used and expended to reclaim and rehabilitate lands that have been subjected to strip mining or underground mining that have not been reclaimed and rehabilitated in accordance with the standards of this part. The board shall cooperate with federal, state, and private agencies to engage in cooperative projects under this section.

(3) Agents, employees, or contractors of the department may enter upon any land for the purpose of conducting studies or exploratory work to determine whether such land has been strip- or underground-mined and not reclaimed and rehabilitated in accordance with the requirements of this part and to determine the feasibility of restoration, reclamation, abatement, control, or prevention of any adverse effects of past coal-mining practices. Upon request of the commissioner, the attorney general shall bring an injunctive action to restrain any interference with the exercise of the right to enter and inspect granted in this subsection.

(4) If the department makes a finding of fact that:

(a) land or water resources have been adversely affected by past coal-mining practices; and

(b) the adverse effects are at a stage where in the public interest action to restore, reclaim, abate, control, or prevent should be taken; and

(c) the owners of the land or water resources where entry must be made to restore, reclaim, abate, control, or prevent the adverse effects of past coal-mining practices are not known or readily available or the owners will not give permission for the department or its agents, employees, or contractors to enter upon such property to restore, reclaim, abate, control, or prevent the adverse effects of past coal-mining practices;

then agents, employees, or contractors of the department, after giving notice by mail to the owner, if known, and any purchaser under contract for deed, if known, or, if neither is known, by posting notice upon the premises and advertising in a newspaper of general circulation in the county in which the land lies, may enter upon property adversely affected by past coal-mining practices and any other property necessary for access to such mineral property to do all things necessary or expedient to restore, reclaim, abate, control, or prevent the adverse effects of past coal-mining practices. This act is not an act of condemnation of property or of trespass but rather an exercise of the power granted by sections 1 and 2, Article IX of the Montana constitution.

(5) (a) Within 6 months after the completion of projects to restore, reclaim, abate, control, or prevent adverse effects of past coal-mining practices on privately owned land, the department shall itemize the money so expended and may file a statement thereof in the office of the clerk and recorder of the county in which the land lies, together with a notarized appraisal by an independent appraiser of the value of the land before the restoration, reclamation, abatement, control, or prevention of adverse effects of past coal-mining practices if the money so expended shall result in a significant increase in property value. Such statement constitutes a lien upon the land. The lien may not exceed the amount determined by the appraisal to be the increase in the

market value of the land as a result of the restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal-mining practices. No lien may be filed against the property of any person, in accordance with this subsection, who owned the surface prior to May 2, 1977, and who neither consented to nor participated in nor exercised control over the mining operation which necessitated the reclamation performed under this part.

(b) The landowner may petition within 60 days of the filing of the lien to determine the increase in the market value of the land as a result of the restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal-mining practices. The amount reported to be the increase in value of the premises constitutes the amount of the lien and shall be recorded with the statement herein provided. Any party aggrieved by the decision may appeal as provided by law.

(c) The lien provided in this section shall be recorded at the office of the county clerk and recorder. The statement constitutes a lien upon the land as of the date of the expenditure of the money and has priority as a lien second only to the lien of real estate taxes imposed upon the land.

(6) The board may acquire the necessary property by gift or purchase or, if the property cannot be acquired by gift or purchase at a reasonable cost, proceedings may be instituted in the manner provided in Title 70, chapter 30, against all nonaccepting landholders if:

(a) the property is necessary for successful reclamation;

(b) the acquired land after restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal-mining practices will serve recreation and historic purposes or conservation and reclamation purposes or provide open space benefits; and

(c) permanent facilities such as treatment plants or relocated stream channels will be constructed on the land for the restoration, reclamation, abatement, control, or prevention of the adverse effects of past strip- or underground-coal-mining practices; or acquisition of coal refuse disposal sites and all coal refuse thereon will serve the purposes of this part in that public ownership is desirable to meet emergency situations and prevent recurrences of the adverse effects of past coal-mining practices.

82-4-243 through 82-4-250 reserved.

82-4-251. Noncompliance — suspension of permits. (1) The commissioner or an authorized representative of the department shall, if he determines on the basis of an inspection that any condition or practices exist or that the permittee is in violation of any requirement of this part or any permit condition required by the part that creates an imminent danger to the health or safety of the public or is causing or can reasonably be expected to cause significant and imminent environmental harm to land, air, or water resources, immediately order cessation of the operation or the portion thereof relevant to the condition, practice, or violation. The cessation order remains in effect until the commissioner or his authorized representative determines that the condition, practice, or violation has been abated or until modified, vacated, or terminated by the commissioner or his authorized representative pursuant to subsection (5). If the commissioner or his authorized representative finds that the ordered cessation of the operation, or any portion thereof, will not completely abate the imminent danger to the health or safety of the public or the significant and imminent environmental harm to land, air, or water resources, he shall in addition to the cessation order impose affirmative obligations requiring whatever steps the commissioner or his authorized representative considers necessary to abate the imminent danger or the significant environmental harm.

(2) When, on the basis of an inspection, the department determines that any permittee is in violation of any requirement of this part or any permit condition required by this part which does not create an imminent danger to the health or safety of the public or cannot be reasonably expected to cause significant and imminent environmental harm to land, air, or water resources, the commissioner or authorized representative shall issue a notice to the permittee or his agent fixing a reasonable time, not exceeding 90 days, for the abatement of the violation and providing opportunity for public hearing. If, upon expiration of the period of time as originally fixed or subsequently extended, for good cause shown and upon the written finding of the commissioner or his authorized representative, the commissioner or his authorized representative finds that the violation has not been abated, he shall immediately order a cessation of the operation or the portion thereof relevant to the violation. Such cessation order remains in effect until the commissioner or his authorized representative determines that the violation has been abated or

until modified, vacated, or terminated by the commissioner or his authorized representative pursuant to subsection (5). In the order of cessation issued under this subsection, the commissioner shall determine the steps necessary to abate the violation in the most expeditious manner possible and shall include the necessary measures in the order.

(3) When, on the basis of an inspection, the commissioner or his authorized representative determines that a pattern of violations of any requirements of this part or any permit conditions required by this part exists or has existed and if the commissioner or his authorized representative also finds that such violations are caused by the unwarranted failure of the permittee to comply with any requirements of this part or any permit conditions or that such violations are willfully caused by the permittee, the commissioner or his authorized representative shall forthwith issue an order to the permittee to show cause as to why the permit should not be suspended or revoked and shall provide opportunity for a public hearing. If a hearing is requested, the commissioner shall inform all interested parties of the time and place of the hearing. Upon the permittee's failure to show cause as to why the permit should not be suspended or revoked, the commissioner or his authorized representative shall forthwith suspend or the board shall revoke the permit. When a permit has been revoked, the board may order the performance bond forfeited.

(4) Any additional permits held by an operator whose mining permit has been revoked shall be suspended and the operator is not eligible to receive another permit or to have the suspended permits reinstated until he has complied with all the requirements of this part in respect to former permits issued him. An operator who has forfeited a bond is not eligible to receive another permit unless the land for which the bond was forfeited has been reclaimed without cost to the state or the operator has paid into the reclamation account a sum together with the value of the bond the board finds adequate to reclaim the lands.

(5) Notices and orders issued pursuant to this section shall set forth with reasonable specificity the nature of the violation and the remedial action required, the period of time established for abatement, and a reasonable description of the portion of the operation to which the notice or order applies. Each notice or order issued under this section shall be given promptly to the permittee or his agent by the department or the commissioner or his authorized representative who issues the notice or order. All such notices and orders must be in writing and be signed by the authorized representatives. Any notice or order issued pursuant to this section may be modified, vacated, or terminated by the commissioner or his authorized representative, provided that any notice or order issued pursuant to this section that requires cessation of mining by the operator expires within 30 days of actual notice to the operator unless a public hearing is held at the site or within such reasonable proximity to the site that any viewings of the site can be conducted during the course of public hearing.

(6) A person issued a notice or an order of cessation pursuant to this section or any person having an interest that is or may be adversely affected by an order or by modification, vacation, or termination of an order may apply

to the department for review of that order within 30 days of its issuance or within 30 days of its modification, vacation, or termination. Upon receipt of the application, the department shall make an investigation. The investigation shall provide an opportunity for public hearing at the request of the applicant or the person having an interest who is or may be adversely affected to enable the applicant or the person to present information relating to the issuance and continuance of the notice or order or the modification, vacation, or termination of it. The filing of an application for review under this subsection may not operate as a stay of any order or notice. The department shall make findings of fact and issue a written decision incorporating an order vacating, affirming, modifying, or terminating the order.

(7) Whenever an order is issued under this section or as the result of any administrative proceeding under this part, at the request of any person, a sum equal to the aggregate amount of all costs, expenses, and attorney fees as determined by the department to have been reasonably incurred by such person for or in connection with his participation in such proceedings, including any judicial review of agency actions, may be assessed against either party as the court, resulting from judicial review, or the department, resulting from administrative proceedings, considers proper.

(8) In order to protect the stability of the land, the commissioner or his authorized representative shall order cessation of underground coal mining under urbanized areas, cities, towns, and communities and adjacent to industrial or commercial buildings, major impoundments, or permanent streams if he finds imminent danger to inhabitants of the urbanized areas, cities, towns, and communities.

82-4-252. Mandamus. (1) A resident of this state or any person having an interest which is or may be adversely affected, with knowledge that a requirement of this part or a rule adopted under this part is not being enforced or implemented by a public officer or employee whose duty it is to enforce or implement the requirement or rule, may bring the failure to enforce to the attention of the public officer or employee by a written statement under oath that shall state the specific facts of the failure to enforce the requirement or rule. Knowingly making false statements or charges in the affidavit subjects the affiant to penalties prescribed in 45-7-202.

(2) If the public officer or employee neglects or refuses for an unreasonable time after receipt of the statement to enforce or implement the requirement or rule, the resident or person having an interest which is or may be adversely affected may bring an action of mandamus in the district court of the first judicial district of this state, in and for the county of Lewis and Clark, or in the district court of the county in which the land is located. The court, if it finds that a requirement of this part or a rule adopted under this part is not

being enforced, shall order the public officer or employee whose duty it is to enforce the requirement or rule to perform his duties. If he fails to do so, the public officer or employee shall be held in contempt of court and is subject to the penalties provided by law.

(3) Any person having an interest that is or may be adversely affected may commence a civil action on his own behalf to compel compliance with this part against any person for the violation of this part or any rule, order, or permit issued hereunder. However, no such action may commence:

(a) prior to 60 days after the plaintiff has given notice in writing to the department and to the alleged violator; or

(b) if the department has commenced and is diligently prosecuting a civil action to require compliance with the provisions of this part or any rule, order, or permit issued hereunder. Any person may intervene as a matter of right in any such civil action. Nothing in this section restricts any right that any person may have under any statute or common law to seek enforcement of this part or the rules adopted hereunder or to seek any other relief.

(4) Any person who is injured in his person or property through the violation by any operator of any rule, order, or permit issued pursuant to this part may bring an action for damages (including reasonable attorney and expert witness fees) only in the county in which the strip- or underground-coal-mining operation complained of is located. Nothing in this subsection affects the rights established by or limits imposed under chapter 71 of Title 39.

(5) The court, in issuing any final order in any action brought pursuant to subsection (3), may award costs of litigation (including attorney and expert witness fees) to any party whenever the court determines such award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Montana Rules of Civil Procedure.

82-4-253. Suit for damage to water supply. (1) An owner of an interest in real property who obtains all or part of his supply of water for domestic, agricultural, industrial, or other legitimate use from an underground source other than a subterranean stream having a permanent, distinct, and known channel may sue an operator to recover damages for contamination, diminution, or interruption of the water supply, proximately resulting from strip mining or underground mining.

(2) Prima facie evidence of injury in a suit under this subsection is established by the removal of coal or disruption of overlying aquifer from designated ground water areas as prescribed in Title 85, chapter 2, part 5. If the area is not a designated ground water area, a showing that the coal or overlying strata is an aquifer in that geographical location and that the coal or the overlying strata has been removed or disrupted shifts the burden to

defendant (operator) to show that plaintiff's (owner's) water supply was not injured thereby.

(3) An owner of water rights adversely affected may file a complaint detailing the loss of his water in quality and quantity with the department. Upon receipt of this complaint the department shall:

(a) investigate the complaint using all available information including monitoring data gathered at the mine site;

(b) require the defendant (operator) to install such monitoring wells or other practices that may be needed to determine the cause of water loss, if there is a loss, in terms of quantity or quality;

(c) issue within 90 days a written finding specifying the cause of the water loss, if there is a loss, in terms of quantity or quality;

(d) order the mining operator in compliance with chapter 2 of Title 85 to replace the water immediately on a temporary basis to provide the needed water and within a reasonable time, replace the water in like quality, quantity, and duration, if the loss is caused by the surface coal mining operation; and

(e) order the suspension of the operator's permit for failure to replace the water, until such time as the operator provides substitute water.

(4) A servient tract of land is not bound to receive surface water contaminated by strip mining or underground mining on a dominant tract of land, and the owner of the servient tract may sue an operator to recover the damages proximately resulting from the natural drainage from the dominant tract of surface waters contaminated by strip mining or underground mining on the dominant tract.

(5) This section and 82-4-252 do not create, modify, or affect any right, liability, or remedy other than as expressly provided.

82-4-254. Violation — penalty — waiver. (1) Except as provided in subsection (2), a person or operator who violates any of the provisions of this part, rules or orders adopted under this part, or term or condition of a permit and any director, officer, or agent of a corporation who willfully authorizes, orders, or carries out a violation shall pay a civil penalty of not less than $100 or more than $5,000 for the violation and an additional civil penalty of not less than $100 or more than $5,000 for each day during which a violation continues and may be enjoined from continuing such violations as hereinafter provided in this section. Any person or operator who fails to correct a violation within the period permitted by law, rule of the board or department, or order of the commissioner shall be assessed a penalty of not less than $750 for each day, up to 30 days, during which such failure or violation continues. The period permitted for correction of a violation shall not, in the case of any review proceeding under 82-4-251(6), end until entry of a final order suspending the abatement requirements or until entry of an order of court ordering suspension of the abatement requirements. If the failure to abate continues for more than 30 days, the department shall, within 30 days after such 30-day period, take appropriate action pursuant to 82-4-251(3) or request action under subsection (4) or (6).

(2) The department may waive the civil penalty for a minor violation of this part, a rule or order adopted under this part, or a term or condition of a permit if the department determines such violation is not of potential harm to public health, public safety, or the environment and does not impair the administration of this part. The board of land commissioners shall adopt rules to implement and administer a procedure for waiver of a penalty under this subsection.

(3) The department shall notify the person or operator of the violation. The person or operator shall by filing a written request within 20 days of receipt of the notice of violation be entitled to a hearing on the issues of whether the alleged violation has occurred and whether the penalty proposed to be assessed is proper. The department shall issue a statement of proposed penalty no more than 10 days after notice of violation. After the hearing or after the time for requesting a hearing has expired, the board shall make findings of fact and shall issue a written decision as to the occurrence of the violation and the amount of penalty warranted and shall order the payment of a penalty in that amount. The person or operator shall remit the amount of the penalty within 30 days of the order. If the person or operator wishes to obtain judicial review of the assessment, he shall submit with the penalty a statement that the penalty is being paid under protest and the department shall hold the payment in escrow until judicial review is complete. Any person or operator who fails to request and submit testimony at the hearing provided for in this subsection or who fails to pay the assessed penalty under protest within 30 days of the order assessing the penalty forfeits his right to seek judicial review of the violation or penalty determinations. These penalties are recoverable in any action brought in the name of the state of Montana by the attorney general in the district court of the first judicial district of this state, in and for the county of Lewis and Clark, or the district having jurisdiction over the defendant.

(4) The attorney general shall, upon request of the commissioner, sue for the recovery of the penalties provided for in this section and bring an action for a restraining order or temporary or permanent injunction against an operator or other person who:

(a) violates, threatens to violate, or fails or refuses to comply with any order or decision issued under this part;

(b) interferes with, hinders, or delays the department in carrying out the provisions of this part;

(c) refuses to admit an authorized representative of the department to the permit area;

(d) refuses to permit inspection of the permit area by an authorized representative of the department;

(e) refuses to furnish any information or report requested by the department in furtherance of the provisions of this part;

(f) refuses to permit access to and copying of such records as the department determines to be necessary in carrying out the provisions of this part.

(5) Any relief granted by a court under subsection (4)(a) continues in effect until the completion or final termination of all proceedings for review of such under this part unless, prior thereto, the district court granting the relief sets it aside or modifies it.

(6) A person who violates any of the provisions of this part or any determination or order adopted under this part or who willfully violates any permit condition issued under this part is guilty of a misdemeanor and shall be fined not less than $500 and not more than $10,000 or imprisoned for not more than 1 year, or both. Each day on which the violation occurs constitutes a separate offense.

(7) Any person who knowingly makes any false statement, representation, or certification or knowingly fails to make any statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained pursuant to this part shall upon conviction be punished by a fine of not more than $10,000 or by imprisonment for not more than 1 year, or both.

(8) Any person who except as permitted by law willfully resists, prevents, impedes, or interferes with the department or its agents in the performance of duties pursuant to this part shall be punished by a fine of not more than $5,000 or by imprisonment for not more than 1 year, or both.

(9) No employee of the department performing any function or duty under this part shall have a direct or indirect financial interest in any strip- or underground-coal-mining operation. Whoever knowingly violates the provisions of this subsection shall upon conviction be punished by a fine of not more than $2,500 or by imprisonment of not more than 1 year, or both.

82-4-301. Legislative findings. The extraction of mineral by mining is a basic and essential activity making an important contribution to the economy of the state and the nation. At the same time, proper reclamation of mined land and former exploration areas not brought to mining stage is necessary to prevent undesirable land and surface water conditions detrimental to the general welfare, health, safety, ecology, and property rights of the citizens of the state. Mining and exploration for minerals take place in diverse areas where geological, topographical, climatic, biological, and sociological conditions are significantly different, and reclamation specifications must vary accordingly. It is not practical to extract minerals or explore for minerals required by our society without disturbing the surface or subsurface of the earth and without producing waste materials, and the very character of many types of mining operations precludes complete restoration of the land to its original condition. The legislature finds that land reclamation as provided in this part will allow exploration for and mining of valuable minerals while adequately providing for the subsequent beneficial use of the lands to be reclaimed.

History: **En. Sec. 1, Ch. 252, L. 1971; R.C.M. 1947, 50-1201.**

82-4-302. Purpose. (1) The purposes of this part are to provide:

(a) that the usefulness, productivity, and scenic values of all lands and surface waters involved in mining and mining exploration within the boundaries and lawful jurisdiction of the state will receive the greatest reasonable degree of protection and reclamation to beneficial use;

(b) authority for cooperation between private and governmental entities in carrying this part into effect;

(c) for the recognition of the recreational and aesthetic values of land as a benefit to the state of Montana; and

(d) priorities and values to the aesthetics of our landscape, waters, and ground cover.

(2) Although both the need for and the practicability of reclamation will control the type and degree of reclamation in any specific instance, the basic objective will be to establish, on a continuing basis, the vegetative cover, soil stability, water condition, and safety condition appropriate to any proposed subsequent use of the area.

82-4-303. Definitions. As used in this part, unless the context indicates otherwise, the following definitions apply:

(1) "Abandonment of surface or underground mining" may be presumed when it is shown that continued operation will not resume.

(2) "Board" means the board of land commissioners or a state employee or state agency as may succeed to its powers and duties under this part.

(7) "Exploration" means all activities conducted on or beneath the surface of lands resulting in material disturbance of the surface for the purpose of determining the presence, location, extent, depth, grade, and economic viability of mineralization in those lands, if any, other than mining for production and economic exploitation, as well as all roads made for the purpose of facilitating exploration, except as noted in 82-4-310.

(8) "Mineral" means any ore, rock, or substance, other than oil, gas, bentonite, clay, coal, sand, gravel, phosphate rock, or uranium, taken from below the surface or from the surface of the earth for the purpose of milling, concentration, refinement, smelting, manufacturing, or other subsequent use or processing or for stockpiling for future use, refinement, or smelting.

(c) the manner and type of revegetation or other surface treatment of disturbed areas;

(d) procedures proposed to avoid foreseeable situations of public nuisance, endangerment of public safety, damage to human life or property, or unnecessary damage to flora and fauna in or adjacent to the area;

(e) the method of disposal of mining debris;

(f) the method of diverting surface waters around the disturbed areas where necessary to prevent pollution of those waters or unnecessary erosion;

(g) the method of reclamation of stream channels and stream banks to control erosion, siltation, and pollution;

(h) maps and other supporting documents as may be reasonably required by the department; and

(i) a time schedule for reclamation that meets the requirements of 82-4-336.

(15) (a) "Small miner" means a person, firm, or corporation that engages in the business of mining or reprocessing of tailings or waste materials that does not remove from the earth during any calendar year material in excess of 36,500 tons in the aggregate, that does not hold an operating permit under 82-4-335 except for a permit issued under 82-4-335(2), and that conducts:

(i) an operation resulting in not more than 5 acres of the earth's surface being disturbed and unreclaimed; or

(ii) two operations which disturb and leave unreclaimed less than 5 acres per operation if the respective mining properties are:

(A) the only operations engaged in by the person, firm, or corporation;

(B) at least 1 mile apart at their closest point; and

(C) not operated simultaneously except during seasonal transitional periods not to exceed 30 days.

(b) For the purpose of this definition only, the department shall, in computing the area covered by the operation, exclude access or haulage roads that are required by a local, state, or federal agency having jurisdiction over that road to be constructed to certain specifications if that public agency notifies the department in writing that it desires to have the road remain in use and will maintain it after mining ceases.

(16) "Surface mining" means all or any part of the process involved in mining of minerals by removing the overburden and mining directly from the mineral deposits exposed, including but not limited to open-pit mining of minerals naturally exposed at the surface of the earth, mining by the auger method, and all similar methods by which earth or minerals exposed at the surface are removed in the course of mining. Surface mining does not include the extraction of oil, gas, bentonite, clay, coal, sand, gravel, phosphate rock, or uranium or excavation or grading conducted for on-site farming, on-site road construction, or other on-site building construction.

(17) "Underground mining" means all methods of mining other than surface mining.

(18) "Unit of surface-mined area" means that area of land and surface water included within an operating permit actually disturbed by surface mining during each 12-month period of time, beginning at the date of the issuance of the permit, and it comprises and includes the area from which overburden or minerals have been removed, the area covered by mining debris, and all additional areas used in surface mining or underground mining operations which by virtue of mining use are susceptible to erosion in excess of the surrounding undisturbed portions of land.

(19) "Vegetative cover" means the type of vegetation, grass, shrubs, trees, or any other form of natural cover considered suitable at time of reclamation.

82-4-304. Exemption — works performed prior to promulgation of rules. No provision of this part shall be applicable to any exploration or mining work performed prior to the date of promulgation of the board's rules pursuant to 82-4-321 relating to exploration and mining. No provision of this part is applicable to the reprocessing of tailings or waste rock that occurred prior to the date of promulgation of the board's rules regarding those activities. If, after the date of promulgation of rules applicable to mills not located at a mine site, work is performed at such a mill that was constructed and operated before promulgation of those rules, this part applies only to the areas initially disturbed after promulgation of those rules.

82-4-305. Exemption — small miners — written agreement. (1) Except as provided in subsections (3) through (9), the provisions of this part do not apply to any small miner if the small miner annually agrees in writing:

(a) that he will not pollute or contaminate any stream;

(b) that he will provide protection for human and animal life through the installation of bulkheads installed over safety collars and the installation of doors on tunnel portals;

(c) that he will provide a map locating his mining operations. The map must be of a size and scale determined by the department.

(d) if the small miner's operations are placer or dredge mining, that he shall reclaim all land disturbed by the operations to comparable utility and stability as that of adjacent areas.

(2) For small-miner exemptions obtained after September 30, 1985, a small miner may not obtain or continue an exemption under subsection (1) unless he annually certifies in writing:

(a) if the small miner is a natural person, that:

(i) no business association or partnership of which he is a member or partner has a small-miner exemption; and

(ii) no corporation of which he is an officer, director, or owner of record of 25% or more of any class of voting stock has a small-miner exemption; or

(b) if the small miner is a partnership or business association, that:

(i) none of the associates or partners holds a small-miner exemption; and

(ii) none of the associates or partners is an officer, director, or owner of 25% or more of any class of voting stock of a corporation that has a small-miner exemption; or

(c) if the small miner is a corporation, that no officer, director, or owner of record of 25% or more of any class of voting stock of the corporation:

(i) holds a small-miner exemption;

(ii) is a member or partner in a business association or partnership that holds a small-miner exemption;

(iii) is an officer, director, or owner of record of 25% or more of any class of voting stock of another corporation that holds a small-miner exemption.

(3) A small miner whose operations are placer or dredge mining shall post a performance bond equal to the state's actual cost of reclaiming the disturbed land, although the bond may not exceed $5,000 per operation. However, if the small miner has posted a bond for reclamation with another government agency, he is exempt from the requirement of this subsection.

(4) If a small miner who conducts a placer or dredge mining operation fails to reclaim the operation, he is liable to the department for all its reasonable costs of reclamation, including a reasonable charge for services performed by state personnel and state materials and equipment used. If the small miner posts a surety bond, the surety is liable to the state to the extent of the bond amount and the small miner is liable for the remainder of the reasonable costs to the state of reclaiming the operation.

(5) If a small miner who conducts a placer or dredge mining operation fails to commence reclamation of the operation within 6 months after cessation of mining or within an extended period allowed by the department for good cause shown or if the small miner fails to diligently complete reclamation, the department shall notify the small miner by certified mail that it intends to reclaim the operation unless the small miner commences reclamation within 30 days and diligently completes the reclamation. The notice must be mailed to the address stated on the small miner exclusion statement or, if the small miner has notified the department of a different address by letter or in the annual certification form, to the most recent address given to the department. If the small miner fails to commence reclamation within 30 days or to diligently complete reclamation, the department may revoke the small miner exclusion statement, forfeit any bond that has been posted with the department, and enter and reclaim the operation. If the small miner has not posted a bond with the department or if the reasonable costs of reclamation exceed the amount of the bond, the department may also collect additional reclamation costs, as set forth in subsection (6), before or after it incurs those costs.

(6) To collect additional reclamation costs, the department shall notify the small miner by certified mail, at the address determined under subsection (5), of the additional reasonable reclamation costs and request payment within 30 days. If the small miner does not pay the additional reclamation costs within 30 days, the department may bring an action in district court for payment of the estimated future costs and, if the department has performed any reclamation, of its reasonable actual costs. The court shall order payment of costs it determines to be reasonable and shall retain jurisdiction until reclamation of the operation is completed. Upon completion of reclamation, the court shall order payment of any additional costs it deems reasonable or the refund of any portion of any payment for estimated costs that exceeds the actual reasonable costs incurred by the department.

(7) A small miner who intends to use a cyanide ore-processing reagent shall obtain an operating permit for that part of his operation where the cyanide ore-processing reagent will be used or disposed of.

(8) The exemption provided in this section does not apply to a person whose failure to comply with the provisions of this part, the rules adopted under this part, or a permit or license issued under this part has resulted in the forfeiture of a bond unless that person meets the conditions described under 82-4-360.

(9) The exemption provided in this section does not apply to an area under permit pursuant to 82-4-335 or to an area that has been permitted pursuant to 82-4-335 and reclaimed by the permittee, the department, or any other state or federal agency.

A license must be issued for a period of 1 year from date of issue and is renewable from year to year on application. An application for renewal must be filed within 30 days preceding the expiration of the current license and be accompanied by payment of a fee as required for a new license. A license may not be renewed if the applicant for renewal is in violation of any provision of this part. A license is subject to suspension and revocation as provided by this part.

(2) Employees of persons holding a valid license under this part are included in and covered by the license.

(3) A person may not be issued an exploration license if that person's failure to comply with the provisions of this part, the rules adopted under this part, or a permit or license issued under this part has resulted in the forfeiture of a bond unless that person meets the conditions described in 82-4-360.

(a) pay a fee of $5 to the board;

(b) agree to reclaim any surface area damaged by the applicant during exploration operations, as may be reasonably required by the board;

(c) not be in default of any other reclamation obligation under this law.

(2) An application for an exploration license shall be made in writing, notarized, and submitted to the department in duplicate upon forms prepared and furnished by it. The application shall include an exploration map or sketch in sufficient detail to locate the area to be explored and to determine whether significant environmental problems would be encountered. The department shall by rule determine the precise nature of such exploration map or sketch. The applicant must state what type of prospecting and excavation techniques will be employed in disturbing the land.

(3) Prior to the issuance of an exploration license, the applicant shall file with the department a reclamation and revegetation bond in a form and amount as determined by the department in accordance with 82-4-338.

(4) In the event that the holder of an exploration license desires to mine the area covered by the exploration license and has fulfilled all of the requirements for an operating permit, the department shall allow the postponement of the reclamation of the acreage explored if that acreage is incorporated into the complete reclamation plan submitted with the application for an operating permit. Any land actually affected by exploration or excavation under an exploration license and not covered by the operating reclamation plan shall be reclaimed within 2 years after the completion of exploration or abandonment of the site in a manner acceptable to the department.

82-4-334. Exception — geological phenomena. Upon proper application by the holder of an exploration license, the board may excuse such holder from reclamation obligations with reference to any specified openings or excavations exposing geological indications or phenomena of especial interest, even though the licensee does not apply or have any intention to apply for an operating permit for the land in which such openings or excavations have been made.

History: En. Sec. 7, Ch. 252, L. 1971; amd. Sec. 3, Ch. 281, L. 1974; R.C.M. 1947, 50-1207(6); amd. Sec. 5, Ch. 588, L. 1979.

82-4-335. Operating permit — limitation — fees. (1) A person may not engage in mining, ore processing, or reprocessing of tailings or waste material, construct or operate a hard-rock mill, use cyanide ore-processing reagents, or disturb land in anticipation of those activities in the state without first obtaining an operating permit from the board. A separate operating permit is required for each complex.

(2) A small miner who intends to use a cyanide ore-processing reagent shall obtain an operating permit for that part of his operation where the cyanide ore-processing reagent will be used or disposed of.

(3) Prior to receiving an operating permit from the board, a person shall pay the basic permit fee of $25. The department may require a person who is applying for a permit pursuant to subsection (1) to pay an additional fee not to exceed the actual amount of contractor and employee expenses beyond the normal operating expenses of the department whenever those expenses are reasonably necessary to provide for timely and adequate review of the application, including any environmental review conducted under Title 75, chapter 1, parts 1 and 2. The department may further define these expenses by rule. Whenever the department determines that an additional fee is necessary and the additional fee will exceed $5,000, the department shall notify the applicant that a fee must be paid and submit to the applicant an itemized estimate of the proposed expenses. The department shall provide the applicant an opportunity to review the department's estimated expenses. The applicant may indicate which proposed expenses the applicant considers duplicative or excessive, if any.

(4) The person shall submit an application on a form provided by the board, which must contain the following information and any other pertinent data required by rule:

(a) name and address of the operator and, if a corporation or other business entity, the name and address of its officers, directors, owners of 10% or more of any class of voting stock, partners, and the like and its resident agent for service of process, if required by law;

(b) minerals expected to be mined;

(c) a proposed reclamation plan;

(d) expected starting date of operations;

(e) a map showing the specific area to be mined and the boundaries of the land which will be disturbed, topographic detail, the location and names of all streams, roads, railroads, and utility lines on or immediately adjacent to the area, and the location of proposed access roads to be built;

(f) the names and addresses of the owners of record and any purchasers under contracts for deed of the surface of the land within the permit area and the owners of record and any purchasers under contracts for deed of all surface area within one-half mile of any part of the permit area, provided that the department is not required to verify this information;

(g) the names and addresses of the present owners of record and any purchasers under contracts for deed of all minerals in the land within the permit area, provided that the department is not required to verify this information;

(h) the source of the applicant's legal right to mine the mineral on the land affected by the permit, provided that the department is not required to verify this information;

(i) types of access roads to be built and manner of reclamation of road sites on abandonment;

(j) a plan which will provide, within limits of normal operating procedures of the industry, for completion of the operation;

(k) ground water and surface water hydrologic data gathered from a sufficient number of sources and length of time to characterize the hydrologic regime;

(l) a plan detailing the design, operation, and monitoring of impounding structures, including but not limited to tailings impoundments and water reservoirs, sufficient to ensure that the structures are safe and stable;

(m) a plan identifying methods to be used to monitor for the accidental discharge of objectionable materials and remedial action plans to be used to control and mitigate discharges to surface or ground water; and

(n) an evaluation of the expected life of any tailings impoundment or waste area and the potential for expansion of the tailings impoundment or waste site.

(5) Except as provided in subsection (7), the permit provided for in subsection (1) for a large-scale mineral development as defined in 90-6-302 must be conditioned to provide that activities under the permit may not commence until the impact plan is approved under 90-6-307 and until the permittee has provided a written guarantee to the department and to the hard-rock mining impact board of compliance within the time schedule with the commitment made in the approved impact plan, as provided in 90-6-307. If the permittee does not comply with that commitment within the time scheduled, the board, upon receipt of written notice from the hard-rock mining impact board, shall suspend the permit until it receives written notice from the hard-rock mining impact board that the permittee is in compliance.

(6) When the department determines that a permittee has become or will become a large-scale mineral developer pursuant to 82-4-339 and 90-6-302(5) and provides notice as required under 82-4-339, within 6 months of receiving the notice, the permittee shall provide the board with proof that he has obtained a waiver of the impact plan requirement from the hard-rock mining impact board or that he has filed an impact plan with the hard-rock mining impact board and the appropriate county or counties. If the permittee does

not file the required proof or if the hard-rock mining impact board certifies to the board that the permittee has failed to comply with the hard-rock mining impact review and implementation requirements in Title 90, chapter 6, parts 3 and 4, the board shall suspend the permit until the permittee files the required proof or until the hard-rock mining impact board certifies that the permittee has complied with the hard-rock mining impact review and implementation requirements.

(7) Compliance with 90-6-307 is not required for exploration and bulk sampling for metallurgical testing when the aggregate samples are less than 10,000 tons.

(8) A person may not be issued an operating permit if that person's failure to comply with the provisions of this part, the rules adopted under this part, or a permit or license issued under this part has resulted in the forfeiture of a bond unless that person meets the conditions described in 82-4-360.

(9) A person may not be issued a permit under this part unless, at the time of submission of a bond, the person provides the current information required in subsection (4)(a) and:

(a) (i) certifies that the person is not currently in violation in this state of any law, rule, or regulation of this state or of the United States pertaining to air quality, water quality, or mined land reclamation; or

(ii) presents a certification by the administering agency that the violation is in the process of being corrected to the agency's satisfaction or is the subject of a bona fide administrative or judicial appeal; and

(b) if the person is a partnership, corporation, or other business association, provides the certification required by subsection (9)(a)(i) or (9)(a)(ii), as applicable, for any partners, officers, directors, owners of 10% or more of any class of voting stock, and business association members.

82-4-336. Reclamation plan and specific reclamation requirements. (1) The reclamation plan shall provide that reclamation activities, particularly those relating to control of erosion, to the extent feasible, shall be conducted simultaneously with the operation and in any case shall be initiated promptly after completion or abandonment of the operation on those portions of the complex that will not be subject to further disturbance. In the absence of an order by the board providing a longer period, the plan shall provide that reclamation activities shall be completed not more than 2 years after completion or abandonment of the operation on that portion of the complex.

(2) In the absence of emergency or suddenly threatened or existing catastrophe, an operator may not depart from an approved plan without previously obtaining from the department written approval of his proposed change.

(3) Provision shall be made to avoid accumulation of stagnant water in the mined area which may serve as a host or breeding ground for mosquitoes or other disease-bearing or noxious insect life.

(4) All final grading shall be made with nonnoxious, nonflammable, noncombustible solids unless approval has been granted by the board for a supervised sanitary fill.

(5) Where mining has left an open pit exceeding 2 acres of surface area and the composition of the floor or walls of the pit are likely to cause formation of acid, toxic, or otherwise pollutive solutions (hereinafter "objectionable effluents") on exposure to moisture, the reclamation plan shall include provisions which adequately provide for:

(a) insulation of all faces from moisture or water contact by covering to a depth of 2 feet or more with material or fill not susceptible itself to generation of objectionable effluents;

(b) processing of any objectionable effluents in the pit before their being allowed to flow or be pumped out of it to reduce toxic or other objectionable ratios to a level considered safe to humans and the environment by the board;

(c) drainage of any objectionable effluents to settling or treatment basins when the objectionable effluents must be reduced to levels considered safe by the board before release from the settling basin; or

(d) absorption or evaporation of objectionable effluents in the open pit itself; and

(e) prevention of entrance into the open pit by persons or livestock lawfully upon adjacent lands by fencing, warning signs, and such other devices as may reasonably be required by the board.

(6) Provisions for vegetative cover shall be required in the reclamation plan if appropriate to the future use of the land as specified in the reclamation plan. The reestablished vegetative cover shall meet county standards for noxious weed control.

(7) The reclamation plan shall provide for the reclamation of all disturbed land. Proposed reclamation shall provide for the reclamation of disturbed land to comparable utility and stability as that of adjacent areas, except for open pits and rock faces which may not be feasible to reclaim. In such excepted

cases, the board shall require sufficient measures to insure public safety and to prevent the pollution of air or water and the degradation of adjacent lands.

(8) A reclamation plan shall be approved by the board if it adequately provides for the accomplishment of the activities specified in this section.

(9) The reclamation plan shall provide for permanent landscaping and contouring to minimize the amount of precipitation that infiltrates into disturbed areas, including but not limited to tailings impoundments and waste rock dumps. The plan shall also provide measures to prevent objectionable postmining ground water discharges.

82-4-337. Inspection — issuance of operating permit — modification. (1) (a) The board shall cause all applications for operating permits to be reviewed for completeness within 30 days of receipt. The board shall notify the applicant concerning completeness as soon as possible. An application is considered complete unless the applicant is notified of any deficiencies within 30 days of receipt.

(b) Unless the review period is extended as provided in this section, the board shall review the adequacy of the proposed reclamation plan and plan of operation within 30 days of the determination that the application is complete or within 60 days of receipt of the application if the board does not notify the applicant of any deficiencies in the application. If the applicant is not notified of deficiencies or inadequacies in the proposed reclamation plan and plan of operation within such time period, the operating permit shall be issued upon receipt of the bond as required in 82-4-338 and pursuant to the requirements of subsection (1)(c). The department shall promptly notify the applicant of the form and amount of bond which will be required.

(c) No permit may be issued until:

(i) sufficient bond has been submitted pursuant to 82-4-338;

(ii) the information and certification have been submitted pursuant to 82-4-335(9); and

(iii) the department has found that permit issuance is not prohibited by 82-4-335(8) or 82-4-341(6).

(d) (i) Prior to issuance of a permit, the department shall inspect the site unless the department has failed to act on the application within the time prescribed in subsection (1)(b). If the site is not accessible due to extended adverse weather conditions, the department may extend the time period prescribed in subsection (1)(b) by not more than 180 days to allow inspection of the site and reasonable review. The department must serve written notice of extension upon the applicant in person or by certified mail, and any such extension is subject to appeal to the board in accordance with the Montana Administrative Procedure Act.

(ii) If the department determines that additional time is needed to review the application and reclamation plan for a major operation, the department and the applicant shall negotiate to extend the period prescribed in subsection (1)(b) by not more than 365 days in order to permit reasonable review.

(iii) Failure of the board to act upon a complete application within the extension period constitutes approval of the application, and the permit shall be issued promptly upon receipt of the bond as required in 82-4-338.

(2) The operating permit shall be granted for the period required to complete the operation and shall be valid until the operation authorized by the permit is completed or abandoned unless the permit is suspended or revoked by the board as provided in this part.

(3) The operating permit shall provide that the reclamation plan may be modified by the board, upon proper application of the permittee or department, after timely notice and opportunity for hearing, at any time during the term of the permit and for any of the following reasons:

(a) to modify the requirements so they will not conflict with existing laws;

(b) when the previously adopted reclamation plan is impossible or impracticable to implement and maintain;

(c) when significant environmental problem situations are revealed by field inspection.

82-4-338. Performance bond. (1) The applicant shall file with the department a bond payable to the state of Montana with surety satisfactory to the department in the sum to be determined by the department of not less than $200 or more than $2,500 for each acre or fraction thereof of the disturbed area, conditioned upon the faithful performance of the requirements of this part and the rules of the board. In lieu of such bond, the applicant may file with the board a cash deposit, an assignment of a certificate of deposit, or other surety acceptable to the board. Regardless of the above limits, the bond shall not be less than the estimated cost to the state to complete the reclamation of the disturbed land. A public or governmental agency shall not be required to post a bond under the provisions of this part. A blanket performance bond covering two or more operations may be accepted by the board. Such blanket bond shall adequately secure the estimated total number of acres of disturbed land.

(2) The department shall review the amount of each bond at least every 5 years and shall consult with the licensee or permittee if the review indicates that the bond level should be adjusted. When determined by the department that the set bonding level of a permit or license does not represent the present

costs of reclamation, the department may modify the bonding requirements of that permit or license. The department shall make written findings, give the licensee or permittee a copy of the findings, and, for operating permits, publish notice of the findings in a newspaper of general circulation in the county in which the operation is located. The permittee or any person with an interest that may be adversely affected may obtain a contested case hearing under the provisions of the Montana Administrative Procedure Act on the adjusted bond level by filing with the department within 30 days of the notice a written request for hearing.

(3) A bond filed in accordance with the provisions of this part may not be released by the department until the provisions of this part, the rules adopted pursuant to this part, and this reclamation plan have been fulfilled.

(4) No bond filed for an operating permit obtained under 82-4-335 may be released until the public has been provided an opportunity for a hearing.

(e) update the information required in 82-4-335(4)(a); and

(f) update any maps previously submitted or specifically requested by the board. Such maps shall show:

(i) the permit area;

(ii) the unit of disturbed land;

(iii) the area to be disturbed during the next 12-month period;

(iv) if completed, the date of completion of operations;

(v) if not completed, the additional area estimated to be further disturbed by the operation within the following permit year; and

(vi) the date of beginning, amount, and current status of reclamation performed during the previous 12 months.

(2) Whenever the department determines that the permittee has become or will, during the next permit year, become a large-scale mineral developer, it shall immediately serve written notice of that fact on the permittee, the hard-rock mining impact board, and the county or counties in which the operation is located.

82-4-340. Successor operator. When one operator succeeds to the interest of another in any uncompleted operation by sale, assignment, lease, or otherwise, the board may release the first operator from the duties imposed upon him by this part as to such operation, provided that both operators have complied with the requirements of this part and the successor operator assumes the duty of the former operator to complete the reclamation of the land, in which case the board shall transfer the permit to the successor operator upon approval of the successor operator's bond as required under this part.

History: En. Sec. 10, Ch. 252, L. 1971; amd. Sec. 6, Ch. 281, L. 1974; amd. Sec. 1, Ch. 427, L. 1977; R.C.M. 1947, 50-1210(3); amd. Sec. 6, Ch. 453, L. 1985.

82-4-341. Compliance with reclamation plan — reclamation by board. (1) Following receipt of the permittee's report and at any other reasonable time the board may elect, the board shall cause the permit area to be inspected to determine if the permittee has complied with the reclamation plan and the board's rules.

(2) The permittee shall proceed with reclamation as scheduled in his approved reclamation plan. Following written notice by the board noting deficiencies, the permittee shall commence action within 30 days to rectify these deficiencies and shall diligently proceed until the deficiencies are corrected, provided that deficiencies that also violate other laws that require earlier rectification shall be corrected in accordance with the applicable time provisions of such laws. The board may extend performance periods referred to in this section and in 82-4-336 for delays clearly beyond the permittee's control, but only when the permittee is, in the opinion of the board, making every reasonable effort to comply.

(3) Within 30 days after notification by the permittee and when, in the judgment of the board, reclamation of a unit of disturbed land area is properly completed, the permittee shall be notified in writing and his bond on said area

shall be released or decreased proportionately to the acreage included within the bond coverage.

(4) If reclamation of disturbed land is not pursued in accordance with the reclamation plan and the permittee has not commenced action to rectify deficiencies within 30 days after notification by the board or if reclamation is not properly completed in conformance with the reclamation plan within 2 years after completion or abandonment of operation on any fraction of the permit area or such longer period as may have been authorized hereunder or if, after default by the permittee, the surety either refuses or fails to perform the work to the satisfaction of the board within the time required therefor, the board may, with the staff, equipment, and material under its control or by contract with others, take such actions as are necessary for required reclamation of the disturbed lands. Such work shall be let on the basis of competitive bidding. The board shall keep a record of all necessary expenses incurred in carrying out the work or activity authorized under this section, including a reasonable charge for the services performed by the state's personnel and the state's equipment and materials utilized.

(5) The board shall notify the permittee and his surety by order. The order shall state the amount of necessary expenses incurred by the board in reclaiming the disturbed land and a notice that the amount is due and payable to the board by the permittee and the surety. If the amount specified in the order is not paid within 30 days after receipt of the notice, the attorney general, upon request of the board, shall bring an action on behalf of the state in district court. The surety shall be liable to the state to the extent of the bond. The permittee shall be liable for the remainder of the cost.

(6) In addition to the other liabilities imposed by this part, failure to commence action to remedy specific deficiencies in reclamation within 30 days after notification by the board or failure to satisfactorily complete reclamation work on any segment of the permit area within 2 years, or such longer period as the board may permit on permittee's application therefor or on the board's own motion, after completion or abandonment of operations on any segment of the permit area shall constitute sufficient grounds for cancellation of a permit or license and refusal to issue another permit or license to the applicant; provided, however, that such action shall not be effected while an appeal is pending from any ruling requiring the same.

(a) the plan of operation or reclamation conflicts with Title 75, chapter 2, as amended, Title 75, chapter 5, as amended, Title 75, chapter 6, as amended, or rules adopted pursuant to these laws;

(b) the reclamation plan does not provide an acceptable method for accomplishment of reclamation as required by this part.

82-4-353. Administrative remedies — notice — parties. (1) Upon receipt of an application for an operating permit, the department shall provide notice of the application by publication in a newspaper of general circulation in the area to be affected by the operation. The notice shall be published once a week for 3 successive weeks.

(2) All hearings and appeal procedures shall be in accordance with the Montana Administrative Procedure Act. Any person whose interests may be adversely affected as a result of an action taken pursuant to this part may become a party to any proceeding held hereunder upon a showing that such person is capable of adequately representing the interests claimed.

82-4-354. Mandamus to compel enforcement. (1) Any person having an interest that is or may be adversely affected, with knowledge that a requirement of this part or a rule adopted under this part is not being enforced by a public officer or employee whose duty it is to enforce the requirement or rule, may bring the failure to the attention of the public officer or employee by an affidavit stating the specific facts of the failure. Knowingly making false statements or charges in the affidavit subjects the affiant to penalties prescribed for false swearing, as provided in 45-7-202.

(2) If the public officer or employee neglects or refuses for an unreasonable time after receipt of the affidavit to enforce the requirement or rule, the affiant may bring an action of mandamus in the district court of the first judicial district or in the district court of the county in which the land is located. If the court finds that a requirement of this part or a rule adopted under this part is not being enforced, it shall order the public officer or employee to perform his duties. If he fails to do so, the public officer or employee must be held in contempt of court and is subject to the penalties provided by law.

(3) Any person having an interest that is or may be adversely affected may commence a civil action on his own behalf to compel compliance with this

part against any person for the violation of this part or any rule, order, or permit issued under it. However, no such action may commence:

(a) prior to 60 days after the plaintiff has given notice in writing to the department and to the alleged violator; or

(b) if the department has commenced and is diligently prosecuting a civil action to require compliance with the provisions of this part or any rule, order or permit issued under it. Any person having an interest that is or may be adversely affected may intervene as a matter of right in any such civil action.

(4) Nothing in this section restricts any right of any person under any statute or common law to seek enforcement of this part or the rules adopted under it or to seek any other relief.

82-4-355. Action for damages to water supply — replacement. (1) An owner of an interest in real property who obtains all or part of his supply of water for beneficial uses, as defined in 85-2-102, from an underground source other than a subterranean stream having a permanent, distinct, and known channel may sue the operator engaged in an operation for which a license is required pursuant to 82-4-332 or for which a permit is required pursuant to 82-4-335 to recover damages for loss in quality or quantity of the water supply resulting from mining or exploration. The owner is required to exhaust the administrative remedy under subsection (2) prior to filing suit.

(2) (a) An owner described in subsection (1) may file a complaint with the department detailing the loss in quality or quantity of water. Upon receipt of a valid complaint, the department:

(i) shall investigate the statements and charges in the complaint, using all available information, including monitoring data gathered at the exploration or mine site;

(ii) may require the operator, if necessary, to install monitoring wells or other practices that may be needed to determine the cause of water loss, if there is a loss, in terms of quantity and quality;

(iii) shall issue a written finding specifying the cause of the water loss, if there is a loss, in terms of quantity and quality;

(iv) shall, if it determines that the preponderance of evidence indicates that the loss is caused by an exploration or mining operation, order the operator, in compliance with Title 85, chapter 2, to provide the needed water immediately on a temporary basis and within a reasonable time replace the water in like quality, quantity, and duration. If the water is not replaced, the department shall order the suspension of the operator's exploration or operating permit until such time as the operator provides substitute water, except that nothing in this section preempts Title 85, chapter 2. The operator may not be required to replace a junior right if the operator's withdrawal or dewatering is not in excess of his senior right.

(b) If the department determines that there is a great potential that surface or subsurface water quality and quantity may be adversely affected by a mining or exploration operation, the operator shall install a water quality monitoring program, water quantity monitoring program, or both, which must be approved by the department prior to the commencement of exploration or mining.

(2) Upon receipt of a complaint, the department:

(a) shall investigate the statements and charges in the complaint, using all available information, including mine or exploration blasting records and other data obtained through an examination of the dwelling, structure, or site identified in the complaint;

(b) may conduct tests and make measurements, including reasonable efforts to replicate conditions that may have caused property damage or safety hazards, and may require the allegedly responsible person to cooperate as necessary to investigate the complaint;

(c) shall issue a written finding specifying the cause of any property damage or safety hazards that are validated by the investigation; and

(d) shall, if it determines that the preponderance of evidence indicates that property damage or safety hazards are or were caused by exploration or mining activities, order the responsible person to make changes in the use of explosives or other appropriate mitigation to alleviate property damage or safety hazards.

(2) The attorney general shall, upon the request of the department, sue for the recovery of the penalties provided for in this section and bring an action for a restraining order or a temporary or permanent injunction against an operator or other person violating or threatening to violate an order adopted under this part.

(3) The civil penalties provided for in this section may be waived for a minor violation if it is determined that the violation does not represent potential harm to public health, public safety, or the environment and does not impair the administration of this part. The board shall adopt rules to

The commissioner may order immediate suspension of a permit whenever he makes a finding that a violation of this part, the rules adopted under this part, or a license or permit, including the reclamation plan, is creating an imminent danger to the health or safety of persons outside the permit area. The notice or order must be handed to the licensee or permittee in person or served by certified or registered mail addressed to the permanent address shown on the application for a license or permit. The notice of noncompliance must specify in what respects the operator has failed to comply with this part, the rules adopted under this part, or the reclamation plan.

(2) If the licensee or permittee has not complied with the requirements set forth in the notice of noncompliance or order of suspension within the time limits set therein, the permit may be revoked by order of the board and the performance bond forfeited to the department. 82-4-431. Contract for reclamation required. (1) After March 16, 1973, an operator may not conduct opencut-mining operations that will result in the removal of 10,000 cubic yards or more of product or overburden or that will result in the disturbance of land that was previously reclaimed pursuant to this part until he has entered into a contract with the board for the reclamation of the land affected. An operator conducting a number of operations, each of which results in the removal of less than 10,000 cubic yards of product or overburden but which result in the removal of 10,000 cubic yards or more of product or overburden in the aggregate, is subject to the provisions of this part, except as provided in this section.

(2) (a) Except as provided in or conditioned under subsections (2)(b) and (2)(c), an operator who holds a contract for reclamation may operate an opencut mine without first securing an additional contract or an amendment to the existing contract or bond if the mine meets the following criteria:

(i) the total amount of material and overburden removed does not exceed 1,000 cubic yards; and

(ii) the operator notifies the department of state lands prior to beginning such operations and, within 30 days of notifying the department, submits a completed site information form, salvages and stockpiles all root-bearing soil materials, regrades the affected area to 3:1 or flatter slope and blends the reclaimed area into the adjacent topography, and during the first appropriate growing season replaces all topsoil and reseeds or revegetates as required by the department.

(b) The department may refuse to allow the operator to operate an opencut mine under subsection (2)(a) if, at the time of notification by the operator to the department, the operator has a pattern of violations or is in current violation of this part or rules adopted under this part or provisions of a contract for reclamation.

(c) The department may require an additional bond as a condition for the operation of an opencut mine under subsection (2)(a).

(3) Opencut mines described in subsection (2) may not be placed in flowing, ephemeral, or intermittent streams, in the bottom or head of a confined drainage, in an area where the operation will intercept ground water or intercept any slope that is naturally steeper than 3:1, or in any area where mining would be restricted by other laws.

(4) Sand and gravel opencut mines must meet applicable local zoning regulations adopted under Title 76, chapter 2.

(b) the type of operation to be conducted;

(c) the volume of earth to be removed, as accurately as the volume may then be estimated, and the volume which has been previously removed, if any;

(d) the operator's plan of his operation and the method and manner of reclamation that will be used or followed.

(3) If, prior to applying for a contract, the operator notifies the board of his intention to submit a plan and requests the board to examine the area to be mined, the board shall cause the area to be examined and make recommendations to the operator regarding reclamation.

(4) Upon receipt of the application, bond or security, and fee due from the operator and upon agreement to the terms of the contract by the parties, the board may issue a contract to the applicant which entitles him to continue in or engage in opencut mining on the land therein described.

(5) An operator desiring to have his contract amended to cover additional contiguous or nearby land may file an amended application with the board. Upon receipt of the amended application and such additional bond as may be required and upon agreement to the terms of the amendment by the parties, the board may issue an amendment to the original contract covering the additional land described in the amended application without the payment of any additional fee.

(6) An operator may withdraw any land covered by contract, except affected land, by notifying the board thereof, in which case the penalty of the bond or security filed by the operator pursuant to the provisions of this part shall be reduced proportionately.

82-4-433. Bond. (1) A bond required to be filed in this part by the operator shall be in such form as the board prescribes, payable to the state of Montana and conditioned upon the operator's full compliance with all requirements of this part and all rules of the board. The bond shall be signed by the landowner or operator, as appropriate, as principal, and by a good and sufficient corporate surety licensed to do business in the state of Montana, as surety. The bond shall be in an amount not to exceed the costs of restoration required by this part as determined by the board. The amount of the bond may not be less than $200 or more than $1,000 per acre unless the department determines, in writing, that the cost of restoration of the land exceeds $1,000 per acre. Upon such a determination, the bond amount must be set by the board at the cost of restoring the land.

(2) In lieu of the bond, the operator may deposit with the board cash, government securities, a letter of credit in a form acceptable to the department of state lands, or a bond with property sureties in an amount equal to that of the required bond on conditions as above prescribed. In the discretion of the board, surety bond requirements may be fulfilled by the operator's posting a bond with land and improvements and facilities thereon as security, in which event no surety may be required. The penalty of the bond or amount of cash and securities shall be increased or reduced from time to time as provided in this part. The bond or security remains in effect until the affected land has been reclaimed as provided under the contract and the reclamation has been approved and the bond or security has been released by the board. The bond or security shall cover only actual affected land and may be increased or reduced to cover only such acreages as remain unreclaimed.

(3) If the license of a surety upon a bond filed with the board pursuant to this part is suspended or revoked, the operator, within 30 days after receiving notice thereof from the board, shall substitute for that surety a good and sufficient surety licensed to do business in the state. Upon failure of the operator to make substitution of surety, the board may suspend the contract of the operator to conduct operations upon the land described in the contract until the substitution has been made.

(4) The board shall cause the reclamation of any affected land with respect to which a bond has been forfeited.

(5) Whenever an operator has completed all of the requirements under the provisions of this part as to any affected land, he shall notify the board thereof. If the board releases the operator from further obligation regarding such affected land, the penalty of the bond shall be reduced proportionately.

82-4-434. Reclamation plan part of contract — requirements. The contract must meet the following requirements:

(1) The operator shall submit a reclamation plan to the board before commencing any opencut mining and may not commence mining before the plan receives approval from the board. The operator may request and receive

a meeting with the board prior to submission of the plan. If the board does not notify the operator that it has approved or disapproved a plan within 30 days after the board has received the plan, the board is considered to have approved the plan. The board, however, for sufficient cause, may extend its period of consideration for an additional 30 days if it notifies the operator prior to the end of the original 30-day period. The board shall submit each reclamation plan or amendments to the reclamation plan to the landowner for his recommendations and shall consider those recommendations in deciding whether to approve or disapprove any plan or amendments. The board may seek technical help from any state or federal agency. The board shall submit the plan immediately to the director of the university of Montana statewide archaeological survey for evaluation of possible archaeological or historical values in the area to be mined. The board may approve a reclamation plan only if the board has found that the plan provides for the best possible reclamation procedures available under the circumstances at the time, so that after mining operations are completed, the affected land will be reclaimed to a productive use. Once the reclamation plan is accepted in writing by the board, it must become a part of the contract but is subject to annual review and modification by the board.

(2) The board may not approve any reclamation plan unless the plan provides:

(a) that the land will be reclaimed for one or more specified uses, including but not limited to forest, pasture, orchard, cropland, residence, recreation, industry, and habitat for wildlife, including food, cover, or water, or other uses;

(b) that to the extent reasonable and practicable, the operator will establish vegetative cover commensurate with the proposed land use;

(c) whenever operations result in a need to prevent acid drainage or sedimentation on or in adjoining lands or streams, for the construction of earth dams or other reasonable devices to control water drainage, provided the formation of the impoundments or devices will not interfere with other landowners' rights or contribute to water pollution;

(d) that to accomplish practical utilization of soil materials, the material will be utilized for placement on affected areas, if required by the reclamation plan after completion or termination of that particular phase of the mining operations, at a depth sufficient for plant growth on slopes of 3:1 or less;

(e) that grading will be commensurate with the topography sought and land use designated;

(f) that metal and other waste will be removed or buried;

(g) that all access, haul, and other support roads will be located, constructed, and maintained in such a manner as to control and minimize channeling and other erosion;

(h) that the operator will submit a progress report annually to the board;

(i) that all operations will be conducted to avoid range and forest fires and spontaneous combustion and that open burning of carbonaceous materials will be in accordance with suitable practices for fire prevention and control;

(j) that archaeological and historical values in areas to be mined will be given appropriate protection;

(k) that except for rock faces, bench faces, and excavations used for water impoundments, each surface area of the mined premises that will be disturbed will be revegetated when its use for extractive purposes is no longer required;

(l) that seeding and planting will be done in a manner to achieve a permanent suitable vegetative cover for wildlife, livestock, and retardation of erosion and that all seed will be drilled unless otherwise provided in the plan;

(m) that reclamation will be as concurrent with mining operations as feasible and will be completed within a specified length of time; and

(n) that surface water and ground water will be given appropriate protection, consistent with state law, from deterioration of water quality and quantity that may arise as a result of the operation.

(3) If reclamation according to the plan has not been completed in the time specified, the board after 30 days' written notice shall order the operator to cease mining and, if the operator does not cease, shall institute an action to enjoin further operation and may sue for damages for breach of contract, for payment of the performance bond, or for both.

(4) (a) At any time during the period of reclamation, the operator may for good reason submit to the board a new reclamation plan or amendments to the existing plan, including extensions of time.

(b) The board may approve the proposed new reclamation plan or amendments to the existing plan if:

(i) the operator has in good faith carried on reclamation according to the existing plan and the proposed new plan or amendments to the existing plan will result in reclamation as or more desirable than the reclamation proposed under the existing plan; or

(ii) it is highly improbable reclamation will be successful unless the existing plan is replaced or amended.

(c) When accepted, the proposed new reclamation plan or the proposed amendments to the existing plan become a part of the contract.

(5) The operator shall provide a performance bond or an alternative acceptable to the board in an amount commensurate with the estimated cost of reclamation, but in no case may the bond be less than $200 per acre. The estimated cost of reclamation must be set forth in the reclamation plan.

(6) The contract, reclamation plan, and amendments accepted by the board are a public record and are open to inspection.

(7) The contract is effective when signed by the board and the operator and remains in force until terminated by mutual consent or by the board upon 6 months' notice.

(2) The civil penalties provided for in this section may be waived for a minor violation if it is determined that the violation does not represent potential harm to public health, public safety, or the environment and does not impair the administration of this part. The board shall adopt rules to implement and administer a procedure for waiver of a penalty under this subsection.

(3) The department of state lands shall notify the person or operator of the violation. The person or operator is entitled, by filing a written request within 20 days of receipt of the notice of violation, to a hearing on the issues of whether the alleged violation has occurred and whether the penalty proposed to be imposed is proper. The department shall issue a statement of proposed penalty no more than 10 days after notice of violation. After the hearing or after the time for requesting a hearing has expired, the board shall make findings of fact, issue a written decision as to the occurrence of the violation and the amount of penalty warranted, and order the payment of a penalty in that amount. The person or operator shall remit the amount of the penalty within 30 days of the order. If the person or operator wishes to obtain judicial review of the assessment, he shall submit with the penalty a statement that the penalty is being paid under protest and the department shall hold the payment in escrow until judicial review is complete. A person or operator who fails to request and submit testimony at the hearing provided for in this subsection or who fails to pay the assessed penalty under protest within 30 days of the order assessing the penalty forfeits his right to seek judicial review of the violation or penalty determinations. These penalties are recoverable in an action brought by the department in the district court of the first judicial district of this state, in and for the county of Lewis and Clark, or the district court of the county in which the opencut mine is located.

(2) In said action the successful party or parties recovering judgment against the person or persons obligated shall, in addition to relief by way of accounting and recovery of the royalty due as hereinabove provided, also recover judgment for a sum of money by way of reasonable attorney's fees to

be allowed by the court together with the costs allowed to successful parties by law in actions generally in said court.

(3) Whenever the same person or persons is or are obligated for delivery or payment of said royalty to separate owners of royalty in or to a tract of land or any portion of said land or the product of the whole or any part of said land, then any number of said owners of royalty may join their separate causes of action as parties plaintiff in the action herein provided for, and in their complaint filed in said action, each cause of action of each of the several plaintiffs shall be set forth separately in said complaint, and the judgment given, made, and rendered upon said complaint shall adjudge the relief to one or more of the plaintiffs and deny relief to any one or more of said plaintiffs accordingly as the evidence may establish.

(4) If the defendant or defendants prevail in said action against any one or more of said plaintiffs, the court shall adjudge and allow to such defendant or defendants and against the unsuccessful plaintiff or plaintiffs recovery of a sum of money as reasonable attorney's fees to be allowed by the court and adjudge and allow costs to said defendant to be recovered from the said unsuccessful plaintiff or plaintiffs in said action, as provided for by law in actions generally in said court.

82-10-102. Remedy not exclusive. The remedy provided for in 82-10-101 is in the nature of a special remedy additional to and not a substitute for other remedies given by law to owners of royalties in lands of the character specified, and all acts or parts of acts in conflict with the provisions of 82-10-101 shall not apply in actions authorized and provided for by that section.

82-10-103. Obligation to pay royalties as essence of contract — interest. (1) The obligation arising under an oil and gas lease to pay oil or gas royalties to the royalty owner or his assignee, to deliver oil or gas to a purchaser to the credit of such royalty owner or his assignee, or to pay a portion of the proceeds of the sale of such oil or gas to the royalty owner or his assignee is of the essence in the lease contract.

(2) If the operator under an oil and gas lease fails to pay oil or gas royalties to the royalty owner or his assignee within 120 days after the initial oil or gas produced under the lease is marketed and within 60 days for all oil and 90 days for all gas produced and marketed thereafter, the unpaid royalties will bear interest, at the maximum rate of interest authorized under 31-1-107 from the date due until paid. The operator may remit semiannually to a person entitled to royalties the aggregate of 6 months' royalties whenever the aggregate amount is less than $50 and annually whenever the aggregate amount is less than $10.

(3) A royalty owner seeking a remedy for failure to make payments under the lease or seeking such payments under this section shall bring his action in the district court for the county in which the oil or gas well is located, and that court has jurisdiction over any such actions brought under this section. The prevailing party in any proceeding brought under this section is entitled to recover his court costs and reasonable attorney fees.

(4) This section does not apply if a royalty owner or his assignee has elected to take his proportionate share of production in kind or whenever there is a dispute as to the title of the minerals or entitlement to royalties, the outcome of which would affect distribution of royalty payments.

The governing body of any county, city, town, school district, or incorporated political subdivision within the state of Montana may, if in the best interests of the county, city, town, school district, or incorporated political subdivision, lease any real property owned by the county, city, town, school district, or incorporated political subdivision for oil and gas development purposes. Such leases shall be made upon the best terms obtainable, shall provide for such terms, except as hereinafter provided, as the governing body shall consider to be for the best interests of the county, city, town, school district, or incorporated political subdivision, shall reserve a royalty of not less than 12 ½% which shall include any royalty payable to any person other than the lessor, and shall be for a period not exceeding 10 years and so long thereafter as oil, gas, or other hydrocarbons shall be produced from the premises embraced in the lease. However, nothing contained herein shall authorize the leasing of lands acquired by a county by tax deed except under the provisions of Title 7, chapter 8, part 25.

82-10-301. Definitions. Unless the context requires otherwise, in this part the following definitions apply:

(1) "Board" means the board of oil and gas conservation provided for in 2-15-3303.

(2) "Native gas" means gas which has not been previously withdrawn from the earth.

(3) "Natural gas" means gas either while in its original state or after the same has been processed by removal therefrom of component parts not essential to its use for light and fuel.

(4) "Natural gas public utility" means any person, firm, or corporation authorized to do business in this state and engaged in the business of transporting or distributing natural gas by means of pipelines into, within, or through this state for ultimate public use.

(5) "Underground reservoir" means any subsurface sand, stratum, or formation of the earth suitable for the injection and storage of natural gas therein and the withdrawal of natural gas therefrom.

(6) "Underground storage" means the process of injecting and storing of natural gas within and withdrawing of natural gas from an underground reservoir.

History: En. Sec. 1, Ch. 259, L. 1955; amd. Sec. 83, Ch. 253, L. 1974; R.C.M. 1947, 60-801.

Cross-References

82-10-302. Policy. (1) The underground storage of natural gas which promotes conservation thereof, which permits the building of reserves for orderly withdrawal in periods of peak demand, which makes more readily available natural gas to the domestic, commercial, and industrial consumers of this state, or which provides a better year-round market to the various gas fields serves the public interest and welfare of this state.

(2) Therefore, in the manner hereinafter provided, the board and the court may find and determine that the underground storage of natural gas as hereinbefore defined is in the public interest.

History: En. Sec. 2, Ch. 259, L. 1955; amd. Sec. 84, Ch. 253, L. 1974; R.C.M. 1947, 60-802.

82-10-303. Use of eminent domain to acquire underground reservoirs. (1) A natural gas public utility may acquire through the exercise of the right of eminent domain as provided in this part for its use for the underground storage of natural gas an underground reservoir which the board finds is suitable and in the public interest for the underground storage of natural gas, and in connection with the underground reservoir, the utility may acquire such other interests in property as may be required adequately to maintain and operate the underground reservoir facilities. The acquisition by the exercise of the right of eminent domain of underground reservoirs granted by this section is limited as follows:

(a) No sand, formation, or stratum which is producing or has produced or which is capable of producing oil is subject to appropriation under this section.

(b) No gas-bearing sand, formation, or stratum is subject to appropriation under this section, unless the recoverable volumes of native gas therein have all been produced or unless the sand, formation, or stratum has a greater value or utility as an underground reservoir for the purpose of insuring an adequate supply of natural gas for domestic, commercial, or industrial consumers of natural gas or for the conservation of natural gas than for the production of the remaining relatively small volumes of native gas as compared with the original volumes of natural gas therein. Gas, sand, formation, or stratum may not be acquired under this part when the gas in the underground reservoir is being used for the secondary recovery of oil, unless gas in necessary and required amounts is furnished to the operator of the secondary recovery operations for as long as oil is produced in paying quantities in the secondary operations for the recovery of oil at the same cost as the cost to the operator at the time of acquisition of the gas being used in the secondary operations, not exceeding, however, the quantity of the appropriated gas that remained recoverable from the sand, formation, or stratum at the time of its acquisition, if the operator was at that time entitled to the whole thereof or if the operator was at that time entitled to less than the whole thereof, then not to exceed the quantity thereof to which the operator was then entitled.

(c) Only the area of the underground sand, formation, or stratum as may reasonably be expected to be penetrated by gas displaced or injected into the underground gas storage reservoir may be appropriated.

(d) No rights or interests in existing underground gas reservoirs being used for the injection, storage, or withdrawal of natural gas owned or operated by a natural gas public utility other than the natural gas public utility seeking to acquire the same are subject to appropriation.

(2) The exercise of the right of eminent domain granted by this section shall be without prejudice to the rights of the owner of the lands or of other rights or interests therein to drill or bore into or through the underground reservoir so appropriated in a manner that complies with orders and rules of the board issued for the purpose of protecting the underground reservoir against pollution and against the escape of natural gas therefrom and shall be without prejudice to the rights of the owner of the lands or other rights or interests therein as to all other uses thereof. The additional cost of complying with those rules or orders in order to protect the storage reservoir shall be paid by the natural gas public utility.

History: En. Sec. 3, Ch. 259, L. 1955; amd. Sec. 85, Ch. 253, L. 1974; R.C.M. 1947, 60-803.

82-10-304. Certificate of board required prior to use of eminent domain. (1) A natural gas public utility desiring to exercise the right of eminent domain as to any property for use for underground storage of natural gas shall, as a condition precedent to the filing of its complaint in the district court, apply for and obtain from the board a certificate setting out the findings of the board:

(a) that the underground sand, stratum, or formation sought to be acquired is suitable for an underground reservoir for the storage of natural gas and that its use for such purposes is in the public interest;

(b) the amount of native gas, if any, remaining therein and the portion thereof recoverable; and

(c) that the applicant has in good faith sought to acquire the rights sought under this part.

(2) The board may not issue the certificate until after a public hearing is had on the application, pursuant to notice given to all persons known to have an interest in the property proposed to be acquired in the manner provided by the laws of the state for service of process in a civil action.

History: En. Sec. 4, Ch. 259, L. 1955; amd. Sec. 86, Ch. 253, L. 1974; R.C.M. 1947, 60-804.

Having first obtained a certificate from the board, a natural gas public utility desiring to exercise the right of eminent domain for the purpose of acquiring property for the underground storage of natural gas shall do so in the manner provided in this section. The natural gas public utility shall present to the district court of the county wherein the land is situated a complaint setting forth the purpose for which the property is sought to be acquired, a description of the property sought to be appropriated, and the names of the owners thereof as shown by the records of the county. The plaintiff shall file the certificate of the board as a part of its complaint, and no order by the court granting the complaint shall be entered without the certificate being filed therewith. Subsequent proceedings shall follow the procedure provided by law in the exercise of the rights of eminent domain, Title 70, chapters 30 and 31.

Abandoned Oil and Gas Wells — Reclamation

82-10-401. Notice required before abandonment of well — owner's option. No person shall plug and abandon an oil or gas well located within this state without first giving reasonable notice of his intention to do so to the surface owner of record of the land on which said well is located. Upon receipt of notice to plug and abandon, the surface owner may, by written notice given within 15 days thereafter, direct that the well pipe for said well shall be buried to a depth of not less than 3 feet. The board of oil and gas conservation shall adopt regulations to implement this section.

(1) The board of oil and gas conservation shall maintain a record of the abandoned oil or gas wells, injection wells, sumps, and seismographic shot holes in the state that disturb land, water, or wildlife resources to a degree not in compliance with plugging, pollution prevention, and reclamation rules of the board. This record must be compiled from petitions or written statements from the owners of surface rights or lessees.

(2) The board shall check the record compiled under subsection (1) against its drilling records and shall determine and list the name of the person who abandoned the well, sump, or hole, whenever this information is available. When a person so listed applies to the board for a new drilling permit, the board may issue the permit only after approving a plan by which the applicant

will reclaim the land disturbed by his abandoned wells, sumps, or holes within 3 years.

(3) When the person who abandoned a well, sump, or hole cannot be identified or located or when the person does not have sufficient financial resources to pay for complete reclamation, the board may then reclaim the disturbed land with funds available from the oil and gas production damage mitigation account in a manner consistent with the requirements for the use of the account provided in 82-11-161 and 82-11-164.

(4) As used in subsection (3), "well" includes a class II injection well, as defined in 82-11-101, for which a drilling permit or a permit authorizing use of a well for that purpose was granted by the board after June 30, 1989, and water source wells used in connection with enhanced recovery projects.

Part 5

Surface Owner Damage and Disruption Compensation

82-10-501. Purpose — legislative findings. (1) The purpose of this part is to provide for the protection of surface owners of land underlaid with oil and gas reserves while allowing for the necessary development of those reserves.

(2) To carry out the purpose described in subsection (1), the legislature finds that:

(a) it is necessary to protect the economic well-being of individuals engaged in agricultural production;

(b) exploration for and development of oil and gas reserves in this state, while necessary, interferes with the use, agricultural or otherwise, of the surface of certain land; and

(c) owners of the surface estate should be justly compensated for use of their property and interference with the use of their property due to oil and gas development.

82-10-502. Definitions. As used in this part, the following definitions apply:

(1) "Agricultural production" means the production of any growing grass, crops, or trees attached to the surface of the land or farm animals with commercial value.

(2) "Oil and gas operations" means the exploration for or drilling of an oil and gas well that requires entry upon the surface estate and is begun

subsequent to June 1, 1981, and the production operations directly related to the exploration or drilling.

(3) "Oil and gas developer or operator" means the person who acquires the oil and gas lease for the purpose of extracting oil and gas.

(4) "Oil and gas estate" means an estate in or ownership of all or part of the oil and gas underlying a specified tract of land.

(5) "Surface owner" means the person who holds record title to or has a purchaser's interest in the surface of the land.

History: En. Sec. 2, Ch. 199, L. 1981.

82-10-503. Notice of drilling operations. In addition to the requirements for geophysical exploration activities governed by Title 82, chapter 1, part 1, the oil and gas developer or operator shall give the surface owner and any purchaser under contract for deed written notice of the drilling operations that he plans to undertake. This notice shall be given to the record surface owner and any purchaser under contract for deed at their addresses as shown by the records of the county clerk and recorder at the time the notice is given. This notice shall sufficiently disclose the plan of work and operations to enable the surface owner to evaluate the effect of drilling operations on the surface owner's use of the property. The notice shall be given no more than 90 days and no fewer than 10 days before commencement of any activity on the land surface.

History: En. Sec. 3, Ch. 199, L. 1981; amd. Sec. 27, Ch. 526, L. 1983; amd. Sec. 1, Ch. 497, L. 1985.

(1) (a) The oil and gas developer or operator shall pay the surface owner a sum of money or other compensation equal to the amount of damages sustained by the surface owner for loss of agricultural production and income, lost land value, and lost value of improvements caused by drilling operations.

(b) The amount of damages may be determined by any formula mutually agreeable between the surface owner and the oil and gas developer or operator. When determining damages, consideration shall be given to the period of time during which the loss occurs.

(c) The surface owner may elect to receive annual damage payments over a period of time, except that the surface owner shall be compensated by a single sum payment for harm caused by exploration only.

(d) The payments contemplated by this subsection (1) may only cover land directly affected by drilling operations and production. Payments under this subsection (1) are intended to compensate the surface owner for damage and disruption; no person may reserve or assign that compensation apart from the surface estate except to a tenant of the surface estate.

(2) An oil and gas developer or operator who fails to timely pay an installment under any annual damage agreement negotiated with a surface owner is liable for payment to the surface owner of twice the amount of the

unpaid installment if the installment payment is not paid within 60 days of receipt of notice of failure to pay from the surface owner.

Part 1

Regulation by Board of Oil and Gas Conservation

82-11-101. Definitions. As used in this chapter, unless the context requires otherwise, the following definitions apply:

(1) "Administrator" means the administrator of the division of oil and gas conservation.

(2) "Board" means the board of oil and gas conservation provided for in 2-15-3303.

(3) "Class II injection well" means a well, as defined by the federal environmental protection agency or any successor agency, that injects fluids:

(a) that have been brought to the surface in connection with oil or natural gas production;

(b) for purposes of enhancing the ultimate recovery of oil or natural gas; or

(c) for purposes of storing liquid hydrocarbons.

(4) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(5) "Determinations" means those decisions delegated to the state by or under authority of the Natural Gas Policy Act of 1978 or any successor or similar legislation relating to oil and gas.

(6) "Enhanced recovery" means the increased recovery from a pool achieved by artificial means or by the application of energy extrinsic to the pool; such artificial means or application includes pressuring, cycling, pressure maintenance, or injection into the pool of any substance or form of energy as is contemplated in secondary recovery and tertiary programs but does not include the injection in a well of a substance or form of energy for the sole purpose of aiding in the lifting of fluids in the well or stimulating of the reservoir at or near the well by mechanical, chemical, thermal, or explosive means.

(7) "Field" means the general area underlaid by one or more pools.

(8) "Fluid" means any material or substance that flows or moves, whether in a semisolid, liquid, sludge, gas, or any other form or state.

(9) "Gas" means all natural gases and all other fluid hydrocarbons as produced at the wellhead and not defined as oil in subsection (10) of this section.

(10) "Oil" means crude petroleum oil and other hydrocarbons regardless of gravity which are produced at the wellhead in liquid form by ordinary production methods and which are not the result of condensation of gas before or after it leaves the reservoir.

(11) "Owner" means the person who has the right to drill into and produce from a pool and to appropriate the oil or gas he produces from a pool either for himself or others or for himself and others, and the term includes all persons holding that authority by or through him.

(12) "Person" means any natural person, corporation, association, partnership, receiver, trustee, executor, administrator, guardian, fiduciary, or other representative of any kind and includes any agency or instrumentality of the state or any governmental subdivision of the state.

(13) "Pollution" means contamination or other alteration of the physical, chemical, or biological properties of any state waters that exceeds that permitted by state water quality standards or standards adopted by the board, including but not limited to the disposal, discharge, seepage, drainage, infiltration, flow, or injection of any liquid, gaseous, solid, or other substance into any state waters that will or is likely to create a nuisance or render the waters harmful, detrimental, or injurious to public health, recreation, safety, welfare, livestock, wild animals, birds, fish, or other wildlife. A disposal, discharge, seepage, drainage, infiltration, flow, or injection of fluid that is authorized under a rule, permit, or order of the board is not pollution under this chapter.

(14) "Pool" means an underground reservoir containing a common accumulation of oil or gas or both; each zone of a structure which is completely separated from any other zone in the same structure is a pool, as that term is used in this chapter.

(15) "Producer" means the owner of a well or wells capable of producing oil or gas or both.

(16) "Responsible person" means a person who is determined by the board under 82-10-402 to have abandoned an oil or gas well, injection well, disposal well, water source well, drill site, sump, seismographic shot hole, or other area where oil and gas drilling and production operations were conducted.

(17) "State waters" means any body of water, either surface or underground.

(18) "Waste" means:

(a) physical waste, as that term is generally understood in the oil and gas industry;

(b) the inefficient, excessive, or improper use of or the unnecessary dissipation of reservoir energy;

(c) the location, spacing, drilling, equipping, operating, or producing of any oil or gas well or wells in a manner which causes or tends to cause reduction in the quantity of oil or gas ultimately recoverable from a pool under prudent and proper operations or which causes or tends to cause unnecessary or excessive surface loss or destruction of oil or gas; and

(d) the inefficient storing of oil or gas. (The production of oil or gas from any pool or by any well to the full extent that the well or pool can be produced in accordance with methods designed to result in maximum ultimate recovery, as determined by the board, is not waste within the meaning of this definition.)

Compiler's Comments

1991 Amendment: In definition of responsible person inserted "disposal well, water source well, drill site", after "hole" inserted "or other area where oil and gas drilling and production operations were conducted", and deleted former (a) and (b) requiring responsible person to be either a corporation, association, partnership, or other business organization with assets in excess of $250,000 or, if the business organization does not have assets in excess of $250,000, to be a natural person with primary ownership in the business organization; and made minor changes in style.

82-11-102. Oil or gas wells not public utilities. Nothing in this chapter shall in any manner be construed as constituting or attempting to constitute oil or gas wells as a public utility or utilities.

History: En. Sec. 20, Ch. 238, L. 1953; amd. Sec. 79, Ch. 253, L. 1974; R.C.M. 1947, 60-143.

82-11-103. Lands subject to law. This chapter applies to all lands in the state lawfully subject to its police powers, including all state-owned lands. It applies to lands of the United States or to lands subject to the jurisdiction of the United States only to the extent that control and supervision of conservation of oil and gas by the United States on its lands fails to effect the intent and purposes of this chapter and otherwise applies to those lands to the extent that any officer of the United States having jurisdiction or his duly authorized representative approves any of the provisions of this chapter or an order of the board that affects those lands. This chapter also applies to any lands committed to a unit agreement approved by the secretary of the interior or his duly authorized representative, except that the board may, with respect to those unit agreements, suspend the application of this chapter or any part of this chapter so long as the conservation of oil and gas and the prevention of waste as provided in this chapter is accomplished under the unit agreements. The suspension does not relieve an operator or owner from making reports that may be required by the board with respect to operations and production under the unit agreement, and the suspension does not relieve an operator or owner from the payment of taxes on his oil and gas production or payment for permit fees as required by this chapter.

82-11-104. Construction — no conflict with board of land commissioners' authority. No provision of this chapter may be construed to conflict with 77-3-430, granting the board of land commissioners the authority to enter into pooling and unitization agreements for the production of oil or gas with others, provided that state lands are subject to the provisions of this chapter concerning spacing and statutory pooling and unitization in the absence of voluntary pooling and unitization agreements.

1991 Amendment: At end of section inserted proviso subjecting state lands to laws concerning space and statutory pooling and unitization in absence of agreements; and made minor changes in style.

82-11-105 through 82-11-110 reserved.

82-11-111. Powers and duties of board. (1) The board shall make such investigations as it considers proper to determine whether waste exists or is imminent or whether other facts exist which justify any action by the board under the authority granted by this chapter with respect thereto.

(2) Subject to the administrative control of the department under 2-15-121, the board shall:

(a) require measures to be taken to prevent contamination of or damage to surrounding land or underground strata caused by drilling operations and production, including but not limited to regulating the disposal or injection of water and disposal of oil field wastes;

(b) classify wells as oil or gas wells or class II injection wells for purposes material to the interpretation or enforcement of this chapter;

(c) adopt and enforce rules and orders to effectuate the purposes and the intent of this chapter.

(3) The board shall determine and prescribe what producing wells shall be defined as "stripper wells" and what wells shall be defined as "wildcat wells" and make such orders as in its judgment are required to protect those wells and provide that stripper wells may be produced to capacity if it is considered necessary in the interest of conservation to do so.

(4) With respect to any pool from which gas was being produced by a gas well on or prior to April 1, 1953, this chapter does not authorize the board to limit or restrain the rate (daily or otherwise) of production of gas from that pool by any well then or thereafter drilled and producing from that pool to less than the rate at which the well can be produced without adversely affecting the quantity of gas ultimately recoverable by the well.

(5) The board has exclusive jurisdiction over all class II injection wells and all pits and ponds in relation to those injection wells. The board may:

(a) issue, suspend, revoke, modify, or deny permits to operate class II injection wells, consistent with rules made by it;

(b) examine plans and other information needed to determine whether a permit should be issued or require changes in plans as a condition to the issuance of a permit;

(c) clearly specify in a permit any limitations imposed as to the volume and characteristics of the fluids to be injected and the operation of the well;

(d) authorize its staff to enter upon any public or private property at reasonable times to:

(i) investigate conditions relating to violations of permit conditions;

(ii) have access to and copy records required under this chapter;

(iii) inspect monitoring equipment or methods; and

(iv) sample fluids which the operator is required to sample; and

(e) adopt standards for the design, construction, testing, and operation of class II injection wells.

(6) The board shall determine, for the purposes of using the oil and gas production damage mitigation account established in 82-11-161:

(a) when the person responsible for an abandoned well, sump, or hole cannot be identified or located, or if the person is identified or located, when the person does not have sufficient financial resources to properly plug the well, sump, or hole; or

(b) when a previously abandoned well, sump, or hole is the cause of potential environmental problems and no responsible party can be identified or located or, if a responsible party can be identified and located, the person does not have sufficient financial resources to correct the problems.

History: En. Sec. 3, Ch. 19, L. 1979.

82-11-115. Procedure to make determinations. (1) The board shall adopt rules to govern the making of determinations. These rules shall be adopted pursuant to the Montana Administrative Procedure Act, but the procedure to be employed in making determinations is not subject to the Montana Administrative Procedure Act. The rules may provide that testimony may only be submitted in writing and that no cross-examination is allowed.

(2) Any determination made by an examiner under this section and 82-11-114 shall be reviewed by the board upon request of two members of the board. The review by the board is subject to the notice and hearing but not the appeal provisions of the contested case procedures of the Montana Administrative Procedure Act. The request for review must be made within 20 days after an examiner makes a determination. If no request for a review is made during this 20-day period, the examiner's determination is considered to be the determination of the board and the determination, together with the accompanying record, shall be forwarded to the federal energy regulatory commission for review. (1) Any information that is furnished to the board or the board's staff or that is obtained by either of them is a matter of public record and open to public use. However, any information unique to the owner or operator that would, if disclosed, reveal methods or processes entitled to protection as trade secrets must be maintained as confidential if so determined by the board.

(2) If an owner or operator disagrees with a determination by the board that certain material will not be maintained as confidential, the owner or operator may file a declaratory judgment action in a court of competent jurisdiction to establish the existence of a trade secret if he wishes such information to enjoy confidential status. The department must be served in any such action and may intervene as a party.

(3) Any information not intended to be public when submitted to the board or the board's staff must be submitted in writing and clearly marked as confidential.

(4) Data describing physical and chemical characteristics of a liquid, gaseous, solid, or other substance injected or discharged into state waters may not be considered confidential.

(5) The board may use any information in compiling or publishing analyses or summaries relating to water pollution if such analyses or summaries do not identify the owner or operator or reveal any information that is otherwise made confidential by this section.

(4) the restoration of surface lands to their previous grade and productive capability after a well is plugged or a seismographic shot hole has been utilized and necessary measures to prevent adverse hydrological effects from such well or hole, unless the surface owner agrees in writing, with the approval of the board or its representatives, to a different plan of restoration;

(5) the furnishing of a reasonable bond with good and sufficient surety, conditioned for performance of the duty to properly plug each dry or abandoned well, which bond may not be canceled or absolved:

(a) if the well fails to produce oil or gas in commercial quantities, until:

(i) the board determines the well is properly plugged and abandoned as provided in the board's rules; or

(ii) the requirements of 82-11-163 are met; or

(1) An owner drilling a well for gas or oil shall make available to the board at its field offices representative cores or chips, when available, the cuttings from the well, and the bottom-hole temperatures of the wells, in order to facilitate the discovery of geothermal potential. However, cores, chips, or cuttings need not be so made available for a period of 6 months following completion or abandonment of the wells. The board may, however, relieve the owner of a well of the obligation to furnish cores, chips, or cuttings when, in the opinion of the board, the furnishing thereof would be unduly burdensome for the owner; however, the owner desiring relief must apply to and receive permission from the board to not so furnish.

(2) The owner of a stratigraphic test well drilled for the purpose of obtaining lithologic information useful in potential oil and gas operations, as such well is defined by the board's rules, shall within 3 years from the date of

the cessation of the drilling of the well make available to the board complete sets of sample cuttings and representative cores or chips and well logs of the wells, which logs shall include among other information the size of casing used, the type and depth of water if any located, and bottom-hole temperatures for geothermal purposes. The board shall require and the owner of a stratigraphic test well shall furnish, prior to the commencement of drilling of the well, a good and sufficient surety bond, to be approved prior to the commencement of the drilling, conditioned upon the proper plugging of the well prior to abandonment, the amount of the bond to be determined by the estimated depth as in the board's rules provided for oil and gas wells; prior to abandonment, the wells shall be plugged by the owner thereof or by the surety should the owner be in default, the plugging to conform to the standards set down and determined by the board.

82-11-131. Privilege and license tax. (1) For the purpose of providing funds for defraying the expenses of the operation and enforcement of this chapter and expenses of the board, an operator or producer of oil and gas shall pay an assessment not to exceed 2/10 of 1% of the market value of each barrel of crude petroleum originally produced, saved and marketed, or stored within the state or exported from the state and the same rate on the market value of each 10,000 cubic feet of natural gas produced, saved and marketed, or stored within the state or exported therefrom.

(2) The board shall, by rule adopted pursuant to the provisions of the Montana Administrative Procedure Act, fix the amount of the assessment and may from time to time reduce or increase the amount thereof as the expenses chargeable against the oil and gas conservation fund may require. However, the assessment fixed by the board may not exceed the limits prescribed in this section. The amount of the assessment shall be a percentage factor (not to exceed 100%) of the rate set forth in subsection (1) above, and the same percentage factor shall be applied by the board in fixing the amount of the assessment on each barrel of crude production and each 10,000 cubic feet of natural gas mentioned in that subsection. (3) The department of revenue shall collect the privilege and license tax assessment in the same manner as the oil and gas severance tax is collected under Title 15, chapter 36.

(3) When an emergency requiring immediate action is found to exist, the board may issue an emergency order without advance notice or hearing which shall be effective upon promulgation. An emergency order may not remain in effect beyond the next regular meeting of the board.

(4) (a) If notice is required by the chapter and the Montana Administrative Procedure Act does not apply, the notice shall be made by publication in one or more issues of a newspaper in general circulation in Helena and a

newspaper of general circulation in the county where the land or some part thereon is situated, and the board may also cause publication to be made in a trade journal or bulletin of general circulation in the oil and gas industry in the state.

(b) At least 20 days prior to the public hearing, a person who applies to establish a well spacing unit under 82-11-201 or who applies to pool all interests in a well spacing unit pursuant to 82-11-202 shall cause written notice of any hearing thereon to be served upon the record owners of the oil and gas and leasehold interests sought to be spaced or pooled. (1) If the Montana Administrative Procedure Act does not apply, the board may subpoena witnesses, administer oaths, and require the production of records, books, and documents for examination at any hearing or investigation conducted by it. Witnesses subpoenaed under this subsection shall be paid the same per diem and mileage as is provided to be paid to witnesses attending the district courts of this state.

(2) This chapter, a suit by or against the board, a violation charged or asserted against a person under this chapter, or a rule or order issued under this chapter does not impair, abridge, or delay a cause of action for damages or other civil remedy which a person may have or assert against a person violating this chapter or a rule or order issued under it. A person so aggrieved by the violation may sue for and recover such damages or relief as he otherwise may be entitled to receive.

(3) A person, association, corporation, or agency of the state or federal government may apply to the board protesting a violation or a threatened violation of this chapter. The board shall make an investigation and make a written report to the person, association, corporation, or agency that made the protest. If a violation is established by the investigation of the board, the

board shall take appropriate enforcement action. If the board fails to take appropriate enforcement action or to bring suit to enjoin a threatened violation of this chapter or a rule or order of the board within 10 days after receipt of written request to do so by a person who is or will be adversely affected, the person making the request may bring the suit in his own behalf to restrain the threatened violation in a court in which the board might have brought suit. The board shall be made a party defendant in the suit in addition to the person threatening to violate this chapter or a rule or order of the board, and the action shall proceed and injunctive relief may be granted without bond in the same manner as if suit had been brought by the board.

(4) If a person fails or refuses to comply with the subpoena issued by the board or if a witness refuses to testify as to any material matter regarding which he may be interrogated, any district court in the state, upon good cause shown by the application of the board, may issue a warrant of attachment for the person and, if after hearing the court finds his failure or refusal to be unjustified, compel him to comply with the subpoena and to attend before the board and produce any subpoenaed records, books, and documents for examination and to give his testimony. The court may punish for contempt as in the case of disobedience to a like subpoena issued by the court or for refusal to testify therein.

82-11-144. Court review. Any interested person adversely affected by any provision of this chapter or by any rule or order adopted by the board hereunder or by any act done or threatened thereunder may obtain court review and seek relief by a suit for an injunction against the board as defendant, which suit may be instituted in the district court of the county where the board keeps its principal office or in the district court of any county wherein the land involved or any part thereof is situated. The term "interested person", as used herein, shall be interpreted broadly and liberally, especially where the suit involves the right to drill a well or involves some other act which clearly affects the plaintiff even though the effect is indirect. If the act complained of involves a general order for a pool or the right to drill a well therein, a person who owns or has an interest in a well in the pool, which well is capable of producing oil or gas, shall be considered to be prima facie an interested person. The suit shall be given a preferential setting and shall be tried de novo and disposed of as an ordinary civil suit and not upon the record of any hearing before the board. The statute, rule, order, or decision involved in the suit shall be prima facie valid; however, the finding of fact, actual or presumed, made by the board in support of the rule, order, or decision involved in the suit is not binding on the court though supported by evidence introduced at a hearing before the board. The court shall decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of any board action. The court shall:

(1) compel board action unlawfully withheld or unreasonably delayed;

(2) hold unlawful and set aside board action, findings, and conclusions found to be:

(a) arbitrary, unreasonable, capricious, and abuse of discretion or otherwise not in accordance with law;

(b) contrary to constitutional right, power, privilege, or immunity;

(c) in excess of statutory jurisdiction, authority, or limitations or short of statutory right;

(d) without observance of procedure required by law; or

(e) unwarranted by the facts; and

(3) consider all the evidence, pass on the credibility of witnesses and the weight to be given their testimony, and resolve such fact issues as may be necessary for decision in the case.

(1) A temporary restraining order or temporary injunction of any kind may not be granted against the board and its members or against the attorney general or against an employee of the board, restraining the board and its members or employees or the attorney general from enforcing this chapter or any rule or order made thereunder, until it is shown to the satisfaction of the court that the act done or threatened is probably without sanction of the law or that the provisions of this chapter or the rule or order complained of is probably invalid or unreasonable and that, if enforced against the complaining party, will probably cause an irreparable injury.

(2) With respect to an order or decree granting temporary injunctive relief, the nature and extent of the probable invalidity of the statute or of any provision of this chapter or of a rule or order thereunder involved in the suit must be recited in the order or decree granting the temporary relief, as well as a clear statement of the probable damage relied upon by the court as justifying temporary injunctive relief.

(3) A temporary restraining order or temporary injunction of any kind against the board or its members or its employees or the attorney general may not be effective until the plaintiff executes a bond with sufficient sureties in such amount and upon such conditions as the court directs. The bond shall be made payable to the state of Montana, shall be approved by the judge of the court, and shall be for the use and benefit of all persons who may be injured by the acts done under the protection of the temporary restraining order or temporary injunction. A person claiming injury must bring suit within 6 months after the date of the final determination of the validity in whole or in part of the provisions of the chapter or the rule or order, the enforcement of which was enjoined; otherwise the right to bring such suit is forever barred.

(a) that a person is violating or threatening to violate this chapter or a rule or order of the board, the board may bring suit against that person in the district court of any county where the violation occurs or is threatened to restrain the person from continuing the violation or from carrying out the threat of violation; or

(b) that a person is violating this chapter or a rule or order of the board in a manner for which the board is authorized to institute proceedings pursuant to 82-11-149, the board may issue an order either assessing a civil penalty in the amount prescribed in 82-11-149, up to a maximum administrative penalty of $125,000, or requiring compliance with this chapter or a rule or order, or both.

82-11-151. Emergencies — notice and hearing. (1) Notwithstanding any other provisions of this chapter, if the administrator or a board member finds that a person is committing or about to commit an act in violation of this chapter or any order or rule issued under it which, if it occurs or continues, will cause substantial pollution, the administrator under order of the board or the board member is authorized to order the person to stop, avoid, or moderate the act, including immediate closure or shutdown of any well. This authority is limited to acts the harmful effects of which will not be remedied immediately after the commission or cessation of the act or will represent an immediate threat to public health, safety, or welfare.

(2) When any emergency requiring immediate action is found pursuant to subsection (1), the board is authorized to issue an emergency order without notice or hearing, which is effective upon issuance as provided in 82-11-141(3).

(3) The board may have written notice served, personally or by mail, on the alleged violator or his agent. The notice must state the provision alleged to be violated, the facts alleged to constitute the violation, the nature of corrective action the board requires, and the time within which the action is to be taken. For the purposes of this section, service by mail is complete on the date of mailing.

(4) The notice must indicate that the order is an emergency order.

(5) Pursuant to 82-11-141(3), the board may consider the emergency order at its next regular meeting, without compliance with the notice requirements of this chapter if they cannot be accomplished within the time available, and enter a second emergency order.

(6) Upon issuing an order under subsection (2), the board may fix a place and time for a hearing, not later than 5 days thereafter unless the person to whom the order is directed requests a later time. The board may deny a request for a later time if it finds that the person to whom the order is directed is not complying with the order. If the board considers it practicable, the hearing must be held in the county where the violation is alleged to have occurred. As soon as practicable after the hearing, the board shall affirm, modify, or set aside the order.

(7) If the order of the board is affirmed, it must be accompanied by a statement specifying the date or dates by which a violation must cease and may prescribe timetables for necessary action in preventing, abating, or controlling the pollution. An action for review of the order of the board may be initiated in the manner specified in 82-11-144. The initiation of such an action or taking of an appeal may not stay the effectiveness of the order unless the court finds that the board did not have reasonable cause to issue an order under this section.

(4) If a sufficient balance exists in the account, funds are statutorily appropriated, as provided in 17-7-502, from the oil and gas production damage mitigation account, upon the authorization of the board, to pay the reasonable costs of properly plugging a well and either reclaiming or restoring, or both, a drill site or other drilling or producing area damaged by oil and gas operations if the board determines that the well, sump, hole, drill site, or drilling or producing area has been abandoned and the responsible person cannot be identified or located or if the responsible person fails or refuses to properly plug, reclaim, or restore the well, drill site, or drilling or producing area within a reasonable time after demand by the board. The responsible person shall, however, pay costs to the extent of his available resources and is subsequently liable to fully reimburse the account or is subject to a lien on property as provided in 82-11-164 for costs expended from the account to properly plug, reclaim, or restore the well, drill site, or drilling or producing area and to mitigate any damage for which he is responsible.

(5) Interest from funds in the oil and gas production damage mitigation account accrues to that account.

(6) The board shall, as provided in 5-11-210, submit to the legislature a complete financial report on the oil and gas production damage mitigation account, including a description of all expenditures made since the preceding report.

History: En. Sec. 6, Ch. 530, L. 1989; amd. Sec. 56, Ch. 112, L. 1991; amd. Sec. 4, Ch. 734, L. 1991.

Compiler's Comments

1991 Amendments: Chapter 112 near beginning of (6) inserted reference to 5-11-210 and after "legislature" deleted "at the beginning of each regular session". Amendment effective March 20, 1991.

Chapter 734 in (4), in first sentence after "well", inserted "and either reclaiming or restoring, or both, a drill site or other drilling or producing area damaged by oil and gas operations", after "hole" inserted "drill site, or drilling or producing area", and after "person" substituted "fails or refuses to properly plug, reclaim, or restore the well, drill site, or drilling or producing area within a reasonable time after demand by the board" for "does not have sufficient funds to pay the costs" and near end of second sentence, after "plug", inserted "reclaim, or restore", after "well" inserted "drill site, or drilling or producing area", and after "damage" substituted "for which he is responsible" for "caused by the well"; and made minor changes in style.

82-11-162. Release of producing oil or gas well from drilling bond — fee. Upon receipt of notification by the owner on a form prescribed by the board, payment by the owner of $125, and proof from the owner that a well completed after June 30, 1989, is producing oil or gas in commercial quantities and is subject to the tax under 15-38-104, the board shall release and absolve the owner of the well from the bond required under 82-11-123.

History: En. Sec. 7, Ch. 530, L. 1989.

82-11-163. Landowner's bond on noncommercial well. If the owner of the surface land upon which has been drilled a well that fails to produce oil or gas in commercial quantities acquires the well for domestic purposes, the board may cancel and absolve the bond required in 82-11-123 upon its acceptance of surety in the form of a certificate of deposit, in the amount of $5,000 for a single well or in the amount of $10,000 for more than one well, or in the form of a property bond of two times the value of the required certificate of deposit. The release of the certificate of deposit or property bond must be conditioned on proof provided by the landowner that the well has been properly plugged.

History: En. Sec. 8, Ch. 530, L. 1989.

82-11-164. Lien created. (1) The oil and gas production damage mitigation account has a lien in the amount of the expenditure from the account under 82-11-161(4), plus interest accrued at the rate of 10% a year, against all real and personal property in this state owned by the responsible person or in which the responsible person has an interest.

(2) The lien created under subsection (1) must be filed in the office of the secretary of state and must attach to all real or personal property of the responsible person.

(3) A lien created by this section is valid until paid in full or otherwise discharged. The lien must be foreclosed in accordance with applicable laws governing foreclosure of liens.

History: En. Sec. 9, Ch. 530, L. 1989; amd. Sec. 5, Ch. 734, L. 1991.

Compiler's Comments

1991 Amendment: In middle of (1), after "person", deleted "if that person is subsequently identified or located" and after "or" substituted "in which the responsible person has an interest" for "the responsible person, if that person is known but cannot or will not fully reimburse the oil and gas production damage mitigation account"; at end of (3), before "liens", deleted "mortgages and"; and made minor changes in style.

Unit Operations

82-11-201. Establishment of well spacing units. (1) To prevent or to assist in preventing waste of oil or gas prohibited by this chapter, the board, upon its own motion or upon application of an interested person, after hearing, may by order establish well spacing units for a pool as to oil wells or as to gas wells or both, except in those pools which, prior to April 1, 1953, have been developed to such an extent that it would be impracticable or unreasonable to establish spacing units at the existing stage of development. Spacing units when established shall insofar as possible be of uniform size and shape for the entire pool.

(2) The size and the shape of spacing units shall be such as will result in the efficient and economic development of the pool as a whole, and the size shall be the area that can be efficiently drained by one well.

(3) Subject to this chapter, the order establishing spacing units shall direct that no more than one well may be drilled and produced from the

common source of supply on any spacing unit and that the well shall be drilled at a location authorized by the order, with such exception as may be reasonably necessary where it is shown, upon application, notice, and hearing, and the board finds that the spacing unit is located on the edge of a pool or field and adjacent to a producing unit or, for some other reason, the requirement to drill the well at the authorized location on the spacing unit would be inequitable or unreasonable.

(4) An order establishing spacing units for a pool shall cover all lands then determined or then believed to be underlaid by the pool and may be modified after notice and hearing by the board from time to time to include additional areas subsequently determined to be underlaid by the pool. When found necessary for the prevention of waste, an order establishing spacing units in a pool may be modified after notice and hearing by the board to increase or decrease the size of spacing units in the pool or to permit the drilling of additional wells in the pool on a reasonably uniform plan.

History: En. Sec. 6, Ch. 238, L. 1953; amd. Sec. 58, Ch. 253, L. 1974; R.C.M. 1947, 60-129.

82-11-202. Pooling of interest within spacing unit. (1) When two or more separately owned tracts are embraced within a spacing unit or when there are separately owned interests in all or a part of the spacing unit, then the persons owning those interests may pool their interests for the development and operation of the spacing unit. In the absence of voluntary pooling within the spacing unit, the board, upon the application of an interested person, may enter an order pooling all interests in the spacing unit for the development and operation thereof. The pooling order shall be made after hearing and shall be upon terms and conditions that are just and reasonable and that afford to the owner of each tract or interest in the spacing unit the opportunity to recover or receive without unnecessary expense his just and equitable share of the oil or gas produced and saved from the spacing unit. Operations incident to the drilling of a well upon any portion of a spacing unit covered by a pooling order shall be considered, for all purposes, the conduct of the operations upon each separately owned tract in the spacing unit by the several owners thereof. That portion of the production allocated to each tract included in a spacing unit covered by a pooling order shall when produced be considered for all purposes to have been produced from the tract by a well drilled thereon.

(2) (a) The pooling order shall provide for the drilling and operating of a well on the spacing unit and for the payment of the cost thereof, which cost may include a reasonable charge for supervision, handling, and storage. As to each owner who refuses to pay his share of the costs of drilling and operating the well, the order shall provide for payment of his share of the cost out of and only out of production from the well allocable to his interest in the spacing unit, excluding royalty or other interest not obligated to pay any part of the cost thereof, and excluding the royalty provided for in subsection (2)(c) of this section. If a dispute arises as to the cost, the board by order shall determine the proper cost. The order may provide in substance that the owners who agree

to share in the cost of drilling and operating the well are, unless they agree otherwise, entitled to receive, subject to royalty or similar obligations, all of the production of the well until they have recovered all of the costs out of the production, and thereafter all of the owners in the spacing unit are entitled to receive their respective shares of the production of the well as their interest may appear after deducting their respective shares of current operating costs.

(b) If an owner refuses to pay his share of the costs of drilling and operating the well, the order must include as cost:

(i) 100% of the refusing owner's share of the cost of newly acquired surface equipment beyond the wellhead connections, including but not limited to stock tanks, separators, treaters, pumping equipment, and piping, plus 100% of the refusing owner's share of the cost of operation of the well commencing with first production and continuing until the agreeing owners have recovered such costs; and

(ii) 200% of the refusing owner's share of the costs and expenses of staking, well site preparation, obtaining rights-of-way, rigging up, drilling, reworking, deepening or plugging back, testing, and completing the well, after deducting any cash contributions received from the refusing owners by the agreeing owners, and 200% of that portion of the cost of equipment in the well, including the wellhead connections.

(c) A refusing owner of an oil and gas interest in a spacing unit which is not subject to any lease or other contract for development of oil and gas is considered to own a landowner royalty equal to one-eighth of his proportionate share of production from the well until such time as the consenting owners recover the costs specified in subsection (2)(b). Any interest in production from the spacing unit to which the interest of the refusing owner may be subject must be deducted from the royalty considered to be owned by the refusing owner. After costs have been recovered by the agreeing owners, the refusing owner owns his proportionate share of the well, surface facilities, and production and is liable for further costs as if he had originally agreed to drilling of the well.

(d) The operator of a well under a pooling order in which there is a refusing owner shall upon demand furnish such owner with a monthly statement of all costs incurred, together with the quantity of oil or gas produced and the amount of proceeds realized from the sale of production during the preceding month.

(1) An agreement for the unit or cooperative development and operation of a field or pool or any part of either or for conducting repressuring or pressure maintenance operations, cycling or recycling operations, including the extraction and separation of liquid hydrocarbons from natural gas in connection therewith, or any other method of unit or cooperative operation, including water flooding, is authorized and may be performed.

(2) Such an agreement does not violate any of the statutes of this state relating to trusts, monopolies, or contracts and combinations in restraint of trade if the agreement is approved by the board as being in the public interest and reasonably necessary to increase ultimate recovery or to prevent waste of oil or gas.

82-11-204. Hearing on operation of pool as unit. (1) The board, upon the application of persons owning leasehold interests underlying 60% of the surface within the delineated area, shall hold a hearing to consider the need for the operation as a unit of one or more pools or parts thereof in a field for enhanced recovery purposes as to oil or oil and gas, to increase ultimate recovery, or to prevent waste of gas from pools or portions of pools where gas only is produced.

(2) At least 60 days prior to application, the applicant shall, by registered or certified mail, notify all known persons owning an interest in the oil and gas within the proposed unit area as disclosed by the records of the county or counties in which the proposed unit area is situated, at those persons' last known addresses, of the applicant's intention to make the application. At the same time producers shall be furnished with a plan of unit operations. Upon written request of an operator of a lease which is in whole or in part within the confines of the proposed delineated area, the applicant shall furnish the operator with copies of any exhibits to be submitted to the board at the time of hearing.

82-11-205. Board order for unit operation — criteria. The board shall make an order providing for the unit operation of a pool or pools or part thereof if it determines, based on evidence presented at the hearing, that:

(1) such operation is reasonably necessary to increase the ultimate recovery of oil or gas;

(2) the value of the estimated additional recovery of oil or gas less royalties or, as to gas pools only, the value of the economies to be effected, exceeds the estimated additional cost incident to conducting such operations; and

(3) the full areal extent of the pool or pools or part thereof has been reasonably defined and determined by drilling operations.

History: En. Sec. 2, Ch. 33, L. 1969; amd. Sec. 2, Ch. 150, L. 1971; amd. Sec. 62, Ch. 253, L. 1974; R.C.M. 1947, 60-131.2.

82-11-206. Terms and conditions of plan for unit operations. The order shall be upon terms and conditions that are just and reasonable and shall prescribe a plan for unit operations that shall include:

(1) a description of the pool or pools or parts thereof to be so operated, termed the unit area, but only so much of a pool as has reasonably been defined and determined by drilling operations to be productive of oil or gas may be included within the unit area. If the unit is formed solely for production of gas, a spacing unit on which is located a well producing or capable of producing gas on March 1, 1971, may not be included in the unit area without the written consent of the majority in interest of the working interest owners of the spacing unit and well.

(2) a statement of the nature and purpose of the plan and operations contemplated, together with a copy of the proposed unit agreement and unit operating agreement;

(3) a plan for allocating to each tract in the unit area its fair share of the oil and gas produced from the unit area and not required or consumed in the conduct of the operation of the unit area or unavoidably lost. A plan may not be approved by the board until it has considered the relative value that the share of production bears to the relative value of all of the separately owned tracts in the unit area, exclusive of physical equipment utilized in unit operations. In considering this relative value, the board shall weigh the economic value of the gas to all persons affected as compared to the economic value of the oil to all persons affected.

(4) a provision for the credits and charges to be made in the adjustment among the owners in the unit area for their respective investments in wells, tanks, pumps, machinery, materials, and equipment contributed to the unit operations;

(5) a provision providing how the costs of unit operations, including overhead and capital investments, shall be determined and charged to the separately owned tracts, including a provision for carrying or otherwise financing any owner who has not executed the proposed unit operating agreement and who elects to be carried or otherwise financed, allowing an interest charge of the then current prime rate plus 2% for the service. Recovery of the money advanced plus interest shall be limited to and only shall be recoverable from the owners' share of production. The recovery shall be as follows:

(a) in the case of a field producing oil or oil and gas, during the period of depletion of the remaining estimated primary reserves from the unit, only from the production that is in excess of the owners' average actual rate of production during the 18 months immediately preceding the effective date of the unit; during the period subsequent to the depletion of the remaining estimated primary reserves from the unit, from 100% of the owners' share of production; for purposes of this subsection, the term "primary reserves" means the oil or gas which would be produced from the unitized pool or pools as a result of the natural energy therein and without the introduction of an enhanced recovery program;

(b) in the case of a field producing only gas, from 100% of the owners' share of production;

(c) in the case of any enhanced recovery program that is initiated subsequent to a secondary recovery program, the recovery shall be from 75% of the owners' increased share of production from such subsequent program;

(6) a provision for the supervision and conduct of the unit operations, in respect to which each owner shall have a vote with a value corresponding to the percentage of the costs of unit operations chargeable against the interest of the owner;

(7) a provision whereby the unit operator, after having operated for a minimum period of 2 years, can be challenged by any other owner in the unit, and the challenging owner may succeed to the unit operations upon a showing that:

(a) he can operate more efficiently and economically than the present operator;

(b) he is qualified and financially responsible;

(c) a majority of the other owners, both in number and in percentage and exclusive of the challenged operator, approved the challenging owner becoming unit operator; and

(d) the challenged operator does not initiate the conditions of operations of the challenging owner within 60 days of the challenged operator's receipt of the conditions of operations;

(8) the time when the unit operations shall commence and the manner in which and the circumstances under which the unit operations shall terminate; and

(9) such additional provisions that are found to be appropriate for carrying on unit operations and for the protection and adjustment of correlative rights.

History: En. Sec. 3, Ch. 33, L. 1969; amd. Sec. 3, Ch. 150, L. 1971; amd. Sec. 63, Ch. 253, L. 1974; amd. Sec. 3, Ch. 336, L. 1977; R.C.M. 1947, 60-131.3.

82-11-207. Approval of plan for unit operations by persons paying costs. An order of the board providing for unit operations may not become effective unless and until the plan for unit operations prescribed by the board has been approved in writing by those persons who under the board's order will be required to pay at least 80% of the costs of the unit operations and also by the persons owning at least 80% of the production or proceeds thereof that will be credited to interests which are free of cost, such as royalties, overriding royalties, and production payments, and the board has made a finding, either in the order providing for unit operations or in a supplemental order, that the plan for unit operations has been so approved; however, if one owner who is obligated to pay costs of the unit operation owns 80% or more but less than 100%, the approval of that owner and at least one other such owner is required, and if one person entitled to production or proceeds thereof that will be credited to interests which are free of costs owns 80% or more but less than 100%, the approval of that person and at least one other such person is required. If the plan for unit operations has not been so approved at the time the order providing for unit operations is made, the board shall, upon application and notice, hold such supplemental hearings as may be required to determine if and when the plan for unit operations has been so approved. If the requisite number of owners and persons and the requisite percentage of interests in the unit area do not approve the plan for unit operations within a period of 6 months from the date on which the order providing for unit operations is made, the board shall revoke the order unless for good cause shown the board extends the time.

History: En. Sec. 4, Ch. 33, L. 1969; amd. Sec. 64, Ch. 253, L. 1974; R.C.M. 1947, 60-131.4.

82-11-208. Board orders — amendment. An order providing for unit operations may be amended by an order made by the board in the same manner and subject to the same conditions and notice as an original order providing for unit operations; however, if such an amendment affects only the rights and interests of the owners, the approval of the amendment by the persons owning interests which are free of costs, such as royalties, overriding royalties, and production payments, is not required, and an order of amendment may not change the percentage for the allocation of oil and gas as established for any tract by the original order, except with the consent of all persons owning oil and gas rights in the tract, or change the percentage for the allocation of cost as established for any tract by the original order, except with the consent of all owners in the tract.

History: En. Sec. 5, Ch. 33, L. 1969; amd. Sec. 65, Ch. 253, L. 1974; R.C.M. 1947, 60-131.5.

82-11-209. Units established by previous order. The board may provide by an order for the unit operation of a pool or pools or parts thereof that embrace a unit established by an order of the board made prior to February 13, 1969. The order, in providing for the allocation of unit production, shall first treat the unit area previously established as a single tract, and the portion of the unit production so allocated thereto shall then be allocated among the tracts included in the previously established unit area in the same proportions as those specified in the previous order. Any new owner whose interest by the order is added to the unit area and who becomes liable for his proportionate share of the costs of unit operations is not liable for any unit operating costs incurred prior to the person's entry in the unit. At the time the interest is included in the unit, an equipment inventory shall be made in order to charge the newly committed interest with its proportionate share of capital investment at its then value. An oil-in-storage inventory shall be taken immediately prior to adding the newly committed interest.

History: En. Sec. 6, Ch. 33, L. 1969; amd. Sec. 4, Ch. 150, L. 1971; amd. Sec. 66, Ch. 253, L. 1974; R.C.M. 1947, 60-131.6.

82-11-210. Unit operations — less than whole of pool. An order may provide for unit operations on less than the whole of a pool where the unit area is of such size and shape as may be reasonably required for that purpose and the conduct thereof will have no adverse effect upon other portions of the pool.

History: En. Sec. 7, Ch. 33, L. 1969; R.C.M. 1947, 60-131.7.

82-11-211. Operations considered as done by all owners in unit. (1) All operations, including but not limited to the commencement, drilling, or operation of a well upon any portion of the unit area, shall be considered for all purposes the conduct of those operations upon each tract in the unit area by the several owners thereof. The portion of the unit production allocated to a tract in a unit area shall, when produced, be considered for all purposes to have been actually produced from the tract by a well drilled thereon.

(2) Operations conducted pursuant to an order of the board providing for unit operations shall constitute a fulfillment of all the express or implied obligations of each lease or contract covering lands in the unit area to the extent that the obligations cannot be performed because of the order of the board.

History: En. Sec. 8, Ch. 33, L. 1969; amd. Sec. 67, Ch. 253, L. 1974; R.C.M. 1947, 60-131.8.

82-11-212. Property rights and operator's lien. That portion of the unit production allocated to any tract and the proceeds from the sale thereof shall be the property and income of the several persons to whom or to whose credit the same are allocated or payable under the order providing for unit operations, except that the operator of the unit shall, subject to 82-11-206(5)(a), have a first and prior lien upon each owner's oil and gas rights and his share of unitized production to secure the payment of such owner's proportionate part of developing and operating the unit area. Such lien may be perfected and enforced in the same manner as provided in Title 71, chapter 3, part 5, as amended. Upon demand by any owner of working interest in any tract to which gas has been allocated, the unit operator shall deliver such allocated share of gas to the owner in kind; but the operator and the other owners of interest shall not be required to bear the cost of providing additional facilities for the delivery of such gas.

History: En. Sec. 9, Ch. 33, L. 1969; amd. Sec. 5, Ch. 150, L. 1971; R.C.M. 1947, 60-131.9.

82-11-213. Contract not terminated by board order. A division order or other contract relating to the sale or purchase or production from a tract may not be terminated by the order providing for unit operations but shall remain in force and apply to oil and gas allocated to the tract until terminated in accordance with the provisions thereof.

History: En. Sec. 10, Ch. 33, L. 1969; amd. Sec. 68, Ch. 253, L. 1974; R.C.M. 1947, 60-131.10.

82-11-214. Title to oil and gas rights not affected by board order. Except to the extent that the parties affected so agree, an order providing for unit operations does not result in a transfer of all or any part of the title of any person to the oil and gas rights in any tract in the unit area. All property, whether real or personal, that may be acquired in the conduct of unit operations hereunder shall be acquired for the account of the owners within the unit area and shall be the property of those owners in the proportion that the expenses of unit operations are charged.

History: En. Sec. 11, Ch. 33, L. 1969; amd. Sec. 69, Ch. 253, L. 1974; R.C.M. 1947, 60-131.11.

82-11-215. Unit operation not restraint of trade. The formation of a unit as provided in 82-11-204 through 82-11-216 and the operation of the unit under order of the board shall not be in violation of any statute of this state relating to trusts, monopolies, contracts, or combinations in restraint of trade.

History: En. Sec. 12, Ch. 33, L. 1969; amd. Sec. 70, Ch. 253, L. 1974; R.C.M. 1947, 60-131.12.

Interstate Oil and Gas Conservation Compact

82-11-301. Authorization to join interstate compact for conservation of oil and gas. The governor of the state of Montana is hereby authorized and directed, for and in the name of the state of Montana, to join with other states in the Interstate Compact To Conserve Oil and Gas, which was heretofore executed in the city of Dallas, Texas, on February 16, 1935, and is now deposited with the department of state of the United States and which has been extended with the consent of congress to September 1, 1947.

History: En. Sec. 1, Ch. 121, L. 1945; R.C.M. 1947, 60-601.

82-11-302. Interstate oil and gas compact. The Interstate Compact To Conserve Oil and Gas referred to in the above section, and which it is hereby proposed to enter and to extend by agreement reads as follows:

AN INTERSTATE COMPACT TO CONSERVE OIL AND GAS

Article I

This agreement may become effective within any compacting state at any time as prescribed by that state and shall become effective within those states ratifying it whenever any three of the states of Texas, Oklahoma, California, Kansas, and New Mexico have ratified and Congress has given its consent. Any oil-producing state may become a party hereto as hereinafter provided.

Article II

The purpose of this compact is to conserve oil and gas by the prevention of physical waste thereof from any cause.

Article III

(1) Each state bound hereby agrees that within a reasonable time it will enact laws or if laws have been enacted, then it agrees to continue the same in force, to accomplish within reasonable limits the prevention of:

(a) the operation of any oil well with an inefficient gas-oil ratio;

(b) the drowning with water of any stratum capable of producing oil or gas or both oil and gas in paying quantities;

(c) the avoidable escape into the open air or the wasteful burning of gas from a natural gas well;

(d) the creation of unnecessary fire hazards;

(e) the drilling, equipping, locating, spacing, or operating of a well or wells so as to bring about physical waste of oil or gas or loss in the ultimate recovery thereof;

(f) the inefficient, excessive, or improper use of the reservoir energy in producing any well.

(2) The enumeration of the foregoing subjects shall not limit the scope of the authority of any state.

Article IV

Each state bound hereby agrees that it will, within a reasonable time, enact statutes or if such statutes have been enacted then that it will continue the same in force, providing in effect that oil produced in violation of its valid oil and/or gas conservation statutes or any valid rule, order, or regulation promulgated thereunder shall be denied access to commerce; and providing for stringent penalties for the waste of either oil or gas.

Article V

It is not the purpose of this compact to authorize the states joining herein to limit the production of oil or gas for the purpose of stabilizing or fixing the price thereof or create or perpetuate monopoly or to promote regimentation but is limited to the purpose of conserving oil and gas and preventing the avoidable waste thereof within reasonable limitations.

Article VI

(1) Each state joining herein shall appoint one representative to a commission hereby constituted and designated as the interstate oil compact commission, the duty of which said commission shall be to make inquiry and ascertain from time to time such methods, practices, circumstances, and conditions as may be disclosed for bringing about conservation and the prevention of physical waste of oil and gas, and at such intervals as said commission deems beneficial, it shall report its findings and recommendations to the several states for adoption or rejection.

When so determined by the department and adopted as rules, such standards and specifications are the standards and specifications for such products sold in this state and official tests of such products shall be based upon them.

82-15-105. Licenses and fees — status of license on transfer of ownership. (1) A petroleum dealer or liquefied petroleum dealer may not do business in this state until a license has been issued to him by the department. The license must be obtained by the dealer by making application to the department upon blank forms provided by the department. A dealer who has not been issued a license and who is found selling, offering for sale, delivering, or distributing petroleum products shall upon conviction be punished as provided by this part.

(2) The fee for this license is determined as follows and depends upon the number of devices utilized by the dealer:

(a) each gasoline pump, diesel pump, or fuel oil pump measuring device—$7;

(b) each petroleum vehicle tank meter or bulk petroleum meter of 2 inches (5.08 centimeters) and under—$20;

(c) each bulk petroleum meter over 2 inches (5.08 centimeters)—$25;

(d) each liquefied petroleum liquid meter—$30;

(e) each vapor meter—$4;

(f) each petroleum and liquefied petroleum vehicle tank up to and including 2,000 gallons (7,570 liters)—$25;

(3) All licenses are annual and expire on December 31 of each year. There is an additional charge of 50% on all license fees that are not paid before March 1 of each year in which the vehicle tank, meter, or measuring device is in use. If the fee is not paid, the equipment must be sealed and removed from service by the department. It is unlawful for anyone to use a device so removed from service or to break the seal until all fees have been paid.

(4) If ownership of a measuring device changes and the device:

(a) remains at the same location, the license transfers to the new owner and remains in effect until December 31 of that year;

(b) is moved to a new location, the license is void, and the new owner shall:

(i) apply for a new license that will expire on December 31 of that year; and

(ii) pay the applicable fees prescribed in subsection (2).

The department may refuse to grant a license or may suspend or revoke a license already granted for due cause after hearing noticed for not less than 10 days. Violation of any provision of this part or any lawful order or rule of the department is cause for which the department may suspend, revoke, or refuse to issue a license. The suspension, revocation, or refusal may be conditioned on those terms which the department considers just and proper.

History: En. Sec. 2, Ch. 111, L. 1935; re-en. Sec. 4193.2, R.C.M. 1935; R.C.M. 1947, 60-402.

82-15-202. Purpose. This part is intended to compel a person, firm, company, association, or corporation doing business in the state of Montana and engaged in the selling of and dealing in standard petroleum products to treat a customer in one part of the state of Montana on an equal basis with a customer in another part of the state or in the nearest adjoining state and to promote the uniform application of the law of the state of Montana providing a tax on gasoline used by a motor vehicle when traveling over a public highway. This part shall be liberally construed to accomplish those purposes.

(2) In the trial of an action under the provisions of this part, in the determination of the justification of the price demanded or collected by a person, firm, company, association, or corporation charged with a violation of the provisions of this part, transportation, quantity of sales, emergencies, cost of doing business, or similar differences under the respective conditions may be offered as a matter of defense or justification for the differences in price demanded or collected. When competent evidence is offered in the trial of any action under this part of a demand for or the receipt of a higher price for any standard petroleum product in the state of Montana by any person, firm, company, association, or corporation than such person, firm, company, association, or corporation demanded, collected, or received at substantially the same time for the same or a similar article of standard petroleum product in another part of the state of Montana or in the nearest adjoining state, the burden of proof shall then be upon such person, firm, company, association, or corporation or agents or officers on trial to prove that the difference in the price demanded or collected was justified.

Study of Water User Fees — 1992 Report: Section 6, Ch. 659, L. 1991, provided for a study by the Department of Natural Resources and Conservation on the feasibility of increasing fees charged to diversionary water users. A written report must be submitted to the Water Policy Committee by July 1, 1992.

85-1-101. Policy considerations. It is hereby declared as follows:

(1) The general welfare of the people of Montana, in view of the state's population growth and expanding economy, requires that water resources of the state be put to optimum beneficial use and not wasted.

(2) The public policy of the state is to promote the conservation, development, and beneficial use of the state's water resources to secure maximum economic and social prosperity for its citizens.

(3) The state, in the exercise of its sovereign power, acting through the department of natural resources and conservation, shall coordinate the development and use of the water resources of the state so as to effect full utilization, conservation, and protection of its water resources.

(4) The development and utilization of water resources and the efficient, economic distribution thereof are vital to the people in order to protect existing uses and to assure adequate future supplies for domestic, industrial, agricultural, and other beneficial uses.

(5) The water resources of the state must be protected and conserved to assure adequate supplies for public recreational purposes and for the conservation of wildlife and aquatic life.

(6) The public interest requires the construction, operation, and maintenance of a system of works for the conservation, development, storage, distribution, and utilization of water, which construction, operation, and maintenance is a single object and is in all respects for the welfare and benefit of the people of the state.

(7) It is necessary to coordinate local, state, and federal water resource development and utilization plans and projects through a single agency of state government, the department of natural resources and conservation.

(8) The greatest economic benefit to the people of Montana can be secured only by the sound coordination of development and utilization of water resources with the development and utilization of all other resources of the state.

(9) Any attempt to gain control of or speculate on large quantities of ground water of the state of Montana is not in the interest of the people and is to be restricted.

(10) To achieve these objectives and to protect the waters of Montana from diversion to other areas of the nation, it is essential that a comprehensive, coordinated multiple-use water resource plan be progressively formulated, to be known as the "state water plan".

In preparing this inventory, the department may conduct studies; adopt studies made by other competent water resource groups, including federal, regional, state, or private agencies; perform research or employ other competent agencies to perform research on a contract basis; and hold public hearings in affected areas at which all interested parties must be given an opportunity to appear.

(2) The department shall formulate and, with the approval of the board, adopt and amend, extend, or add to a comprehensive, coordinated multiple-use water resources plan known as the "state water plan". The state water plan may be formulated and adopted in sections, these sections corresponding with hydrologic divisions of the state. The state water plan must set out a progressive program for the conservation, development, and utilization of the state's water resources and propose the most effective means by which these water resources may be applied for the benefit of the people, with due consideration of alternative uses and combinations of uses. Before adopting the state water plan or any section of the plan, the department shall hold public hearings in the state or in an area of the state encompassed by a section of the plan if adoption of a section is proposed. Notice of the hearing or hearings must be published for 2 consecutive weeks in a newspaper of general county circulation in each county encompassed by the proposed plan or section of the plan at least 30 days prior to the hearing.

(4) The legislature, by joint resolution, may revise the state water plan.

(5) The department shall prepare a continuing inventory of the ground water resources of the state. The ground water inventory must be included in the comprehensive water resources inventory described in subsection (1) but must be a separate component of the inventory.

(6) The department shall publish the comprehensive inventory, the state water plan, the ground water inventory, or any part of each, and the department may assess and collect a reasonable charge for these publications.

(7) In developing and revising the state water plan as provided in this section, the department shall consult with the water policy committee established in 85-2-105 and solicit the advice of the committee in carrying out its duties under this section.

85-1-204. Department powers over state waters. (1) The department, with the approval of the board, may sell, lease, and otherwise dispose of all waters which may be impounded under this chapter, and the water may be sold for the purpose of irrigation, development of power, watering of stock, or any other purpose. The department, with the approval of the board, may also lease water under the state water leasing program established under the provisions of 85-2-141. To the extent that it may be necessary to carry out this chapter and subject to a compliance with the other provisions of this chapter, the department has full control of all the water of the state not under the exclusive control of the United States and not vested in private ownership, and it shall take such steps as may be necessary to appropriate and conserve the same for the use of the people. The authority of the department conferred by this chapter extends and applies to rights to the natural flow of the waters of this state which it may acquire, with the approval of the board, by condemnation, purchase, exchange, appropriation, or agreement.

(2) For the purpose of regulating the diversion of those waters, the department may enter upon the means and place of use of all appropriators for making surveys of respective rights and seasonal needs.

(3) The department may take into consideration the decrees of the courts of this state having jurisdiction which purport to adjudicate the waters of a stream or its tributaries, and a fair, reasonable, and equitable reconciliation shall be made between the claimants asserting rights under different decrees and between decreed rights and asserted rights of appropriation not adjudicated by any court.

(4) The department, at its discretion, may hold hearings relating to the rights of respective claimants after first giving such notice as it considers appropriate and make findings of the date and quantity of appropriation and use of all claimants which the department will recognize and observe in diverting the waters which it owns. The department may police and distribute to the owner of the recognized appropriation the waters due him upon request and under terms agreed upon.

(5) The department, when engaged in controlling and dividing the natural flow of a stream under the authority granted by this chapter, is exercising a police power of the state, and water commissioners appointed by any court may not deprive the department of any of the waters owned or administered under agreement with respective owners. The owner of a prior right contending that the department is not recognizing and respecting the appropriation may resort to a court for the purpose of determining whether or not the rights of the claimant have been invaded, and the department shall observe the terms of the final decree.

(6) When the department impounds or acquires the right of appropriation of the waters of a stream it may divert or authorize the diversion at any point

on the stream or any portion thereof when it is done without injury to a prior appropriator.

(1) Subject to the approval of the board, the department may construct works, the cost of the construction to be paid wholly by means of or with the proceeds of revenue bonds hereinafter authorized or of a grant or loan to aid in financing the construction from the United States or any instrumentality or agency thereof and other funds provided for the construction. Before constructing a project, the department shall estimate the cost of the project, the cost of operation and maintenance, and the revenues to be derived therefrom. A project may not be constructed unless, according to the estimates, the revenues to be derived will be sufficient to pay the cost of operation and maintenance and the principal and interest of loans or revenue bonds which may be issued for the cost of the project; however, in connection with the issuance of revenue bonds, the failure of the department to make the estimates required by this section or to make them in proper form does not affect the validity or enforceability of those bonds or of the trust indenture, resolution, or other security therefor.

(2) Should the bid of the lowest responsible bidder on any capital improvement associated with public works exceed the department estimates of the cost of the improvements by more than 5%, the department shall obtain approval from the water user association, whenever an association is involved, before the bid is accepted; however, capital improvements of an

emergency nature necessary to protect life or property or to supply immediate needs for water do not require such approval.

(3) A purpose of this chapter is to meet, so far as possible, a statewide need for the conservation and use of water through the construction and operation of projects designed for those purposes. The projects to be finally constructed shall qualify as parts of the statewide program and shall be approved by the board upon the showing of their prospective ability to meet, through the sale of water or other services, the cost of operation and maintenance and the principal and interest of loans and revenue bonds issued to finance the construction. The failure of the board to determine the prospective ability of a project does not affect the validity or enforceability of the bonds or of the trust indenture, resolution, or other security therefor.

85-1-208. Construction across streams, highways, or other obstacles. (1) The department may construct irrigation works across any stream of water, watercourse, streets, avenues, highways, railways, canals, ditches, or flumes in such manner as to afford security to life and property. The department shall restore the same, when so crossed or intersected, to its former state, as near as may be, so as not to destroy its usefulness. A company whose railroads are intersected or crossed by the works shall unite with the department in forming the intersection and crossing. If the railroad company and the department or the owners and controllers of the property, thing, or franchise so to be crossed cannot agree upon the amount to be paid therefor or the points or the manner of the crossing or intersections, the amount shall be ascertained and determined in all respects as herein provided in respect to taking of land for public use.

(2) This section does not require the payment to the state or any subdivision thereof of a sum for the right to cross a public highway with the works. A right-of-way is hereby given, dedicated, and set apart to locate, construct, and maintain the works over and through the lands which are the property of this state.

85-1-209. Acquisition of property by department. (1) The department, subject to the approval of the board under 85-1-202, may acquire by purchase or exchange upon terms and conditions and in a manner it considers proper and acquire by condemnation, in accordance with laws applicable to the condemnation of property for public use, any land, rights, water rights, easements, franchises, and other property considered necessary for the construction, operation, and maintenance of works. Title to property purchased or condemned shall be taken in the name of the department. The department is under no obligation to accept and pay for any property condemned under this chapter except from the funds provided by this chapter. In any proceedings to condemn, orders may be made by the court having jurisdiction of the suit, action, or proceeding as may be warranted by law and the facts.

(2) In condemnation proceeding brought under the powers of eminent domain for the purpose of carrying out this chapter, all persons interested in the title of or holding liens upon the property sought to be acquired as disclosed by the public records shall be made parties, and the court in the action shall partition and distribute the damages awarded, if any, among those persons as their rights appear. If there is controversy between them, the court may direct the amount of the damage awarded to be paid into court to abide the result of further appropriate proceedings either at law or in equity.

(3) The taking possession of the property sought to be condemned may not be delayed by reason of any dispute between the rival claimants or the failure to join any of them as a party to the proceedings in condemnation.

(4) If water rights are acquired or exercised by the department in connection with two or more works or projects, the department by order shall apportion or allocate to each of the works or projects such part of those water rights as it may determine. Upon the adoption of the order, those water rights shall be considered a part of each of the works or projects to the extent that the water rights have been so apportioned or allocated thereto respectively.

85-1-211. Management of property — water contracts. (1) Subject to this chapter, the department may fix and establish the prices, rates, and charges at which the resources and facilities made available under this chapter may be sold and disposed of and enter into contracts and agreements and do those things which in its judgment are necessary, convenient, or expedient for the accomplishment of the purposes and objects of this chapter, under such general rules and upon such terms, limitations, and conditions as it prescribes.

(2) The department shall enter into the contracts and fix and establish the prices, rates, and charges so as to provide at all times funds which will be sufficient to pay all costs of operation and maintenance of the works authorized by this chapter, together with necessary repairs thereto, and which will provide at all times sufficient funds to meet and pay the principal and interest of all bonds or loans as they severally become due and payable.

(3) This chapter does not authorize any change, alteration, or revision of those rates, prices, or charges as established by any contract entered into under this chapter except as provided by the contract.

(4) A contract made by the department for the sale of water, use of water, water storage, or other service or for the sale of any property or facilities shall provide that, in the event of a failure or default in the payment of moneys specified in the contract to be paid to the department, the department may, upon notice as is prescribed in the contract, terminate the contract and all obligations thereunder. The act of the department in ceasing on default to furnish or deliver water, use of water, water storage, or other service under the contract does not deprive the department of or limit any remedy provided by the contract or by law for the recovery of moneys due or which may become due under the contract.

(5) Subject to the approval of the board under 85-1-202, the department may sell, transfer to water user associations, abandon, or otherwise dispose of any rights-of-way, easements, properties, or interests or lease or rent the same or otherwise take and receive the income or profit and revenue therefrom without regard to other laws providing for the disposition of state property. Prior to the department's sale, transfer, or other disposition, a determination shall be made by the department as to the market value of the rights-of-way, easements, properties, or interests to be sold, transferred, abandoned, or otherwise disposed of. The department's determination of market value shall consider all liens, encumbrances, and other limitations on the project properties or interests.

(6) (a) The department shall attempt to dispose of its canal projects by June 30, 1995. The canal projects to be disposed of include the:

(i) Columbus canal;
(ii) Delphia-Melstone canals;
(iii) Hysham pumping canals;
(iv) Livingston ditch;
(v) Florence canal;
(vi) Paradise canal;
(vii) Park Branch canal;
(viii) Sidney pumping canals;
(ix) South Side canal;
(x) Vigilante canal; and
(xi) West Bench canal.

(b) The department may dispose of a canal project by sale, transfer to a water users' association, abandonment, or other legal conveyance. If there is an existing water users' association on the canal project, the provisions of 85-6-109(5) must be complied with in the disposal of the canal project. The department shall give preference to existing water users' associations operating and maintaining the canal project.

(c) Upon the sale or transfer of a canal project, the department shall either cancel or write off from the accounts receivable carried on the books of the department a sum not to exceed any previous 1-year cost of operating and maintaining the canal project or make a payment not to exceed any previous 1-year cost of operating and maintaining the canal project. For a canal project not disposed of by June 30, 1995, the water users of the canal project are responsible for the department's administrative costs and the actual costs of operation and maintenance of the canal project.

(7) An employee or agent of the department authorized by the director may enter upon any land to carry out the purposes of this section, including but not limited to entry to make an inspection the department considers necessary of the canal project, entry to salvage or remove project property, and entry to make physical alterations to canal project property. The department shall give reasonable notice to the landowner of its intention to enter upon the land. The department is responsible for actual damages done to property.

85-1-301. Water conservation revenue bonds. (1) The board is hereby authorized to provide, by resolution, at one time or from time to time, for the issuance of water conservation revenue bonds of the state for the purpose of paying the cost, as hereinabove defined, of any one or more such public works, the principal and interest of which bonds shall be payable solely from the special fund herein provided for such payment. Such bonds shall mature at such time or times, not more than 40 years from their date or dates, as may be fixed by such resolution but may be made redeemable before maturity at the option of the state, to be exercised by the board, at such price or prices and under such terms and conditions as may be fixed by the board prior to the issuance of the bonds. The board shall determine the rate of interest such bonds shall bear; the time or times of payment of such interest; the form of the bonds and the interest coupons to be attached thereto; and the manner of executing the bonds and coupons and shall fix the denomination or denominations of the bonds and the place or places of payment of principal and interest thereof, which may be at any bank or trust company within or without the state.

(2) Provisions may be made for the registration of any of the bonds in the name of the owner as to principal alone or as to both principal and interest. The bonds authorized under the provisions of this section and 85-1-303 may be issued and sold from time to time and in such amounts as may be determined by the board, and the board may sell the bonds in such manner and for such price as it may determine to be for the best interests of the state. The proceeds of such bonds shall be used solely for the payment of the cost of

the works and shall be checked out in such manner and under such restrictions, if any, as the board may provide.

(3) Each resolution providing for the issuance of bonds shall set forth the project or projects for which the bonds are to be issued, and the bonds authorized by each such resolution shall constitute a separate series. The bonds of each series shall be identified by a series letter or letters and may be sold and delivered at one time or from time to time.

All bonds issued under 85-1-301 and 85-1-303 shall contain a statement on their face that the state shall not be obligated to pay the same or the interest thereon except from the special fund hereinafter set forth. In case any of the officers whose signatures appear on the bonds or coupons shall cease to be such officers before the delivery of such bonds, such signatures shall nevertheless be valid and sufficient for all purposes, the same as if they had remained in office until such delivery. All such bonds shall be fully negotiable, as provided by the Uniform Commercial Code—Investment Securities. Such bonds shall not constitute or be a debt, liability, or obligation of the state and shall be secured only by the revenues of such works and the funds received from the sale or disposal of water and from the operation, lease, sale, or other disposition of the works, property, and facilities to be acquired out of the proceeds of such bonds.

If the proceeds of bonds issued for any such works shall exceed the cost thereof, the surplus shall be paid into the fund hereinafter provided for the payment of principal and interest of such bonds. Prior to the preparation of definitive bonds, the board may, under like restrictions, issue temporary bonds with or without coupons, exchangeable for definitive bonds when such bonds have been executed and are available for delivery. In determining whether small-scale hydroelectric generation may be economically feasible on a particular project, the department shall consider:

(1) the estimated cost of construction of a facility;

(2) the estimated cost of maintaining, repairing, and operating the facility;

(3) the estimated cost of tying into an existing power distribution channel;

(4) the ability of public utilities or rural electric cooperatives to lease and operate such a facility;

(5) the debt burden to be serviced;

(6) the revenue expected to be derived; and

(7) the likelihood of a reasonable rate of return on the investment.

History: En. Sec. 1, Ch. 503, L. 1981.

85-1-502. Notice of availability of lease sites. (1) If after completion of the feasibility study of a particular project the board determines that hydroelectric power generation at the project would be feasible and in the best interest of the people of the state of Montana, it shall publish notice and make the site available for lease for the purpose of small-scale hydroelectric power generation, pursuant to 85-1-502 through 85-1-508, unless such action would result in the forfeiture of any necessary federal license, permit, or exemption, in which case the department may proceed under 85-1-509.

(2) In issuing a notice of availability of a site for lease under this section, the board shall include in the notice any reasonable conditions it may find necessary in order to protect the interests of the state.

(2) Within 180 days following the conclusion of the lease application period, the board must reject any or all applications or must award a lease to the party whose offer, considered in its totality, is the most advantageous to the state.

(3) The decision must include a determination that the potential developer will provide an adequate royalty payment, is capable of carrying out the proposed development, can provide efficient and reliable service, and intends in good faith without unnecessary delay to proceed with the development.

(4) If all lease applications are rejected, the department may negotiate with all applicants on an equal basis in an effort to arrive at an acceptable application.

History: **En. Sec. 4, Ch. 503, L. 1981.**

85-1-505. Lease conditions. (1) The lessee must pay a royalty to the state as required in the lease.

(2) The board may authorize provisions in the lease that offer economic incentives for rapid development of the project or impose economic penalties for delays in development, which may include cancellation of the lease.

History: **En. Sec. 5, Ch. 503, L. 1981.**

85-1-506. Compliance with federal law. The department may hold a license, permit, or exemption under federal law on a project.

85-1-508. Duties of the department. The department has primary responsibility for supervision of any such lease. Any disputes that arise between the department and the lessee may be appealed to the board, upon written petition of either party.

History: **En. Sec. 8, Ch. 503, L. 1981.**

85-1-509. Power generation by department authorized. (1) If no lease applications are received under 85-1-503 or if the board rejects all lease applications under 85-1-504, the department may proceed to obtain any necessary license, permit, or exemption under federal law and commence construction and operation of a small-scale hydroelectric generation facility pursuant to the provisions of this chapter. Construction may not commence until such time as the department has clear and convincing evidence that construction is economically feasible and is the most practical means by which the facility could be developed.

(2) Financing of construction and operation of the facility shall be accomplished in a manner determined by the board to be most feasible.

(3) The department may not sell power generated at a facility except to a public utility, a rural electric cooperative, or a federal power-marketing agency organized in Montana and selling power to Montana customers.

(a) Long-term contracts for the purchase of electricity by the utility or electric cooperative from a small-scale hydroelectric facility under this chapter shall be encouraged in order to enhance the economic feasibility of such facilities.

(b) The rates paid by a utility or electric cooperative to a small-scale hydroelectric facility may not exceed, over the term of the purchase contract, the incremental cost to the utility or electric cooperative of the electricity that, but for the purchase from the small-scale hydroelectric facility, the utility or electric cooperative would generate or purchase from another source.

(c) The rates to be paid by a utility or an electric cooperative for power purchased from a small-scale hydroelectric facility shall be established with consideration of the availability and reliability of the power produced.

(2) The commission may set these rates by use of any of the following methods:

(a) the levelized avoided cost over the term of the contract;

(b) the cost of production for the small-scale hydroelectric facility plus a just and reasonable return; or

The terms, conditions, and compensation agreed to must include but not be limited to the full market value of the interest disposed of by the department. Full market value must be determined by the department in the report completed under subsection (2).

(4) An applicant under subsection (1) shall pay to the department all costs incurred by the department in carrying out its duties under this section. The department and the applicant shall contract for the provision of services and payment of fees required by this section prior to accepting an application under subsection (2).

(5) Nothing in this section requires the department to construct, rehabilitate, reconstruct, operate, or otherwise maintain the state-owned project to accommodate the hydroelectric facility except as negotiated under subsection (3).

85-1-601. Purpose and policies. (1) The legislature finds and declares that in order that the people of Montana may enjoy the full economic and recreational benefits of the state's water resources, the state must establish this long-term water development program providing financial and administrative assistance to private, local, and state entities for water resource development projects and activities.

(2) The purpose of the water development program is to further the state's policies, set forth in 85-1-101, regarding the conservation, development, and beneficial use of water resources.

(3) The legislature recognizes that water is one of the most valuable and important renewable resources in Montana; therefore, it is appropriate that

a portion of the taxes on the removal of nonrenewable resources be dedicated to the conservation, development, and beneficial use of water resources.

(4) The development of water resources is of a high priority because a large portion of Montana's present and future economy is based either directly or indirectly on the wise use of water.

(5) This water development program is an integral part of the implementation and development of the comprehensive, coordinated, multiple-use water resources plan known as the "state water plan".

85-1-602. Objectives. The department shall administer a water development program to accomplish such objectives as rehabilitation of state-owned water projects and works; promotion of private, local government, and state water development; development of water-based recreation and the protection of water resources for the benefit of agriculture, flood control, and other uses; development of offstream and tributary storage; encouragement of projects or programs that improve water use efficiency, including development of new, efficient water systems, rehabilitation of older, less efficient water systems, and acquisition and installation of measuring devices required under 85-2-113; and development of state-tribal, state-federal, and state-tribal-federal water projects. The storage of water for existing and future beneficial uses shall be given the highest priority unless a water development project or activity designed to accomplish another objective is demonstrated to be more beneficial to a greater number of people. The water development program is the key implementation portion of the state water plan and shall be administered to accomplish the objectives of the plan.

85-1-615. Security interests — purchase, operation, and resale of encumbered property. (1) The state has a lien upon a project constructed with money from the water development state special revenue account or water development account for the amount of the loan and interest due the state. This lien may attach to any project facilities, equipment, easements, real property, and property of any kind or nature owned by the debtor, including all water rights. The department shall file with the county clerk and recorder of each county in which a part of the project is located either a financing statement or a real estate mortgage covering the loan, its amount, terms, and a description of the security. The county clerk and recorder shall record and index the lien as other liens are required by law to be recorded and indexed. The lien shall be valid until paid in full or otherwise discharged. The lien shall be foreclosed in accordance with applicable state law governing foreclosure of mortgages and liens.

(2) From the funds available under 85-1-604(3)(c) or 85-1-617, the state may:

(a) purchase a lien that is prior to the state's lien if:

(i) the director of the department determines that the loan is in default and the prospects for collecting the loan may be materially increased by purchasing the prior lien; and

(ii) the amount to be paid for the prior lien does not exceed the appraised value of the property;

(b) operate property that is subject to the state's lien if the director of the department determines that the loan is in default and the prospects for collecting the loan may be materially increased by operating the property that is subject to the state's lien; or

(c) purchase a prior lien as provided in (2)(a) and operate property as provided in (2)(b).

(3) Any property acquired under the provisions of this section must be resold as expeditiously as possible to recover funds used under this section and funds loaned to the borrower.

85-1-617. Issuing bonds. (1) When authorized by the legislature and within the limits of the authorization and within the further limitations established in this section, the board of examiners may issue and sell water development bonds of the state in the amount and manner it considers necessary and proper to finance the water development loan program. The full faith and credit and taxing powers of the state are pledged for the prompt and full payment of all bonds so issued and interest and redemption premiums payable thereon according to their terms.

(2) Each series of water development bonds may be issued by the board of examiners, upon request of the board of natural resources and conservation, at public or private sale, in such denominations and forms, whether payable to bearer with attached interest coupons or registered as to principal or as to both principal and interest, with such provisions for conversion or exchange and for the issuance of notes in anticipation of the issuance of definitive bonds, bearing interest at such rate or rates, maturing at such rate or rates, maturing at such time or times not exceeding 30 years from date of issue, subject to optional or mandatory redemption at such earlier times and prices and upon such notice, with such provisions for payment and discharge by the deposit of funds or securities in escrow for that purpose, and payable at the office of such banking institution or institutions within or outside the state, as the board of examiners shall determine subject to the limitations contained in this section and 17-5-731.

(3) In the issuance of each series of water development bonds, the interest rates and the maturities and any mandatory redemption provisions thereof shall be established in such manner that the funds then specifically pledged and appropriated by law to the water development debt service fund will in the judgment of the board of examiners be received in an amount sufficient in each year to pay all principal, redemption premiums, and interest due and payable in that year with respect to that and all prior series of such bonds, except outstanding bonds as to which the obligation of the state has been discharged by the deposit of funds or securities sufficient for their payment in accordance with the terms of the resolutions by which they are authorized to be issued.

(4) In all other respects, the board of examiners is authorized to prescribe the form and terms of the bonds and notes and shall do whatever is lawful and necessary for their issuance and payment. Such bonds, notes, and any interest coupons appurtenant thereto must be signed by the members of the board of examiners, and the bonds and notes must be issued under the great seal of the state of Montana. The bonds, notes, and coupons may be executed with facsimile signatures and seal in the manner and subject to the limitations prescribed by law. The state treasurer shall keep a record of all such bonds and notes issued and sold.

(5) There is created a water development account within the state special revenue fund established in 17-2-102.

(6) All proceeds of bonds or notes issued under this section, other than refunding bonds, must be deposited in the water development account established in subsection (5), except that any principal and accrued interest received in repayment of a loan made from the proceeds of bonds issued under this section must be deposited in the water development debt service fund and the water development loan loss reserve fund pursuant to 85-1-603. All proceeds of refunding bonds must be deposited in the water development debt service fund and applied to the payment and redemption of outstanding bonds issued under this section as directed by the board, whether at maturity or on any earlier date on which they may be prepaid according to their terms.

(7) All actions taken by the board of examiners under this section or 85-1-619 must be authorized by a vote of a majority of the members of the board of examiners.

85-1-619. Debt service fund — pledge and administration of sufficient balance. (1) The legislature may levy, impose, assess, and pledge and appropriate to the water development debt service fund any tax, charge, fee, rental, or other income from any designated source. The state reserves the right to modify from time to time the nature and amount of special taxes and other revenues pledged and appropriated to the water development debt service fund, provided that the aggregate resources so pledged and appropriated are determined by the legislature to be sufficient for the prompt and full payment of the principal of and interest and redemption premiums when due on all bonds payable from that fund and provided that the pledge of the full faith and credit and taxing powers of the state for the security of all such bonds shall be and remain irrevocable until they are fully paid.

(2) Money in the water development debt service fund must be used to pay interest, principal, and redemption premiums when due and payable with respect to water development bonds, and for bonds issued prior to 1985, to accumulate a reserve for the further security of such payments.

(3) After the reserve provided for in subsection (2) for bonds issued prior to 1985 has been accumulated in the water development debt service fund, money at any time received in the water development debt service fund in excess of that amount must be transferred by the treasurer to the water development state special revenue account.

85-1-620. Water development refunding bonds. (1) The board of examiners may issue refunding bonds at such times and in such amounts, if any, as may be necessary to pay principal or interest due that cannot be paid from funds then on hand in the water development debt service fund. The board of examiners may also issue refunding bonds to refund outstanding bonds before maturity for the purpose of extending the maturities thereof so far as determined by the board of examiners to be necessary to assure that the funds then pledged to the water development debt service fund will be sufficient for payment of principal and interest due in subsequent years. The board of examiners may also issue refunding bonds to refund outstanding bonds before maturity for the purpose of reducing the interest cost or the total amount of principal and interest payable thereon.

(2) No refunding bonds may be issued and sold more than 3 months before all bonds refunded thereby mature or are called for redemption unless the proceeds thereof, with any other funds in the water development debt service fund that are needed and available for the purpose or securities purchased from such proceeds and other funds, are deposited with a suitable banking institution within or outside the state, in escrow, for the retirement of the refunded bonds at maturity or at a prior date or dates on which they have been called for redemption in accordance with their terms, in an amount and in a manner sufficient under the provisions securing the refunded bonds, so that the state's obligation to pay the same, from sources other than the escrow fund, is discharged.

(3) No new debt may be created by the issuance of refunding bonds in accordance with this section, but such refunding bonds shall evidence the debt previously created and shall be secured by the pledge of the full faith and credit and taxing powers of the state and by the further provisions of this part in the same manner as the bonds refunded thereby.

(2) In determining the best solution for a particular water management problem, the state shall:

(a) carefully define the problem;

(c) a progress report on the development of water storage projects during the previous 2 years.

(2) In setting priorities among new water storage projects, the governor shall consider whether a project:

(a) solves a severe water problem;

(b) provides multiple uses and benefits;

(c) provides for public uses;

(d) shows strong evidence of broad citizen support;

(e) is able to obtain nonstate sources of funding;

(f) protects and seeks to enhance social, ecological, cultural, and aesthetic values;

(g) improves local and state economic development;

(a) is needed to protect public safety;

(b) has impacts if not repaired or rehabilitated; and

(c) accomplishes the goals listed in subsections (2)(a) through (2)(j).

(4) In establishing budget priorities for the allocation of state water storage development funds:

(a) first preference must be given to projects that resolve threats to life and property posed by high-hazard facilities that are in an unsafe condition;

General Provisions

85-2-101. Declaration of policy and purpose. (1) Pursuant to Article IX of the Montana constitution, the legislature declares that any use of water is a public use and that the waters within the state are the property of the state for the use of its people and are subject to appropriation for beneficial uses as provided in this chapter.

(2) A purpose of this chapter is to implement Article IX, section 3 (4) of the Montana constitution, which requires that the legislature provide for the administration, control, and regulation of water rights and establish a system of centralized records of all water rights. The legislature declares that this system of centralized records recognizing and establishing all water rights is essential for the documentation, protection, preservation, and future beneficial use and development of Montana's water for the state and its citizens and for the continued development and completion of the comprehensive state water plan.

(3) It is the policy of this state and a purpose of this chapter to encourage the wise use of the state's water resources by making them available for appropriation consistent with this chapter and to provide for the wise utilization, development, and conservation of the waters of the state for the maximum benefit of its people with the least possible degradation of the natural aquatic ecosystems. In pursuit of this policy, the state encourages the development of facilities which store and conserve waters for beneficial use, for the maximization of the use of those waters in Montana, for the stabilization of stream flows, and for ground water recharge.

(4) Pursuant to Article IX, section 3 (1) of the Montana constitution, it is further the policy of this state and a purpose of this chapter to recognize and confirm all existing rights to the use of any waters for any useful or beneficial purpose.

85-2-124. Fees for environmental impact statements. (1) Whenever the department determines that the filing of an application (or a combination of applications) for a permit or approval under this chapter requires the preparation of an environmental impact statement as prescribed by the Montana Environmental Policy Act and the application (or combination of applications) involves the use of 4,000 or more acre-feet per year and 5.5 or more cubic feet per second of water, the applicant shall pay to the department the fee prescribed in this section. The department shall notify the applicant in writing within 90 days of receipt of a correct and complete application (or a combination of applications) if it determines that an environmental impact statement and fee is required.

(2) Upon notification by the department under subsection (1), the applicant shall pay a fee based upon the estimated cost of constructing, repairing, or changing the appropriation and diversion facilities as herein provided. The maximum fee that shall be paid to the department may not exceed the fees set forth in the following declining scale: 2% of the estimated cost up to $1 million; plus 1% of the estimated cost over $1 million and up to $20 million; plus 1/2 of 1% of the estimated cost over $20 million and up to $100 million; plus 1/4 of 1% of the estimated cost over $100 million and up to $300 million; plus 1/8 of 1% of the estimated cost over $300 million. The fee shall be deposited in the state special revenue fund to be used by the department only to comply with the Montana Environmental Policy Act in connection with the application(s). Any amounts paid by the applicant but not actually expended by the department shall be refunded to the applicant.

(3) The department and the applicant may determine by agreement the estimated cost of any facility for purposes of computing the amount of the fee to be paid to the department by the applicant. The department may contract with an applicant for:

(a) the development of information by the applicant or a third party on behalf of the department and the applicant concerning the environmental impact of any proposed activity under an application;

(b) the division of responsibility between the department and an applicant for supervision over, control of, and payment for the development of information by the applicant or a third party on behalf of the department and the applicant under any such contract or contracts;

(c) the use or nonuse of a fee or any part thereof paid to the department by an applicant.

(4) Any payments made to the department or any third party by an applicant under any such contract or contracts shall be credited against any fee the applicant must pay hereunder. The department and the applicant may agree on additional credits against the fee for environmental work performed by the applicant at the applicant's own expense.

(5) No fee as prescribed by this section may be assessed against an applicant for a permit or approval if the applicant has also filed an application for a certificate of environmental compatibility or public need pursuant to the Montana Major Facility Siting Act and the appropriation or use of water involved in the application(s) for permit or approval has been or will be studied by the department pursuant to that act.

(6) This section shall apply to all applications, pending or hereinafter filed, for which the department has not, as of April 9, 1975, commenced writing an environmental impact statement. This section shall not apply to any application, the fee for which would not exceed $2,500.

(7) Failure to submit the fee as required by this section shall void the application(s).

(8) The department may in its discretion rely upon the environmental studies, investigations, reports, and assessments made by any other state

agency or any person, including any applicant, in the preparation of its environmental impact statement.

85-2-141. Water leasing program. (1) There is a water leasing program administered by the department on behalf of the state of Montana. Water leases issued under this program must be approved by the board.

(2) The department may acquire rights to water needed for leasing under this program through appropriation of water in its own name or by agreement with or purchase from another holder of water rights.

(3) Water for leasing under the water leasing program must be obtained from the following sources:

(a) any existing or future reservoir in a basin concerning which a temporary preliminary decree, a preliminary decree under 85-2-231, or a final decree under 85-2-234 has been entered;

(b) Fort Peck Reservoir, if an agreement between the department and the federal government concerning the acquisition of water and the sharing of revenues with the state is in effect;

(c) Tiber, Canyon Ferry, Hungry Horse, or Yellowtail Reservoirs if and for so long as there is an agreement between the department and the federal government concerning the acquisition of water and sharing of revenues with the state from one or more of these reservoirs; and

(d) any other existing or future federal reservoir:

(i) located in a basin concerning which a temporary preliminary decree, a preliminary decree under 85-2-231, or a final decree under 85-2-234 has been entered; and

(ii) for which and for so long as there is an agreement between the department and the federal government concerning the acquisition of water and the sharing of revenues with the state.

(4) Water may be leased for any beneficial use. The amount of water that can be leased under this program for all beneficial uses shall not exceed 50,000 acre-feet.

(5) The term of any lease may not exceed 50 years. A term may be extended up to another 50 years if the department again determines the desirability of leasing by applying the considerations set forth in subsection (7). In making such a redetermination, the department may require the completion of an environmental impact statement in accordance with subsection (6).

(6) The department shall require the completion of an environmental impact statement under the provisions of Title 75, chapter 1, for lease applications that would result in the consumption of 4,000 acre-feet a year or more and 5.5 cubic feet per second or more of water and for any other application for which an environmental impact statement is required by law. The department shall require the completion of an environmental impact statement whenever the cumulative effect of more than one application for a lease would constitute a probable significant environmental impact.

(7) Upon application by any person to lease water, the department shall make an initial determination of whether it is desirable for the department to lease water to the applicant. Such a determination of desirability shall be made solely on the following considerations:

(a) the content of the environmental impact statement, if required;

(b) whether there is sufficient water available under the water leasing program; and

(c) whether the criteria, except as to legislative approval, set forth in 85-2-311 have been satisfied.

(8) The department shall for any agreement require commercially reasonable terms and conditions, which may include the requirement that up to 25% of the water to be leased be made available to a potential user for any beneficial use upon payment by such user of the costs of tapping into and removing water from the applicant's project. The department may differentiate in pricing, depending on the proposed beneficial use of the water.

(9) The lease of water or the use of water under a lease does not constitute a permit as provided in 85-2-102 and does not establish a right to appropriate water within the meaning of Title 85, chapter 2, part 3.

(10) For purposes of the water leasing program established in this section, it is the intent of the legislature that the state act as a proprietor.

85-2-218. Process and criteria for designating priority basins or subbasins. (1) The water judges and the department, in performing their functions in the adjudication process, shall give priority to basins or subbasins designated each biennium by the legislature. Basins or subbasins must be designated according to the following criteria:

(a) recurring water shortages within the basin or subbasin have resulted in urgent water rights controversies that require adjudication to determine relative rights;

(b) federal or Indian reserved rights are nearing determination, either by compact or adjudication, thus making adjudication of other rights in the basin or subbasin important for timely issuance of preliminary or final decrees;

(c) the basin or subbasin's location would help ensure efficient use of department and water court resources; and

(d) the adjudication process in the basin or subbasin is nearing the issuance of a decree.

(2) The water judge may designate a basin for priority adjudication upon petition of 100 or more persons who have filed claims within the basin, or he may designate a subbasin for priority adjudication upon petition of a majority of persons who have filed claims within the subbasin. (2) Under authority granted to the states by 43 U.S.C. 666, a federal reserved water right that has a priority date of July 1, 1973, or later and that is asserted by a federal agency is subject to the claim filing requirements and all other applicable requirements of the state water adjudication system provided for in Title 85, chapter 2, parts 2 and 7.

85-2-231. Temporary preliminary and preliminary decree. (1) A water judge may issue a temporary preliminary decree prior to the issuance of a preliminary decree if the temporary preliminary decree is necessary for the orderly adjudication or administration of water rights.

(2) (a) The water judge shall issue a preliminary decree. The preliminary decree shall be based on:

(i) the statements of claim before the water judge;

(ii) the data submitted by the department;

(iii) the contents of compacts approved by the Montana legislature and the tribe or federal agency or, lacking an approved compact, the filings for federal and Indian reserved rights; and

(iv) any additional data obtained by the water judge.

(b) The preliminary decree shall be issued within 90 days after the close of the special filing period set out in 85-2-702(3) or as soon thereafter as is reasonably feasible.

(c) This section does not prevent the water judge from issuing an interlocutory decree or other temporary decree, pursuant to 85-2-321 or as provided in subsection (1) of this section, or if such a decree is otherwise necessary for the orderly administration of water rights prior to the issuance of a preliminary decree.

(3) A preliminary decree may be issued for any hydrologically interrelated portion of a water division, including but not limited to a basin, subbasin, drainage, subdrainage, stream, or single source of supply of water, at a time different from the issuance of other preliminary decrees or portions of the same decree.

(4) The preliminary decree shall contain the information and make the determinations, findings, and conclusions required for the final decree under 85-2-234. The water judge shall include in the preliminary decree the contents of a compact negotiated under the provisions of part 7 that has been approved by the legislature and the tribe or federal agency.

(5) If the water judge is satisfied that the report of the water master meets the requirements for the preliminary decree set forth in subsections (1) and (3) and is satisfied with the conclusions contained in the report, the water judge shall adopt the report as the preliminary decree. If the water judge is not so satisfied, he may, at his option, recommit the report to the master with instructions, or modify the report and issue the preliminary decree.

(6) In issuing a subsequent preliminary decree, the water judge shall incorporate the temporary preliminary decree for the basin as modified by objections and hearings. The temporary preliminary decree or preliminary decree, as modified after objections and hearings, is enforceable and administrable according to its terms among parties ordered under 85-2-406. The preliminary decree, as modified after objections and hearings, shall upon issuance supersede and replace the temporary preliminary decree.

(1) The water judge shall send to the department a copy of any temporary preliminary decree or preliminary decree issued for a basin, and the water judge shall serve by mail a notice of availability of the temporary preliminary decree or preliminary decree to each person who has filed a claim of existing right within the decreed basin and to the purchaser under contract for deed, as defined in 70-20-115, of property in connection with which a claim of existing right has been filed within the decreed basin or, in the Powder

River Basin, to each person who has filed a declaration of an existing right. The water judge shall enclose with the notice an abstract of the disposition of such person's claimed or declared existing right. The notice of availability shall also be served upon those issued or having applied for and not having been denied a permit to beneficially use water within the decreed basin pursuant to Title 85, chapter 2, part 3, those granted a reservation within the decreed basin pursuant to 85-2-316, or other interested persons who request service of the notice from the water judge. The clerk or person designated by the water judge to mail the notice shall make a general certificate of mailing certifying that a copy of the notice has been placed in the United States mail, postage prepaid, addressed to each party required to be served notice of the temporary preliminary decree or preliminary decree. Such certificate shall be conclusive evidence of due and legal notice of entry of decree.

(2) Notice of the availability of a preliminary decree must also be published at least once each week for 3 consecutive weeks in at least three newspapers of general circulation which cover the water division or divisions in which the decreed basin is located. This notice must be provided before the final decree for the basin is issued.

(3) Any person may obtain a copy of the temporary preliminary decree or preliminary decree upon payment of a fee of $20 or the cost of printing, whichever is greater, to the water judge.

85-2-233. Hearing on temporary preliminary decree or preliminary decree. (1) (a) For good cause shown, a hearing shall be held before the water judge on any objection to a temporary preliminary decree or preliminary decree by:

(i) the department;

(ii) a person named in the temporary preliminary decree or preliminary decree;

(iii) any person within the basin entitled to receive notice under 85-2-232(1); or

(iv) any other person who claims rights to the use of water from sources in other basins that are hydrologically connected to the sources within the decreed basin and who would be entitled to receive notice under 85-2-232 if his claim or claims were from sources within the decreed basin.

(b) A person does not waive the right to object to a preliminary decree by failing to object to a temporary preliminary decree. However, a person may not raise an objection to a matter in a preliminary decree if he was a party to the matter when the matter was previously litigated and resolved as the result of an objection raised in a temporary preliminary decree, unless the objection is allowed for any of the following reasons:

(i) mistake, inadvertence, surprise, or excusable neglect;

(ii) newly discovered evidence that by due diligence could not have been discovered in time to move for a new trial under Rule 59(b) Montana Rules of Civil Procedure;

(iii) fraud, misrepresentation, or other misconduct of an adverse party;

(iv) the judgment is void; or

(v) any other reason justifying relief from the operation of the judgment.

(2) If a hearing is requested, the request must be filed with the water judge within 180 days after entry of the temporary preliminary decree or preliminary decree. The water judge may, for good cause shown, extend this time limit up to two additional 90-day periods if application for an extension is made prior to expiration of the original 180-day period or any extension of it.

(3) The request for a hearing shall contain a precise statement of the findings and conclusions in the temporary preliminary decree or preliminary decree with which the department or person requesting the hearing disagrees. The request shall specify the paragraphs and pages containing the findings and conclusions to which objection is made. The request shall state the specific grounds and evidence on which the objections are based.

(4) Upon expiration of the time for filing objections and upon timely receipt of a request for a hearing, the water judge shall notify each party named in the temporary preliminary decree or preliminary decree that a hearing has been requested. The water judge shall fix a day when all parties who wish to participate in future proceedings must appear or file a statement. The water judge shall then set a date for a hearing. The water judge may conduct individual or consolidated hearings. A hearing shall be conducted as for other civil actions. At the order of the water judge a hearing may be conducted by the water master, who shall prepare a report of the hearing as provided in M.R.Civ.P., Rule 53(e).

(5) Failure to object under subsection (1) to a compact negotiated and ratified under 85-2-702 or 85-2-703 bars any subsequent cause of action in the water court.

(6) If the court sustains an objection to a compact, it may declare the compact void. The agency of the United States, the tribe, or the United States on behalf of the tribe party to the compact shall be permitted 6 months after the court's determination to file a statement of claim, as provided in 85-2-224, and the court shall thereafter issue a new preliminary decree in accordance with 85-2-231; provided, however, that any party to a compact declared void may appeal from such determination in accordance with those procedures applicable to 85-2-235, and the filing of a notice of appeal shall stay the period for filing a statement of claim as required under this subsection.

(2) The terms of a compact negotiated and ratified under 85-2-702 must be included in the final decree without alteration unless an objection is sustained pursuant to 85-2-233; provided that the court may not alter or amend any of the terms of a compact except with the prior written consent of the parties in accordance with applicable law.

85-2-306. *(Temporary)* **Exceptions to permit requirements — fee.** (1) Ground water may be appropriated only by a person who has a possessory interest in the property where the water is to be put to beneficial use and exclusive property rights in the ground water development works or, if another person has rights in the ground water development works, the written consent of the person with those property rights. Outside the boundaries of a controlled ground water area, a permit is not required before appropriating ground water by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, except that a combined appropriation from the same source from two or more wells or developed springs exceeding this limitation requires a permit. Within 60 days of completion of the well or developed spring and appropriation of the ground water for beneficial use, the appropriator shall file a notice of completion with the department on a form provided by the department at its offices and at the offices of the county clerk and recorders and pay a filing fee. Upon receipt of the notice, the department shall review the notice and may, before issuing a certificate of water right, return a defective notice for correction or completion, together with the reasons for returning it. A notice does not lose priority of filing because of defects if the notice is corrected, completed, and refiled with the department within 30 days or within a further time as the department may allow, not to exceed 6 months. If a notice is not corrected and completed within the time allowed, the priority date of appropriation shall be the date of refiling a correct and complete notice with the department. A certificate of water right may not be issued until a correct and complete notice has been filed with the department. The original of the certificate shall be sent to the appropriator. The department shall keep a copy of the certificate in its office in Helena. The date of filing of the notice of completion is the date of priority of the right.

(2) An appropriator of ground water by means of a well or developed spring first put to beneficial use between January 1, 1962, and July 1, 1973, who did not file a notice of completion, as required by laws in force prior to April 14, 1981, with the county clerk and recorder shall file a notice of completion, as provided in subsection (1) of this section, with the department to perfect the water right. The filing of a claim of existing water right pursuant to 85-2-221 is sufficient notice of completion under this subsection. The priority date of the appropriation shall be the date of the filing of a notice as provided in subsection (1) of this section or the date of the filing of the claim of existing water right. An appropriation under this subsection is an existing right, and a permit is not required; however, the department shall acknowledge the receipt of a correct and complete filing of a notice of completion, except that for an appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, the department shall issue a certificate of water right. If a certificate is issued under this section, a certificate need not be issued under the adjudication proceedings provided for in 85-2-236.

(3) A permit is not required before constructing an impoundment or pit and appropriating water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream and the impoundment or pit is to be constructed on and will be accessible to a parcel of land that is owned or under the control of the applicant and that is 40 acres or larger. As used in this subsection, a perennial flowing stream means a stream which historically has flowed continuously at all seasons of the year, during dry as well as wet years. However, within 60 days after constructing the impoundment or pit, the appropriator shall apply for a permit as prescribed by this part. Upon receipt of a correct and complete application for a stockwater provisional permit, the department shall then automatically issue a provisional permit. If the department determines after a hearing that the rights of other appropriators have been or will be adversely affected, it may revoke the permit or require the permittee to modify the impoundment or pit and may then make the permit subject to such terms, conditions, restrictions, or limitations it considers necessary to protect the rights of other appropriators.

(4) A person may also appropriate water without applying for or prior to receiving a permit under rules adopted by the board under 85-2-113.

(5) In addition to the filing fee prescribed by the board by rule pursuant to 85-2-113, a person filing a notice under subsection (1) shall pay a $10 fee, and the department shall deposit $10 of each filing fee collected pursuant to subsection (1) in the ground water assessment account, established in 85-2-905, within the state special revenue fund. *(Terminates July 1, 1993—sec. 22, Ch. 769, L. 1991.)*

85-2-306. *(Effective July 1, 1993)* **Exceptions to permit requirements.** (1) Ground water may be appropriated only by a person who has a possessory interest in the property where the water is to be put to beneficial use and exclusive property rights in the ground water development works or, if another person has rights in the ground water development works, the written consent of the person with those property rights. Outside the boundaries of a controlled ground water area, a permit is not required before appropriating ground water by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, except that a combined appropriation from the same source from two or more wells or developed springs exceeding this limitation requires a permit. Within 60 days of completion of the well or developed spring and appropriation of the ground water for beneficial use, the appropriator shall file a notice of completion with the department on a form provided by the department at its offices and at the offices of the county clerk and recorders. Upon receipt of the notice, the department shall review the notice and may, before issuing a certificate of water right, return a defective notice for correction or completion, together with the reasons for returning it. A notice does not lose priority of filing because of defects if the notice is corrected, completed, and refiled with the department within 30 days or within a further time as the department may allow, not to exceed 6 months. If a notice is not corrected and completed within the time allowed, the priority date of appropriation shall be the date of refiling a correct and complete notice with the department. A certificate of water right may not be issued until a correct and complete notice has been filed with the department. The original of the certificate shall be sent to the appropriator. The department shall keep a copy of the certificate in its office in Helena. The date of filing of the notice of completion is the date of priority of the right.

(2) An appropriator of ground water by means of a well or developed spring first put to beneficial use between January 1, 1962, and July 1, 1973, who did not file a notice of completion, as required by laws in force prior to April 14, 1981, with the county clerk and recorder shall file a notice of completion, as provided in subsection (1) of this section, with the department to perfect the water right. The filing of a claim of existing water right pursuant to 85-2-221 is sufficient notice of completion under this subsection. The priority date of the appropriation shall be the date of the filing of a notice as provided in subsection (1) of this section or the date of the filing of the claim of existing water right. An appropriation under this subsection is an existing right, and a permit is not required; however, the department shall acknowledge the receipt of a correct and complete filing of a notice of completion, except that for an appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, the department shall issue a certificate of water right. If a certificate is issued under this section, a certificate need not be issued under the adjudication proceedings provided for in 85-2-236.

(3) A permit is not required before constructing an impoundment or pit and appropriating water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing

stream and the impoundment or pit is to be constructed on and will be accessible to a parcel of land that is owned or under the control of the applicant and that is 40 acres or larger. As used in this subsection, a perennial flowing stream means a stream which historically has flowed continuously at all seasons of the year, during dry as well as wet years. However, within 60 days after constructing the impoundment or pit, the appropriator shall apply for a permit as prescribed by this part. Upon receipt of a correct and complete application for a stockwater provisional permit, the department shall then automatically issue a provisional permit. If the department determines after a hearing that the rights of other appropriators have been or will be adversely affected, it may revoke the permit or require the permittee to modify the impoundment or pit and may then make the permit subject to such terms, conditions, restrictions, or limitations it considers necessary to protect the rights of other appropriators.

(4) A person may also appropriate water without applying for or prior to receiving a permit under rules adopted by the board under 85-2-113.

85-2-310. Action on application. (1) The department shall grant, deny, or condition an application for a permit in whole or in part within 120 days after the last date of publication of the notice of application if no objections have been received and within 180 days if a hearing is held or objections have been received. However, in either case the time may be extended upon agreement of the applicant, or, in those cases where an environmental impact statement must be prepared or in other extraordinary cases, not more than 60 days upon order of the department. If the department orders the time extended, it shall serve a notice of the extension and the reasons therefor by certified mail upon the applicant and each person who has filed an objection as provided by 85-2-308.

(2) However, an application may not be approved in a modified form or upon terms, conditions, or limitations specified by the department or denied, unless the applicant is first granted an opportunity to be heard. If no objection is filed against the application but the department is of the opinion that the application should be approved in a modified form or upon terms, conditions, or limitations specified by it or that the application should be denied, the department shall prepare a statement of its opinion and the reasons therefor. The department shall serve a statement of its opinion by certified mail upon the applicant, together with a notice that the applicant may obtain a hearing

by filing a request therefor within 30 days after the notice is mailed. The notice shall further state that the application will be modified in a specified manner or denied, unless a hearing is requested.

(3) The department may cease action upon an application for a permit and return it to the applicant when it finds that the application is not in good faith or does not show a bona fide intent to appropriate water for a beneficial use. An application returned for any of these reasons shall be accompanied by a statement of the reasons for which it was returned, and there shall be no right to a priority date based upon the filing of the application. Returning an application pursuant to this subsection shall be deemed a final decision of the department.

(4) For all applications filed after July 1, 1973, the department shall find that an application is not in good faith or does not show a bona fide intent to appropriate water for a beneficial use if:

(a) an application is not corrected and completed as required by 85-2-302;

(b) the appropriate filing fee is not paid;

(c) the application does not document:

(i) a beneficial use of water;

(ii) the proposed place of use of all water applied for;

(iii) for an appropriation of 4,000 acre-feet a year or more and 5.5 cubic feet per second or more, a detailed project plan describing when and how much water will be put to a beneficial use. The project plan must include a reasonable time line for the completion of the project and the actual application of the water to a beneficial use.

(iv) for appropriations not covered in subsection (4)(c)(iii), a general project plan stating when and how much water will be put to a beneficial use; and

(v) if the water applied for is to be appropriated above that which will be used solely by the applicant or if it will be marketed by the applicant to other users, information detailing:

(A) each person who will use the water and the amount of water each person will use;

(B) the proposed place of use of all water by each person;

(C) the nature of the relationship between the applicant and each person using the water; and

(D) each firm contractual agreement for the specified amount of water for each person using the water; or

(d) the proposed use of water is a beneficial use;

(e) the proposed use will not interfere unreasonably with other planned uses or developments for which a permit has been issued or for which water has been reserved; and

(f) the applicant has a possessory interest, or the written consent of the person with the possessory interest, in the property where the water is to be put to beneficial use.

(2) The department may not issue a permit for an appropriation of 4,000 or more acre-feet of water a year and 5.5 or more cubic feet per second of water unless the applicant proves by clear and convincing evidence that:

(a) the criteria in subsection (1) are met;

(b) the rights of a prior appropriator will not be adversely affected;

(c) the proposed appropriation is a reasonable use. Such a finding shall be based on a consideration of the following:

(i) the existing demands on the state water supply, as well as projected demands such as reservations of water for future beneficial purposes, including municipal water supplies, irrigation systems, and minimum streamflows for the protection of existing water rights and aquatic life;

(ii) the benefits to the applicant and the state;

(iii) the effects on the quantity and quality of water for existing beneficial uses in the source of supply;

(iv) the availability and feasibility of using low-quality water for the purpose for which application has been made;

(v) the effects on private property rights by any creation of or contribution to saline seep; and

(vi) the probable significant adverse environmental impacts of the proposed use of water as determined by the department pursuant to Title 75, chapter 1, or Title 75, chapter 20.

(3) (a) The state of Montana has long recognized the importance of conserving its public waters and the necessity to maintain adequate water supplies for the state's water requirements, including requirements for reserved water rights held by the United States for federal reserved lands and in trust for the various Indian tribes within the state's boundaries. Although

the state of Montana also recognizes that, under appropriate conditions, the out-of-state transportation and use of its public waters are not in conflict with the public welfare of its citizens or the conservation of its waters, the criteria in this subsection (3) must be met before out-of-state use may occur.

(b) The department may not issue a permit for the appropriation of water for withdrawal and transportation for use outside the state unless the applicant proves by clear and convincing evidence that:

(i) depending on the volume of water diverted or consumed, the applicable criteria and procedures of subsection (1) or (2) are met;

(ii) the proposed out-of-state use of water is not contrary to water conservation in Montana; and

(iii) the proposed out-of-state use of water is not otherwise detrimental to the public welfare of the citizens of Montana.

(c) In determining whether the applicant has proved by clear and convincing evidence that the requirements of subsections (3)(b)(ii) and (3)(b)(iii) are met, the department shall consider the following factors:

(i) whether there are present or projected water shortages within the state of Montana;

(ii) whether the water that is the subject of the application could feasibly be transported to alleviate water shortages within the state of Montana;

(iii) the supply and sources of water available to the applicant in the state where the applicant intends to use the water; and

(iv) the demands placed on the applicant's supply in the state where the applicant intends to use the water.

(d) When applying for a permit or a lease to withdraw and transport water for use outside the state, the applicant shall submit to and comply with the laws of the state of Montana governing the appropriation, lease, and use of water.

(4) To meet the substantial credible evidence standard in this section, the applicant shall submit independent hydrologic or other evidence, including water supply data, field reports, and other information developed by the department, the U.S. geological survey, or the U.S. soil conservation service and other specific field studies, demonstrating that the criteria are met.

(5) An appropriation, diversion, impoundment, use, restraint, or attempted appropriation, diversion, impoundment, use, or restraint contrary to the provisions of this section is invalid. An officer, agent, agency, or employee of the state may not knowingly permit, aid, or assist in any manner an unauthorized appropriation, diversion, impoundment, use, or other restraint. A person or corporation may not, directly or indirectly, personally or through an agent, officer, or employee, attempt to appropriate, divert, impound, use, or otherwise restrain or control waters within the boundaries of this state except in accordance with this section.

85-2-312. Terms of permit. (1) The department may issue a permit for less than the amount of water requested, but in no case may it issue a permit for more water than is requested or than can be beneficially used without waste for the purpose stated in the application. The department may require modification of plans and specifications for the appropriation or related diversion or construction. The department may issue a permit subject to terms, conditions, restrictions, and limitations it considers necessary to satisfy the criteria listed in 85-2-311, and it may issue temporary or seasonal permits. A permit shall be issued subject to existing rights and any final determination of those rights made under this chapter.

(2) The department shall specify in the permit or in any authorized extension of time provided in subsection (3), the time limits for commencement of the appropriation works, completion of construction, and actual application of the water to the proposed beneficial use. In fixing those time limits, the department shall consider the cost and magnitude of the project, the engineering and physical features to be encountered, and, on projects designed for gradual development and gradually increased use of water, the time reasonably necessary for that gradual development and increased use. The department shall issue the permit or authorized extension of time subject to the terms, conditions, restrictions, and limitations it considers necessary to ensure that the work on the appropriation is commenced, conducted, and completed and that the water is actually applied in a timely manner to the beneficial use specified in the permit.

(3) The department may, upon a showing of good cause, extend time limits specified in the permit for commencement of the appropriation works, completion of construction, and actual application of the water to the proposed beneficial use. All requests for extensions of time must be by affidavit and must be filed with the department prior to the expiration of the time limit specified in the permit or any previously authorized extension of time. The department may issue an order temporarily extending the time limit specified in the permit for 120 days or until the department has completed its action under this section, whichever is greater. Upon receipt of a proper request for extension of time, the department shall prepare a notice containing the facts pertinent to the request for extension of time and shall publish the notice in a newspaper of general circulation in the area of the source. The department may serve notice by first-class mail upon any public agency or other person the department determines may be interested in or affected by the request for extension of time. The department shall hold a hearing on the request for extension of time on its own motion or if requested by an interested party. The department may grant the extension of time in the absence of a hearing if no requests for a hearing are received and the extension of time is granted as requested, or the department may grant the extension of time in a modified form by following the process established in 85-2-310(2). Subsequent extensions of time may be made in the same manner.

(4) The original of the permit shall be sent to the permittee, and a copy shall be kept in the office of the department in Helena.

85-2-316. Reservation of waters. (1) The state or any political subdivision or agency thereof or the United States or any agency thereof may apply to the board to reserve waters for existing or future beneficial uses or to maintain a minimum flow, level, or quality of water throughout the year or at periods or for a length of time as the board designates.

(2) (a) Water may be reserved for existing or future beneficial uses in the basin where it is reserved, as described by the following basins:

(i) the Clark Fork River and its tributaries to its confluence with Lake Pend Oreille in Idaho;

(ii) the Kootenai River and its tributaries to its confluence with Kootenay Lake in British Columbia;

(iii) the St. Mary River and its tributaries to its confluence with the Oldman River in Alberta;

(iv) the Little Missouri River and its tributaries to its confluence with Lake Sakakawea in North Dakota;

(v) the Missouri River and its tributaries to its confluence with the Yellowstone River in North Dakota; and

(vi) the Yellowstone River and its tributaries to its confluence with the Missouri River in North Dakota.

(b) A water reservation may be made for an existing or future beneficial use outside the basin where the diversion occurs only if stored water is not reasonably available for water leasing under 85-2-141 and the proposed use would occur in a basin designated in subsection (2)(a).

(3) Upon receiving an application, the department shall proceed in accordance with 85-2-307 through 85-2-309. After the hearing provided in 85-2-309, the board shall decide whether to reserve the water for the applicant. The department's costs of giving notice, holding the hearing, conducting investigations, and making records incurred in acting upon the application to reserve water, except the cost of salaries of the department's personnel, must be paid by the applicant. In addition, a reasonable proportion of the department's cost of preparing an environmental impact statement must be paid by the applicant unless waived by the department upon a showing of good cause by the applicant.

(4) (a) The board may not adopt an order reserving water unless the applicant establishes to the satisfaction of the board:

(i) the purpose of the reservation;

(ii) the need for the reservation;

(iii) the amount of water necessary for the purpose of the reservation;

(iv) that the reservation is in the public interest.

(b) In determining the public interest under subsection (4)(a)(iv), the board may not adopt an order reserving water for withdrawal and transport for use outside the state unless the applicant proves by clear and convincing evidence that:

(i) the proposed out-of-state use of water is not contrary to water conservation in Montana; and

(ii) the proposed out-of-state use of water is not otherwise detrimental to the public welfare of the citizens of Montana.

(c) In determining whether the applicant has proved by clear and convincing evidence that the requirements of subsections (4)(b)(i) and (4)(b)(ii) are met, the board shall consider the following factors:

(i) whether there are present or projected water shortages within the state of Montana;

(ii) whether the water that is the subject of the application could feasibly be transported to alleviate water shortages within the state of Montana;

(iii) the supply and sources of water available to the applicant in the state where the applicant intends to use the water; and

(iv) the demands placed on the applicant's supply in the state where the applicant intends to use the water.

(d) When applying for a reservation to withdraw and transport water for use outside the state, the applicant shall submit to and comply with the laws of the state of Montana governing the appropriation, lease, use, and reservation of water.

(5) If the purpose of the reservation requires construction of a storage or diversion facility, the applicant shall establish to the satisfaction of the board that there will be progress toward completion of the facility and accomplishment of the purpose with reasonable diligence in accordance with an established plan.

(6) The board shall limit any reservations after May 9, 1979, for maintenance of minimum flow, level, or quality of water that it awards at any point on a stream or river to a maximum of 50% of the average annual flow of record on gauged streams. Ungauged streams can be allocated at the discretion of the board.

(7) After the adoption of an order reserving waters, the department may reject an application and refuse a permit for the appropriation of reserved waters or may, with the approval of the board, issue the permit subject to terms and conditions it considers necessary for the protection of the objectives of the reservation.

(8) (a) Any person desiring to use water reserved to a conservation district for agricultural purposes shall make application for the use with the district, and the district, upon approval of the application, shall inform the department of the approved use and issue the applicant an authorization for the use. The department shall maintain records of all uses of water reserved to conservation districts and be responsible, when requested by the districts, for rendering technical and administrative assistance within the

department's staffing and budgeting limitations in the preparation and processing of such applications for the conservation districts. The department shall, within its staffing and budgeting limitations, complete any feasibility study requested by the districts within 12 months of the time the request was made. The board shall extend the time allowed to develop a plan identifying projects for utilizing a district's reservation so long as the conservation district makes a good faith effort, within its staffing and budget limitations, to develop a plan.

(b) Upon actual application of water to the proposed beneficial use the authorized user shall notify the conservation district. The notification must contain a certified statement by a person with experience in the design, construction, or operation of project works for agricultural purposes that the reserved water has been put to use in substantial accordance with the terms and conditions of the authorization to use reserved water. The department or the district may then inspect the appropriation to determine if it has been completed in substantial accordance with the authorization.

(9) Except as provided in 85-2-331, the priority of appropriation of a water reservation and the relative priority of the reservation to permits with a later priority of appropriation must be determined according to this subsection (9).

(a) A reservation under this section has a priority of appropriation dating from the filing with the department of a notice of intention to apply for a water reservation in a basin in which no other notice of intention to apply is currently pending. The notice of intention to apply must specify the basin in which the applicant is seeking a reservation.

(b) Upon receiving a notice of intention to apply for a water reservation, the department shall identify all potential water reservation applicants in the basin specified in the notice and notify each potential applicant of the opportunity to submit an application and to receive a reservation with the priority of appropriation as described in subsection (9)(a).

(c) To receive the priority of appropriation described in subsection (9)(a), the applicant shall submit a correct and complete water reservation application within 1 year after the filing of the notice of intention to apply. Upon a showing of good cause, the board may extend the time for preparing the application.

(d) The board may by order subordinate a water reservation to a permit issued pursuant to this part if:

(i) the permit application was accepted by the department before the date of the board order granting the reservation; and

(ii) the effect of subordinating the reservation to one or more permits does not interfere substantially with the purpose of the reservation.

(e) The board shall by order establish the relative priority of reservations approved under this section that have the same day of priority. A reservation may not adversely affect any rights in existence at that time.

(10) The board shall, periodically but at least once every 10 years, review existing reservations to ensure that the objectives of the reservation are being met. Where the objectives of the reservation are not being met, the board may extend, revoke, or modify the reservation. Any undeveloped water made

available as a result of a revocation or modification under this subsection is available for appropriation by others pursuant to this part.

(11) The board may modify an existing or future order originally adopted to reserve water for the purpose of maintaining minimum flow, level, or quality of water, so as to reallocate the reservation or portion of the reservation to an applicant who is a qualified reservant under this section. Reallocation of reserved water may be made by the board following notice and hearing wherein the board finds that all or part of the reservation is not required for its purpose and that the need for the reallocation has been shown by the applicant to outweigh the need shown by the original reservant. Reallocation of reserved water may not adversely affect the priority date of the reservation, and the reservation shall retain its priority date despite reallocation to a different entity for a different use. The board may not reallocate water reserved under this section on any stream or river more frequently than once every 5 years.

(12) A reservant may not make a change in a reservation under this section except as permitted under 85-2-402 and this subsection. If the department approves a change, the board, upon notification by the department of its approval, shall give notice and require the reservant to establish that the criteria in subsection (4) will be met under the approved change.

(13) A reservation may be transferred to another entity qualified to hold a reservation under subsection (1). Only the entity holding the reservation may initiate a transfer. The transfer occurs upon the filing of a water right transfer certificate with the board together with an affidavit from the entity receiving the reservation establishing that the entity is a qualified reservant under subsection (1), that the entity agrees to comply with the requirements of this section and the conditions of the reservation, and that the entity can meet the objectives of the reservation as granted. If the transfer of a reservation involves a change in an appropriation right, the necessary approvals must be acquired pursuant to subsection (12).

(14) Nothing in this section vests the board with the authority to alter a water right that is not a reservation.

(15) The department shall undertake a program to educate the public, other state agencies, and political subdivisions of the state as to the benefits of the reservation process and the procedures to be followed to secure the reservation of water. The department shall provide technical assistance to other state agencies and political subdivisions in applying for reservations under this section.

(16) Water reserved under this section is not subject to the state water leasing program established under 85-2-141.

(3) As part of fulfilling the requirements of 2-4-623, the order must define the source and must state the class of applications to which the suspension or closure, or both, applies.

(4) Upon adoption of the order, the department shall refuse to accept any application for a permit under this part for the class of application for which closure is ordered under this section and 85-2-321. If the order suspends action on pending applications, the department shall notify the applicant that action on his application is suspended.

(5) Upon notice under 85-2-307 of intent to combine the hearings under 85-2-309 with the hearings under this section, the department may suspend action on pending applications of the class until the hearing is conducted under this section and, as part of its final order, may grant, deny, or condition the applications under 85-2-306(3), 85-2-310, and 85-2-311 or continue the suspension under this section.

The request must contain allegations supported by substantial evidence showing that the criteria in 85-2-311 can be met for an application or a class of applications from the source. If not so supported, the department may reject the request without a hearing.

(2) The department may by order after a hearing modify or revoke any order made as provided in 85-2-321 and 85-2-322 upon such notice and in such manner as is reasonable under the circumstances.

History: En. Sec. 3, Ch. 524, L. 1981.

Part 4

Utilization of Water

85-2-401. Priority. (1) As between appropriators, the first in time is the first in right. Priority of appropriation does not include the right to prevent changes by later appropriators in the condition of water occurrence, such as the increase or decrease of streamflow or the lowering of a water table, artesian pressure, or water level, if the prior appropriator can reasonably exercise his water right under the changed conditions.

(2) Priority of appropriation made under this chapter dates from the filing of an application for a permit with the department, except as otherwise provided in 85-2-301 through 85-2-303, 85-2-306, 85-2-310(3), and 85-2-313.

(3) Priority of appropriation perfected before July 1, 1973, shall be determined as provided in part 2 of this chapter.

History: En. Sec. 27, Ch. 452, L. 1973; R.C.M. 1947, 89-891; amd. Sec. 33, Ch. 697, L. 1979.

85-2-402. *(Temporary)* **Changes in appropriation rights.** (1) An appropriator may not make a change in an appropriation right except as permitted under this section and with the approval of the department or, if applicable, of the legislature.

(2) Except as provided in subsections (3) through (5), the department shall approve a change in appropriation right if the appropriator proves by substantial credible evidence that the following criteria are met:

(a) The proposed use will not adversely affect the water rights of other persons or other planned uses or developments for which a permit has been issued or for which water has been reserved.

(b) Except for a lease authorization pursuant to 85-2-436 that does not require appropriation works, the proposed means of diversion, construction, and operation of the appropriation works are adequate.

(c) The proposed use of water is a beneficial use.

(d) The applicant has a possessory interest, or the written consent of the person with the possessory interest, in the property where the water is to be put to beneficial use.

(e) If the change in appropriation right involves salvaged water, the proposed water-saving methods will salvage at least the amount of water asserted by the applicant.

(3) The department may not approve a change in purpose of use or place of use of an appropriation of 4,000 or more acre-feet of water a year and 5.5 or more cubic feet per second of water unless the appropriator proves by substantial credible evidence that:

(a) the criteria in subsection (2) are met;

(b) the proposed change is a reasonable use. A finding of reasonable use must be based on a consideration of:

(i) the existing demands on the state water supply, as well as projected demands for water for future beneficial purposes, including municipal water supplies, irrigation systems, and minimum streamflows for the protection of existing water rights and aquatic life;

(ii) the benefits to the applicant and the state;

(iii) the effects on the quantity and quality of water for existing uses in the source of supply;

(iv) the availability and feasibility of using low-quality water for the purpose for which application has been made;

(v) the effects on private property rights by any creation of or contribution to saline seep; and

(vi) the probable significant adverse environmental impacts of the proposed use of water as determined by the department pursuant to Title 75, chapter 1, or Title 75, chapter 20.

(4) The department may not approve a change in purpose of use or place of use for a diversion that results in 4,000 or more acre-feet of water a year and 5.5 or more cubic feet per second of water being consumed unless:

(a) the applicant proves by clear and convincing evidence and the department finds that the criteria in subsections (2) and (3) are met; and

(b) the department then petitions the legislature and the legislature affirms the decision of the department after one or more public hearings.

(5) (a) The state of Montana has long recognized the importance of conserving its public waters and the necessity to maintain adequate water supplies for the state's water requirements, including requirements for reserved water rights held by the United States for federal reserved lands and in trust for the various Indian tribes within the state's boundaries. Although the state of Montana also recognizes that, under appropriate conditions, the out-of-state transportation and use of its public waters are not in conflict with the public welfare of its citizens or the conservation of its waters, the following criteria must be met before out-of-state use may occur:

(b) The department and, if applicable, the legislature may not approve a change in appropriation right for the withdrawal and transportation of appropriated water for use outside the state unless the appropriator proves by clear and convincing evidence and, if applicable, the legislature approves after one or more public hearings that:

(i) depending on the volume of water diverted or consumed, the applicable criteria and procedures of subsection (2) or (3) are met;

(ii) the proposed out-of-state use of water is not contrary to water conservation in Montana; and

(iii) the proposed out-of-state use of water is not otherwise detrimental to the public welfare of the citizens of Montana.

(c) In determining whether the appropriator has proved by clear and convincing evidence that the requirements of subsections (5)(b)(ii) and (5)(b)(iii) will be met, the department and, if applicable, the legislature shall consider the following factors:

(i) whether there are present or projected water shortages within the state of Montana;

(ii) whether the water that is the subject of the proposed change in appropriation might feasibly be transported to alleviate water shortages within the state of Montana;

(iii) the supply and sources of water available to the applicant in the state where the applicant intends to use the water; and

(iv) the demands placed on the applicant's supply in the state where the applicant intends to use the water.

(d) When applying for a change in appropriation right to withdraw and transport water for use outside the state, the applicant shall submit to and comply with the laws of the state of Montana governing the appropriation and use of water.

(6) For any application for a change in appropriation right involving 4,000 or more acre-feet of water a year and 5.5 or more cubic feet per second of water, the department shall give notice of the proposed change in accordance with 85-2-307 and shall hold one or more hearings in accordance with 85-2-309 prior to its approval or denial of the proposed change. The department shall provide notice and may hold one or more hearings upon any other proposed change if it determines that a change might adversely affect the rights of other persons.

(7) The department or the legislature, if applicable, may approve a change subject to terms, conditions, restrictions, and limitations as it considers necessary to satisfy the criteria of this section, including limitations on the time for completion of the change. The department may extend time limits specified in the change approval under the applicable criteria and procedures of 85-2-312(3).

(8) Upon actual application of water to the proposed beneficial use within the time allowed, the appropriator shall notify the department that the appropriation has been properly completed. The notification must contain a certified statement by a person with experience in the design, construction, or operation of appropriation works that the appropriation has been properly completed in substantial accordance with the terms and conditions of the change approval.

(9) If a change is not completed as approved by the department or legislature or if the terms, conditions, restrictions, and limitations of the change approval are not complied with, the department may, after notice and opportunity for hearing, require the appropriator to show cause why the change approval should not be modified or revoked. If the appropriator fails

to show sufficient cause, the department may modify or revoke the change approval.

(10) The original of a change approval issued by the department must be sent to the applicant, and a duplicate must be kept in the office of the department in Helena.

(11) A person holding an issued permit or change approval that has not been perfected may change the place of diversion, place of use, purpose of use, or place of storage by filing an application for change pursuant to this section.

(12) A change in appropriation right contrary to the provisions of this section is invalid. An officer, agent, agency, or employee of the state may not knowingly permit, aid, or assist in any manner an unauthorized change in appropriation right. A person or corporation may not, directly or indirectly, personally or through an agent, officer, or employee, attempt to change an appropriation right except in accordance with this section. *(Terminates June 30, 1999—sec. 4, Ch. 740, L. 1991.)*

85-2-402. *(Effective July 1, 1999)* **Changes in appropriation rights.** (1) An appropriator may not make a change in an appropriation right except as permitted under this section and with the approval of the department or, if applicable, of the legislature.

(2) Except as provided in subsections (3) through (5), the department shall approve a change in appropriation right if the appropriator proves by substantial credible evidence that the following criteria are met:

(b) The proposed means of diversion, construction, and operation of the appropriation works are adequate.

(c) In determining whether the appropriator has proved by clear and convincing evidence that the requirements of subsections (5)(b)(ii) and (5)(b)(iii) will be met, the department and, if applicable, the legislature shall consider the following factors:

(2) Failure to comply with the provisions of 85-2-402 does not render a conveyance or reservation of a water right void, but the right may not be used until the department has approved the change. (2) If an appropriator ceases to use all or part of his appropriation right or ceases using his appropriation right according to its terms and conditions for a period of 10 successive years and there was water available for his use, there is a prima facie presumption that the appropriator has abandoned his right in whole or for the part not used.

(3) If an appropriator ceases to use all or part of his appropriation right because the land to which the water is applied to a beneficial use is contracted under a state or federal conservation set-aside program:

(a) the set-aside and resulting reduction in use of the appropriation right does not represent an intent by the appropriator to wholly or partially abandon the appropriation right or to not comply with the terms and conditions attached to the right; and

(b) the period of nonuse that occurs for part or all of the appropriation right as a result of the contract may not create or may not be added to any previous period of nonuse to create a prima facie presumption of abandonment.

(4) The lease of an existing right pursuant to 85-2-436 or the temporary change pursuant to 85-2-407 does not constitute an abandonment or serve as

evidence that could be used to establish an abandonment of any part of the right.

(5) Subsections (1) and (2) do not apply to existing rights until they have been determined in accordance with part 2 of this chapter. *(Terminates June 30, 1999—sec. 4, Ch. 740, L. 1991.)*

85-2-405. Procedure for declaring appropriation rights abandoned. (1) When the department has reason to believe that an appropriator may have abandoned his appropriation right under 85-2-404 or when another appropriator in the opinion of the department files a valid claim that he has been or will be injured by the resumption of use of an appropriation right alleged to have been abandoned, the department shall petition the district court which determined the existing rights in the source of the appropriation in question to hold a hearing to determine whether the appropriation right has been abandoned. Proceedings under this section shall be conducted in accordance with the Montana Rules of Civil Procedure, and appeal shall be taken in accordance with the Montana Rules of Appellate Procedure.

(2) At the hearing, the burden of proof shall be on the department which must establish by a preponderance of the evidence that the appropriation has been abandoned under 85-2-404.

(3) The determination of the court shall be appended to the final decree. The department shall keep a copy of the determination in its office in Helena.

85-2-406. District court supervision of water distribution. (1) The district courts shall supervise the distribution of water among all appropriators. This supervisory authority includes the supervision of all water commissioners appointed prior or subsequent to July 1, 1973. The supervision shall be governed by the principle that first in time is first in right.

(2) When a water distribution controversy arises upon a source of water in which existing rights have not been determined according to part 2 of this chapter or when a basin is the subject of a temporary preliminary decree or preliminary decree, as modified after objections and hearings, any party to the controversy or any person whose rights are or may be affected by enforcement of the decree may petition the district court for relief. The district court from which relief is sought may grant injunctive or other relief which is necessary and appropriate to preserve property rights or the status quo pending the issuance of the final decree.

(3) A controversy between appropriators from a source that has been the subject of a final decree under part 2 of this chapter must be settled by the district court that issued the final decree. The order of the district court settling the controversy may not alter the existing rights and priorities established in the final decree except to the extent the court alters rights based upon abandonment, waste, or illegal enlargement or change of right. In cases involving permits issued by the department, the court may not amend the respective rights established in the permits or alter any terms of the permits unless the permits are inconsistent or interfere with rights and priorities established in the final decree. The order settling the controversy must be appended to the final decree, and a copy must be filed with the department. The department must be served with process in any proceeding under this subsection, and the department may, in its discretion, intervene in the proceeding.

(4) If an action to enforce a temporary preliminary decree is commenced, the water judge shall upon referral from the district court establish, in a form determined to be appropriate by the water judge, one or more tabulations or lists of all existing rights and their relative priorities.

(5) (a) A person whose existing rights and priorities are determined in a temporary preliminary decree or preliminary decree or a person exercising a suspension under 85-2-217 and part 7 of this chapter may appeal a determination made pursuant to subsection (2).

(b) The water judge is not bound by a supreme court determination on an appeal entered under this subsection in issuing any subsequent decree under part 2 of this chapter.

85-2-407. Temporary changes in appropriation right. (1) An appropriator may not make a temporary change in appropriation right for his use or another's use except with department approval in accordance with 85-2-402 and this section.

(2) A temporary change in appropriation right may be approved for a period not to exceed 10 years. A temporary change in appropriation right may be approved for consecutive or intermittent use.

(3) An authorization for a temporary change in appropriation right may be renewed by the department for a period not to exceed 10 years. Renewal of an authorization for a temporary change in appropriation right requires application to the department by the appropriator. Upon application, the department shall notify other appropriators potentially affected by the renewal and shall allow 30 days for submission of new evidence of adverse effects to other water rights. A temporary change authorization may not be renewed by the department if it determines that the right of an appropriator, other than an appropriator described in subsection (7), is adversely affected.

(4) During the term of the original temporary change authorization, the department may modify or revoke its authorization for a temporary change if it determines that the right of an appropriator, other than an appropriator described in subsection (7), is adversely affected.

(5) The priority of appropriation for a temporary change in appropriation right is the same as the priority of appropriation of the right that is temporarily changed.

(6) Neither a change in appropriation right nor any other authorization right is required for reversion of the appropriation right to the permanent purpose, place of use, point of diversion, or place of storage after the period for which a temporary change was authorized expires.

(7) A person issued a water use permit with a priority of appropriation after the date of filing of an application for a temporary change in appropriation right under this section may not object to the exercise of the temporary change according to its terms, the renewal of the authorization for the temporary change, or the reversion of the appropriation right to its permanent purpose, place of use, point of diversion, or place of storage. Persons described in this subsection must be notified of the existence of any temporary change authorizations from the same source of supply.

(8) If a water right for which a temporary change has been approved is transferred as an appurtenance of real property, the temporary change remains in effect unless another change in appropriation right is authorized by the department.

Upon failure to do so within 24 hours after demand being made upon him in writing, to him in person or at his place of abode, by any person having a right to the use of such surplus water, the person so diverting the same shall be liable to the person aggrieved for the damage resulting therefrom, in such sum as may be determined by court.

(i) the length of the stream reach and how it is determined;

Parties who believe they may be adversely affected by the proposed lease may file an objection as provided in 85-2-308. A lease may not be approved until all objections are resolved. After resolving all objections filed under 85-2-308, the department shall authorize a lease of an existing right for the purpose of maintaining or enhancing streamflows for the benefit of fisheries if the applicant submits a complete application and meets the requirements of 85-2-402.

(c) The application for a lease authorization must include specific information on the length and location of the stream reach in which the streamflow must be maintained or enhanced and must provide a detailed streamflow measuring plan that describes the points where and the manner in which the streamflow must be measured.

(d) The maximum quantity of water that may be leased is the amount historically diverted by the lessor. However, only the amount historically consumed, or a smaller amount if specified by the department in the lease authorization, may be used to maintain or enhance streamflows below the lessor's point of diversion.

(e) The lease may not be issued for a term of more than 10 years, but it may be renewed once for up to 10 years, except that a lease of water made available from the development of a water conservation or storage project is restricted to a term of not more than 20 years. Upon receiving notice of a lease renewal, the department shall notify other appropriators potentially affected by the lease and shall allow 30 days for submission of new evidence of adverse effects to other water rights. A lease authorization is not required for a renewal unless an appropriator other than an appropriator described in subsection (2)(i) submits evidence of adverse effects to his rights that has not been considered previously. If new evidence is submitted, a lease authorization must be obtained according to the requirements of 85-2-402.

(f) During the term of the lease, the department may modify or revoke the lease authorization if an appropriator other than an appropriator described in subsection (2)(i) proves by substantial credible evidence that his water right is adversely affected.

(g) The priority of appropriation for a lease under this section is the same as the priority of appropriation of the right that is leased.

(h) Neither a change in appropriation right nor any other authorization is required for the reversion of the appropriation right to the lessor's previous use.

(i) A person issued a water use permit with a priority of appropriation after the date of filing of an application for a lease authorization under this section may not object to the exercise of the lease according to its terms or the reversion of the appropriation right to the lessor according to the lessor's previous use.

(j) The department of fish, wildlife, and parks shall pay all costs associated with installing devices or providing personnel to measure streamflows according to the measuring plan submitted under this section.

(3) (a) The department of fish, wildlife, and parks shall complete and submit to the board, commission, and water policy committee an annual study progress report by December 1 of each year. This report must include the applicable information listed in subsection (1) for each lease. If the department of fish, wildlife, and parks has not leased water rights under this section by December 1 of any year, the department of fish, wildlife, and parks shall provide compelling justification for that fact in the study progress report.

(b) A final study report must be adopted by the board and commission and submitted to the water policy committee, which shall complete the final report by December 1, 1998.

(4) This section does not create the right for a person to bring suit to compel the renewal of a lease that has expired. *(Terminates June 30, 1999—sec. 4, Ch. 740, L. 1991.)*

1991 Amendment: In (2)(e) increased lease term from 4 years to 10 years and after "years" substituted "but it may be renewed once for up to 10 years, except that a lease of water made available from the development of a water conservation or storage project is restricted to a term of not more than 20 years" for "but may be renewed for up to 10 years per renewal, if allowed by law and upon notification to the department. If this section terminates without reauthorization by the legislature, all leases and lease authorizations expire on the date of termination"; in (2)(f), before "lease", deleted "original"; in (2)(i), after "terms", deleted "the renewal of the lease"; in (2)(j), after "installing", deleted "measuring"; inserted (3)(a) requiring Department to submit to Board, Commission, and Water Policy Committee by December 1 annual progress report, including lease information, and requiring Department to provide compelling information justifying any water rights not leased by December 1 of any year in progress report; in (3)(b), before "study", inserted "final" and at end extended date from 1990 to 1998; inserted (4) providing that section does not create right to bring suit to compel renewal of expired lease; and made minor changes in style. Amendment effective May 1, 1991.

85-2-505. Waste and contamination of ground water prohibited. (1) No ground water may be wasted. The department shall require all wells producing waters which contaminate other waters to be plugged or capped. It shall also require all flowing wells to be so capped or equipped with valves that the flow of water can be stopped when the water is not being put to beneficial use. Likewise, both flowing and nonflowing wells shall be so constructed and maintained as to prevent the waste, contamination, or pollution of ground water through leaky casings, pipes, fittings, valves, or pumps either above or below the land surface, provided, however, in the following cases the withdrawal or use of ground water shall not be construed as waste under this part:

(a) the withdrawal of reasonable quantities of ground water in connection with the construction, development, testing, or repair of a well or other means of withdrawal of ground water;

(b) the inadvertent loss of ground water owing to breakage of a pump, valve, pipe, or fitting, if reasonable diligence is shown by the person in effecting the necessary repair;

(c) the disposal of ground water without further beneficial use that must be withdrawn for the sole purpose of improving or preserving the utility of land by draining the same or that must be removed from a mine to permit mining operations or to preserve the mine in good condition;

(d) the disposal of ground water used in connection with producing, reducing, smelting, and milling metallic ores and industrial minerals or that displaced from an aquifer by the storage of other mineral resources.

(2) The department at any time may hold a hearing on its own motion or upon petition signed by a representative body of users of ground water in any area or subarea to determine whether the water supply within such area or subarea is used in compliance with this part.

85-2-506. Controlled ground water areas — designation or modification. (1) The board may designate or modify controlled ground water areas as provided in this part.

(2) Designation or modification of an area of controlled ground water use may be proposed to the board by the department on its own motion or by petition signed by at least 20 or one-fourth of the users (whichever is the lesser number) of ground water in a ground water area wherein there are alleged to be facts showing:

(a) that ground water withdrawals are in excess of recharge to the aquifer or aquifers within such ground water area;

(b) that excessive ground water withdrawals are very likely to occur in the near future because of consistent and significant increases in withdrawals from within the ground water area;

(c) that significant disputes regarding priority of rights, amounts of ground water in use by appropriators, or priority of type of use are in progress within the ground water area;

(d) that ground water levels or pressures in the area in question are declining or have declined excessively; or

(e) that excessive ground water withdrawals would cause contaminant migration and a degradation of ground water quality within the ground water area.

(3) When such a proposal is thus made, the board shall fix a time and place for a hearing, which time shall not be less than 90 days from the making of the proposal. The place for the hearing shall be within or as close as practical to the controlled ground water area.

(4) The department shall publish a notice of the hearing, setting forth therein:

(a) the names of the petitioners;

(b) the description by legal subdivisions (section, township, range) of all lands included in or proposed to be included in the ground water area or subarea;

(c) the purpose of the hearing; and

(d) the time and place of the hearing where any interested person may appear, either in person or by attorney, file written objections to the granting of the proposal, and be fully heard.

(5) Such notice of hearing shall be published at least once in each week for 3 successive weeks not less than 30 days before the date of the hearing in a newspaper of general circulation in the county or counties in which the ground water area or subarea is located. The department shall also cause a copy of the notice, together with a copy of the petition, to be served by mail, not less than 30 days before the hearing, upon each well driller licensed in Montana whose address is within any county in which any part of the area in question is located; upon each person or public agency known from an examination of the records in the department's office to be a claimant or appropriator of ground water in the area in question (claimant or appropriator meaning one who diverts, impounds, or withdraws ground water and not merely one who uses or obtains ground water from another who diverts, impounds, or withdraws ground water); upon the bureau; and upon the mayor or chairman of the governing body of each incorporated municipality located in whole or in part within the proposed ground water area. The department may also serve notice upon any other person or state or federal agency that the department feels may be interested in or affected by the proposed designation or modification of a controlled ground water area. The petition need not be served on any petitioner. A copy of the notice, together with a copy of the proposal, shall be mailed to each person at his last-known address, and such service shall be complete upon depositing it in the post office, postage prepaid, addressed to each person on whom it is to be served. Publication and mailing of such notice as prescribed herein, when completed, shall be deemed to be sufficient notice of such hearing to all interested persons.

85-2-507. Limiting withdrawals — modification of order. (1) At the time set for the hearing, the board shall proceed to hear oral and written evidence relevant to the designation or modification of the controlled ground water area presented by the bureau, the department, and any other interested party. A full record shall be kept of all evidence taken at the hearing. The procedure shall be such as to secure a full, fair, and orderly proceeding and to permit all relevant evidence to be received. The common-law and statutory rules of evidence shall apply only upon stipulation of all parties.

(2) After the conclusion of the hearing, the board shall make written findings and an order. The board shall by order declare the area in question to be a controlled ground water area if the board finds on the basis of the hearing that:

(a) the public health, safety, or welfare requires a corrective control be adopted; and

(b) (i) there is a wasteful use of water from existing wells or undue interference with existing wells;

(ii) any proposed use or well will impair or substantially interfere with existing rights to appropriate surface water or ground water by others; or

(iii) the facts alleged in the petition as required by 85-2-506(2) are true.

(3) The order shall define the boundary of the controlled ground water area and shall indicate which of the ground water aquifers located within the area in question are included within the controlled ground water area. Any number of ground water aquifers which wholly or partially overlie one another may be included in the same controlled ground water area.

(4) The order may include the following corrective control provisions:

(a) a provision closing the controlled ground water area to further appropriation of ground water, in which event the department shall thereafter refuse to accept any applications for beneficial water use permits to appropriate ground water located within such controlled area;

(b) a provision determining a permissible total withdrawal of ground water in the controlled area by day, month, or year and permitting the board to apportion such permissible total withdrawal among the appropriators holding valid rights to the ground water in the controlled area in accordance with the relative dates of priority of such rights;

(c) a provision according preference, without reference to relative priorities, to withdrawals of ground water in the controlled area for domestic and livestock purposes first and thereafter to withdrawals for other beneficial purposes, including but not limited to agricultural, industrial, municipal (other than domestic), and recreational purposes, in such order as the board considers advisable under the circumstances;

(d) a provision reducing the permissible withdrawal of ground water by any appropriator or well in the controlled area;

(e) when two or more wells in the controlled area are used by the same appropriator, a provision adjusting the total permissible withdrawal of ground water by the appropriator or a provision forbidding the use of one or more such wells;

(f) a provision requiring and specifying a system of rotation of use of ground water in the controlled area;

(g) provisions making such additional requirements as are necessary to protect the public health, safety, and welfare in accordance with the intent, purposes, and requirements of this part and the laws of the state.

(5) (a) If at the conclusion of the hearing the board finds that sufficient facts are not available to designate or modify a permanent controlled ground water area, the board may by order designate the area in question to be a temporary controlled ground water area. Such order may include the corrective control provisions contained in subsection (4). A temporary controlled ground water area shall be designated as such for a period not to exceed 2 years from the date of the board's order designating the temporary controlled ground water area. The board may, for sufficient cause, extend the time period for an additional 2 years, and in this case all ground water appropriators in the controlled ground water area shall be notified of the extension.

(b) During the 2-year period, the department shall commence studies necessary to obtain the facts needed to assist in the designation or modification of a permanent controlled ground water area. Facts gathered during the study period shall be presented at a hearing prior to the designation or modification of a permanent controlled ground water area. All parties appearing at the first hearing shall be served notice of this hearing by mail at least 30 days prior to the date set for the hearing. The service shall be complete upon deposit of notice at the post office, postage prepaid, addressed to each person on whom service is to be made. Mailing of the notice, when completed, shall be considered to be sufficient notice of the hearing to all persons directly affected. The department shall file in its records proof of service by its own affidavit. The hearing shall be conducted by the board in the manner of the first hearing, and the board shall make written findings of fact and conclusions of law and issue an order according to the provisions set forth in subsections (1) through (4). In the event the department does not complete the necessary study in the 2-year period or extension thereof, the temporary controlled ground water area designation will terminate at the end of the 2-year period or extension.

(6) The department may enforce the order and bring an action for an injunction in a district court of a district in which all or part of the area affected is located, in addition to all other remedies.

(7) The order of the board shall be published and mailed by the department in the manner and for the length of time as prescribed by 85-2-506 for the publication and mailing of the notice of hearing, except that a copy of the written findings and order of the board shall be mailed instead of a copy of the proposal and, except further, that a copy of the order, together with a copy of the written findings, shall be mailed to each petitioner at his last-known address. The department shall file a copy of the order with the county clerk of each county within which any part of the controlled ground water area lies, and the county clerk shall record the order without fee. The department shall file in its records proof of service by its own affidavit of service. Upon publication and mailing of such order as prescribed herein, the order shall be final and conclusive unless an appeal therefrom is taken.

(8) The board may by order suspend, modify, or revoke any order made as provided in this section upon such notice and in such manner as is reasonable under the circumstances. A copy of each suspension, modification, or revocation shall be served or filed and recorded as provided for orders in subsection (7).

(9) While a matter is pending before the board, the department may restrict further development of the subarea.

The department shall produce at the hearing a map showing and describing all the lands included in the ground water area or subarea and copies of all data upon which any prior designation or modification order was based. (1) In a hearing for the ascertainment and finding of priorities to the use of ground water, the department in its finding and order shall confirm, modify, alter, or amend any prior order designating and modifying the boundaries of the ground water area or subarea involved, as the evidence justifies; shall determine the priority of rights and the quantity of ground water to which each appropriator who is a party to the proceedings is entitled in the particular ground water area or subarea; and shall find and determine any other matter necessary to the ascertainment of priorities of such existing rights to ground water. It may also determine the level below which the ground water may not be drawn by appropriators. The department shall act in administering and enforcing the order, as provided in 85-2-507.

(2) A copy of the order shall be recorded in the office of the clerk and recorder of each county in which the particular ground water area or subarea is located. 85-2-601. Statement of legislative findings and policy. The legislature, noting that appropriations have been claimed, that applications have been filed for, and that there is further widespread interest in making substantial appropriations of water in the Yellowstone River basin, finds that these appropriations threaten the depletion of Montana's water resources to the significant detriment of existing and projected agricultural, municipal, recreational, and other uses and of wildlife and aquatic habitat. The legislature further finds that these appropriations foreclose the options to the people of this state to utilize water for other future beneficial purposes, including municipal water supplies, irrigation systems, and minimum flows for the protection of existing rights and aquatic life. The legislature, pursuant to its mandate and authority under Article IX of the Montana constitution, declares that it is the policy of this state that before these proposed appropriations are acted upon, existing rights to water in the Yellowstone basin must be accurately determined for their protection and that reservations of water within the basin must be established as rapidly as possible for the preservation and protection of existing and future beneficial uses.

85-2-602. Definitions. Unless the context clearly requires otherwise, in this part the following definitions apply:

(1) (a) "Application" means an application for a permit under part 3 of this chapter to appropriate surface water from any source of supply within the basin for either or both of the following purposes:

(i) a reservoir with a total planned capacity of 14,000 acre-feet or more; or

(ii) for a flow rate greater than 20 cubic feet of water per second.

(b) The term also includes an application for approval under 85-2-402 to change the purpose of use.

(2) "Basin" means the Yellowstone River basin.

(3) "Reservation" means a reservation of water provided for by 85-2-316.

History: En. 89-8-104 by Sec. 2, Ch. 116, L. 1974; R.C.M. 1947, 89-8-104(Intro.), (2) thru (4).

85-2-603. Suspension of action. (1) The department may not grant or otherwise take any action on an application until one of the following first occurs:

(a) The board of natural resources and conservation makes a final determination on the applications for reservations of water in the basin filed before January 1, 1977, in accordance with 85-2-316;

(b) A final determination of existing rights has been made in the source of supply in accordance with part 2 of this chapter; or

(c) January 1, 1978; however, if a court stays or enjoins the continuance of proceedings on any pending application for reservation of water in the basin filed before January 1, 1977, and such stay or injunction prevents the board from making a final determination on such application before January 1, 1978, the court shall extend this date by the length of delay incurred. The court may not extend this date beyond January 15, 1979.

(2) A reservation established before such application for permit is granted is a preferred use over the right to appropriate water pursuant to the permit, and the permit, if granted, shall be issued subject to that preferred use.

85-2-604. When department may suspend action. The department may suspend action on applications not meeting the definition of application in 85-2-602 if it determines, after a public hearing conducted under the contested case procedures of the Montana Administrative Procedure Act, that the cumulative impact of those applications, if granted, would be contrary to the policies and purposes of this part. If the department suspends action on such applications, the provisions of 85-2-603 apply.

85-2-701. Legislative intent. (1) Because the water and water rights within each water division are interrelated, it is the intent of the legislature to conduct unified proceedings for the general adjudication of existing water rights under the Montana Water Use Act. Therefore, it is the intent of the legislature that the attorney general's petition required in 85-2-211 include all claimants of reserved Indian water rights as necessary and indispensable parties under authority granted the state by 43 U.S.C. 666. However, it is further intended that the state of Montana proceed under the provisions of this part in an effort to conclude compacts for the equitable division and apportionment of waters between the state and its people and the several Indian tribes claiming reserved water rights within the state.

(2) To the maximum extent possible, the reserved water rights compact commission established under 2-15-212 should make the negotiation of water rights claimed by the federal government or Indian tribes in or affecting the basins identified by 85-2-218 its highest priority.

(1) The reserved water rights compact commission, created by 2-15-212, may negotiate with the Indian tribes or their authorized representatives jointly or severally to conclude compacts authorized under 85-2-701. Compact proceedings shall be commenced by the commission. The commission shall serve by certified mail directed to the governing body of each tribe a written request for the initiation of negotiations under this part and a request for the designation of an authorized representative of the tribe to conduct compact negotiations. Upon receipt of such written designation from the governing body of a tribe, compact negotiations shall be considered to have commenced.

(2) When the compact commission and the Indian tribes or their authorized representatives have agreed to a compact, they shall sign a copy and file an original copy with the department of state of the United States of America and copies with the secretary of state of Montana and with the governing body for the tribe involved. The compact is effective and binding upon all parties upon ratification by the legislature of Montana and any affected tribal governing body, and approval by the appropriate federal authority.

(3) Upon its ratification by the Montana legislature and the tribe, the terms of a compact must be included in the preliminary decree as provided by 85-2-231, and unless an objection to the compact is sustained under 85-2-233, the terms of the compact must be included in the final decree without alteration. However, if approval of the state legislature and the tribe has not been accomplished by July 1, 1999, all Indian claims for reserved water rights that have not been resolved by a compact must be filed with the department within 6 months. These new filings shall be used in the formulation of the preliminary decree and shall be given treatment similar to that given to all other filings.

(2) Each report must state which Indian tribes and federal agencies are engaged in negotiations, whether any negotiations with Indian tribes or federal agencies have been terminated, and the progress of negotiations on a tribe-by-tribe and agency-by-agency basis. 85-2-902. Findings and purpose. (1) The legislature finds that:

(a) Montana's citizens depend on ground water for a variety of uses, including domestic, agricultural, industrial, irrigation, mining, municipal, power, and recreation, and for maintenance of ecosystems and surface water supplies;

(b) ground water supplies and quality are threatened by a variety of contaminant sources;

(c) there is insufficient information characterizing the volume, quality, and flow patterns of the state's ground water;

(d) ground water information deficiencies are hampering the efforts of citizens and units of government to properly manage, protect, and develop ground water;

(e) government policies and programs should focus on preventing ground water contamination and supply depletion, but in order for preventive policies and programs to be effective, better ground water information is required; and

(f) there is a need for better coordination among those numerous units of state, federal, and local government with responsibility for ground water management, protection, and development.

(2) The purposes of this part are:

(a) to improve the quality of ground water management, protection, and development decisions within the public and private sectors by establishing a program to systematically assess and monitor the state's ground water and to disseminate the information to interested persons; and

(b) to improve coordination of ground water management, protection, development, and research functions among units of state, federal, and local government by establishing a ground water assessment steering committee.

85-3-401. Definitions. As used in this part, the following definitions apply:

(1) "Authority" means a county weather modification authority established pursuant to 85-3-411 or 85-3-413 through 85-3-415.

(2) "Commissioner" means a county weather modification authority commissioner appointed pursuant to 85-3-411 or 85-3-413 through 85-3-415.

History: En. Sec. 1, Ch. 609, L. 1983.

85-3-402 through 85-3-410 reserved.

85-3-411. Weather modification authority created by petition — expiration — reinstatement. (1) Upon receipt of a valid petition signed by at least 51% of the qualified electors of a county, as determined by the vote cast for the office of governor at the last preceding general election, a board of county commissioners may by resolution create a weather modification authority. The board of county commissioners shall appoint five residents of the county as weather modification authority commissioners from those names set forth in the petition and designated by the petitioners to be appointed commissioners. If any of the five candidates named in the petition to be appointed commissioner is unable or refuses for any reason to accept appointment as commissioner or is disqualified by not meeting residence requirements as an elector in the county, the board of county commissioners shall name an appointee to fill the position. Each commissioner shall serve a 5-year term of office. If any commissioner submits his resignation in writing to the board of county commissioners or becomes unable or disqualified for any reason after accepting office, the board of county commissioners shall name an appointee to fill the vacancy. The board of county commissioners may remove any commissioner from office whenever it appears, by competent evidence and after hearing, that the commissioner has been guilty of misconduct, malfeasance, crime in office, or gross incompetency. A vacancy occurring otherwise than by expiration of term of office must be filled for the unexpired term.

(2) Any authority created pursuant to this section expires 5 years after the date of the initial appointment of the commissioners. Any unexpended funds remaining in the name of the authority after all proper bills and expenses have been paid must be transferred into the county general fund by the officers of the authority on or before the 5-year termination date provided by this section. However, all unexpended funds remaining in the name of the authority after all proper bills and expenses have been paid shall remain in the name of the authority if the board of county commissioners of such county by resolution creates a weather modification authority and all its powers in accordance with 85-3-414.

(3) Nothing in this section prevents renewal of an authority for another 5 years by petition of the qualified electors in the same manner as the initial authority was created.

(4) If more than one petition is filed with the board of county commissioners on or about the same time, the petition with the highest percentage of the qualified county electors voting for the office of governor at the last preceding general election must be selected by the board of county commissioners. However, the petition with the highest percentage must have the signatures of at least 40% of the qualified electors in the county, and the sum total of all qualified electors signing all petitions filed must equal at least 60%

of the qualified electors in the county. If the name of the same elector appears on two or more petitions, the name must be stricken from both petitions.

Appointment and Duties

85-5-101. Appointment of water commissioners. (1) Whenever the rights of persons to use the waters of any stream, ditch or extension of ditch, watercourse, spring, lake, reservoir, or other source of supply have been determined by a decree of a court of competent jurisdiction, including temporary preliminary, preliminary, and final decrees issued by a water judge, it is the duty of the judge of the district court having jurisdiction of the subject matter, upon the application of the owners of at least 15% of the water rights affected by the decree, in the exercise of his discretion, to appoint one or more commissioners. The commissioners have authority to admeasure and distribute to the parties owning water rights in the source affected by the decree the waters to which they are entitled, according to their rights as fixed by the decree and by any certificates and permits issued under chapter 2 of this title. When petitioners make proper showing that they are not able to obtain the application of the owners of at least 15% of the water rights affected and they are unable to obtain the water to which they are entitled, the judge of the district court having jurisdiction may, in his discretion, appoint a water commissioner.

(2) When the existing rights of all appropriators from a source or in an area have been determined in a temporary preliminary decree, preliminary decree, or final decree issued under chapter 2 of this title, the judge of the district court may upon application by both the department of natural resources and conservation and one or more holders of valid water rights in the source appoint a water commissioner. The water commissioner shall dis-

tribute to the appropriators, from the source or in the area, the water to which they are entitled.

(3) The department of natural resources and conservation or any person or corporation operating under contract with the department or any other owner of stored waters may petition the court to have stored waters distributed by the water commissioners appointed by the district court. The court may make an order requiring the commissioner or commissioners appointed by the court to distribute stored water when and as released to water users entitled to the use of the water.

(4) At the time of the appointment of a water commissioner or commissioners, the district court shall fix their compensation, and the owners and users of the distributed waters, including permittees and certificate holders, shall pay their proportionate share of fees and compensation. The judge may include the department in the apportionment of costs if it applied for the appointment of a water commissioner under subsection (2).

(5) Upon the application of the board or boards of one or more irrigation districts entitled to the use of water stored in a reservoir which is turned into the natural channel of any stream and withdrawn or diverted at a point downstream for beneficial use, the district court of the judicial district wherein the most irrigable acres of the irrigation district or districts are situated may appoint a water commissioner to equitably admeasure and distribute stored water to the irrigation district or districts from the channel of the stream into which it has been turned. A commissioner appointed under this subsection has the powers of any commissioner appointed under this chapter, limited only by the purposes of this subsection. His compensation is set by the appointing judge and paid by each district and other users of stored water affected by the admeasurement and distribution of the stored water. In all other matters the provisions of this chapter apply so long as they are consistent with this subsection.

When such expense of commissioner or commissioners has been assessed against the land for which such service of the commissioner or commissioners has been rendered, it shall constitute a lien against said land. Execution may issue upon the order, as upon a judgment, by direction of the court or judge upon the application of any person interested therein. The water commissioner, at his discretion, may withhold further admeasurement or distribution of water to any person otherwise entitled thereto until such person shall have paid all fees, compensation, and expenses of such water commissioner or commissioners so fixed by the court and apportioned and charged to such person and likewise may withhold the admeasurement and distribution of water from any land against which there exists any such lien as aforesaid, until such lien shall have been fully discharged.

Rights and Duties of Water Users

85-5-301. Complaint by dissatisfied user. (1) A person owning or using any of the waters of the stream or ditch or extension of the ditch who is dissatisfied with the method of distribution of the waters of the stream or ditch by the water commissioner or water commissioners and who claims to be entitled to more water than he is receiving or to a right prior to that allowed him by the water commissioner or water commissioners may file his written complaint, duly verified, setting forth the facts of the claim. Thereupon the judge shall fix a time for the hearing of such petition and shall direct that such notice be given to the parties interested in the hearing as the judge considers necessary. At the time fixed for the hearing, the judge must hear and examine the complainant and other parties as may appear to support or resist such claim and examine the water commissioner or water commissioners and witnesses as to the charges contained in the complaint.

(2) Upon the determination of the hearing, the judge shall make such findings and order as he considers just and proper. If it appears to the judge that the water commissioner or water commissioners have not properly distributed the water according to the provisions of the decree, the judge shall give the proper instructions for such distribution. The judge may remove any water commissioner and appoint some other person in his stead if he considers that the interests of the parties in the waters mentioned in the decree will be best subserved thereby, and if it appears to the judge that the water commissioner has willfully failed to perform his duties, he may be proceeded against for contempt of court, as provided in contempt cases. The judge shall make such order as to the payment of costs of the hearing as appears to him to be just and proper.

85-5-302. Maintenance of headgates and measuring devices. All persons using water from any stream or ditch whereon a water commissioner is appointed are required to have suitable headgates at the point where a ditch taps a stream and shall also, at some suitable place on the ditch and as near the head as practicable, place and maintain a proper measuring box, weir, or other appliance for the measurement of the waters flowing in the ditch. In case any person or persons shall fail to place or maintain a proper measuring appliance, it is the duty of the water commissioner not to apportion or distribute any water through the ditch. The commissioner shall notify all parties interested by certified mail or in person 1 week before making the annual repair or cleaning of any stream or ditch or performing necessary labor or expenses to divert water to any ditch. The sending of a certified letter to the last-known post-office address of any interested party is prima facie evidence of the fact that he was duly notified. Any work in the way of repairing a ditch made necessary by any emergency may be done without such notice when injury would result from delay.

Part Cross-References
Definition of irrigable land, 85-7-2205.

85-7-101. Creation of irrigation districts by percentage of titleholders. (1) Sixty per centum in number of the holders of title or evidence of title to lands sought to be included in an irrigation district and which are susceptible of irrigation, such holders of title or evidence of title also representing 60% of the acreage of said lands, may propose the establishment and organization of an irrigation district under the provisions of this part and part 15. When any of such land sought to be included in such irrigation district is covered by mortgage or other lien, then the owner or owners of such land shall first procure the written consent of the holder of such mortgage or other lien before proposing the establishment and organization of such irrigation district.

(2) Irrigation districts may be formed in order to cooperate with the United States under the federal reclamation laws heretofore or hereafter enacted or under any act of congress which shall permit of the performance by the United States of work in this state for the purposes of construction of irrigation works, including drainage works, or for purchase, extension, operation, or maintenance of constructed works or for the assumption, as principal or guarantor, of indebtedness to the United States on account of district lands. When so organized, such district shall have the powers conferred or that may hereafter be conferred by law upon such irrigation district. In all irrigation districts organized in connection with United States reclamation projects, a majority of the holders of title or evidence of title to lands sought to be included in such irrigation district under the provisions of this part may propose the establishment and organization of such district.

85-7-105. Order and notice of hearing on petition. (1) On such petition being filed, the district court or judge thereof shall make an order fixing the time and place of hearing on the petition and directing that notice thereof be given. Thereupon the clerk of said court shall cause to be published at least once a week for 2 successive calendar weeks in some newspaper published in the county where the petition is filed a copy of such petition, together with a notice stating the time and place fixed by the district court when and where the hearing on said petition will be had. (2) The first publication of said petition and notice shall be not less than 30 days prior to the time mentioned in said notice for said hearing.

(3) If any holder of title or evidence of title to lands within the proposed district is a nonresident of the county or counties in which the proposed district lies, the clerk of said court shall, within 3 days after the first publication aforesaid, mail a copy of said petition and notice to each such nonresident whose post-office address is stated in said petition.

(1) At the time specified in the notice mentioned in 85-7-105, the district court in which the petition is filed shall hear the petition but may adjourn such hearing from time to time, not exceeding 3 weeks in all, and may continue the hearing for want of sufficient notice or other good cause. The court, upon application of the petitioners or any interested person or persons, shall permit the petition to be amended and may order further or additional notice to be given. Upon such hearing all interested persons whose lands or rights may be damaged or benefited by the organization of the district or by the irrigation works or improvements therein or to be acquired or constructed may appear and contest the necessity or utility of the proposed district or any part thereof, and the contestants and petitioners may offer any competent evidence in regard thereto.

85-7-107. Court decision — appointment of commissioners. (1) (a) The court may make such changes in the proposed district as may be considered advisable or as fact, right, and justice may require. Land which is susceptible of irrigation from the same general source and by the same general system of works applicable to the other lands of the proposed district may not be excluded from the proposed district if the owner or owners of the lands file in the district court a written request that the lands be included.

(b) Lands which will not, in the judgment of the court, be benefited by irrigation from the works of the proposed district; which are already under irrigation; which have appurtenant water rights; or which can be irrigated from sources more feasible than the proposed district may not be included in the district unless the owner of such lands consents in writing to the inclusion.

(c) Notwithstanding the provisions of subsection (1)(b), whenever a district is formed to cooperate with the United States, lands previously irrigated and having appurtenant water rights may be included within the district boundaries if it appears to the court that the lands will be benefited by inclusion.

(d) All lands having appurtenant water rights, served by an irrigation works system supplying more than 10,000 acres, may, in the discretion of the court, be included in the proposed district upon petition by at least a majority, both in number and acreage, of the holders of title or evidence of title to the lands served by the irrigation system and having appurtenant water rights.

(e) Lands of the district need not be contiguous. The location of a particular tract in the proposed district is not a bar to exclusion.

(2) For purposes of including or excluding land from a proposed district, the court may subdivide any tract into 40-acre or smaller parcels.

(3) If, on final hearing, it is found by the court that the petition does not substantially comply with the requirements of this part or that the facts stated are not sustained by the evidence, the court shall dismiss the petition at the cost of the petitioners and make and enter an order to that effect. If it is found that the petition substantially complies with the requirements and that the facts stated are sustained by the evidence, the court shall make and enter an order:

(a) setting forth findings and allowing the petition;

(b) establishing the proposed district;

(c) giving accurate descriptions of the lands included within the proposed district;

(d) dividing the proposed district into three, five, or seven divisions, as may be advisable in view of the size of the district;

(e) appointing as commissioner one competent person for each division of the district having the qualifications as provided by 85-7-1501.

If a majority of the holders of title or evidence of title to lands included in the district heretofore organized under the provisions of said session laws (said holders of title or evidence of title, also representing a majority in acreage of irrigable lands of said district) shall petition under the provisions of this part for the organization of a new district, including not less than four-fifths of the irrigable lands embraced within such districts so organized, and shall pray for an order disorganizing such district and vacating all proceedings therein, the court shall have jurisdiction to proceed under this part and part 15 to organize such new district and, in making its final order creating such new district, shall also make an order vacating and disorganizing the old district. All money or property belonging to such old district shall be and become the money and property of such new district. Creation of Districts — Adjudicated Streams

85-7-201. Creation of districts by owners of water of adjudicated streams. It is the purpose and intention of this part, in the furtherance of public welfare, to provide an effective public agency for the improvement, development, and maintenance of certain existing irrigation systems in cases where administration thereof, through the agency of a water commissioner and the existing statutes, is not effective.

History: En. Sec. 1, Ch. 117, L. 1933; re-en. Sec. 7187.4, R.C.M. 1935; R.C.M. 1947, 89-1318.

85-7-202. Application of part. This part shall apply only when 20 or more owners of land with water rights appurtenant thereto are being served by one stream and its branches or from one source of water supply and in which the rights to the use of water shall have been determined by decree of a court of competent jurisdiction and at least 2,000 acres of land, contiguous in location or of reasonably compact area, are being served by the single stream or source.

History: En. Sec. 2, Ch. 117, L. 1933; re-en. Sec. 7187.5, R.C.M. 1935; amd. Sec. 20, Ch. 460, L. 1977; R.C.M. 1947, 89-1319.

85-7-203. Petition, hearing, and order. Whenever the owners of land and water rights, as described in 85-7-202, desire to organize for the purposes mentioned in this part, a petition to that effect, signed by not less than 60% of the individual landowners who represent not less than 51% of the irrigable acres to be affected by the proposed district and 51% of the cubic feet of water per second decreed or adjudicated in the stream from which the irrigation district is to operate, shall be filed with the clerk of the district court of the county or counties in which the district is to be created. For the purpose of determining whether the requirements of acreage and cubic feet of water per second have been met by the petition, water diverted from the adjudicated stream and distributed under irrigation districts other than the one to be created under this part may not be considered; however, such water and acreage shall be required to pay all assessments the same as other water and acreage affected by irrigation districts created under this part. Upon filing of the petition, the court shall set a date for a hearing on the petition and a written notice shall be mailed, not less than 5 days prior to the hearing, to each landowner or water right owner affected by the proposed district. If the court finds from such hearing that an irrigation district, as prayed for in the petition, is feasible and practical, the court shall issue an order creating the irrigation district. The order shall constitute the authority for the district to function for the purposes and intent as outlined in this part. The court shall appoint five commissioners who are landowners or water right owners affected by such district to act until the first annual meeting.

Whenever waters of the stream under the irrigation district created by this part are commingled with other waters or it is difficult to determine how many acres are irrigable by the water rights held in the stream, the acre basis of levy shall be determined by the number of cubic feet of water per second owned by such party or parties at the rate of .025 cubic feet of water per second to the acre. The board may not issue bonds or incur any indebtedness other than warrant indebtedness under the limitations imposed by law.

Subdistricts

85-7-401. Authority to create subdistricts — petition — requirements. (1) The board of commissioners of an irrigation district created and organized under Title 85, chapter 7, parts 1 and 15, may establish one or more subdistricts within the irrigation district to provide for and finance the cost of irrigation works, including gravity irrigation systems, gravity measure systems, or sprinkling systems, that would irrigate lands in the subdistrict but not other lands in the district. A subdistrict may be established only upon a petition signed by at least 60%, in number and acreage, of the holders of title or evidence of title to lands to be included within the subdistrict. The petition must be addressed to and filed with the board of commissioners and be accompanied by a map or plat of the proposed subdistrict.

(2) The petition must state:

(a) the name suggested for the proposed subdistrict;

(b) a general description of the land to be included in the proposed subdistrict;

(c) the name of each holder of title or evidence of title to the lands in the proposed subdistrict, as determined according to 85-7-101 and 85-7-102 and, if a holder is a nonresident of the county or counties in which the proposed district lies, the post-office address of the nonresident owner, if known;

(d) the general water source from which the land in the proposed subdistrict will be irrigated and the general character of the works, water rights, canals, and other property proposed to be acquired or constructed for irrigation purposes in or for the benefit of the proposed subdistrict; and

(e) a request that the land within the proposed subdistrict be made a subdistrict according to the provisions of 85-7-401 through 85-7-404.

History: En. Sec. 1, Ch. 439, L. 1989.

85-7-402. Notice of hearing on petition to create subdistrict. (1) Upon the filing of a petition to create a subdistrict, the board of commissioners of the irrigation district shall by order fix the time and place for a hearing on the petition and shall direct that notice of the hearing be given.

(2) The notice of the hearing must state:

(a) the name of the proposed subdistrict and its purpose;

(b) the time and place of the hearing;

(c) a general description of the land proposed to be included in the subdistrict;

(d) a general description of the water source; and

(e) the general character of the works, water rights, canals, and other property proposed to be acquired or constructed in or for the benefit of the subdistrict.

(3) The board shall publish notice of the hearing at least once a week for 2 successive weeks in a newspaper published in each county in which the proposed subdistrict is located. The first publication must occur not less than 15 days before the date of the hearing.

(4) Notice of the hearing must also be mailed not less than 15 days before the date of the hearing to each holder of title or evidence of title to land within the proposed subdistrict. However, a defect in the notice or failure to give mailed notice does not affect the validity of the proceeding for the creation of a subdistrict under 85-7-401 through 85-7-404.

History: En. Sec. 2, Ch. 439, L. 1989.

85-7-403. Hearing on petition to create subdistrict. (1) The board of commissioners shall hear the petition at the time specified in the notice provided under 85-7-402. The board may adjourn the hearing for lack of sufficient notice or other good cause. The hearing must be completed within 3 weeks of the initial hearing.

(2) Upon application of the petitioners or any interested person or persons, the board shall allow the petition to be amended and may order that additional notice be given.

(3) At the hearing, any person whose land or property rights may be damaged or benefited by the creation of the subdistrict or by the irrigation works or improvements to be acquired or constructed in or for the benefit of the subdistrict may appear and submit oral or written testimony.

History: En. Sec. 3, Ch. 439, L. 1989.

85-7-404. Review of petition — creation of irrigation subdistrict. (1) After the hearing on the creation of the proposed subdistrict, the board of commissioners shall by resolution create the subdistrict if it finds that:

(a) the petition substantially complies with the provisions of 85-7-401; and

(b) it is in the best interests of the holders of title or evidence of title in the subdistrict and the district to establish the subdistrict.

(2) The board shall describe in the resolution the land to be included in the subdistrict. The land does not need to be contiguous but must be located within the district.

(3) In creating the subdistrict proposed by the petition, the board may alter the geographic area of the subdistrict or the scope or type of irrigation improvements to be undertaken in or for the benefit of the subdistrict, subject to the following conditions:

(a) The board may not include within the subdistrict land not identified by the petition as part of the proposed subdistrict unless notice and hearing on the addition are provided according to 85-7-402 and 85-7-403.

(a) no irrigation plant or system for the irrigation of the lands in the district has been constructed or purchased;

(b) no bonded indebtedness has been incurred; and

(c) all expenses for the organization and all other indebtedness of the district have been paid.

(2) In order that the district court may acquire jurisdiction to enter such order dissolving the district, a petition must be filed with the clerk of said

The district court must make an order for the hearing of said petition within 30 days from its filing, and the clerk of the court must give due notice of the hearing of such petition by posting three notices in three public places in said district and by publication of a notice of the hearing for 2 successive weeks in a newspaper of general circulation published in the county. Upon the hearing of said petition, any person interested may appear and give evidence for or against the granting of said petition. If, upon said hearing, the court finds that no bonded indebtedness of the district has been created and all of the expenses of organization and all other indebtedness have been paid and that the best interests of the landowners of said district require that the district shall be dissolved, the district court shall make such order dissolving said district and shall cause a certified copy of the order to be recorded in the office of the county clerk and recorder of said county.

85-7-1710. Qualification of electors and nature of voting rights. (1) At all elections held under the provisions of this part, except as otherwise expressly provided, the following holders of title or evidence of title to irrigable lands within the district, herein designated "electors", are entitled to vote:

(a) all individuals having the qualifications of electors under the constitution and general election laws of the state, except that no registration of electors may be required;

(b) guardians, executors, administrators, and trustees;

(c) domestic corporations, by their duly authorized agents.

(2) In all elections held under this part, each elector is permitted to cast one vote for each 40 acres of irrigable land or major fraction thereof owned by the elector within the district, irrespective of the location of the irrigable lands within the tracts designated by the commissioners for assessment and taxation purposes or within congressional subdivisions, platted lots or blocks (except as hereinafter provided for), election precincts, or district divisions, but any elector owning any less than 40 acres of irrigable land is entitled to one vote. Until the irrigable area under the proposed plan of reclamation is determined, all land included within the boundaries of the district must be considered irrigable land for election purposes.

Whenever the total irrigable acreage within any one district has been platted or subdivided into lots or blocks to the extent

of 5% or more of the total acreage of the district or whenever the majority of the district board adopts a resolution allowing it, each elector is permitted to cast one vote for each acre of irrigable land or major fraction of an acre of irrigable land owned by the elector within the district, irrespective of the location of such irrigable lands within the tracts designated by the commissioners for assessment and taxation purposes or within the congressional subdivisions, but any elector owning any less than 1 acre of irrigable land within the district is entitled to one vote.

(4) The board of commissioners shall choose one of the following methods of balloting:

(a) 10 votes or less, separate ballots will be used; more than 10 votes, the elector shall vote in blocks of 10 using one ballot for each 10 votes and separate ballots for odd votes over multiples of 10; or

85-7-1811. Procedure to correct errors and omissions in orders or decrees. (1) The district court shall retain jurisdiction of any petition presented to establish an irrigation district or to enlarge and increase its boundaries or to exclude land therefrom for the purpose of correcting any omissions, defects, or errors in the proceedings of said court. The court shall have power to correct and, if necessary, to amend the order of the district court establishing the district, any order extending the boundaries thereof, or any order excluding lands therefrom, including the description of lands included or intended to be included in the district or excluded therefrom or intended to be excluded, the boundaries of the divisions into which it is divided, and any other matter which shall be before the court on the application to create the district, to enlarge or extend its boundaries, or to exclude lands therefrom. The court shall have and is hereby granted power and authority on application of the board of commissioners of the district to correct and amend the terms of any order or judgment of said court so that the same shall conform to the provisions of the statute under the authority of which such order was made. The board of commissioners of any district may adopt a resolution directing its president and secretary to prepare, execute, and file with the clerk of the district court a petition which shall set forth the following matters:

(a) the name of the district and a reference to the order in which the defect, error or omission, errors in description of lands included or excluded, or departure from the statute occurred;

(b) a statement of the defects, errors, omissions, irregularities, errors in description of lands included or excluded, or variance from the statutory requirements;

(c) a prayer for an order correcting said defects, errors, omissions, or irregularities.

(2) If the error, defect, omission, irregularity, or variance is in the description of any land or lands embraced in the district, the petition shall set forth the correct description of said lands, the names of the holders of title or evidence of title thereto, ascertained in the manner provided in 85-7-101 and

85-7-102, and if any holder is a nonresident of the county or counties in which the district lies, the post-office address of such nonresident owner, if known. Upon the filing of said petition, the court shall direct notice of the hearing thereof to be given in such manner as shall be deemed necessary to protect the rights and interests of the parties and, after a hearing of any parties intervening, shall enter an order correcting the defects, errors, omissions, or irregularities. If the defects, errors, omissions, or irregularities are in the description of the lands embraced in the district, the district court or judge shall direct the clerk of said court to publish, at least once a week for 2 successive calendar weeks, in some newspaper published in said county where said petition is filed, a copy of said petition, together with a notice stating the time and place fixed by said district court when and where a hearing on said petition will be had, and, if any portion of the lands within said district lies within any other county or counties, said petition and notice shall be published as provided above in a newspaper published in each such other county. If there be no newspaper published in such county, such petition and notice may be published in an adjoining county. If any holder of title or evidence of title to lands within the district is a nonresident of the county or counties in which the district lies, the clerk of said court shall, within 3 days after the first publication aforesaid, mail a copy of said petition and notice to each such nonresident whose post-office address is stated in said petition. The certificate of the clerk of the district court, under the seal of the court, as to the facts of the publishing and mailing of said petition and notice, affixed to a copy of said notice, shall be sufficient evidence of such facts.

(3) At the time specified in the notice the district court in which the petition aforesaid is filed shall hear the petition but may adjourn such hearing from time to time and may continue the hearing for want of sufficient notice or other good cause. The court, upon application of the petitioners or any person or persons interested, shall permit the petition to be amended and may order further or additional notice to be given. Upon such hearing, all persons interested may appear and contest the application for the order prayed for in the petition, and the contestants and petitioners may offer any competent evidence pertinent to the prayer of the petition.

(4) The court may make such changes in the description of the lands embraced within the limits of the district as may be deemed advisable or as fact, right, and justice may require but shall not exclude from the district any lands described as a part of said district in the order creating it after the district has issued bonds or entered into a contract with the United States under 85-7-1906. However, such lands may be excluded from a district which has entered into a contract with the United States under said section, provided the secretary of the interior shall give his consent to such exclusion.

(5) If, on final hearing, it is found by the court that the petition does not substantially comply with the foregoing requirements of this section or that the facts therein stated are not sustained by the evidence, then the court shall dismiss the petition at the cost of the petitioners and shall make and enter an order to that effect. If it is found that said petition substantially complies with

said requirements and that the facts therein stated are sustained by the evidence, the court shall make and enter an order in accordance with the prayers of the petition.

(6) All orders and findings of the district court made under the provisions of this section shall be conclusive upon all owners of lands within the district and shall be final unless appealed from to the supreme court within 60 days from the date of entry of such order. A copy of such order, duly certified to by the clerk of said court, shall be filed for record within 30 days after such order is made and entered with the county clerk and recorder of the county wherein the lands included within such district are situated. There shall be omitted from such copy lands not situated in the county in which such copy is filed.

Such report shall be accompanied by a map, when such is necessary for a proper explanation or understanding of the same.

(3) Upon receiving such report, said board of commissioners shall proceed to determine the amount of money necessary to be raised for the purchase or construction of said proposed property, canals, or irrigation works and system and within 10 days after arriving at such determination shall cause the secretary of said board to notify all persons or corporations holding title or evidence of title to lands within said district (ascertained as provided in 85-7-101 and 85-7-102) of the filing of said report and their determination thereon. A certificate of the secretary of the

board as to the fact of mailing said notice, affixed to a copy of said notice and recorded in the record book of said board of commissioners, shall be sufficient and conclusive evidence of such fact.

The board of commissioners shall require a good and sufficient bond to secure the faithful performance of the lease by the lessee.

85-7-1912. Exchange of water by board. (1) Whenever any canal constructed, owned, or controlled by the district crosses any creek, stream, water channel or course, the water of which is used to irrigate land lying below such canal, the district shall have the right to contract with the owner or owners of the right to the use of the water or waters in any such stream, creek, water channel or course for an exchange of water and to supply him with water from the district system. The contract shall be in writing, signed and acknowledged by all the parties thereto before some officer authorized to take acknowledgments, and shall be filed and recorded in the office of the clerk and recorder of the county in which the creek, stream, water channel or course is situated. The acknowledgment shall be certified by such officer in the manner that deeds are now required to be certified to entitle them to be recorded. Thereafter, such district shall have the right to supply such land below the canal, whether such land is included in the district or not, with water from the works of the district, and the owner or lessee of such land shall, in such case, be furnished with the same quantity of water as that to which such owner or lessee would be entitled out of such creek, stream, water channel or course had the district works not been built.

(2) The district shall have the right to appropriate and take possession of the water so replaced and shall have the same right to such water as the owner or lessee of the land had, so long as such water shall be replaced by a like quantity of water from such works. The appropriating and taking of such water by the district shall never deprive such owner or lessee of the right to retake and use the same should such owner or lessee at any time be prevented from having or using a like quantity of water from such works. The district shall also have the right to make appropriation and take possession of such water at any point and to sell, lease, or use such water on any land, either above or below the canal, and the appropriation of such water at any point or selling, leasing, or using the same shall not prejudice the right of the district to the water and shall not increase the rights of the owner or owners of any other water right on such creek, stream, water channel or course.

(3) All water, the right to the use of which is acquired by the district under any contract with the United States, shall be distributed and apportioned by the district in accordance with the acts of congress, the rules and regulations of the secretary of the interior, and the provisions of said contract in relation thereto.

(1) All bonds and the interest thereon issued under this chapter and all payments due or to become due to the United States under any contract between the district and the United States for which the bonds of the district have not been deposited with the United States as provided in 85-7-1906 must be paid by revenue derived from a special tax or assessment levied upon all the lands included in the district, or upon all lands in a subdistrict of the district if the bonds are issued by the district on behalf of the subdistrict, except upon those lands that have been included in the district or subdistrict on account of the exchange or substitution of water under the provisions of 85-7-1912. All lands in the district, or in a subdistrict if the bonds are issued on behalf of the subdistrict, at the time the bonds are issued and all lands subsequently included which are chargeable under the provisions of this chapter remain liable to be taxed and assessed for the payment of the bonds and interest and all payments due or to become due to the United States under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906.

(2) The board of commissioners of the district, in the order or resolution authorizing and directing the issuance of bonds of the district mentioned in 85-7-2014, shall provide for the annual levy and collection of a special tax or assessment upon all the lands included in the district, or in a subdistrict if the bonds are to be issued on behalf of the subdistrict, and subject to taxation and assessment, sufficient in amount to meet the interest on the bonds promptly when and as the interest accrues and to discharge the principal of the bonds at their maturity or respective maturities and to meet all payments due or to become due to the United States under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906, at the times the payments by the contract become due and payable.

85-7-2102. Added lands to pay proportional share of bonded indebtedness. (1) Where a district or subdistrict is extended after the construction of works of irrigation, including drainage works, to include other irrigable lands, the included lands are chargeable with the proportion of the bonded indebtedness incurred or authorized to be incurred by any district or subdistrict and the proportion of the indebtedness incurred under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906, as the district court shall order, as provided in 85-7-1808 through 85-7-1811 and 85-7-1841 through 85-7-1845. The board of commissioners of the district shall provide for the levy of a special tax or assessment against the included lands on account of the bonds and the interest on the bonds and on account of any payments under any contracts between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906.

(2) The special tax or assessment shall be levied and collected as and in the manner as the special tax assessment against the lands of the original district or subdistrict on account of the payments under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906, and on account of which the bonds and the interest on the bonds is provided for, levied, and collected. Upon the extending of any district or subdistrict, the total of the bond indebtedness or indebtedness due to the United States shall be reapportioned, spread, and equalized upon and over the entire area, as provided in 85-7-2021.

85-7-2103. All irrigable lands chargeable alike. (1) All irrigable lands in each irrigation district and all lands in each subdistrict of the district, except those lands that are included within the district because of the exchange or substitution of water under the provisions of 85-7-1912, shall pay at the same rate for all purposes for which the lands are charged, except as otherwise provided by law. There may be an administrative charge of $5 to $25 against each separately owned tract of land regardless of its size, as provided in 85-7-2104.

(2) Whenever water used for the irrigation of any lands within an irrigation district or subdistrict is obtained by pumping to different elevations, the cost of maintenance, operation, and pumping to each separate elevation shall be apportioned and levied upon the lands lying under the ditch or ditches running from that particular elevation, in a manner as may be determined fair and equitable by the board of commissioners after considering the facts in each case. This apportionment must be made by the board of commissioners and included each year in the assessment provided for by 85-7-2104. The amount of the assessment for maintenance, operation, and pumping of water to each separate elevation, whenever there are different elevations, must be determined by the board in a manner and upon notice to the persons interested in the district or subdistrict as the board in its rules may provide.

(3) Whenever a contract has been made with the United States, the lands within the district or of a subdistrict if the contract substantially benefits the subdistrict, whether originally included or later annexed to the district or subdistrict, shall pay in accordance with the federal reclamation laws and the public notices, orders, and regulations issued under the reclamation laws and in compliance with any contracts made by the United States with the owners of the lands and in compliance with the contract between the districts and the United States.

(4) Whenever a contract has been made with the state of Montana, the lands within the district or of a subdistrict if the contract substantially benefits the subdistrict, whether originally included or later annexed to the district or subdistrict, shall pay in accordance with state laws and public notices and rules issued under the laws and in compliance with any contract made by the state with the owners of the lands and in compliance with the contract between the district and the state.

(5) Whenever the works necessary for the completed project are constructed progressively over a period of years and whenever a portion of the lands within the district are or can be irrigated 1 year or more before the completion of the entire project, those lands irrigated or that can be irrigated through the built portion of the project shall pay for the cost of operating that portion of the project serving them with irrigation water and also shall pay the portion of the interest charges as its irrigable area bears to the irrigable area of the entire project.

(6) Whenever lands have appurtenant thereto a partial water right or partial rights in a system of irrigation other than that of the district or subdistrict, the amounts payable must be equitably apportioned.

(7) Whenever the owners of a portion of the lands within an irrigation district choose to install a gravity system to irrigate those lands, the cost of constructing the gravity system must be apportioned among and levied upon the lands irrigated by the gravity system in a manner determined to be equitable by the board. The levy must be included each year in the assessment charged under 85-7-2104.

85-7-2104. Annual tax levy — apportionment when tracts divided. (1) (a) On or before the second Monday in July each year, the board of commissioners of each irrigation district organized under parts 1 and 15 shall ascertain:

(i) the total amount required to be raised in that year for the general administrative expenses of the district, including the cost of maintenance and repairs; and

(ii) the total amount to be raised that year for interest on and principal of the outstanding bonded or other indebtedness of the district for which bonds of the district have not been deposited with the United States as provided in 85-7-1906.

(b) The board shall levy against each 40-acre tract or fractional lot, as designated by United States government survey, or platted lot if land is subdivided in lots and blocks (or where land is owned in less than 40-acre tracts or in less than the platted lot, against each tract) of land in the district, that portion of the respective total amounts to be raised which the total irrigable area of any tract or lot bears to the total irrigable area of the lands in the district, so that each acre of irrigable land in the district must be assessed and required to pay the same amount as every other acre of irrigable land therein, unless otherwise specifically provided by the board. The board may charge $5 to $25 against each separately owned tract of land, regardless of its size.

(c) Indebtedness under subsection (1) includes debt incurred under any contract between the district and the United States but excludes any indebtedness incurred by the district on behalf of a subdistrict.

(2) (a) On or before the second Monday in July each year, the board of commissioners of each irrigation district organized under parts 1 and 15 for which a subdistrict has been created pursuant to 85-7-404 shall determine the total amount to be raised that year for interest and principal payments on the outstanding bonded or other indebtedness of the district incurred on behalf of the subdistrict.

(b) The board shall levy against each 40-acre tract or fractional lot, as designated by United States government survey, or platted lot if land is subdivided in lots and blocks (or where land is owned in less than 40-acre tracts or in less than the platted lot, against each tract) in the subdistrict, the portion of the total amount to be raised apportioned according to the ratio of the total irrigable area of the tract or lot to the total irrigable area of the lands in the subdistrict, so that each acre of irrigable land in the subdistrict is assessed and required to pay the same amount as every other acre of irrigable land in the subdistrict, unless otherwise specifically provided by the board. The board may charge $5 to $25 against each separately owned tract or lot of land, regardless of its size.

(3) In the event that the ownership of any 40-acre tract or other subdivision of land in the district or subdistrict is divided after a special tax or assessment against the land has been levied, each of the owners of a tract or subdivision is entitled to have the special tax or assessment equitably apportioned to and against the divisions of the tract or subdivision, so that each owner is enabled to pay a special tax or assessment against his portion of the tract or subdivision and have the land discharged from the lien. In no event shall the charge against any separately owned tract of land be less than $5.

85-7-2107. Procedure for the determination of irrigable area. (1) For the purpose of determining the number of acres of irrigable lands in each 40-acre tract or fractional lot as designated by United States government survey or platted lot, if land is subdivided in lots and blocks (or whenever land is owned in less than 40-acre tracts or in less than the platted lot, in each tract) of land in the district or subdistrict, the board of commissioners of any irrigation district established under part 1, whenever considered advisable and at any time except as otherwise provided, may cause a careful topographical survey and map of the lands to be made, as well as a specific examination of the character of the soil of each tract. Upon completion of the survey and maps and examination, the board shall give notice that at a meeting of the board, to be held at the office of the board on a day to be fixed in the notice, the board will determine the irrigable area of each tract of land in the district or subdistrict and that it will hear and consider any objection on the part of any landowner in the district, or in a subdistrict if only the irrigable area of the subdistrict is being determined, to the determination and to adjustment of the irrigable area of the district or subdistrict or of any lands within any tract or subdivision of the district or subdistrict. It is not necessary to describe the tracts in the notice. The notice must be given by publication once a week for 2 successive calendar weeks in a newspaper of general circulation in the county where the office of the board is located, and whenever lands of any irrigation district or subdistrict lie in more than one county, the notice must also be published in a newspaper or newspapers of general circulation in each county. The last publication of the notice must be at least 5 days prior to the date fixed for the meeting.

(2) At the meeting, the board shall determine and fix the number of acres in each tract or subdivision irrigable from the works or proposed works of the district or subdistrict and shall hear all persons interested who may appear and shall continue in session from day to day (exclusive of Sundays and legal holidays) as long as may be necessary and until the determination of irrigable area is completed. The board shall hear and receive all evidence offered, including maps and surveys caused to be prepared by it as well as maps and surveys prepared by any owner of lands. Upon determination, the irrigable area fixed is the acreage upon which any special tax or assessment must be levied, and each irrigable acre shall pay at the same rate as every other acre of irrigable land in the district or subdistrict, except as otherwise provided by law.

85-7-2109. List of all lands in district or subdistrict to be prepared. Upon completing the determination, the board shall fix, by appropriate resolution or order, the total acreage and the irrigable acreage of each tract or subdivision and shall prepare a list of all lands in the district or subdistrict. The list must contain an accurate description of each 40-acre tract or fractional lot as designated by United States government survey or platted lot, if land is subdivided in lots and blocks (or whenever land is owned in less than 40-acre tracts or in less than the platted lot, then of each such tract) of land in the district or subdistrict, the total acreage and the number of irrigable acres as fixed and determined, and the name of the owner or holder of title or evidence of title, ascertained as provided in 85-7-101 and 85-7-102. This list, when completed and adopted, must be filed in the office of the board and shall remain there for public inspection. A certified copy of the resolution and list must be filed with the county clerk and recorder of each county in which any portion of the lands in the district is situated. The lands not situated in the county in which the copy is filed must be omitted from the copy.

85-7-2110. Nonirrigable lands not to be taxed. A special tax or assessment may not be levied against any 40-acre tract or fractional lot as designated by United States public survey or platted lot, if land is subdivided in lots and blocks (or whenever lands are owned in less than 40-acre tracts or in less than the platted lot, against each such tract) found by the board of commissioners to contain no irrigable land. A lien created after the order of determination may not attach to any nonirrigable tract, nor may the owner or owners of any nonirrigable tract or tracts have any vote or votes in any proceeding or election under the provisions of Chapter 146 of the Laws of 1909 or any amendment thereof or act supplementary thereto, after the making of the order, unless their land or a portion of their land is found by the board to contain an area irrigable from the works or proposed works of the district or subdistrict.

85-7-2111. Refunds and cancellation of excess taxes. Upon the determination provided for in 85-7-2107 through 85-7-2113, the board of commissioners may refund any taxes paid or cancel any unpaid taxes or assessments levied upon an acreage in excess of that so fixed by the order of determination and whenever necessary may issue warrants therefor.

85-7-2112. Confirmation of board actions by district court. (1) Within 60 days after the resolution adopting the list, the board of commissioners may petition the district court for confirmation of its acts in determining the irrigable area and in refunding or canceling any taxes or assessments. The majority in number and acreage of the holders of title or evidence of title to lands in the district or the majority in number and acreage of the holders of title or evidence of title in the subdistrict if only the irrigable area of the subdistrict is to be reviewed, determined as provided in 85-7-101 and 85-7-102, may likewise within the 60-day period petition the district court for review of the actions of the board. However, one of these proceedings, if prosecuted to determination, is exclusive of the other. The court may order any assessment of taxes upon any land or lands to be reduced or raised according to the irrigable area as found by the court or taxes previously levied upon any area shown to be excessive to be refunded or canceled.

(2) The provisions of 85-7-1808 through 85-7-1810 regarding the procedure as well as the right and time to appeal apply to any proceeding instituted pursuant to this section, provided nothing in this section affects or impairs the lien of any bonds issued by the district. If confirmation proceedings are held and a certified copy of the order of confirmation is filed with the county clerk and recorder of the county in which any portion of the lands is situated, it is not necessary to file in the office the certified copy of the resolution and order of the board or of the list provided for in this section.

85-7-2113. Effect of federal involvement. Whenever districts have been established in order to cooperate with the United States under the federal reclamation laws or under any act of congress which permits the performance by the United States of work in this state, for the purposes of construction of irrigation works, including drainage works, or for purchase, extension, operation, or maintenance of construction works or for the assumption as principal or guarantor of indebtedness to the United States on account of district lands, the determination of the irrigable area of the lands in the district may be made by the board of commissioners in the manner provided in 85-7-2107 through 85-7-2112 or by the United States at the option of the latter, and, if the United States determines the irrigable area, the proceeding for the apportionment and distribution of the costs of the proposed works or improvements provided for in 85-7-2114 through 85-7-2116 may not be had.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.1, R.C.M. 1935; amd. Sec. 22, Ch. 388, L. 1975; amd. Sec. 32, Ch. 460, L. 1977; R.C.M. 1947, 89-1805(8).

85-7-2114. Apportionment of costs when bonds issued. (1) Whenever a petition for the issuance of bonds of any irrigation district established under the provisions of part 1 has been filed as provided in 85-7-2012 through 85-7-2015, the board of commissioners of the district shall examine or cause to be examined each 40-acre tract or fractional lot as designated by United States public survey or platted lot, if land is subdivided in lots and blocks (or whenever land is owned in less than 40-acre tracts or in less than the platted lot, each such tract) of land in the district or of land in a subdistrict if the bonds are to be issued on behalf of the subdistrict, and cause a careful topographical survey and map to be made in the manner provided for in 85-7-2107. Upon the examination, the board shall determine the number of irrigable acres in each tract and shall apportion and distribute the cost of the works or improvements for which the bonds are to be issued over the tracts within the district or subdistrict according to the irrigable area in each of the tracts or subdivisions, so that each irrigable acre is required to bear the same burden of such costs as each other irrigable acre in the district or subdistrict, except as otherwise provided by law. The special tax or assessment levied to meet the principal of and interest on the bonds is a lien upon the entire tract of which the irrigable area forms a part or portion as of January 1 of the year in which the special tax or assessment is levied, and the number of irrigable acres in each tract so determined may not be diminished but may be increased during the term for which the bonds are issued or until the bonds are liquidated in full.

(2) Whenever a proceeding for the determination, in whole or in part, of the irrigable area of the lands in the district or subdistrict has already been had or a topographical survey or maps thereof prepared or a court confirmation of prior proceedings had, in part or in full, the board may, in its discretion, adopt all or portions of the prior proceedings and need not cause an additional survey or maps or examination of any of the tracts to be made or redetermine the irrigable area of any tract.

(3) The board shall make the determination after the hearing and shall fix the total acreage and the irrigable acreage and shall prepare a list of the irrigable area for filing, and the proceedings of the board in connection with the determination, including the hearing and notice of the hearing and order or resolution fixing the irrigable area and the preparation and filing of the list, shall conform to the requirements set forth in 85-7-2107 through 85-7-2113. At the hearing, the board shall also determine the amount and rate per acre necessary to be levied against each irrigable acre in the district to meet the interest on and principal of the authorized bond issue. The tax levied is a lien upon the entire tract of which the irrigable area forms a part. If any landowner in the district or subdistrict appears before the board at that time and pays in cash the amount fixed against his land as its proportion of the amount found necessary for the purposes for which the bonds were authorized and are to be issued, his land must be excluded from the lien of the bond issue and the amount of bonds intended to be issued shall be reduced by the amount of the payment. Any person interested who fails to appear before the board at the meeting may not thereafter contest the proceedings of the board or any part thereof, except upon special application to the court in the proceedings

for the confirmation of the bonds and a showing of reasonable excuse for failure to appear before the board.

time any semiannual installment of the district tax or assessment, together with the penalty and interest to date of payment on such installment. However, the payment may not be considered a redemption of the property from the tax sale but must be credited on account of any redemption that may be made. In case of any payment pursuant to this subsection, a separate tax receipt must issue showing exactly what assessments have been paid and must show that no other tax on the real estate has been received by the treasurer. The county treasurer may not collect or receive or receipt for any taxes levied for county purposes upon real estate situated wholly or in part within any irrigation district upon which an assessment for the purposes of the irrigation district has been levied unless the assessment levied for irrigation district purposes is paid as herein permitted and the receipt for the payment presented to the county treasurer at the time the taxes are paid, or paid at the same time.

85-7-2156. Proceedings where land struck off to county and not redeemed. In case the property so assessed for irrigation district purposes is struck off to the county, as provided for by law, and certificates of the taxes and assessments of said irrigation district issued thereon, as hereinbefore provided for, and the said lands and premises be not redeemed before the next annual assessment for irrigation purposes shall become delinquent thereon, then and in that event, like certificates for each year's irrigation district taxes and assessments shall be issued against said land and shall be included in and satisfied by any redemption thereof, with interest as hereinbefore provided for, and shall in like manner be paid from the proceeds of sale of said lands by the board of county commissioners, if the same be not redeemed as provided for by law.

History: En. Sec. 2, Ch. 127, L. 1913; re-en. Sec. 7247, R.C.M. 1921; re-en. Sec. 7247, R.C.M. 1935; R.C.M. 1947, 89-1820; amd. Sec. 56, Ch. 587, L. 1987.

85-7-2157. Purchase of lands by district — revolving fund, credits, and expenditures. (1) At all sales of all lands for delinquent taxes where all or a portion of such delinquent taxes are taxes and assessments levied and assessed by any irrigation district against the lands to be sold, the commissioners of such irrigation district, if there be no other bidder for such land at such tax sale, may bid therefor the total amount of all delinquent taxes and assessments, penalty, and interest against such land, and thereupon the county treasurer shall strike off said lands to such irrigation district and issue certificates of tax sale to said irrigation district the same as such certificates of tax sales are issued to other purchasers. For the purpose of paying such taxes, assessments, interest, and penalties, the commissioners of such irrigation district shall have the power and authority to create by resolution a fund to be known and designated as the revolving fund for the purchase of tax certificates and titles and to provide funds for such revolving fund by levy, bond issue, or otherwise. The district may pay such taxes, assessments, interest, and penalties by issuing a warrant to the county treasurer against such revolving fund, provided that there shall be sufficient money in such fund to pay same in full upon demand.

(2) When taxes are paid by the district as provided in this part, the county treasurer shall distribute that portion of said tax belonging to the irrigation district to the several funds as designated in the tax levy and assessment. However, if the board of commissioners of the irrigation district shall file with the county treasurer a certified copy of resolution passed by such commissioners requesting nondistribution by the county treasurer of the portion of the tax belonging to the district, the county treasurer shall not distribute that portion of said tax belonging to the irrigation district to the several funds as designated in the tax levy and assessment, but the total amount due the irrigation district shall be credited by him to the revolving fund above specified. In such event, at the time of the sale by the district of the tax sale certificate or of the property obtained through such certificate, such funds as are realized from such sale must be deposited with the county treasurer, together with the rentals received from the property, and he shall credit the proceeds of such redemption sale or rental pro rata to the several funds of the district in accordance with the original levy or assessment.

(3) At the time of redemption or of the sale by the district of the tax sale certificate or of the property obtained through such certificate, such funds as are realized must be deposited with the county treasurer, together with rentals received from the property. He shall credit the proceeds of such redemption, sale, or rentals to the above specified revolving fund to such extent as may be required, with the credit provided for above, to reimburse

said revolving fund in full, if the sum realized permits, the overplus, if any, to be credited to the several funds of the district in accordance with the original levy and assessment. No expenditures shall be made from the revolving fund except for the purpose as herein specified, and when, by resolution of the board of irrigation district commissioners, such fund shall be deemed inactive, the balance remaining in said fund shall be transferred to a sinking fund to be applied upon any indebtedness which may have been incurred by the district by reason of the creation of such revolving fund, if any there may be.

The petition shall pray for the organization of a drainage district by the name and with the boundaries proposed and for the appointment of commissioners for the execution of such proposed work, according to the provisions of this and the following sections.

(3) (a) Any lands, the title to which is in the state and which are within the boundaries of any drainage district heretofore created or which may be

85-8-102. Amendment and circulation of petition — court consideration. No petition having as many signers as are required by 85-8-101 may be declared void, but the court may at any time permit the petition to be amended in form and substance to conform to the facts, if the facts justify the organization of a drainage district. Several similar petitions for the organization of the same district may be circulated and, when filed, together shall be regarded as one petition having as many signers as there are separate signers on the several filed petitions who own lands within the proposed drainage district. All petitions for the organization of the district filed prior to the hearing on the petition shall be considered by the court the same as if filed with the first petitions placed on file, and the signatures thereon shall be counted in determining whether sufficient landowners have signed the petition.

(b) by serving or causing to be served a copy of such notice on each owner of land within said proposed district residing in any county in which any lands in said proposed district are situated, either personally or by leaving a copy thereof at his last usual place of abode with a person of suitable age and discretion, to whom its contents shall be explained; and

(c) by publishing a copy thereof at least once a week for 3 successive weeks in some newspaper published in each county from which any part of the district is proposed to be taken. If there be no newspaper in any such county, such notice may be published in a newspaper published in an adjoining county.

85-8-112. Affidavit in case of nonresident petitioners. If any of the owners of land in said district are nonresidents of the county or counties in which the proposed district lies, the petition shall be accompanied by an affidavit giving the names and post-office addresses of such nonresidents, if such are known, and if unknown, shall state that upon diligent inquiry their names or post-office addresses (whichever may be the fact) cannot be ascertained. The clerk of the court shall mail a copy of the notice aforesaid to each of said nonresident owners whose post-office address is known, within 6 days after the first publication of the same.

85-8-115. Insufficient service. (1) If it shall be found, before the hearing on a petition for the organization of a drainage district, that one or more owners of land in said district have not been duly served with notice of hearing on said petition, the court or presiding judge shall not thereby lose jurisdiction. The court or presiding judge in such case shall adjourn the hearing, make an order directing the serving of said notice upon said landowner, and fix the time and manner of service of such notice, which notice shall notify him to appear at said adjourned time and place and be heard on said petition.

(2) Said notice shall be served personally or by leaving at the last usual place of abode of said unserved owners as provided in 85-8-111, not less than 8 days before said adjourned hearing, or published, not less than 14 days before said adjourned hearing, in some newspaper published in the county in which said owners' lands lie or, if no newspaper be published in said county, then in some newspaper published in an adjoining county.

85-8-116. Procedure on adjourned day. Upon the adjourned day the same proceedings, adjournments, trial findings, and orders may be had as in case of complete service of notice in the first instance. In case of failure to mail said notice as herein required, the court or judge may order the same mailed later and shall adjourn said hearing so that said notice shall be mailed at least 14 days before said adjourned hearing. In case of failure to publish or post notice as required in this part, the court or judge may adjourn said hearing for sufficient time to permit the due posting and publication of said notice and order said notice posted or published as directed in 85-8-111. In case of adjournment to permit notice to be given, the notice shall state the fact of such adjournment and the time and place of hearing pursuant to said adjournment.

85-8-117. Contest by landowners. (1) On the day fixed for hearing on such petition, all parties owning lands or any interest or easement in land within said proposed district or who would be affected thereby may appear and contest:

(a) the sufficiency of the petition;

(b) the sufficiency of the signers of the petition;

(c) the sufficiency of the notice;

(d) the constitutionality of the law; and

(e) the jurisdiction of the court, specifying their objections to such jurisdiction.

(2) The petitioners and contestants may, on the trial, offer any competent evidence in regard thereto. All notices of contest shall be in writing and shall clearly specify the grounds of contest.

85-8-118. Determination of sufficiency of petition. The court shall hear and determine whether or not the petition contains the signatures of a majority of the owners of lands within the proposed district who are of lawful age and who represent one-third in area of the lands proposed to be affected by said work or the signatures of the owners of more than one-half of such lands and shall determine all questions of law arising on said contest. The district court in which such petition shall be filed or the judge thereof may adjourn the hearing on the petition from time to time for want of sufficient notice, to give time to prepare for trial, or for other good cause.

History: En. Sec. 12, Ch. 129, L. 1921; re-en. Sec. 7276, R.C.M. 1921; re-en. Sec. 7276, R.C.M. 1935; R.C.M. 1947, 89-2213; amd. Sec. 9, Ch. 326, L. 1979.

85-8-119. Receiving affidavits on question of petition sufficiency. The affidavits of any 10 or more of the signers of the petition, stating that they have examined it and are acquainted with the locality of the district and that the petition is signed by a sufficient number of owners of lands in the district to satisfy 85-8-101, may be taken by the court or judge as prima facie evidence of the facts therein stated. The affidavit of any petitioner or other landowner before the court or represented before the court asserting his ownership of lands in the district, properly described, is sufficient evidence to the court of such facts.

History: En. Sec. 13, Ch. 129, L. 1921; re-en. Sec. 7277, R.C.M. 1921; re-en. Sec. 7277, R.C.M. 1935; R.C.M. 1947, 89-2214; amd. Sec. 10, Ch. 326, L. 1979.

85-8-120. Fraudulent deeds. 85-8-121. Court determination. (1) If the court or presiding judge thereof, after hearing any and all competent evidence that may be offered for and against the petition, shall find that the same has not been signed as herein required, the petition shall be dismissed at the cost of the petitioners and judgment shall be entered against said petitioners for the amount of said costs.

(2) If it shall appear that the petition has been so signed, the court or judge shall so find and order any necessary amendments thereto; shall divide the district into three divisions, as nearly equal in area as possible; and shall appoint three suitable and competent persons as commissioners and fix their temporary bonds. In making such appointments one commissioner shall be appointed from each division, and each person so appointed a commissioner must be an actual landowner and resident of the county or counties in the division for which he is appointed such commissioner. If the district is situated in two or more counties, not more than two of said commissioners shall reside in one of said counties. Ownership of land within the district shall not disqualify a person from acting as a commissioner.

Part 2

Dissolution of Districts

85-8-201. Dissolution of districts. Whenever the owners of more than one-half of the lands within any drainage district organized under the provisions of this chapter shall present to the district court having jurisdiction of the drainage district a petition signed by them, praying that such drainage district be dissolved, the judge of the court shall cause notice of such petition, together with a copy of the petition, to be served upon the commissioners of the district, directing them to show cause on a day certain, not less than 15 or more than 30 days from the date of the filing of the petition, why the petition should not be granted. The judge, at the time of receiving the petition, shall make an order forbidding the commissioners from incurring any further expense or proceeding with the work of constructing a drain. On the day of hearing the court shall hear the same, and if it appears that the owners of more than one-half of the lands in the drainage district have signed the petition, it shall be granted. Thereupon, the court shall make an order directing the commissioners to file a written report, under oath, setting forth the amount of the debts and obligations of the drainage district. Within 30 days after such report is filed, the court shall cause an assessment to be levied against all lands in the district on the basis of the final report of the commissioners, as confirmed by the court, and if no final report has been made, then on an area basis. The court shall also enter judgment dissolving the district and authorize the commissioners to settle the business of the district on the basis of the final report of the commissioners or on the area basis as confirmed by this court, the commissioners to render their services for same without pay.

One of the commissioners, to be determined by lot, shall hold office until the first Tuesday in May in the year following his election; another of the commissioners, to be determined by lot, shall hold office until the first Tuesday in May in the second year following his election; and the third of the commissioners shall hold office until the first Tuesday in May in the third year following his election. Thereafter one commissioner shall be elected each year, who shall hold office for a term of 3 years and until his successor is elected and qualified. The person so appointed must be appointed as a commissioner for the division in which such vacancy exists. 85-8-315. Presumption of regularity of commissioners' acts. Commissioners of drainage districts are hereby declared to be public officers. The presumption shall be in favor of the regularity and validity of all their official acts. Whenever any report of the commissioners of any drainage district or any part of any such report is contested, remonstrated against, or called in question, the burden of proof shall rest upon the contestant, remonstrant, or questioner.

(3) They shall also appoint a competent civil and drainage engineer, who may be an individual, a partnership, or a corporation, who may employ assistants and make surveys; and who, with the approval of the court, may employ a consulting engineer or secure expert advice. The expense of the engineer, his assistants, and the consulting engineer shall be taxed as expenses under the petition. As soon thereafter as may be, they shall personally examine the lands in said district and make a preliminary report to the court, which report shall state:

(a) whether said proposed work is necessary or would be of utility in carrying out the purposes of the petition;

(b) whether the proposed work would promote the public health;

(c) whether the proposed work would promote the public welfare;

(d) whether the total benefits from said proposed work will exceed the cost thereof, together with the damages resulting therefrom, and in arriving at this, they shall include all benefits and all damages resulting therefrom both within and without said district.

(4) Said commissioners shall in said report fix, as near as may be, and report to the court the boundaries of said proposed drainage district. Said boundaries shall not be changed from those in the petition described so as to

85-8-327. Procedure at court hearing and order. (1) All issues arising upon said preliminary report shall be tried by the court without a jury.

(2) If the court shall find in favor of the remonstrance or if said report be that the proposed work will not promote the public health and will not promote the public welfare or that the benefits from said proposed work will not exceed the damages and cost of construction and no remonstrance against said report is filed, the petition shall be dismissed, the costs taxed against the petitioners, and judgment entered therefor, as provided in 85-8-350.

(3) If the preliminary report be that the benefits of said proposed work (or work proposed by the commissioners) will exceed the damages and the cost of construction and that the public health will be promoted thereby or that the public welfare will be promoted thereby and no remonstrance thereto is filed or if on the trial of the issues made on said report the court finds that the benefits will exceed the damages and cost of construction and that the public health or the public welfare will be promoted by said proposed work, the court shall make and file such findings in writing and make an order confirming said report or directing amendment of the report to conform to the findings of said court, and when so amended the court shall by order confirm the same and direct said commissioners to proceed with said work with all convenient speed.

85-8-341. Preparation of report — contents. (1) As soon as may be after the confirmation of the preliminary report or within such time as the court may direct, said commissioners shall proceed to have all necessary levels taken and surveys made and shall lay out said proposed work; make a map thereof and plans, profiles, and other specifications thereof; and report in writing to the court:

(a) whether the starting points, routes, and termini of the proposed work and the proposed location thereof as contained in the petition are in all respects proper and feasible and, if not, shall report such as are most proper and feasible;

(b) if it be found necessary to change the boundaries of said proposed district, as fixed by them previously, they shall report said proposed change and, if possible, shall report the names, residence, and post-office addresses of the owner or owners of all lands affected by said change in boundaries, but no such change in boundaries shall be made as to deprive the court of jurisdiction; provided, however, that if the owners of lands adjacent to the district petition to have their lands brought into the district such may be considered the same as original petitioners in making changes of boundaries;

(c) what lands within the district, as reported by them, will be injured by the proposed work, if any, and they shall therein award to each tract, lot, easement, or interest, by whomsoever held, the amount of damages which they shall determine will be caused to the same by the proposed work;

(d) what lands (including improvements when improvements receive benefits), easements, irrigation ditches, cities, towns, counties, individuals, and other corporations and persons should be assessed for the payment of any part of the cost of constructing the proposed drains, levees, or other facilities, repairs thereto, maintenance thereof, and the incidental expenses attached to the establishment of such drainage district;

(e) the total amount, as near as they can determine, that said proposed work will cost, which cost shall include all incidental expenses, the reasonable cost of organizing said district, the costs of proceeding and all probable damage to lands, both within and without the district, together with a reasonable attorney fee for the petitioners, which cost will hereinafter be referred to as cost of construction.

(2) If the cost of construction of any particular part of the work so proposed to be done should be assessed upon any particular tract or tracts, lot or lots of land, including improvements where the same are benefited or upon any corporation or corporations, the commissioners shall so specify, and in their report they shall fix and determine the sums which should be assessed against said tracts, lots, and corporations and assess such sum against said tracts, lots, and corporations.

(3) If any individual, association of individuals, or corporation would, in the judgment of said commissioners, derive special benefits from the whole or any part of such proposed work, the commissioners shall so report and assess those benefits and assess against the recipient thereof its proportionate share of the costs of said proposed work. The word "corporation", whenever contained in this chapter, shall be construed to include:

(a) railroad companies;
(b) other private and quasi-public corporations of all kinds;
(c) towns;
(d) cities;
(e) villages;
(f) other drainage districts; and
(g) counties.

(4) They shall apportion and assess the part of this cost of construction, not assessed as above, against the several benefited tracts, lots (including improvements when the same are benefited), and easements in said drainage district, in proportion to the benefits which they have assessed against the same, by setting down opposite each tract, lot, or easement the sum which they assess against the same for construction. The assessments which together make up the cost of construction, as above defined, are herein referred to as assessments for construction.

(5) The commissioners shall further report to the court the probable cost of keeping said proposed work in repair after it is completed.

(6) They shall include in their report said map, plans, and other specifications and file the same with their report.

85-8-342. Apportionment of costs. (1) In apportioning the costs and expenses mentioned in 85-8-341(1)(d), the following classes of property, persons, corporations, and municipalities shall be assessed:

(a) all lands which are swampy, bogged, or waterlogged and will be relieved and improved by virtue of the construction of the proposed drainage system;

(b) all lands which are becoming or are liable to become swampy, bogged, or waterlogged and which the construction of the proposed drainage system will prevent from being thus affected;

(c) all lands from which surface or seepage waters will enter or can be conducted into the proposed drainage system;

(d) all lands and improvements thereto upon which or through which surface or seepage water will be prevented from flowing or can be prevented from flowing by virtue of the construction of the proposed drainage system;

(e) all lands or improvements which will sustain any direct benefit of any kind or character whatsoever;

(f) all railways, whether operated by steam, electricity, or otherwise, whose right-of-way or roadbed will be benefited or can be benefited by reason of the construction of the proposed drainage system or levee project;

(g) all public utilities whose easements or other facilities within the district will receive benefit from the proposed work;

(h) all owners of irrigation ditches or canals included within said district or from which water seeps, drains, or wastes to, upon, or through lands included within the district;

(i) the county or counties which the proposed drainage system traverses or which will be benefited as to public health, convenience, welfare, or improvement of any public highway;

(j) all incorporated cities or towns and lands included within townsites and subdivisions, in whole or in part, directly benefited by reason of the construction of the proposed drainage system.

(2) In apportioning the costs and expenses mentioned in 85-8-341(1)(d), the following principles shall be regarded:

(a) All of the above classes of lands, improvements, railways, public utilities, irrigation ditches, counties, cities, towns, townsites, and subdivisions shall be liable to assessment for the construction of the proposed drainage system in such proportions as may seem just and equitable.

(b) The benefits to accrue from the construction of the proposed drainage system to a railway, county, incorporated city or town, and lands included within a platted townsite or subdivision being of a different character than those to accrue to agricultural lands shall be considered in apportioning the assessment, and also the damages and inconvenience caused by seepage and waste waters from irrigation ditches and from the higher lands shall be considered in apportioning the assessment to them.

(c) In the case of the construction of levees or other flood control facilities, lands and improvements which are located or constructed at an elevation which is greater than the elevation of the design flood level which said levees or other flood control facilities are designed to protect against shall not be assessed for the payment of any part of the cost of constructing the levees or other flood control facilities, nor shall such lands or improvements be assessed for the payment of any part of the cost for repairs thereto, maintenance thereof, or the incidental expenses attached to the establishment of such drainage district.

(d) The assessment against each tract, lot, easement, town, city, county, irrigation ditch, railroad, public utility, individual, or corporation owner thereof which will be benefited by the proposed work or which, in any manner, contributes to the swamped, seeped, bogged, or waterlogged condition of any land within said district and the proportionate share of cost of construction of the proposed drainage system which each of them should bear shall be shown in tabular form, the columns of which shall be headed as follows:

Column 1—Owners of property assessed; 2—Description of property assessed; 3—Number of acres assessed; 4—Amount of benefits assessed; 5—Number of acres taken for right-of-way; 6—Value of property taken; 7—Damages; 8—Assessment for costs; which shall be known as the assessment roll. Where property, persons, or corporations, public or private, contribute to the damaged condition of the lands to be reclaimed, it shall not be necessary to assess in such assessment roll the benefits to be derived by or accruing to them.

85-8-343. Commissioners to use most feasible plan. The commissioners shall not be confined to the points of commencement, routes, or termini of the drains or ditches or the number, extent, or size of the same or the location, plan, or extent of any levee, ditch, or other work as proposed by the petitioners but shall locate, design, lay out, and plan the same in such manner as to them shall seem best to promote the public health or welfare and to drain or to protect the lands, including improvements, of the parties interested with the least damage and the greatest benefit to all lands affected thereby. Any plan proposed by the commissioners may, on the application of any interested person, on the hearing provided for hereinafter, or on the application of the commissioners, be altered by the court, by written order, in such manner as shall appear to the court to be just.

85-8-344. Alteration of boundaries. If the commissioners find that the proposed district, as described in the filed petition, will not embrace all of the lands, including improvements, that will be benefited by the proposed work or that it will include lands that will not be benefited and are not necessary to be included in said district for any purpose, they shall extend or contract the boundaries of the proposed district so as to include or exclude all such lands or improvements, as the case may be, and the boundaries adopted and reported by them, upon the hearing of their report, as hereinafter provided, upon their application or that of any person interested, may be altered by the court in such manner as shall appear to be just; provided, that the alteration of boundaries as aforesaid shall not have the effect of so far enlarging or contracting the proposed district as to render such petition void or dismissable. Said report shall be filed with the clerk of the court.

85-8-345. Notice of hearing of report. (1) Upon the filing of such report, the court shall make an order fixing the time and place when and where all interested persons may appear and remonstrate against the confirmation thereof. The clerk of such court shall cause notice to be given to all parties interested by publication thereof for at least 3 successive weeks before the date of such hearing in at least one newspaper in each county wherein lands located in such district are situate, which notice shall contain a statement of the time and place of the hearing of said report and a brief statement of the substance thereof.

(2) Upon a date not later than the date of the first publication of the notice referred to in the last subsection, the clerk of such court shall also cause to be mailed to each of the persons or corporations recommended by said report to be assessed or whose lands are recommended by said report to be included in said district, at his or its last known post-office address, a notice containing a brief description of the land or easement belonging to such person or corporation benefited or damaged; the net damage awarded to such tract, parcel, easement, or corporation; and the sum assessed against such benefited parcel, tract, easement, or corporation.

The order of confirmation shall be final and conclusive, the proposed work shall be established and authorized, and the proposed assessments approved and confirmed unless within 30 days an appeal be taken to the supreme court. The said order of confirmation shall also fix the commissioners' bond.

85-8-350. Judgment on dismissal of proceedings — assessment of costs. (1) In case the petition or proceedings are dismissed as provided in 85-8-327, a judgment shall be entered for the costs, expenses, and liabilities incurred in said proceedings against the petitioners and in favor of the commissioners, but for the benefit of those who have rendered services or advanced money in the prosecution of said proceedings or have recovered costs on successful contests therein.

(2) In case the proceedings are dismissed at any time or the district is discontinued for any cause subsequent to the time provided in 85-8-327, a judgment shall be entered directing the commissioners of the district to assess the costs, expenses, and liabilities incurred in said proceedings, up to and including the time of such dismissal and discontinuation, on an acreage basis against the lands in said district, which assessment shall be a lien upon said lands from the date of said judgment superior to the lien of any other judgment, mortgage, or construction lien against said lands. Said assessment shall be verified by the commissioners of the district the same as assessments to pay costs of construction. Such assessments shall be spread upon the tax rolls of the counties in which said district is situated and shall be collected by the county treasurers of such counties the same as assessments to pay costs of construction are collected. Such assessments shall be payable on or before November 30 following the date upon which they are so spread upon the assessment roll of such counties. The money so collected shall be paid out upon warrants issued by the commissioners of the district to those who have rendered service or advanced money in connection with said district or have recovered costs on successful contests therein. Should such assessment, for any cause, be not sufficient for all such costs, expenses, and liabilities, then additional assessments shall be made and collected in like manner until sufficient funds have been raised to pay all such costs, expenses, and liabilities.

Taxes and Assessments

85-8-601. Certification and collection of district taxes. (1) On or before the third Monday in August of each year the commissioners shall certify to the agent of the department of revenue in each county wherein the lands of the district are situate a correct list of all the district lands in such county and the owners thereof, together with a statement of the amount of the total tax or assessment against said lands for district purposes for that year. The agent of the department of revenue in each county shall immediately thereupon cause said assessment roll to be entered in the assessment book of said county for each year and prior to the delivery of the assessment book to the county treasurer.

(2) It shall be the duty of the county treasurer of each county in which any drainage district is located, in whole or in part, to collect and receipt for all taxes and assessments levied by any such district, in the same manner and at the same time as is required in the collection of taxes upon real estate for county purposes as provided in 15-16-102; provided the treasurer shall receive from any taxpayer, at any time, the amount due on account of any district assessments of any kind, whether other taxes on the same real estate are paid or not. When any real estate on account of which such district taxes and assessments have been levied has been sold to the county and tax certificate of sale is held by the county, the taxpayer may pay to the treasurer at any time any semiannual installment of such district tax or assessment, together with the penalty and interest to date of payment on such installment; provided that such payment shall not be deemed a redemption of said property from such tax sale, but shall be credited on account of any redemption that may thereafter be made. In case of any payment pursuant to this subsection, a separate tax receipt shall issue showing exactly what assessments have been paid and shall show that no other tax on said real estate has been received by said treasurer; provided such county treasurer shall not collect or receive or receipt for any taxes levied for county purposes upon real estate situated wholly or in part within any drainage district upon which an assessment for the purposes of such drainage district has been levied unless the assessment levied for such drainage district purposes be paid as herein permitted and the receipt therefor presented to the county treasurer at the time such taxes are paid, or paid at the same time.

Delinquent sales of land for unpaid taxes and assessments shall be made in the same manner as for state and county taxes in the respective counties where such lands are situate, and the right of redemption shall in all cases be made the same as in cases where lands are sold for state or county taxes. 85-8-611. Construction assessments — annual installment. At the time of the confirmation of the assessments as provided in 85-8-347, the court may order the assessment for construction of new work to be paid in not more than 15 annual installments of such amounts and at such times as will be convenient for the accomplishment of the proposed work or for the payment of the principal and interest of such notes or bonds of the district as the court grants authority to issue for the construction of new work. The court shall also by such order fix a date on which the first installment of the assessments for construction shall become due, not more than 5 years after the date of the order, and each of the installments shall draw interest at the rate fixed by the court in accordance with law from the date of the order.

85-8-612. Lien of assessments — payment of assessments against state lands. (1) From the time of the entry of said order, assessments for construction of new work and additional assessments and interest thereon shall be a lien upon the lands assessed, until paid. Any owner of land or any corporation assessed for construction may, at any time within 30 days after the confirmation of said report, pay into court the amount of the assessment against his land or any tract thereof or against any such corporation. Said payment shall relieve said lands from the lien of said assessment and said corporation from all liability on said assessment.

(2) Upon presentation to the state auditor of an order of the district court having jurisdiction of such drainage district, properly certified, the auditor shall draw his warrant on the treasurer on the common school fund in favor of the commissioners of such drainage district for the total amount that may be assessed against any lands included in such district, the title to which is in the state of Montana, and upon the payment of such warrant such lands shall thereby be relieved from the lien theretofore created for such costs of construction.

85-8-614. Procedure on failure to certify assessments. When commissioners shall fail to certify to the county treasurer of the proper county any one or more drainage assessments for construction or repair or additional assessment against any lands (including improvements where benefited) in said district at the proper time, they may certify the same to the county treasurer at any time thereafter, whether in the same or any subsequent year.

History: En. Sec. 69, Ch. 129, L. 1921; re-en. Sec. 7333, R.C.M. 1921; re-en. Sec. 7333, R.C.M. 1935; amd. Sec. 7, Ch. 409, L. 1973; R.C.M. 1947, 89-2405.

85-8-615. Procedure to levy additional assessments. If in the first assessment for construction the commissioners shall have reported to the court a smaller sum than is needed to complete the work of construction or if in any year an additional sum is necessary to pay the lawful indebtedness of said drainage district, further or additional assessments on the land (including improvements where benefited) and corporations benefited, proportioned on the last assessment of benefits which has been approved by the court, shall be made by the commissioners of said drainage district under the order of the court or presiding judge thereof; provided, however, that the total assessments for original construction and any additional assessments, other than for maintenance, incidental expense, and interest on bonds, shall, in no event, exceed the total assessments of benefits as provided in 85-8-342. Notice of the hearing of the application for such additional assessment shall be published at least once each week for 3 consecutive weeks in one newspaper published in each county in which said lands, or any part thereof, within said district are situated, which further or additional assessment may be made payable in installments as specified in 85-8-611 and shall be treated and collected in the same manner as the original assessments for construction confirmed by the court in said drainage district.

History: En. Sec. 74, Ch. 129, L. 1921; re-en. Sec. 7338, R.C.M. 1921; re-en. Sec. 7338, R.C.M. 1935; amd. Sec. 8, Ch. 409, L. 1973; R.C.M. 1947, 89-2410.

85-8-616. Correction of omissions. Omission to assess benefits, to assess for construction, to make additional assessments, to make assessment for repairs, to award damages to any one or more tracts of land or easements in a drainage district or to assess benefits, assess for construction, assess for repairs, or make additional assessments against any corporation which should have been assessed does not affect the jurisdiction of the court to confirm the report or to render the benefits assessed, the assessments for construction, additional assessments, or assessments for repairs against other lands or assessments against any corporation voidable; but the commissioners of the drainage district shall thereafter, as soon as they discover the omission or as soon as they have notice thereof, either agree with the omitted parties upon the proper assessments and award the damages or assess such benefits, make such assessments for construction, and make such additional assessments against the omitted lands and corporations and award such damages as are just and report the facts, together with such assessments and awards, to the court.

History: En. Sec. 75, Ch. 129, L. 1921; re-en. Sec. 7339, R.C.M. 1921; re-en. Sec. 7339, R.C.M. 1935; amd. Sec. 43, Ch. 460, L. 1977; R.C.M. 1947, 89-2411.

85-8-617. Illegal assessments. In case the court decides that any land should not have been assessed for drainage purposes or that any assessment is void, the commissioners of the district shall:

(1) levy an additional assessment on all of the assessable lands, irrigation ditches, railroads, corporations, and individual owners, based on the last assessment of the district approved by the court, sufficient to pay the sum lost to the district by reason of such void assessment; or

(2) pay such sum out of the general fund of the district.

History: En. Sec. 78, Ch. 129, L. 1921; re-en. Sec. 7342, R.C.M. 1921; re-en. Sec. 7342, R.C.M. 1935; amd. Sec. 2, Ch. 109, L. 1923; amd. Sec. 6, Ch. 169, L. 1929; R.C.M. 1947, 89-2412.

85-8-618. Assessment of unassessed, benefited lands. Whenever any lands from which surface or seepage water enters any drain or upon which or through which surface or seepage water has been prevented from flowing because of the construction of any drain have not been included within the drainage district which constructed such drains or drain or the owner of any irrigation ditch or canal from which water seeps, drains, or wastes to, upon, or through lands included within a drainage district has not been assessed for the cost of construction of the drainage system of said drainage district, the commissioners of such district may report said facts to the court and ask that said lands, describing them, be brought into said district and assessed for their proportionate share of the cost of the drainage system of said drainage district and ask that the owner of any such irrigation ditch or canal be assessed its proportionate share of the costs of construction of such drainage system. Thereupon, the same proceedings as set out in 85-8-421 through 85-8-424 for the determination and levy of assessments against drained lands outside of drainage district receiving benefits from the drainage of said district shall be had to determine the proper assessments, if any, to be levied against said lands and the owner of such irrigation ditch or canal to aid in payment of costs of construction.

History: En. Sec. 7364A by Sec. 7, Ch. 169, L. 1929; re-en. Sec. 7364.1, R.C.M. 1935; R.C.M. 1947, 89-2601.

85-8-619. Assessments to have effect of judgment. Each and every sum assessed for construction, for additional assessment, or for repairs against any land or against any corporation, as soon as such assessment is confirmed by the court, shall be and is declared to be a judgment of the district court in favor of said drainage district and against said land or corporation. Unless some other method of collection is herein provided, the judgment shall be collected in the same manner as any other money judgment is collected; provided, that whenever said assessment is a lien upon land, it shall only be collected out of said land on which it is a lien.

85-8-621. Renumbered 85-8-803 by Code Commissioner, 1983.

85-8-622. Agreement of landowners to omitted assessments. In case of omission to assess any corporation or land that should be assessed for benefits, construction, repairs, or additional assessments or to award damages, said omitted party and the owner of omitted land may in writing agree with the commissioners of said district what the assessment should be against said land or against said corporation or what said damages should be, and such agreement shall be acknowledged and witnessed, as provided above for waivers, and be filed in the court.

85-8-623. Assessments not to be obstructed by preliminary defects. The collection of any assessments made by the commissioners for construction and confirmed by the court shall not be restrained or obstructed by reason of any omission, imperfection, or defect in the organization of any district or in any proceedings occurring prior to the order confirming the assessments of benefits, but such order shall be conclusive as to the regularity of all proceedings relating to the assessments of benefits unless appealed from within 30 days after the entry of such order.

85-8-624. Assessments on improvements — taxpayers' approval, limitations, and election procedures. (1) It shall require a vote of the persons on the assessment rolls in any existing district to make Chapter 409, Laws of 1973, applicable to such districts.

(2) Nothing in Chapter 409, Laws of 1973, confers upon districts created for drainage purposes only the authority to levy assessments on benefits to improvements.

(3) The election provided for by subsection (1) shall be governed by the following rules:

(a) Notice of the election shall be as provided in 13-1-401(4).

Commissioners shall prepare a list of such persons and the election administrator or deputy election administrator shall give them notice as provided in 13-1-401(4).

(d) The commissioners of any district in existence prior to March 21, 1973, who wish to hold an election to determine if the district shall be governed by Chapter 409, Laws of 1973, shall at any regular or special meeting adopt a resolution calling for an election to determine whether or not the voters of said district wish to be governed by Chapter 409, Laws of 1973. The resolution shall contain a short summary of the changes made by Chapter 409, Laws of 1973, and the summary must be included in the notice provided for by 13-1-401(4). In addition, the commission shall provide copies of Chapter 409, Laws of 1973, to any person interested in obtaining a copy of the same and the notice to the persons in the district calling the election shall describe where and how copies may be obtained. The commissioners may authorize a reasonable charge for providing said copies, not to exceed 20 cents per page.

Part 7

Flood Control and Planning

85-8-701. Purpose of part. (1) The purpose of this part is to confer certain additional powers on drainage districts already created or to be created under the laws of the state of Montana for the purposes of cooperating with the government of the United States and landowners in flood prevention and the conservation, development, utilization, and disposal of water for the further development of the economy of this state and for the promotion of the public health and welfare.

(2) The purpose of this part is to enable existing drainage districts or newly created drainage districts as provided herein to enter into cooperative agreements and programs to carry out the purposes of Public Law 566, 83rd congress of the United States, or other laws of the national congress pertaining to flood prevention and the conservation, development, utilization, and disposal of water. This part is to be given a liberal construction to the end that these purposes may be carried out, and to this end all political subdivisions of the state of Montana, all agencies and departments of the state government, and all soil conservation districts are authorized to cooperate with, expend funds for, and enter into agreements with drainage districts and any agencies

of the United States government for the purpose of carrying out the provisions of this part and Public Law 566, 83rd congress of the United States, or other laws of the national congress pertaining to flood prevention and the conservation, development, utilization, and disposal of water.

(3) None of the additional powers granted by this part shall be exercised except for the purpose of participating in projects or programs authorized under Public Law 566, 83rd congress of the United States, or other laws of the national congress pertaining to flood prevention and the conservation, development, utilization, and disposal of water.

(1) to carry out necessary measures for the prevention of floodwater and sediment damages and for the conservation, development, utilization, and disposal of water and to adopt necessary regulations, policies, and procedures to accomplish these ends, subject to the approval of the district court and on proper notice to interested parties as is provided for in the general statutes pertaining to drainage districts;

(2) to cooperate and enter into agreements to carry out the purposes of this part with (and to receive financial and other assistance from) state agencies and political subdivisions of the state, other organizations created under state laws, and the government of the United States and agencies thereof and to enter into agreements with (and to accept contributions from) private landowners for the purposes of this part;

Before the additional powers granted by this part shall become applicable to any presently existing drainage district in this state, the commissioners of such district shall file a petition in the district court requesting such additional powers as set forth herein and proper notice shall be given to interested landowners in the same manner as in the first instance of creation of the district. Proceedings shall be conducted, insofar as possible, in accordance with the procedures set forth for determining whether or not the district shall be created in the first instance, and the district court shall render its decree or order accordingly.

History: En. Sec. 3, Ch. 3, L. 1957; R.C.M. 1947, 89-2823.

All drain districts of the state of Montana organized prior to March 1, 1921, and continued in existence pursuant to section 100, Chapter 129, Laws of 1921, shall continue their existence as drain districts under and pursuant to all of the provisions of drainage district laws, and the commissioners of such drain districts shall have all the power and authority conferred by the drainage district laws upon the commissioners of drainage districts.

Ten percent of the adult owners or legally authorized agents or representatives of minor owners of lands within any drainage district heretofore created and organized and in existence on February 27,1925, may file a petition with the proper district court to have such district divided into divisions. Such court must thereupon make an order setting a day for hearing such petition and cause a copy of such order to be served on each of the commissioners of such district at least 5 days before the date set for such hearing. On the day fixed in such order (or on any day to which such hearing may be regularly continued) the court must hear such petition and, after such hearing, must make an order dividing such district into three divisions, as nearly equal in area as possible.

Part 5

Alteration of Districts

85-9-501. Merger of districts. (1) In case two or more districts have been organized in a territory which, in the opinion of the directors of each of the districts, should constitute but one district, the directors of the districts may petition the court for an order merging the districts into a single district. The petition shall be filed in the office of the clerk of the district court in and for that county which has the largest portion of taxable valuation of property within the districts sought to be included, as shown by the tax rolls of the respective counties. The petition shall set forth facts showing that the purposes of this chapter would be served by the merging of the districts and that the merger would promote the economical execution of the purposes for which the districts were organized. A copy of the petition shall be filed with the department.

(2) Upon the filing of the petition, the court shall by order fix a time and place of hearing, and the clerk shall give notice as specified in 85-9-103(9), as well as by mail to the directors of the districts which would be merged. The notice shall contain the purpose, time, and the place of the hearing.

(3) Upon the hearing, should the court find that the averments of the petition are true and that the districts or any of them could feasibly and profitably be merged, it shall order that the merger take place and the districts shall be merged into one district and proceed as such. The court shall designate the corporate name of the district, and further proceedings shall be taken as provided for in this chapter. The court shall by order appoint the directors of the district, who shall thereafter have powers and be subject to rules as are provided for directors in districts created in the first instance.

(4) Instead of organizing a new district from the constituent districts, the court may, in its discretion, direct that one or more of the districts described in the petition be included in another of the districts, which other shall continue under its original corporate name and organization, or the court may direct that the district or districts so absorbed shall be represented on the directors of the original districts, designating what members of the directors of the original district shall be retired from the new board and what members representing the included district or districts shall take their places.

(5) If the court receives a petition opposing the merger, signed by a majority of the electors of any of the concerned districts, the court shall not grant the order and shall dismiss the petition.

(6) Upon merger or inclusion, existing obligations shall remain exclusively with those who bore them prior to the merger or inclusion, except with the written consent, given prior to the merger or inclusion, of those who did not bear the obligations.

History: En. Sec. 38, Ch. 100, L. 1969; amd. Sec. 192, Ch. 253, L. 1974; R.C.M. 1947, 89-3438.

85-9-502. Annexation of property. To annex real property to the district, the procedure is the following:

(1) The directors shall petition the court.

(2) The petition shall:

(a) give a general description of the real property to be annexed sufficient to enable a person to determine if his property is in the proposed annexation;

(b) describe the benefits to accrue to the real property as a result of the annexation.

(3) The court shall:

(a) give notice and hold a hearing on the petition;

(b) upon good cause shown, order or deny the annexation.

History: En. Sec. 39, Ch. 100, L. 1969; R.C.M. 1947, 89-3439.

History: En. Sec. 40, Ch. 100, L. 1969; R.C.M. 1947, 89-3440.

85-9-504. Procedure to exclude lands. Any territory included within any district formed under the provisions of this chapter and not benefited in any manner by such district or its inclusion therein may be excluded therefrom. The procedure for exclusion consists of the following:

(1) A petition for exclusion shall be initiated by either the directors or the owner or owners of the land sought to be excluded.

(2) The petition shall give a description of the territory sought to be excluded sufficient to enable a person to determine if his property is in the proposed exclusion; shall set forth that such territory is not benefited in any manner by the district or its continued inclusion therein; and shall request that such territory be excluded from the district.

(3) When owners of property initiate the petition for exclusion, the petition shall be filed with the secretary of the district and shall be accompanied by a deposit of $100 to meet the costs incident to the process of exclusion. The unexpended balance of the deposit shall be returned to the petitioner.

(4) Upon the filing of such petition with the secretary of the district, the secretary shall duly call a meeting of the directors to consider the petition. The directors shall approve or disapprove of the merits of the petition. The secretary shall then file the petition, together with a copy of the action of the directors, with the court.

(5) The court shall give notice, hold a hearing, and issue an order either granting or denying the petition.

History: En. Sec. 41, Ch. 100, L. 1969; R.C.M. 1947, 89-3441.

Part 6

85-9-601. Assessments. (1) To the extent that anticipated revenues from rates, fees, and other charges fixed pursuant to 85-9-407(1) will not be sufficient to meet the district's anticipated obligations for annual operation, maintenance, and replacement or depreciation of works or for payment of the interest and principal on bonded indebtedness, the directors may make an assessment of not more than 2 mills on all taxable real property in the district for the purpose of fully meeting such obligations.

(2) In addition to the assessment authorized by subsection (1), the directors may annually make an assessment of up to 3 mills on the taxable real property in the district to pay interest and principal on bonded indebtedness.

85-15-209. High-hazard dam — determination. Any person proposing to construct any dam or reservoir shall make application to the department for a determination of whether the dam or reservoir is a high-hazard dam. The application must include the information required by the department. The department shall make the determination required by this section within 60 calendar days after a complete application is received by the department.

History: En. Sec. 6, Ch. 501, L. 1985.

85-15-210. Preparation and approval of plans. (1) A person may not begin construction of a high-hazard dam as determined under 85-15-209 without first obtaining a construction permit from the department.

(2) An application for a construction permit must be submitted to the department and must contain:

(a) plans and specifications for the proposed construction, prepared by or under the direction of an engineer experienced in dam design and construction; and

(b) other data and information required by the department.

(3) Within 60 calendar days after receipt of the application and any additional information requested by the department, the department shall:

(a) issue a construction permit or deny the application, as filed; or

(b) issue a construction permit upon terms, conditions, or modifications the department considers appropriate.

History: En. Sec. 7, Ch. 501, L. 1985.

85-15-211. Inspection and reports during construction. (1) An engineer must be in charge of and responsible for inspections during construction of any high-hazard dam.

(2) Inspections during construction must be performed at intervals necessary to ensure conformity with the permit. The engineer in charge or a qualified designee shall perform the inspections.

(3) The department shall set procedures and requirements for reporting information obtained from, during, or as the result of an inspection. The engineer in charge shall certify all reports to the department.

(4) The department may also inspect the dam during construction to ensure conformity with the construction permit.

(5) If the department finds that construction of the high-hazard dam does not conform with the construction permit, it may order that construction be stopped until changes are made in conformity with the permit.

History: En. Sec. 8, Ch. 501, L. 1985.

85-15-212. Operating permit. (1) An operation plan must be prepared by the owner and approved by the department prior to operation of the high-hazard dam or reservoir. The operation plan must set forth at a minimum:

(a) a reservoir operation procedure;

(b) a maintenance procedure for the dam and appurtenant works; and

(c) emergency procedures and warning plans.

(2) When construction is complete and if the dam or reservoir conforms to the construction permit and when an operation plan has been approved, the department shall issue a permit to operate the high-hazard dam or reservoir, containing such conditions on the safe operation of the dam as it considers necessary.

History: En. Sec. 9, Ch. 501, L. 1985.

85-15-213. Periodic inspections after construction. (1) Any high-hazard dam, whether or not previously permitted by the department, must be inspected as often as considered necessary by the department, but at least once every 5 years, in order to ensure the continued safe operation of the dam.

(2) Periodic inspections required by this section must be performed by a qualified engineer, who shall make a report of the inspection to the department. If the department finds that the dam conforms to current safety standards, it shall issue or reissue, as the case may be, a permit to continue operation of the dam, containing such conditions on the safe operation of the dam as it considers necessary.

(3) The owner is responsible for inspections required under this section.

History: En. Sec. 10, Ch. 501, L. 1985.

85-15-214. Requested inspections — costs — limitations against unsafe structures. (1) At its discretion or upon receipt of an affidavit complaining that the person or property of the complainant is endangered by the construction, maintenance, or operation of any dam or reservoir, the department may order an inspection of the dam or reservoir unless the data, records, and inspection reports on file are adequate to determine that the complaint is not meritorious.

(2) If the complainant continues to request an inspection even though the department has determined under subsection (1) that the complaint is not meritorious, the department may make the inspection upon requiring the complainant to deposit with the department money sufficient to cover the costs of the inspection.

(3) If the dam or reservoir is found to be defective, the department may require the person who owns the dam or reservoir to pay all or part of the expenses of inspection. If the department requires such payment, it shall present a bill of costs to the owner. The costs shall constitute a lien upon the

dam, reservoir, and other property of the owner and may be collected by appropriate action in a court of competent jurisdiction.

(4) If the dam or reservoir is not found to be defective after an inspection made under subsection (2), any money deposited by the complainant therefor must be paid to the general fund.

(5) If the inspection discloses defects in the dam or reservoir that, in the judgment of the department, constitute an immediate hazard to life or property, the department may order:

(a) the draining of the dam or reservoir;

(b) the limitation or cessation of use of the dam or reservoir or any defective appurtenant works; or

(c) any other steps to eliminate the hazard until the dam, reservoir, or appurtenant works have been made safe and approved by the department.

History: En. Sec. 11, Ch. 501, L. 1985.

85-15-215. Emergency repairs or breaching. (1) In case of an emergency, the department may take any action necessary to safeguard life and property. This action must be commenced immediately by the owner, or by the department at the owner's expense if the owner fails to act. The department must be notified immediately of any proposed emergency repairs or breaching to be instituted by the owner.

(2) All costs incurred by the department during an emergency must be paid by the owner on receipt of a bill of costs from the department. The costs are a lien upon the dam, reservoir, and other property of the owner and may be collected by appropriate action in a court of competent jurisdiction.

History: En. Sec. 12, Ch. 501, L. 1985.

85-15-216. Permit cancellation. Failure to comply with the provisions of 85-15-209 through 85-15-212 or 85-15-214 subjects the permit to cancellation at any time during the progress of construction or the operation of the dam. The department is authorized to cancel any permit if the provisions of 85-15-209 through 85-15-212 or 85-15-214 have not been or are not being complied with, and the cancellation operates as a forfeiture of all rights acquired under and by virtue of any permit approved by the department.

85-15-305. Liability of owners for damage. (1) Except as provided in subsection (2), nothing in this chapter relieves an owner of a dam or reservoir of any legal duty, obligation, or liability incident to its ownership or operation, including any damages resulting from leakage or overflow of water or floods caused by the failure or rupture of the dam or reservoir.

(2) The owner of a dam or reservoir that has been permitted by the department in accordance with this chapter is not, in the absence of negligence, liable for damages resulting from flows of water from the dam or reservoir which are of sufficient magnitude to exceed the limits of the 100-year floodplain as defined in 76-5-103. In addition, the owner of any dam or reservoir that has been permitted by the department in accordance with this chapter may, without incurring liability, allow passage through the reservoir of inflows without diminution.

History: En. Sec. 14, Ch. 501, L. 1985.

85-15-306. Filling of unsafe reservoir — complaint. Upon complaint, on oath made by any person or persons and filed in the district court, that a person, association, or corporation is filling or proposing to fill with water a reservoir or has filled or gathered water in a reservoir and that life and property are thereby endangered, the judge must appoint three disinterested persons, at least one of whom must be a resident of the county in which the dam or reservoir is situated and one of whom must be a competent and experienced civil or hydraulic engineer, each of whom must take an oath that he will examine the dam and reservoir to determine as to its security to the best of his ability.

History: En. Sec. 2140, Rev. C. 1907; amd. Sec. 2, Ch. 168, L. 1917; re-en. Sec. 2660, R.C.M. 1921; re-en. Sec. 2660, R.C.M. 1935; R.C.M. 1947, 89-703; Sec. 85-15-201, MCA 1983; redes. 85-15-306 by Code Commissioner, 1985.

85-15-307. Examination and report — subsequent actions. (1) It is the duty of the persons so appointed to make a thorough examination of the dam or reservoir. If, upon examination, they find that persons or property are endangered by reason of the dam or reservoir and it is not secure against the pressure of the water confined therein or the water that may be confined therein or against rains and freshets that may occur and if they find that the same is secure against the occurrence of the casualties mentioned or any of them, they must make a report in writing to the judge, which must be entered of record as a proceeding in court.

(2) If, upon such examination as to the safety of such reservoir, they consider such reservoir insufficient and insecure, they must further inquire whether the danger to be apprehended is imminent, and if they are of the opinion that such danger is imminent and that destruction of life or property may result from delay, it is their duty forthwith to draw from such reservoir the waters therein or so much thereof as will insure safety, and they must make return of their action to the judge. In the discharge of such duties, the persons so acting are peace officers.

(3) If, upon examination, they are of the opinion that such dam or reservoir is insecure and insufficient but that the danger therefrom is not immediate or imminent, they must so state in their report to the judge. The judge must thereupon cause a copy of the report to be served on the owner of

the property, the person in charge thereof, and any purchaser of the property under contract for deed, with a notice requiring him to make the same secure or to draw the water therefrom without delay. Unless such order is complied with after hearing, the judge may order the sheriff to draw from said dam or reservoir the waters thereof.

85-15-308. Issues and trial. The owner of the dam or reservoir may answer the complaint, and an issue may be joined at the hearing. The question of the security and sufficiency of the dam or reservoir may be tried before the court or jury as in other cases.

History: En. Sec. 2144, Rev. C. 1907; re-en. Sec. 2664, R.C.M. 1921; re-en. Sec. 2664, R.C.M. 1935; R.C.M. 1947, 89-707; Sec. 85-15-203, MCA 1983; redes. 85-15-308 by Code Commissioner, 1985.

85-15-309. Judgment. If the jury finds the dam or reservoir insufficient or insecure, judgment must be entered thereon, declaring such dam or reservoir a nuisance and that all the water be drawn therefrom. Costs may be taxed as in other cases to the losing party.

History: En. Sec. 2145, Rev. C. 1907; re-en. Sec. 2665, R.C.M. 1921; re-en. Sec. 2665, R.C.M. 1935; R.C.M. 1947, 89-708; Sec. 85-15-204, MCA 1983; redes. 85-15-309 by Code Commissioner, 1985.

85-15-311. Withdrawal of water pending an appeal. The judge may, after the verdict of the jury and pending an appeal, order that the water be drawn from the reservoir so as to make the same secure and safe until the final determination of the proceedings.

History: En. Sec. 2147, Rev. C. 1907; re-en. Sec. 2667, R.C.M. 1921; re-en. Sec. 2667, R.C.M. 1935; R.C.M. 1947, 89-710; Sec. 85-15-206, MCA 1983; redes. 85-15-311 by Code Commissioner, 1985.

Part 4

Local Government Proceedings

85-15-401. Municipality or county prohibited from regulation. No municipality or county may regulate, supervise, or provide for the regulation or supervision of any dam or reservoir in this state or the construction, maintenance, or operation thereof or limit the size of any dam or reservoir or the amount of water that may be stored therein. This chapter does not prevent a municipality or county from adopting ordinances or regulations regulating, supervising, or providing for the regulation or supervision of dams and reservoirs that:

(1) are not within the state's jurisdiction; or

(2) are not subject to regulation by another public agency or body.

History: En. Sec. 13, Ch. 501, L. 1985.

85-15-402. Appointment of experts by county commissioners. Whenever any person is constructing a dam or reservoir and complaint is made to the board of county commissioners that the same is being built in an insecure and unsafe manner and dangerous to life or property or that when constructed will be insecure and dangerous, it is the duty of the board to appoint three experts under whose supervision the dam or reservoir must be constructed. Such reservoir must not be filled with water, nor shall any water be allowed to flow therein, until the owner thereof has filed, in the office of the county clerk, a certificate, signed by a majority of the persons so appointed, to the effect that such dam or reservoir is constructed in a proper manner and is safe and secure.

85-15-404. Duty of board when complaint filed. Whenever such complaint is made to the board of commissioners, it is the duty of the board, in case such dam or reservoir is not being constructed in a safe and secure manner, to proceed against the owner or persons constructing the same in the manner provided for in this chapter, and any person may file a complaint and proceed against any such owner of or person constructing such dam or reservoir, as provided in this chapter.

Wharves and Docks

85-16-101. Who may build wharves and docks. Any person or persons owning land bordering upon any of the navigable waters within the state are granted a license and permit to build docks and wharves over, across, and upon the lands under water belonging to the state. Such docks and wharves shall be extended out into such navigable water such distance only as may be necessary to permit all boats, steamboats, and vessels to safely land thereat and discharge and take on their cargoes and passengers.

Article I

A. Where the name of a state is used in this compact, as a party thereto, it shall be construed to include the individuals, corporations, partnerships, associations, districts, administrative departments, bureaus, political subdivisions, agencies, persons, permittees, appropriators, and all others using, claiming, or in any manner asserting any right to the use of the waters of the Yellowstone River system under the authority of said state.

B. Any individual, corporation, partnership, association, district, administrative department, bureau, political subdivision, agency, person, permittee, or appropriator authorized by or under the laws of a signatory state and all others using, claiming, or in any manner asserting any right to the use of the waters of the Yellowstone River system under the authority of said state shall be subject to the terms of this compact. Where the singular is used in this article, it shall be construed to include the plural.

Article II

A. The state of Montana, the state of North Dakota, and the state of Wyoming are hereinafter designated as "Montana", "North Dakota", and "Wyoming", respectively.

B. The terms "commission" and "Yellowstone River Compact commission" mean the agency created as provided herein for the administration of this compact.

C. The term "Yellowstone River basin" means areas in Wyoming, Montana, and North Dakota drained by the Yellowstone River and its tributaries and includes the area in Montana known as lake basin but excludes those lands lying within Yellowstone National Park.

D. The term "Yellowstone River system" means the Yellowstone River and all of its tributaries, including springs and swamps, from their sources to the mouth of the Yellowstone River near Buford, North Dakota, except those portions thereof which are within or contribute to the flow of streams within the Yellowstone National Park.

E. The term "tributary" means any stream which in a natural state contributes to the flow of the Yellowstone River, including interstate tributaries and tributaries thereof but excluding those which are within or contribute to the flow of streams within the Yellowstone National Park.

F. The term "interstate tributaries" means the Clarks Fork, Yellowstone River; the Big Horn River (except Little Big Horn River); the Tongue River;

and the Powder River, whose confluences with the Yellowstone River are respectively at or near the city (or town) of Laurel, Big Horn, Miles City, and Terry, all in the state of Montana.

G. The terms "divert" and "diversion" mean the taking or removing of water from the Yellowstone River or any tributary thereof when the water so taken or removed is not returned directly into the channel of the Yellowstone River or of the tributary from which it is taken.

H. The term "beneficial use" is herein defined to be that use by which the water supply of a drainage basin is depleted when usefully employed by the activities of man.

I. The term "domestic use" shall mean the use of water by an individual or by a family unit or household for drinking, cooking, laundering, sanitation, and other personal comforts and necessities and for the irrigation of a family garden or orchard not exceeding one-half acre in area.

J. The term "stock water use" shall mean the use of water for livestock and poultry.

Article III

A. It is considered that no commission or administrative body is necessary to administer this compact or divide the waters of the Yellowstone River basin as between the states of Montana and North Dakota. The provisions of this compact, as between the states of Wyoming and Montana, shall be administered by a commission composed of one representative from the state of Wyoming and one representative from the state of Montana, to be selected by the governors of said states as such states may choose, and one representative selected by the director of the United States geological survey or whatever federal agency may succeed to the functions and duties of that agency, to be appointed by him at the request of the states to sit with the commission and who shall, when present, act as chairman of the commission without vote, except as herein provided.

B. The salaries and necessary expenses of each state representative shall be paid by the respective state; all other expenses incident to the administration of this compact not borne by the United States shall be allocated to and borne one-half by the state of Wyoming and one-half by the state of Montana.

C. In addition to other powers and duties herein conferred upon the commission and the members thereof, the jurisdiction of the commission shall include the collection, correlation, and presentation of factual data, the maintenance of records having a bearing upon the administration of this compact, and recommendations to such states upon matters connected with the administration of this compact, and the commission may employ such services and make such expenditures as reasonable and necessary within the limit of funds provided for that purpose by the respective states and shall compile a report for each year ending September 30 and transmit it to the governors of the signatory states on or before December 31 of each year.

D. The secretary of the army; the secretary of the interior; the secretary of agriculture; the chairman, federal power commission; the secretary of commerce, or comparable officers of whatever federal agencies may succeed to the functions and duties of these agencies and such other federal officers and officers of appropriate agencies of the signatory states having services or data useful or necessary to the compact commission shall cooperate, ex officio, with the commission in the execution of its duty in the collection, correlation, and publication of records and data necessary for the proper administration of the compact; and these officers may perform such other services related to the compact as may be mutually agreed upon with the commission.

E. The commission shall have power to formulate rules and regulations and to perform any act which it may find necessary to carry out the provisions of this compact and to amend such rules and regulations. All such rules and regulations shall be filed in the office of the state engineer of each of the signatory states for public inspection.

F. In case of the failure of the representatives of Wyoming and Montana to unanimously agree on any matter necessary to the proper administration of this compact, then the member selected by the director of the United States geological survey shall have the right to vote upon the matters in disagreement and such points of disagreement shall then be decided by a majority vote of the representatives of the states of Wyoming and Montana and said member selected by the director of the United States geological survey, each being entitled to one vote.

G. The commission herein authorized shall have power to sue and be sued in its official capacity in any federal court of the signatory states and may adopt and use an official seal which shall be judicially noticed.

Article IV

The commission shall itself or in conjunction with other responsible agencies cause to be established, maintained, and operated such suitable water gauging and evaporation stations as it finds necessary in connection with its duties.

Article V

A. Appropriative rights to the beneficial uses of the water of the Yellowstone River system existing in each signatory state as of January 1, 1950, shall continue to be enjoyed in accordance with the laws governing the acquisition and use of water under the doctrine of appropriation.

B. Of the unused and unappropriated waters of the interstate tributaries of the Yellowstone River as of January 1, 1950, there is allocated to each signatory state such quantity of that water as shall be necessary to provide supplemental water supplies for the rights described in paragraph A of this Article V, such supplemental rights to be acquired and enjoyed in accordance with the laws governing the acquisition and use of water under the doctrine of appropriation, and the remainder of the unused and unappropriated water is allocated to each state for storage or direct diversions for beneficial use on new lands or for other purposes as follows:

1. Clarks Fork, Yellowstone River

a.	to Wyoming	60%
	to Montana	40%

b. The point of measurement shall be below the last diversion from Clarks Fork above Rock Creek.

2. Big Horn River (exclusive of Little Big Horn River)
a. to Wyoming 80%
to Montana 20%

b. The point of measurement shall be below the last diversion from the Big Horn River above its junction with the Yellowstone River, and the inflow of the Little Big Horn River shall be excluded from the quantity of water subject to allocation.

3. Tongue River
a. to Wyoming 40%
to Montana 60%

b. The point of measurement shall be below the last diversion from the Tongue River above its junction with the Yellowstone River.

4. Powder River (including the Little Powder River)
a. to Wyoming 42%
to Montana 58%

b. The point of measurement shall be below the last diversion from the Powder River above its junction with the Yellowstone River.

C. The quantity of water subject to the percentage allocations in paragraph B 1, 2, 3, and 4 of this Article V shall be determined on an annual water year basis measured from October 1 of any year through September 30 of the succeeding year. The quantity to which the percentage factors shall be applied through a given date in any water year shall be, in acre-feet, equal to the algebraic sum of:

1. the total diversions, in acre-feet, above the point of measurement, for irrigation, municipal, and industrial uses in Wyoming and Montana developed after January 1, 1950, during the period from October 1 to that given date;

2. the net change in storage, in acre-feet, in all reservoirs in Wyoming and Montana above the point of measurement completed subsequent to January 1, 1950, during the period from October 1 to that given date;

3. the net change in storage, in acre-feet, in existing reservoirs in Wyoming and Montana above the point of measurement, which is used for irrigation, municipal, and industrial purposes developed after January 1, 1950, during the period October 1 to that given date;

4. the quantity of water, in acre-feet, that passed the point of measurement in the stream during the period from October 1 to that given date.

D. All existing rights to the beneficial use of waters of the Yellowstone River in the states of Montana and North Dakota below Intake, Montana, valid under the laws of these states as of January 1, 1950, are hereby recognized and shall be and remain unimpaired by this compact. During the period May 1 to September 30, inclusive, of each year, lands within Montana and North Dakota shall be entitled to the beneficial use of the flow of waters of the Yellowstone River below Intake, Montana, on a proportionate basis of acreage irrigated. Waters of tributary streams having their origin in either Montana or North Dakota, situated entirely in said respective states and flowing into the Yellowstone River below Intake, Montana, are allotted to the respective states in which situated.

E. There are hereby excluded from the provisions of this compact:

1. existing and future domestic and stock water uses of water, provided that the capacity of any reservoir for stock water so excluded shall not exceed 20 acre-feet;

2. devices and facilities for the control and regulation of surface waters.

F. From time to time the commission shall reexamine the allocations herein made and upon unanimous agreement may recommend modifications therein as are fair, just, and equitable, giving consideration among other factors to:

priorities of water rights;
acreage irrigated;
acreage irrigable under existing works; and
potentially irrigable lands.

Article VI

Nothing contained in this compact shall be so construed or interpreted as to affect adversely any rights to the use of the waters of Yellowstone River and its tributaries owned by or for Indians, Indian tribes, and their reservations.

Article VII

A. A lower signatory state shall have the right, by compliance with the laws of an upper signatory state, except as to legislative consent, to file application for and receive permits to appropriate and use any waters in the Yellowstone River system not specifically apportioned to or appropriated by such upper state as provided in Article V; and to construct or participate in the construction and use of any dam, storage reservoir, or diversion works in such upper state for the purpose of conserving and regulating water that may be apportioned to or appropriated by the lower state. Provided, that such right is subject to the rights of the upper state to control, regulate, and use the water apportioned to and appropriated by it. And provided further, that should an upper state elect, it may share in the use of any such facilities constructed by a lower state to the extent of its reasonable needs upon assuming or guaranteeing payment of its proportionate share of the cost of the construction, operation, and maintenance. This provision shall apply with equal force and effect to an upper state in the circumstance of the necessity of the acquisition of rights by an upper state in a lower state.

B. Each claim hereafter initiated for an appropriation of water in one signatory state for use in another signatory state shall be filed in the office of the state engineer of the signatory state in which the water is to be diverted, and a duplicate copy of the application or notice shall be filed in the office of the state engineer of the signatory state in which the water is to be used.

C. Appropriations may hereafter be adjudicated in the state in which the water is diverted, and where a portion or all of the lands irrigated are in another signatory state, such adjudications shall be confirmed in that state by the proper authority. Each adjudication is to conform with the laws of the state where the water is diverted and shall be recorded in the county and state where the water is used.

D. The use of water allocated under Article V of this compact for projects constructed after the date of this compact by the United States of America or any of its agencies or instrumentalities shall be charged as a use by the state in which the use is made. Provided, that such use incident to the diversion, impounding, or conveyance of water in one state for use in another shall be charged to such latter state.

Article VIII

A lower signatory state shall have the right to acquire in an upper state by purchase or through exercise of the power of eminent domain such lands, easements, and rights-of-way for the construction, operation, and maintenance of pumping plants, storage reservoirs, canals, conduits, and appurtenant works as may be required for the enjoyment of the privileges granted herein to such lower state. This provision shall apply with equal force and effect to an upper state in the circumstance of the necessity of the acquisition of rights by an upper state in a lower state.

Article IX

Should any facilities be constructed by a lower signatory state in an upper signatory state under the provisions of Article VII, the construction, operation, repairs, and replacements of such facilities shall be subject to the laws of the upper state. This provision shall apply with equal force and effect to an upper state in the circumstance of the necessity of the acquisition of rights by an upper state in a lower state.

Article X

No water shall be diverted from the Yellowstone River basin without the unanimous consent of all the signatory states. In the event water from another river basin shall be imported into the Yellowstone River basin or transferred from one tributary basin to another by the United States of America, Montana, North Dakota, or Wyoming or any of them jointly, the state having the right to the use of such water shall be given proper credit therefor in determining its share of the water apportioned in accordance with Article V herein.

Article XI

The provisions of this compact shall remain in full force and effect until amended in the same manner as it is required to be ratified to become operative as provided in Article XV.

Article XII

This compact may be terminated at any time by unanimous consent of the signatory states, and upon such termination all rights then established hereunder shall continue unimpaired.

Article XIII

Nothing in this compact shall be construed to limit or prevent any state from instituting or maintaining any action or proceeding, legal or equitable, in any federal court or the United States supreme court, for the protection of any right under this compact or the enforcement of any of its provisions.

Article XIV

The physical and other conditions characteristic of the Yellowstone River and peculiar to the territory drained and served thereby and to the development thereof have actuated the signatory states in the consummation of this compact, and none of them, or the United States of America by its consent and approval, concedes thereby the establishment of any general principle or precedent with respect to other interstate streams.

Article XV

This compact shall become operative when approved by the legislature of each of the signatory states and consented to and approved by the congress of the United States.

Article XVI

Nothing in this compact shall be deemed:

(a) to impair or affect the sovereignty or jurisdiction of the United States of America in or over the area of waters affected by such compact, any rights or powers of the United States of America, its agencies, or instrumentalities in and to the use of the waters of the Yellowstone River basin or its capacity to acquire rights in and to the use of said waters;

(b) to subject any property of the United States of America, its agencies, or instrumentalities to taxation by any state or subdivision thereof or to create an obligation on the part of the United States of America, its agencies, or instrumentalities, by reason of the acquisition, construction, or operation of any property or works of whatsoever kind, to make any payments to any state or political subdivision thereof, state agency, municipality, or entity whatsoever in reimbursement for the loss of taxes;

(c) to subject any property of the United States of America, its agencies, or instrumentalities to the laws of any state to an extent other than the extent to which these laws would apply without regard to the compact.

Article XVII

Should a court of competent jurisdiction hold any part of this compact to be contrary to the constitution of any signatory state or of the United States of America, all other severable provisions of this compact shall continue in full force and effect.

Article XVIII

No sentence, phrase, or clause in this compact or in any provision thereof shall be construed or interpreted to divest any signatory state or any of the agencies or officers of such states of the jurisdiction of the water of each state as apportioned in this compact.

IN WITNESS WHEREOF the commissioners have signed this compact in quadruplicate original, one of which shall be filed in the archives of the department of state of the United States of America and shall be deemed the authoritative original, and of which a duly certified copy shall be forwarded to the governor of each signatory state.

85-20-102. Purpose of the part. Under the provisions of the Yellowstone River Compact (Chapter 39, Laws of Montana 1951), all appropriative rights to the beneficial uses of the waters of the interstate tributaries of the Yellowstone River existing in each signatory state as of January 1, 1950, have been recognized and shall continue to be enjoyed in accordance with the laws governing the acquisition and use of water under the doctrine of appropriation. All appropriative rights to the beneficial uses of the waters of the interstate tributaries of the Yellowstone River acquired after January 1, 1950, are subject to distribution in the states of Montana and Wyoming in accordance to the percentages in the different basins as provided in subsections (2) and (3) of Article V of said compact. The purpose of this part is to provide the means to determine the various appropriative rights to the beneficial uses of water of the interstate tributaries of the Yellowstone River acquired after January 1, 1950, and the quantity of water diverted and used by each such appropriator during each year, to enable the state of Montana and the Yellowstone River Compact commission to comply with and to administer the percentage allocations as provided in subsections (2) and (3) of Article V of said compact.

85-20-104. Filing written statement with department. (1) Any person claiming an appropriative right to the use of any water of any interstate tributary, which right was acquired after January 1, 1950, shall, within 60 days after February 25, 1953, or before he diverts any water, file with the department at its office in Helena, Montana, a written statement containing the following information:

(a) the name of the claimant and his address;

(b) date of appropriation or the date when the water was first applied to a beneficial use;

(c) the quantity of water claimed;

Part 2

Fort Peck-Montana Compact

Part Cross-References

Reserved Water Rights Compact Commission, 2-15-212.

Indian and federal water rights, Title 85, ch. 2, part 7.

85-20-201. Fort Peck-Montana compact ratified. The compact entered into by the state of Montana and the Assiniboine and Sioux tribes of the Fort Peck Indian reservation and filed with the secretary of state of the state of Montana under the provisions of 85-2-702 on May 15, 1985, is ratified. The compact is as follows:

FORT PECK-MONTANA COMPACT

This Compact is entered into by and between THE STATE OF MONTANA and THE ASSINIBOINE AND SIOUX TRIBES OF THE FORT PECK INDIAN RESERVATION (herein called the "Parties") and shall become effective as set forth hereinafter.

The Parties agree as follows:

ARTICLE I
GENERAL PURPOSES

The basic purposes of this Compact are to determine finally and forever all rights of the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation in the State of Montana to water on, under, adjacent to, or otherwise appurtenant to the Reservation, to settle existing disputes and remove causes of future controversy between the Tribes and the State and between Indians of the Fort Peck Reservation and other persons concerning waters of the Missouri River, its tributaries, and ground water, and to settle all claims by the Tribes and by the United States on behalf of the Tribes in United States v. Aageson, Civ. No. 79-21-GF (D. Mont.), United States v. Aasheim, Civ. No. 79-40-BLG (D. Mont.) and the pending adjudication in the state water court initiated pursuant to the provisions of Chapter 697, Laws of Montana 1979.

ARTICLE II
DEFINITIONS

For purposes of this Compact, and for no other purposes, the following definitions apply:

(1) "Acre-foot" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet.

(2) "Annual" or "per year" means the calendar year commencing January 1 and ending December 31.

(3) "Board" means the Fort Peck-Montana Compact Board established by Article VI.

(4) "Conservation (carry-over) storage" is storage provided in a reservoir to capture and hold water that would otherwise go downstream. Such storage holds the water for beneficial use later in the season or is carried over to a subsequent season or seasons. Evaporation from the surface of such reservoir is considered to be a consumptive use to the extent that it exceeds the evaporative and transpirational losses which occurred in the reservoir area prior to its construction.

(5) "Consumptive use" means the amount of irrigation water that is transpired by vegetation, converted in the processes of photosynthesis and plant tissue growth, and evaporated from adjacent soils, water surfaces and foliage. For uses other than irrigation, consumptive use means the quantity of water diverted less the quantity of reusable return flow within the State.

(6) "Court of competent jurisdiction" means a state or federal district court which otherwise has jurisdiction of the subject matter and the parties, or a tribal court which otherwise has such jurisdiction provided that all parties to the case consent to tribal court jurisdiction.

(7) "Diversion" means the removal of water from its natural course or location by means of a ditch, canal, flume, bypass, pipeline, conduit, well, pump, or other structure or device, or the impoundment of water in a reservoir. Where a reservoir is constructed or operated on a stream, the annual diversion shall be the greater of:

(a) the inflow into the reservoir minus the outflow for releases or spills downstream from the reservoir, or

(b) withdrawals of water from the reservoir for actual use.

(8) "Domestic use" means the diversion of water by one or more individuals, family units or households for drinking, cooking, laundering, sanitation and other personal comforts and necessities; and for the irrigation of a family garden or orchard not exceeding one-half acre in area.

(9) "Fort Peck Irrigation Project" means those irrigation systems and works constructed pursuant to the Act of May 30, 1908, 35 Stat. 558, and all lands receiving water from such systems and works.

(10) "Fort Peck Reservoir" means that body of surface water impounded by Fort Peck Dam, at the current spillway elevation.

(11) "Full service irrigation" means any form of irrigation that distributes water on a regularly scheduled basis in order to satisfy the full seasonal crop and soil water requirements.

(12) "Ground water" means any water located under the surface of the land or the bed of any stream, lake, reservoir, or other body of surface water. All other water shall be considered surface water.

(13) "Indian" means any person who:

(a) is an enrolled member of the Tribes; or

(b) is a member of a tribe that is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians; or

(c) holds or is recognized by the Secretary of the Interior as eligible to hold trust or restricted property on the Reservation.

(14) "Industrial" means the use of water for any uses that benefit an industrial enterprise including, but not limited to, industrial cooling, energy production, and evaporation associated with any industrial operation. Among the purposes excluded from the industrial use category are irrigation, stockwater, and domestic uses.

(15) "Instream flow" means that quantity of water scheduled to remain in a stream to maintain fish and wildlife resources.

(16) "Missouri River" means the river formed by the confluence of the Gallatin, Jefferson and Madison Rivers in southwestern Montana, and flowing easterly beyond the eastern boundary of Montana.

(17) "Partial service irrigation" means the diversion of flood runoff from natural channels or water courses and spreading such water for the purpose of applying as much water as practicable to the land during periods of high stream flow to increase crop production.

(18) "Parties" means the Tribes and the State.

(19) "Person" means an individual or any other entity, public or private, including the State, the Tribes, and the government of the United States and all officers, agents, and departments thereof.

(20) "Regulatory Storage" is storage provided as a part of a water distribution system for operational purposes. Evaporation loss from the distribution system itself is accounted for and is a part of the unit consumptive use rate established in this Compact and is therefore not considered to be a separate item of consumptive use.

(21) "Reservation" means the Fort Peck Indian Reservation as established in the agreement of December 28 and December 31, 1886, and confirmed by the Act of May 1, 1888, 25 Stat. 113.

(22) "Reusable" means capable of further beneficial use.

(23) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "State" means the Director of the State Department of Natural Resources and Conservation or its successor agency.

(24) "Transfer" means any authorization for the delivery or use of water by a joint venture, service contract, lease, sale, exchange or other similar agreement.

(25) "Tribal Water Right" means the right to divert and use water as confirmed by Article III of this Compact.

(26) "Tribes" means the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation and all officers, agents and departments thereof. Unless

otherwise indicated, for purposes of notification or consent, "Tribes" means the Tribal Chairman or the Chief Executive Official of the Tribes at the time.

(27) "Tributary" or "tributaries of the Missouri River that flow through or adjacent to the Reservation" means those tributaries of the Missouri River that traverse the Reservation, generally in a north to south direction, including:

(a) streams that form the east and west boundaries of the Reservation (Big Muddy Creek, Porcupine Creek and the Milk River);

(b) streams that originate outside the Reservation but empty into the Missouri River within the boundaries of the Reservation (the Poplar River and its tributaries);

(c) streams that are wholly contained within the boundaries of the Reservation (Chelsea Creek, Tule Creek, Wolf Creek, Oswego Creek, and Little Porcupine Creek); and

(d) all other watercourses that traverse the Reservation.

(28) "Wasteful" means the unreasonable loss of water through the design or negligent operation of a diversion or of a water distribution facility.

ARTICLE III
TRIBAL WATER RIGHT

A. General Statement of the Tribal Water Right. The Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation have the right to divert annually from the Missouri River, certain of its tributaries, and ground water beneath the Reservation the lesser of (i) 1,050,472 acre-feet of water, or (ii) the quantity of water necessary to supply a consumptive use of 525,236 acre-feet per year for the uses and purposes set forth in this Compact with a priority date of May 1, 1888, provided that no more than 950,000 acre-feet of water, or the quantity of water necessary to supply a consumptive use of 475,000 acre-feet may be diverted annually from surface water sources. This right is held in trust by the United States for the benefit of the Tribes and is further defined and limited as set forth in this Compact.

B. Persons Who May Use the Tribal Water Right. All uses of water authorized under any applicable law by the following persons shall be considered and calculated as uses of the Tribal Water Right:

1. the Tribes within or outside the Reservation;

2. all individual Indians using water within the Reservation including, but not limited to, Indians exercising uses established pursuant to state law prior to the effective date of this Compact;

3. all non-Indian successors-in-interest to any allottee actually using water within the Reservation by virtue of a water right arising under the laws of the United States, which water right was acquired directly or indirectly from an Indian predecessor-in-interest;

4. all other persons receiving water from the Fort Peck Irrigation Project including, but not limited to, persons exercising uses established pursuant to state law prior to the effective date of this Compact;

5. all other persons authorized to use water by the Tribes pursuant to this Compact, within or outside the Reservation;

6. the United States as trustee for the Tribes or any Indian including, but not limited to, persons exercising uses established pursuant to state law prior to the effective date of this Compact.

C. Measure of Consumptive Use for Irrigation. Irrigation usage of the Tribal Water Right shall be conclusively deemed to cause a consumptive use of 1.8 acre-feet per acre per year for full service irrigation and 0.48 acre-feet per acre per year for partial service irrigation. Any loss of water due to evaporation from reservoirs constructed in the future for conservation (carry-over) storage rather than for regulatory storage by the United States for the benefit of the Tribes or any Indian, or constructed for such conservation storage by the Tribes or by any Indian, shall be counted as a consumptive use.

D. Purposes for Which the Tribal Water Right May be Used. Within the Reservation, use of water in the exercise of the Tribal Water Right for any purpose may be authorized by the Tribes without regard to whether such use is beneficial as defined by valid state law. No use of the Tribal Water Right may be wasteful or inconsistent with the terms of this Compact. Outside the Reservation, any use of water in the exercise of the Tribal Water Right shall be beneficial as defined by valid state law on the date the Tribes give notice to the State of a proposed use outside the Reservation.

E. Facilities Diverting or Using the Tribal Water Right Outside the Reservation. All persons diverting or using the Tribal Water Right outside the Reservation, including the Tribes as sovereign, shall apply for all permits, certificates, variances and other authorizations required by valid state laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water located outside the Reservation, and shall comply with all applicable provisions of this Compact. A diversion or use of water in the exercise of the Tribal Water Right may be made only after all permits, certificates, variances or other authorizations applied for pursuant to this paragraph have been obtained, and the diversion or use has not been found unlawful by a court of competent jurisdiction.

F. Amounts To Be Diverted from the Missouri River.

1. Diversions of water for use within or outside the Reservation may be made in the exercise of the Tribal Water Right from Fort Peck Reservoir and the mainstem of the Missouri River—but without utilization of the conservation (carry-over) storage of Fort Peck Reservoir—in the following amounts:

(a) during the months of November, December, January, February and March, not to exceed 40,000 acre-feet per month;

(b) during the months of April and October, not to exceed 50,000 acre-feet per month;

(c) during the months of May and September, not to exceed 105,000 acre-feet per month;

(d) during the month of June, not to exceed 145,000 acre-feet;

(e) during the month of July, not to exceed 215,000 acre-feet;

(f) during the month of August, not to exceed 180,000 acre-feet.

Provided that the aggregate of monthly diversions in the exercise of the Tribal Water Right from surface water shall not exceed 950,000 acre-feet per year, and the total annual consumptive use shall not exceed 475,000 acre-feet.

2. The Tribes shall report the amount of all actual diversions from Fort Peck Reservoir and the mainstem of the Missouri River to the United States Army Corps of Engineers by April 1st of the calendar year following the year in which such diversions are made in accordance with paragraph 5 of section J of this Article.

3. All diversions authorized by paragraph 1 of this section may be made without payment to the United States, but the Tribes and any user of the Tribal Water Right shall otherwise comply with all generally applicable laws and regulations of the United States.

G. Export of the Tribal Water Right Outside the State. Use of the Tribal Water Right outside the State shall be in compliance with all valid provisions of state law in effect at the time of the proposed transfer that prohibit, regulate, condition, or permit the transportation of water outside the State.

H. Non-use of the Tribal Water Right not a Forfeiture. Non-use of any part of the Tribal Water Right shall not constitute a relinquishment, forfeiture or abandonment of the right to such use.

I. Sources of Diversions of the Tribal Water Right. In the exercise of the Tribal Water Right water may be diverted:

1. Within the Reservation for use within the Reservation from:

(a) the mainstem of the Missouri River within or adjacent to the Reservation;

(b) any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River; and

(c) any ground water source.

2. Outside the Reservation for use within the Reservation from:

(a) Fort Peck Reservoir;

(b) any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River; and

(c) the mainstem of the Missouri River below Fort Peck Dam.

Diversions authorized by subparagraphs (a) and (c) shall comply with paragraph 1 of section J of this Article.

3. Within or outside the Reservation for use outside the Reservation from:

(a) Fort Peck Reservoir;

(b) any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River, provided that water from these sources shall not be transported outside the respective watershed of each stream;

(c) the mainstem of the Missouri River below Fort Peck Dam; and

(d) the mainstem of the Missouri River above Fort Peck Reservoir.

Diversions authorized by subparagraphs (a) and (c) shall comply with paragraph 1 of section J of this Article. Diversions authorized by subparagraph (b) shall comply with paragraph 4 of section K of this Article. Diversions authorized by subparagraph (d) shall comply with paragraph 3 of section J of this Article.

J. Notice of and Conditions upon Diversions and Uses of the Tribal Water Right.

1. The Tribes shall give the State not less than 180 days advance written notice of any proposed diversion or use of the Tribal Water Right authorized

by subparagraphs 2(a) and 2(c) and subparagraphs 3(a) and 3(c) of section I of this Article and shall, in the case of any transfer of the Tribal Water Right, except agreements on the tributaries pursuant to paragraph 4 of section K of this Article, offer the State an opportunity to participate as provided in paragraph 2 of section K of this Article. Such notice shall include sufficient documentation to demonstrate that:

(a) the proposed use of water complies with section D of this Article;

(b) for diversions outside the Reservation, the proposed means of diversion and the construction and operation of the diversion works are adequate;

(c) the proposed use and diversion will not adversely affect, except with the consent of the owner of such right, any of the following rights to the use of water existing at that time:

(i) any water right arising under the laws of the United States;

(ii) any appropriative right to the use of water established pursuant to the laws of the State that has not been abandoned, but excluding any reservation of water made pursuant to the laws of the State which has not been put to actual beneficial use by the date notice is given;

(d) the proposed use does not cause any unreasonable significant adverse environmental impact; and

(e) proposed diversions in excess of 4,000 acre-feet per year and 5.5 cubic feet per second of water will not:

(i) substantially impair the quality of water for existing uses in the source of water from which the diversion is made;

(ii) be made where low quality water which can economically be used is legally and physically available to the Tribes for the proposed use;

(iii) create or substantially contribute to saline seep; or

(iv) substantially injure fish or wildlife populations in the source of water from which the diversion is made.

The requirements of subparagraph (c) of this paragraph may be satisfied by a showing that the owner of such right has consented to the adverse effect. Subparagraph (c) shall not be construed to alter or avoid in any way the consequences resulting from such consent under state law.

2. A proposed diversion or use of the Tribal Water Right outside the Reservation authorized by subparagraphs 2(a) and 2(c) and subparagraphs 3(a) and 3(c) of section I of this Article may be challenged only:

(a) within 30 days after the expiration of the notice period provided in paragraph 1 of this section;

(b) in a court of competent jurisdiction; and

(c) by the State or by a person whose rights are adversely affected by the proposed diversion or use.

In any such case, the Tribes shall have the burden of going forward and the burden of proving by a preponderance of the evidence that they have satisfied the requirements of paragraph 1 of this section.

3. Diversions of water in the exercise of the Tribal Water Right outside the Reservation from the mainstem of the Missouri River above Fort Peck Reservoir, as authorized in subparagraph 3(d) of section I of this Article, may be made so long as the Tribes or any user of the Tribal Water Right:

(a) comply with all the laws of the State in effect at the time the diversion is proposed, including but not limited to state water use statutes;

(b) give not less than 180 days advance written notice of any proposed diversion in the manner required in paragraph 5 of this section:

(i) if the diversion is to be made from a reservoir, to the operator of the reservoir; or

(ii) if the diversion is not to be made from a reservoir, to the operator of the first dam, upstream and downstream, if any, from the point of diversion;

(c) obtain approval of the diversion from the State legislature.

4. For purposes of demonstrating compliance with subparagraph 1(c) and subparagraph 3(a) of this section and paragraph 6 of Section K of this Article, the portion of the Tribal Water Right to be diverted will be deemed an appropriative right which has:

(a) been acquired on May 1, 1888;

(b) a point of diversion and use where the water is actually being diverted and used or, if not actually being diverted, where the water would first flow on or adjacent to the Reservation;

(c) the existing use or, if not actually in use, an irrigation use provided, however, that the use can be transferred to a purpose other than irrigation without restriction as to period of use so long as the requirements of Section F of this Article are observed;

(d) the actual consumptive use or, if not actually in use or if being used for irrigation purposes, a consumptive use of 1.8 acre-feet per acre per year; and

(e) not been abandoned or forfeited.

5. Any notice of a diversion required by paragraph 3 of this section and any report of a diversion required by paragraph 2 of section F of this Article shall specify:

(a) the person authorized to make the diversion;

(b) the amount of water proposed or authorized to be diverted annually;

(c) the amount proposed or authorized for annual consumptive use;

(d) the point of diversion;

(e) the period of use;

(f) the place of use; and

(g) the purposes for which the water may be used.

K. Transfers of the Tribal Water Right.

1. As an incident to and in the exercise of the Tribal Water Right, the Tribes may transfer within or outside the Reservation, as authorized by federal law and this Compact, the right to use water but may not permanently alienate such right or any part thereof. Any such transfer of water by the Tribes shall be subject to all provisions of this Compact.

2. Prior to making any transfer which authorizes use of water outside the Reservation to be diverted from the mainstem of the Missouri River, including Fort Peck Reservoir, the Tribes shall give not less than 180 days advance written notice to the State of the proposed terms and conditions of the transfer, and shall offer the State the opportunity to participate in the transfer as a substantially equal partner with the Tribes, assuming obligations and receiving benefits of the transfer under terms and conditions agreed to by the

Parties. If the State does not accept the opportunity within the 180-day notice period, or if the State unreasonably delays the institution or completion of approval processes required by state law or unreasonably delays resolution of any litigation arising from its decision to accept the opportunity, the Tribes may proceed with the proposed transfer without State participation, provided that the proposed transfer shall be subject to all other provisions of this Compact. If the State does not accept the opportunity, or if State participation in the joint transfer is not approved, the State shall not later pursue the opportunity, except in accordance with all the terms of this Compact, including paragraph 3 of this section.

3. Prior to making any transfer allowing use or diversion of water from Fort Peck Reservoir or from the mainstem of the Missouri River below Fort Peck Dam, the State shall give not less than 180 days advance written notice to the Tribes of the proposed terms and conditions of the transfer and shall offer the Tribes the same opportunity to participate in the transfer as a substantially equal partner with the State, assuming obligations and receiving benefits of the transfer on terms and conditions agreed to by the Parties. If the Tribes do not accept the opportunity within the 180 day notice period, the State may proceed with the proposed transfer without the Tribes' participation, and the Tribes shall not later pursue the opportunity except in accordance with all the terms of this Compact, including paragraph 2 of this section.

4. If otherwise authorized by federal law, the Tribes may enter into an agreement with any person who is exercising or proposing to exercise a right under the laws of the State to use surface water outside the Reservation on any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River, which agreement allows such person's diversion and use and protects it from any other exercise of the Tribal Water Right provided, however, that:

(a) before use of such water, the person shall have complied with all applicable state laws concerning the acquisition of a water right;

(b) subsequent to acquisition of the state water right, regulation of its use shall be subject to state law;

(c) the amount of water subject to the agreement shall be considered a consumptive use of the Tribal Water Right;

(d) the agreement shall not permanently alienate the Tribal Water Right or any part thereof.

5. The Tribes may transfer annually only the following amounts of water for consumptive use outside the Reservation:

(a) 50,000 acre-feet;

(b) plus 35 percent of any amount over 200,000 acre-feet but less than 300,000 acre-feet authorized by state law to be transferred annually by the State from waters within the State;

(c) plus 50 percent of any amount over 300,000 acre-feet authorized by state law to be transferred annually by the State from waters within the State.

Transfers of the Tribal Water Right shall not be considered as part of any amounts authorized by state law to be transferred annually by the State.

6. In no event shall the Tribes be authorized to transfer less than 50,000 acre-feet of water per year outside the Reservation. The limits established in paragraph 5 of this section shall apply so long as the State is authorized to transfer annually at least 50,000 acre-feet of water pursuant to state law. If statutory authorization for the State to transfer water is not enacted, is repealed, or is held invalid, or if the amount of water authorized by state law to be transferred by the State is less than 50,000 acre-feet per year, then for any period in which the authorization or the limitation is not in force the Tribes may transfer water in accordance with all terms and conditions of this Compact other than paragraph 5 of this section. However, such transfers will be subject to any volume limitations provided by federal law or, in the absence of any federal volume limitations, the Tribes may transfer water in accordance with all terms and conditions in this Compact other than paragraph 5 of this section and with any volume limitations imposed by state law which would apply to a holder of a right to the use of water established pursuant to state law. For the purposes of complying with volume limitations imposed by state law, the Tribal Water Right will be deemed to have the characteristics set forth in paragraph 4 of section J of this Article.

7. Unless authorized by federal law, the State shall not in any manner whatsoever tax any proceeds received by the Tribes as consideration for any transfer of the Tribal Water Right.

L. Instream Flows.

1. At any time within five years after the effective date of this Compact, the Tribes may establish a schedule of instream flows to maintain any fish or wildlife resource in those portions of streams, excluding the mainstem of the Milk River, which are tributaries of the Missouri River that flow through or adjacent to the Reservation. These instream flows shall be a part of the Tribal Water Right with a priority date of May 1, 1888. Water remaining in a stream to maintain instream flows pursuant to such a schedule shall be counted by the Tribes as a consumptive use of surface water.

2. Instream flows may be established by the Tribes only in accordance with this section. The Tribes may change the use of water for maintenance of instream flows to another purpose only with the consent of the State.

M. No Other Diversion or Use of the Tribal Water Right. No other diversion or use of the Tribal Water Right shall be made other than those authorized or recognized by this Article.

ARTICLE IV
PROTECTION OF USES UNDER STATE LAW

A. Uses Protected.

1. The following existing and proposed uses of water by Indians within the Reservation are protected and shall not be subordinated to any other uses by subsequent provisions of this Article:

(a) a maximum of 113 acres of irrigated land within the Wolf Creek watershed;

(b) a maximum of 11 acres of irrigated land within the Poplar River watershed;

(c) a maximum of 523 acres of irrigated land within the Big Muddy Creek watershed; and

(d) a maximum of 300 acres of land irrigated with ground water near the confluence of Porcupine Creek and the Milk River.

2. Uses of water by Indians within the Reservation for stockwatering purposes not in excess of 20 acre-feet per year for each impoundment and for all domestic uses are protected and shall not be subordinated to any other uses by subsequent provisions of this Article.

3. With the exception of the uses protected in paragraphs 1 and 2 of this section, diversion and use of water in the exercise of the Tribal Water Right except from the mainstem of the Missouri River, including water allocated to instream flow purposes, shall be subordinate to the following uses of water in the Porcupine Creek, Poplar River, Big Muddy Creek, Little Porcupine Creek, Wolf Creek, Tule Creek, and Chelsea Creek watersheds, including all tributary streams within those watersheds, and all underlying ground water whether or not hydrologically connected with the surface water:

(a) the beneficial uses of water with a priority date of December 31, 1984 or earlier established under the laws of the State and identified in Appendix A to this Compact;

(b) such rights of the United States Fish and Wildlife Service to the waters of Big Muddy Creek for the Medicine Lake National Wildlife Refuge as may be finally determined by the state water court;

(c) beneficial uses of water for domestic purposes;

(d) beneficial uses of water for stock watering purposes in existence prior to December 31, 1984, and beneficial uses of water for stock watering subsequent to that date not in excess of 20 acre-feet per year for each impoundment.

4. Except as to the rights protected in paragraph 3 of this section, the Tribal Water Right shall be prior to all rights to the use of surface and ground water established under the laws of the State with a priority date later than May 1, 1888.

B. Changes of Protected Uses.

1. The rights to the use of water protected by paragraph 3 of section A of this Article may be changed in accordance with state law as to point of diversion, period of use, place of use, purpose of use, or ownership of the right provided that:

(a) the proposed change will not adversely affect any use of the Tribal Water Right existing at the time of the proposed change;

(b) the amount of surface water flowing onto the Reservation within the Poplar River, the Big Muddy Creek, or the Porcupine Creek watersheds, will not be changed; and

(c) the source of the water will not be changed from surface to ground water, or from ground to surface water, or from one watershed to another.

2. Upon receiving an application for a proposed change authorized by paragraph 1 of this section, the State shall give the Tribes such advance written notice as is required by state law.

3. If an irrigation use is changed in any manner, or if a reservoir is constructed or operated which results in the consumptive use of water by evaporation, the following limitations apply:

(a) no more than 1.8 acre-feet of consumptive use per year may be authorized for each acre of land retired from full service irrigation; and

(b) no more than 0.48 acre-feet of consumptive use per year may be authorized for each acre of land retired from partial service irrigation;

(c) evaporation from any reservoir shall be charged as a consumptive use in accordance with definition 4 in Article II.

4. If an irrigation use is changed to an industrial use, all diversions and return flows shall be measured by a device acceptable to and subject to periodic inspection and testing by the State and the Tribes at the expense of the owner. The owner shall also have the quality of the return flows sampled and tested by a laboratory acceptable to the State and the Tribes as often as reasonably required by the State and the Tribes and at the expense of the owner.

ARTICLE V
ADMINISTRATION OF WATER RIGHTS

A. United States Administration. All rights to the use of water received from the Fort Peck Irrigation Project shall be administered by the United States, and the United States has the final and exclusive jurisdiction to resolve all disputes concerning uses of water received from the Fort Peck Irrigation Project subject to any judicial review provided by applicable law.

B. Tribal Administration.

1. The Tribal Water Right shall be administered by the Tribes, and the Tribes have the final and exclusive jurisdiction to resolve all disputes between users of the Tribal Water Right, except for disputes concerning uses of water received from the Fort Peck Irrigation Project and disputes involving users of the Tribal Water Right pursuant to agreements authorized in Article III, section K, paragraph 4.

2. Administration and enforcement of the Tribal Water Right shall be pursuant to a water code, which shall be adopted by the Tribes and submitted for approval to the Secretary of the Interior within one year after ratification of this Compact by the Parties. Such code shall take effect 18 months after ratification of this Compact unless sooner disapproved by the Secretary of the Interior. Pending the adoption and approval of the tribal water code, administration and enforcement of the Tribal Water Right shall be by the Secretary of the Interior as trustee for the Tribes. The Tribes shall not administer the Tribal Water Right in a manner which denies any person a water right owned by that person which arises under the laws of the United States.

3. Within six months after the tribal water code takes effect or within six months after disapproval of the code by the Secretary, the Tribes or the Secretary of the Interior shall provide the State with notice of each existing use of the Tribal Water Right which shall show:

(a) the person authorized to make the diversion;

(b) the amount of water authorized to be diverted annually;

(c) the amount of water authorized for annual consumptive use;

(d) the point of diversion;

(e) the period of use;

(f) the place of use;

(g) the uses for which the water may be diverted; and

(h) the relative priority of the use as against other uses of the Tribal Water Right.

4. The Tribes shall thereafter notify the State within sixty days after the end of each quarter year of all new uses of surface and ground water authorized by the Tribes during the preceding quarter year and of all new uses of the Tribal Water Right actually commenced during that quarter year.

C. State Administration.

1. The State shall administer all rights to the use of surface water and ground water within or outside the Reservation which are not a part of the Tribal Water Right to the fullest extent allowed by law. The State shall have the final and exclusive jurisdiction to resolve all disputes between users of rights established under state law.

2. Within two years after ratification of this Compact, the State shall notify the Tribes of all existing uses authorized by the State on the mainstem of the Missouri River below Fort Peck Dam and on all tributaries of the Missouri River that flow through or adjacent to the Reservation, except the mainstem of the Milk River. The State shall notify the Tribes within sixty days after the end of each quarter year of all new uses of surface and ground water permitted by the State on each of these sources during the preceding quarter year and of all new uses of water actually commenced pursuant to the laws of the State during that quarter year on each of these sources. Notices required by this paragraph shall include the information required by paragraph 3 of section B of this Article.

3. No agency of the State shall administer any part of the Tribal Water Right. From and after the effective date of this Compact, unless the Tribal Water Right confirmed in Article III is fully utilized at the time application is made for a permit or other authorization, the State shall issue no permit or other authorization to divert or use water within the Reservation to the following persons:

(a) the Tribes;

(b) any Indian;

(c) any non-Indian successor-in-interest to any allottee on the Reservation by virtue of that person's assertion of a right arising under the laws of the United States; or

(d) the United States for the benefit of the Tribes or any Indian or any non-Indian successor-in-interest to any allottee.

D. Regulation of Ground Water.

1. With the exception of uses protected in Article IV, neither the State nor the Tribes shall authorize or continue the use of ground water without the consent of the other if such use will:

(a) result in degradation of instream flows established pursuant to section L of Article III; or

(b) contribute to the permanent depletion or the significant degradation of the quality of a ground water source which in whole or in part underlies the Reservation.

2. With the exception of uses protected in Article IV, the State shall not, without the Tribes' consent, authorize or continue the use of ground water

that unreasonably interferes with a use of ground water authorized by the Tribes. The Tribes shall not, without the consent of the State, authorize or continue the use of ground water that unreasonably interferes with a use of ground water authorized by the State and protected by Article IV of this Compact.

ARTICLE VI
FORT PECK-MONTANA COMPACT BOARD

A. Board established. There is hereby established the Fort Peck-Montana Compact Board, which shall exercise powers and responsibilities as set forth in this Article.

B. Membership.

1. The Board shall consist of three members. One member shall be appointed by the Governor of the State of Montana or, in lieu of such appointment, shall be the Governor. The salary and expenses of that member shall be paid by the State. One member shall be appointed by the Chairman of the Tribes, or in lieu of such appointment, shall be the Tribal Chairman. The salary and expenses of that member shall be paid by the Tribes. The third member shall be selected by agreement of the other two members. The salary and expenses of that member and all other expenses of the Board shall be shared equally by the State and the Tribes subject to the availability of funds. Each member duly appointed or selected shall hold office for a term of six years, and for so long thereafter until a successor shall be appointed or selected. The initial term of each member shall be staggered, with one member serving a six-year term, one a four-year term, and one a two-year term. The initial term of each member shall be chosen by lot, or by any other procedure and agreed upon in writing by the first three members of the Board. If the Governor or the Tribal Chairman serves on the Board, such person shall not serve on the Board beyond his or her term as Governor or Tribal Chairman.

2. Should the two appointed members fail to agree within sixty days of the effective date of this Compact or within thirty days after any vacancy occurs, on the selection of the third member, the following procedure shall be utilized:

(a) within five days each member shall nominate no more than five and no less than three persons to serve as a member of the Board;

(b) within fifteen days thereafter each member shall reject all but one of the persons nominated by the other member;

(c) the chief judge of the United States District Court for the District of Montana shall select the third member of the Board from the remaining two nominees. If the chief judge declines for any reason to select the third member, the chief justice of the Montana Supreme Court shall make the selection from the remaining two nominees.

3. Vacancies on the board shall be filled by appointment of a person to serve the unexpired term of the member whose seat has become vacant. If the member appointed by the Governor becomes unable or unwilling to serve on the Board, the Governor shall make the appointment within fifteen days. If the member appointed by the Tribal Chairman becomes unable or unwilling to serve, the Tribal Chairman shall make the appointment within fifteen days. If the third member of the Board becomes unable or unwilling to serve on the

Board, the remaining members shall fill the vacancy under the procedure set forth in paragraphs 1 and 2 of this section.

C. Quorum and Vote Required. Two members of the Board shall constitute a quorum if reasonable notice has been provided in advance to the absent member. Meetings may be in person or, in appropriate circumstances, by telephone. All Board decisions shall be by a majority of the Board, shall be in writing and, together with any dissenting opinions, shall be delivered to all parties in the proceeding before the Board, and to both Parties to this Compact.

D. Jurisdiction of the Board. The Board shall have exclusive jurisdiction, only as provided in this Compact, to resolve any controversy over the use of ground water to which this Compact pertains, any controversy over the use of surface water within the Reservation or from any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River, and any controversy as to the meaning of this Compact between: (i) on the one hand, the Tribes or any person or persons claiming a right to use the Tribal Water Right; and (ii) on the other hand, the State or any person or persons claiming a right to use water under the laws of the State.

E. Powers and Duties of the Board.

1. The Board shall have power to administer oaths to witnesses, to take evidence under oath, and to issue subpoenas to compel the attendance of witnesses or for the production of books, records, documents and other evidence. The courts of the Tribes and the State shall enforce any subpoena issued by the Board in the same manner as prescribed by the laws of the Tribes and the State for enforcing a subpoena issued in a civil action by courts of the Tribes and the State.

2. The Board shall hold hearings in proceedings before it and shall give advance notice to the Tribes, the State and all parties to any proceeding personally or by registered mail not less than five days before any hearing. Appearance at a hearing waives such notice. The Board may hear and determine the controversy upon the evidence produced notwithstanding the failure of a party duly notified to appear. The Tribes, the State and all parties to the proceeding are entitled to be heard, to present evidence material to the controversy, to cross-examine witnesses appearing at the hearing, and to be represented by counsel at their own expense.

3. The Board may enter an order after hearing granting any party to the dispute before it temporary or preliminary injunctive relief, or any other relief which the Board deems appropriate except money damages. The Board or any party to a proceeding before the Board may invoke the jurisdiction of a court of competent jurisdiction to enforce any temporary or preliminary injunction so issued by the Board by filing a petition for enforcement naming the enjoined person as respondent. Upon filing the petition, the court shall enter any order it deems appropriate for enforcement of the injunction ordered by the Board, including but not limited to injunctive relief on such terms as to bond or otherwise as it deems proper for the security of the rights of the enjoined party. The United States, the State, and the Tribes shall not be required to post any

bond. The court may appoint a water commissioner or master to monitor compliance with such relief.

4. The Board shall adopt rules and regulations to govern its procedures and to carry out its responsibilities under this Compact. Such rules and regulations must be consistent with all provisions of this Compact. All records of the Board shall be open to public inspection except for privileged information.

5. The Board may employ or seek assistance of such clerical or other personnel and may establish such offices as it deems necessary for the performance of its functions according to this Compact. Pending the establishment of a principal office, the Board's office shall be located at Fort Peck Agency of the Bureau of Indian Affairs.

6. The annual budget of the Board shall be subject to approval of the Parties to this Compact and to the availability of funds appropriated by the Parties.

F. Review and Enforcement of Board Decisions.

1. Decisions by the Board shall be effective immediately, unless stayed for a period of time prescribed by the Board. On application of a party within a reasonable time, but in any event no more than ninety days after a decision is rendered, the Board may modify or correct any decision:

(a) where there was an evident material miscalculation of figures or an evident material mistake in the description of any person, thing or property referred to in the decision;

(b) where the decision is imperfect in a matter of form not affecting the merits of the controversy; or

(c) where the decision requires clarification.

2. Any party before the Board may, within ten days of any final decision, apply to the Board to modify or set aside any aspect of the decision. Notice of such application shall be served personally or by registered mail upon all parties to the proceeding. Any other party shall have ten days within which to respond to the application. The Board shall act on such application within ten days after a response is filed or, if no response is filed, within fifteen days after the application is filed. If the Board fails to act within the time limitations set forth in this paragraph, the application shall be deemed denied. The time for appeal provided in paragraph 3 of this section shall not begin to run until the application is determined as provided in this paragraph.

3. Any party before the Board may appeal any final decision by the Board to a court of competent jurisdiction within thirty days of such decision. The notice of appeal shall be filed with the Board and served personally or by registered mail upon the Tribes, the State and all parties to the proceeding before the Board, and all such persons shall thereafter have the right to participate in the appeal.

4. In any appeal, the Board's decision shall be presumed to be valid, and may be vacated by the court only on one of the following grounds:

(a) the decision is not supported by substantial evidence;

(b) the decision was procured by corruption, fraud or undue means;

(c) there was evident partiality or corruption by the Board or by any member;

(d) the Board was guilty of misconduct in refusing to hear the dispute, or in refusing to hear evidence pertinent and material to the controversy, or any other clear misbehavior by which the rights of any party have been substantially prejudiced;

(e) the Board exceeded its authority under the terms of this Compact; or

(f) the decision is contrary to law.

5. Unless an appeal is timely filed as provided in paragraph 3 of this section, any decision of the Board shall be confirmed or enforced by any court of competent jurisdiction on petition of the Board, the Tribes, the State or any party before the Board in the proceeding in which the decision was made.

6. A court of competent jurisdiction in which a timely appeal is filed pursuant to paragraph 3 of this section, or in which a petition to confirm or enforce is filed pursuant to paragraph 5 of this section, may order such temporary or permanent relief as it considers just and proper.

7. An appeal may be taken from any decision of the court in which a timely appeal is filed pursuant to paragraph 3 of this section, or in which a petition to confirm or enforce is filed pursuant to paragraph 5 of this section, in the manner and to the same extent as from orders or judgments of the court in a civil action.

8. In any appeal or petition to confirm or enforce the Board's decision, the Board shall file with the court the record of the proceedings before the Board.

G. Waiver of Immunity. The Tribes and the State hereby waive their respective immunities from suit, including any defense the State shall have under the Eleventh Amendment of the Constitution of the United States, to permit the appeal or judicial enforcement of Board decisions as provided in this Compact, except that such waivers shall not extend to any action for money damages including costs and attorneys' fees as a result of such judicial action.

ARTICLE VII
FINALITY AND EFFECTIVENESS OF COMPACT

A. Ratification. This Compact shall become effective as to both parties when ratified by the Legislature of the State of Montana and the Fort Peck Tribal Executive Board and approved by the United States Departments of Justice and the Interior. Ratification by the State and by the Tribes is irrevocable, and this Compact may not be modified in any manner whatsoever except with the joint consent of the legislative body of both Parties.

B. Incorporation into Decrees and Disposition of Federal Suits.

1. The Parties and the United States shall petition for incorporation of this Compact into the preliminary decrees and final decrees in any state water court proceedings to adjudicate any right to the use of water to which this Compact pertains, and this Compact may not be modified in any manner whatsoever without the consent of both Parties as provided in section A of this Article. The United States shall not be bound by provisions of this Compact until it is incorporated into the final decree, as provided in this section.

2. This Compact shall only be filed as a proposed consent decree in United States v. Aageson, Civ. No. 79-21-GF (D. Mont.), or United States v. Aasheim, Civ. No. 79-40-BLG (D. Mont.) if there is a final determination by the state

courts that they lack jurisdiction over, or that the state proceedings are inadequate to adjudicate, some or all of the water rights asserted in either of the above cases. Upon a final determination that the state courts have jurisdiction over, and that the state proceedings are adequate to adjudicate all of the water rights in the above cases, the United States and the Parties will immediately execute a joint motion pursuant to Rule 41(a) of the Federal Rules of Civil Procedure to dismiss with prejudice and on their merits all claims by the Tribes and the United States on behalf of the Tribes in the pending cases.

ARTICLE VIII
DISCLAIMERS AND RESERVATION OF RIGHTS

A. Disclaimers. Nothing in this Compact shall be so construed or interpreted:

1. to establish the nature, extent, transferability, or manner of enforcement of water rights of any Indian reservation other than the Fort Peck Indian Reservation;

2. to preclude the acquisition or exercise of an appropriative right to the use of water under state law by the Tribes or any individual Indian outside the Reservation by purchase of such right or by purchase of land, or by application to the State;

3. to preclude the acquisition or exercise of an appropriative right to the use of water under state law by the Tribes or any individual Indian within the Reservation:

(a) by purchase of such right or by purchase of land, provided that water rights acquired by such purchase after ratification of this Compact shall be deemed to be an exercise of the Tribal Water Right; or

(b) by application to the State, provided that the Tribal Water Right confirmed in Article III has been fully utilized at the time an application is made;

4. to determine the relative rights inter sese of persons using water under the authority of the State or the Tribes;

5. to limit in any way the rights of the Parties or any other person to litigate any issues or questions not resolved by this Compact;

6. to authorize the taking of a water right which is vested under state or federal law;

7. to create or deny substantive rights through headings or captions used in this Compact; or

8. to address or prejudge whether, in any interstate apportionment of the waters of the Missouri River Basin, the Tribal Water Right shall be counted as a part of the waters apportioned to the State.

B. Reservation of Rights. The Parties expressly reserve all rights not granted, recognized or relinquished in this Compact.

ARTICLE IX
TRIBAL RELINQUISHMENT OF OTHER WATER CLAIMS

The Tribal Water Right confirmed in Article III shall be final and conclusive. With the exception of the Tribal Water Right recognized herein and rights established under state law as authorized by this Compact, the Tribes and the United States as trustee for the Tribes hereby relinquish forever any and all existing and future claims to water from any source and for any purpose. This relinquishment includes, but is not limited to, any claim for water derived from: aboriginal use of land or water; any Indian treaties; any act of Congress; and any executive act of the United States.

ARTICLE X
BINDING EFFECT

A. Persons Bound. Upon the effectiveness of this Compact, its terms will be binding:

1. upon the State and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the State to the use of water in the State of Montana, provided that for purposes of consent, ratification, or authorization the validity of consent, ratification, or authorization is to be determined by Montana law; and

2. upon the Tribes and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right to the use of the Tribal Water Right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribes, or any right arising under tribal law, provided that for purposes of consent, ratification, or authorization the validity of consent, ratification or authorization is to be determined by Tribal law. Notwithstanding any other provision of law, the Tribal Water Right confirmed in Article III of the Fort Peck-Montana Compact includes conclusively and forever the water rights arising under the laws of the United States of all persons on the Fort Peck Reservation by virtue of the ownership or purchase of any Indian allotment, and the courts of the State shall not have jurisdiction to adjudicate or decree any such right claimed by any such person.

B. Effect on Other Laws. The provisions of the Fort Peck-Montana Compact shall supersede any present or future enactment or common law rule inconsistent with such Compact including but not limited to Montana Code Annotated 28-2-708.

ARTICLE XI
SEVERABILITY

Should any part of this Compact other than Articles III, IV, VII, or IX be held to be invalid, all other parts thereof shall continue to be in full force and effect. Should any part of Articles III, IV, VII, or IX be held invalid, either party may withdraw from the remaining provisions of this Compact by action of its legislative body taken within one year from the determination of such invalidity.

ARTICLE XII
LEGISLATION

A. Future legislation. The parties agree to seek enactment of further legislation if it becomes necessary to effectuate the provisions and purposes of this Compact, and to protect such provisions and purposes from challenge and attack, provided that no provisions of the Compact shall be modified as to substance except as provided in Article VII.

B. Petition to Congress.

1. The Parties hereby request the Montana legislature to petition Congress to enact the following legislation in substantially the following form:

"Sec. 2. For purposes of this Act, the term:

A Water Agreement may authorize the diversion or use of water within or outside the Reservation subject to all terms of the Fort Peck-Montana Compact.

"(b) The Secretary shall approve or disapprove any Water Agreement within (1) one hundred and eighty days after submission or (2) sixty days after compliance, if required, with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C) and any other requirement of federal law, whichever is later. Any party to such an agreement may enforce the provisions of this subsection pursuant to 28 U.S.C. 1361. Tribal Water Right

A. Quantification of Water Right.

The water rights of the Northern Cheyenne Tribe are as follows:

1. Existing Non-Agricultural Uses.

Tribal and individual Indian stockwater, domestic and municipal water uses on the Reservation and in existence as of the ratification date are hereby recognized and protected as part of the Tribal Water Right, and are in addition to the water rights set forth in Sections A.2., A.3., and A.4. of this Article. All such existing uses shall be governed by the terms of this Compact.

2. Tongue River.

Subject to the terms of this Compact, the Tribal Water Right in the Tongue River basin consists of the right to divert or use or to permit the diversion or use of up to 32,500 acre-feet per year, from a combination of direct flow, storage, and exchange water. Tribal and individual Indian irrigation uses in existence on the Reservation in the Tongue River basin as of the ratification date are recognized and protected, and shall be counted as a use of the 32,500 acre-feet per year right described in Section A.2. of this Article.

a. Direct Flow Right. The Tribe has a right to divert or use or permit the diversion or use of up to 12,500 acre-feet of water per year from direct flow of the Tongue River and its tributaries with a priority date of October 1, 1881; provided, that:

i. The Tribe's annual depletion of its direct flow water right in the Tongue River and its tributaries shall not exceed 75 percent of the amount diverted, or 9,375 acre-feet per year; and

ii. The Tribe's direct flow water right in the Tongue River and its tributaries may not be used in a manner that adversely affects:

A. Miles City Decree water rights, or

B. Water rights from off-Reservation tributaries of the Tongue River, which are finally decreed in any general adjudication of the Tongue River, or are recognized under state law until such final adjudication, and which have a priority date of June 30, 1973 or earlier and are based on the use of an irrigation system in place and not abandoned as of June 30, 1973.

b. Storage and Exchange Water. The Tribe has a right to divert or deplete, or permit the diversion or depletion of, up to 20,000 acre-feet per year from a combination of water stored in the Tongue River Reservoir and exchange water. The availability of the 20,000 acre-feet per year depends, as provided in the Tongue River Water Model, upon the annual schedule utilized by the Tribe for diversions of Tongue River direct flows. Except as provided in paragraph A.2.c.ii. of this Article, any reduction in Tongue River Reservoir stored water resulting from Tribal diversions of Tongue River direct flows shall not affect State contract rights, as defined in this Compact, but shall be satisfied exclusively from the right described in this paragraph. Tribal use of stored water from the Tongue River Reservoir shall be measured at the Reservoir.

c. Shortages.

i. The Tribal Water Right in the Tongue River basin shall be subject to shortages due to natural low flows that are consistent with the period of record used in the Tongue River Water Model in diversion amounts not to exceed 50% in any one year and 100% cumulative in any ten-year period.

ii. Decreases in the amount of water stored in the Tongue River Reservoir that are caused by: (i) sedimentation; (ii) Reservoir inflows lower than those assumed in the Tongue River Water Model; (iii) normal and expected maintenance of the Tongue River Dam and associated structures; or (iv) normal and expected deterioration of the Tongue River Dam and associated structures shall not be considered a failure of the Tongue River Dam as that term is utilized in paragraph A.2.f. of this Article. All such decreases in water availability shall be shared pro rata among all users of stored water including the Tribe.

d. Excess Water. The Tribe shall, as part of the Tribal Water Right, have the first right to use excess water, as defined in this Compact; provided, that total use of the Tongue River Tribal Water Right shall not exceed 32,500 acre-feet per year diverted from direct flow, storage, and exchange water.

Tribal nonuse of excess water in any one year shall not affect the right of the Tribe to use excess water in any subsequent year.

e. Contract Water. Nothing in this Compact shall affect the water, and any rights therein, secured to the Tribe by Water Purchase Contract No. 232 for 7,500 acre-feet per year, dated March 15, 1938, between the Tongue River Water Users Association, the Water Conservation Board of the State of Montana and the United States, through the Secretary of the Interior. Any water entitlement pursuant to the Contract shall be in addition to and not a part of the 32,500 acre-feet per year Tribal Water Right set forth above.

f. Failure of Tongue River Dam. In the event of a failure of the Tongue River Dam which causes a substantial diminution of the Tribe's storage right set forth in paragraph A.2.b. of this Article, and notwithstanding the provisions of Article V.A. of this Compact, any party may within 180 days of said failure request the others to renegotiate this Compact. The parties shall have three years from the date of the request to reach a new agreement, during which time all of the provisions in this Compact shall remain in full force and effect. If no party requests renegotiation, or if a new agreement is not reached within three years of the request, the provisions of paragraph A.2.a.ii. of this Article concerning the subordination of the Tongue River direct flow Tribal Water Right to other specified water rights, shall become null and void; provided, that all other provisions of this Compact shall remain in full force and effect. The Tribe shall not be entitled to void or terminate this Compact, or to assert that the State is in breach of the Compact, for a failure of the Tongue River Dam; provided, that any and all other rights of the Tribe arising from such event shall not be affected by this paragraph.

3. Rosebud Creek.

a. Water Right. The Tribe has a right to divert or use or to permit the diversion or use from Rosebud Creek and its tributaries, for agricultural purposes only, of 1,800 acre-feet of water per year, or enough water to irrigate 600 acres of land per year, whichever is less, with a priority date of October 1, 1881. Tribal and individual Indian irrigation uses in existence as of the ratification date on-Reservation in the Rosebud Creek basin are recognized and protected, and shall be considered a use of the 1,800 acre-feet per year right described in this paragraph.

b. Implementation. The Tribe agrees that in the period between May 1, 1991 and July 1, 1993, the Tribe, or persons authorized by it, will develop no more than 200 acres of land in addition to irrigation uses in existence as of May 1, 1991, through irrigation methods involving pumping of alluvial groundwater, except that the Tribe, or persons authorized by it, may develop up to the full 600 acres of land, or any portion thereof, by any other method. During this period, the Tribe and the State agree to share any hydrologic data available for use in connection with any test which the State undertakes to evaluate impacts, if any, of development of on-Reservation lands on off-Reservation lands. After July 1, 1993, the Tribe, or persons authorized by it, may develop the full 600 acres of land by any irrigation method.

c. Additional Water Right. In addition to the water right described in paragraph A.3.a. of this Article, the Tribe has a right to divert or use or permit the diversion or use from Rosebud Creek and its tributaries, for any purpose, of up to 19,530 acre-feet of water per year, or enough water to irrigate 6,510 acres of land per year, whichever is less, with a priority date of October 1, 1881. The Tribe may not exercise the water right set forth in this paragraph in a manner that adversely affects a water right finally decreed in any general adjudication of the Rosebud Creek basin or, until such final decree is issued, a water right recognized under state law, which 1) has a priority date of June 30, 1973 or earlier, and 2) is based on the use of an irrigation system in place and not abandoned as of June 30, 1973; provided, that the state law water rights protected in this paragraph shall not exceed:

i. North of the Reservation, 8,100 acre-feet of water per year or enough water to irrigate 2,700 acres of land per year, whichever is less; and

ii. South of the Reservation, 540 acre-feet of water per year or enough water to irrigate 180 acres of land per year, whichever is less.

d. Dams and Impoundments. The Tribe shall not construct, within the Rosebud Creek basin, any dams or impoundments to store water naturally arising in Rosebud Creek and its tributaries; provided, that the Tribe may construct stockwater impoundments pursuant to paragraph A.5. of this Article, and, subject to other applicable provisions of this Compact, may construct dams or impoundments within the Rosebud Creek basin to store water from sources outside the basin, including non-alluvial groundwater.

e. Moratorium on Permits. The Montana Department of Natural Resources and Conservation shall order a moratorium on the issuance of permits in the Rosebud Creek basin concurrent with the ratification date of this Compact. The moratorium shall not apply to applications for permits by persons who have entered into deferral agreements with the Tribe for Rosebud Creek basin water as provided in Section G. of this Article. The Department may order the moratorium lifted if it determines that water is available over and above the amount necessary to fulfill the Tribal Water Right described in paragraph A.3.a. and Section A.3.c. of this Article. The Tribe may challenge the Department's determination to lift the moratorium under the procedure set forth in Article IV of this Compact.

4. Groundwater.

a. Alluvial Groundwater. The Tribe has a right to withdraw and use, or permit the withdrawal and use of, alluvial groundwater in lieu of surface water diversions of the Tongue River and Rosebud Creek Tribal Water Right, subject to the same terms and conditions of this Compact that apply to such surface water diversions. Alluvial water withdrawn from wells or manifolded well systems with a capacity of 100 gallons per minute or less shall not be deducted from the Tribal Water Right. For wells or manifolded well systems with a capacity of withdrawing greater than 100 gallons per minute of alluvial water, the entire amount withdrawn shall be deducted from the Tribal Water Right.

b. Non-alluvial Groundwater. Except where a Tribal right to non-alluvial groundwater is established pursuant to Article VII.B. of this Compact, Tribal use or authorization of use of non-alluvial groundwater shall, at the election of the Tribe, comply with state law in effect at the time of the use or with the alluvial groundwater provisions of paragraph A.4.a. of this Article.

5. Stockwater Impoundments. The Tribe may construct, or permit the construction of, stockwater impoundments on the Reservation, where the capacity of the impoundment is less than 15 acre-feet and the impoundment is constructed on a source other than a perennial flowing stream. The amount of water so impounded shall not be deducted from the Tribal Water Right.

6. Subirrigation. The Tribe shall be entitled to take advantage of any natural subirrigation occurring on the Reservation. Where otherwise consistent with state law, persons outside the Reservation shall also be entitled to take advantage of natural subirrigation.

7. Big Horn Reservoir (Yellowtail) Storage.

a. Tribal Allocation. As a part of the Tribal Water Right, the Secretary of the Interior shall allocate 30,000 acre-feet per year of stored water in Big Horn Reservoir, Yellowtail Unit, Lower Bighorn Division, Pick-Sloan Missouri Program, Montana, measured at the dam, for use or disposition by the Tribe for any beneficial purpose, either on or off the Reservation, pursuant to the terms of this Compact. This allocation is subject to the prior reserved water rights, if any, of any Indian tribe, or of persons claiming water through that tribe, to that water. Any use or disposition of water from Big Horn Reservoir off the Reservation by the Tribe is subject to the specific provisions relating to such use or disposition in any act of Congress ratifying this Compact.

b. Payment for Tribal Allocation. The Tribe shall not be required to make payments to the United States for any portion of the Tribal Water Right stored in Yellowtail Reservoir unless and until the water is used or sold by the Tribe in which case the Tribe shall make annual payments to the United States as hereinafter provided.

i. Use or Sale for Municipal and Industrial (M&I) Purposes. For each acre-foot of stored water used or sold for M&I purposes, the Tribe shall pay annually to the United States an amount to cover the proportionate share of the annual operation, maintenance and replacement (OM&R) costs, and the proportionate share of the capital costs with appropriate interest for the Yellowtail Unit allocable to the Tribe's stored water. Upon full payment of the capital costs allocable to the Tribe's stored water supply, the annual payments shall include only a proportionate share of the annual OM&R costs. Such annual payments shall be reviewed and adjusted, as appropriate, to reflect the actual capital and OM&R costs for the Yellowtail Unit.

ii. Agricultural, Domestic, Livestock, and Other Uses. For each acre-foot of stored water used or sold for other than M&I purposes, the Tribe shall pay annually to the United States an amount to cover the OM&R cost for the Yellowtail Unit allocable to the Tribe's stored water, which amount shall be reviewed and adjusted, as appropriate, to reflect the actual OM&R costs for the Yellowtail Unit. The Bureau of Indian Affairs shall transfer sufficient funds on a nonreimbursable basis to the Bureau of Reclamation to cover allocable OM&R costs under this paragraph.

c. Rates and Revenues. Except for payments required to be made to the United States as set forth above, the Tribe shall set such rates as it deems proper for its use or sale of stored water and shall retain all revenues from its use or sale of said stored water; provided, that the United States reserves the right to use any and all water stored in Yellowtail Reservoir for hydropower generation.

d. Agreement. Following ratification of this Compact, and upon development of a demand for the water under Section A.7. of this Article, the United States and the Tribe shall enter into an appropriate agreement, if required, setting forth the terms and conditions under which water will be made available to the Tribe, and for the collection and disposition of revenues in connection therewith.

B. Persons Entitled to Use the Tribal Water Right.

The Tribal Water Right may be used by the Tribe, or persons authorized to use water by the Tribe pursuant to Article III; provided, that:

1. Such use is in accordance with the terms of this Compact;

2. That the Tribe shall give preference to Tribal members to use the Tribal Water Right; and

3. Such water right may be transferred from one Tribal member to another Tribal member for agricultural purposes only upon the transfer of land on the Reservation from one Tribal member to another Tribal member.

C. Place of Use of the Tribal Water Right.

Pursuant to a Tribal water code adopted as prescribed in Article III of this Compact, and subject to all other provisions of this Compact, the Tribe shall have the right to use or permit use of the Tribal Water Right with any point of diversion or any place of use on or off the Reservation; provided, that any use of the Tribal Water Right off the Reservation shall not be deemed to convert the Tribal Water Right to a state water right, and subsequent nonuse of the Tribal Water Right off the Reservation shall not constitute a relinquishment, forfeiture, or abandonment of the Right.

D. Purposes of the Tribal Water Right.

Except as provided in paragraph A.3.a. of this Article, the Tribe may authorize use of the Tribal Water Right on the Reservation for any purpose without regard to whether such use is beneficial as defined by state law. Off the Reservation, any use of the Tribal Water Right shall comply with Article III.B.

E. Conditions Upon Uses of the Tribal Water Right.

The Tribe shall adopt appropriate regulations to ensure that use of the Tribal Water Right is not wasteful and does not degrade water quality.

F. Transfer of Tribal Water Right.

The Tribe shall not transfer water naturally arising in Rosebud Creek or its tributaries for use off the Reservation. The Tribe may transfer any other part of the Tribal Water Right for use on or off the Reservation pursuant to the terms of this Compact. This paragraph shall not affect the right of the Tribe to enter into a deferral agreement regarding Rosebud Creek water pursuant to Section G. of this Article.

G. Deferral Agreements.

After the ratification date, the Tribe may enter into an agreement with any person who is exercising or proposing to exercise a right under state law to use surface water off the Reservation, which agreement protects the person's right from any exercise of the Tribal Water Right; provided, that:

1. Before use of such water, the person shall have complied with all applicable state laws concerning the acquisition of a water right;

2. Subsequent to acquisition of the state water right, regulation of its use shall be subject to state law;

3. The amount of water subject to the agreement shall be deducted from the amount of water available for depletion by the Tribe in the basin from which the water is being diverted; and

4. The agreement shall not permanently alienate the Tribal Water Right or any part thereof.

H. Effect of Non-Use of Tribal Water Right.

Non-use of any part of the Tribal Water Right shall not constitute a relinquishment, forfeiture or abandonment of the Right.

I. Tribal Water Right to be Held in Trust.

The Tribal Water Right shall be held in trust by the United States for the benefit of the Tribe.

Article III

Administration of Water Rights

A. Tribal Administration.

1. Except as otherwise provided in this Compact, the use of the Tribal Water Right shall be administered by the Tribe, and the Tribe has the final and exclusive jurisdiction to resolve all disputes between users of the Tribal Water Right. Administration and enforcement of the Tribal Water Right shall be pursuant to a water code, which shall be developed and adopted by the Tribe and submitted for approval to the Secretary of the Interior within one year after ratification of this Compact. Pending the adoption and approval of the Tribal water code, the administration and enforcement of the Tribal Water Right shall be by the Secretary of the Interior.

2. Within six months after the Tribal water code takes effect, the Tribe shall provide the State with notice of each use of the Tribal Water Right, including uses in existence as of the ratification date of this Compact and those established since that time, which shall show:

a. The person authorized to make the diversion;
b. The amount of water authorized to be diverted annually;
c. The amount of water authorized for annual consumption;
d. The point of diversion;
e. The period of use;
f. The place of use;
g. The uses for which the water may be diverted; and
h. The relative priority of the use as against other uses of the Tribal Water Right.

3. The Tribe shall thereafter notify the State within sixty days after the end of each quarter year of all new uses of surface and groundwater authorized by the Tribe during the preceding quarter year and of all new uses of the Tribal Water Right actually commenced during that quarter year. The notice shall be in the same format as that prescribed in Section A.2. of this Article.

4. The Tribe shall provide the State with not less than 180-days written notice prior to the start of construction of any project to divert any portion of

the Tribal Water Right from the Big Horn River or the Big Horn Reservoir for use on the Reservation, or from the Tongue River or the Tongue River Reservoir for use on the Reservation in the Rosebud Creek basin. The notice shall describe: any diversion, conveyance and storage facilities; the amounts of water to be diverted and consumed; and the purpose, place, and period of the proposed use. Diversion or use of water from such project may be made only after all permits, certificates, variances or other authorizations described in paragraph B.3. of this Article have been obtained. With respect to any such project or diversion, the State or any affected person may seek such remedies as may be available under federal, state, or tribal law, and nothing in this Compact shall be construed to affect the rights of any party under such law.

B. Off-Reservation Uses of the Tribal Water Right.

1. Off-Reservation Uses. Any use of the Tribal Water Right involving a point of diversion or place of use located off the Reservation shall be considered an off-Reservation use; provided, that releases or diversions from Big Horn Reservoir or Tongue River Reservoir for use on the Reservation shall not be considered off-Reservation uses.

2. Subsequent Federal or State Law. All off-Reservation uses of the Tribal Water Right shall comply with the requirements set forth in Section B. of this Article until such time as the statutory or common law of the United States or the State of Montana establishes that off-Reservation uses of Indian water rights may occur without regard to state law.

3. Diversion Facilities.

With respect to diversion or transportation facilities located off the Reservation, the Tribe or persons using the Tribal Water Right shall apply for all permits, certificates, variances and other authorizations required by state laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water. A diversion or use of water in the exercise of the Tribal Water Right may be made only after all permits, certificates, variances or other authorizations applied for pursuant to this paragraph have been obtained.

4. Off-Reservation Uses in Tongue and Rosebud Basins.

a. The Tribe shall provide the State with not less than 180-days advance written notice of any off-Reservation use, transfer, or change of use of the Tribal Water Right:

i. Within the Tongue River basin, or

ii. Utilizing Tongue River water off-Reservation in the Rosebud Creek basin.

b. The notice shall include sufficient documentation to demonstrate that:

i. The proposed use of water is a beneficial use as defined by Montana law in effect at that time;

ii. The proposed means of diversion, and the construction and operation of the diversion works are adequate;

iii. The proposed use, transfer, or change of use will not adversely affect, except with the consent of the owner of such right:

A. Any water right arising under the laws of the United States, or

B. Any right to the use of water established pursuant to the laws of the State; except that, if the portion of the Tribal Water Right that is the subject of the proposed off-Reservation use, transfer or change of use is the storage and exchange right set forth in Article II.A.2.b. of this Compact, the Tribe need only demonstrate that Miles City Decree rights will not be adversely affected by such use, transfer, or change of use.

iv. The proposed use, transfer, or change of use does not cause any unreasonable significant adverse environmental impact; and

v. Proposed uses, transfers, or changes in use in excess of 4,000 acre-feet per year and 5.5 cubic feet per second of water will not:

A. Substantially impair the quality of water for existing uses in the source of water from which the diversion is made;

B. Be made where low quality water which can economically be used is legally and physically available to the Tribe for the proposed use;

C. Create or substantially contribute to saline seep; or

D. Substantially injure fish or wildlife populations in the source of water from which the diversion is made.

c. A proposed use, transfer or change of use of the Tribal Water Right pursuant to Section B.4. of this Article may be challenged:

i. Within 30 days after the expiration of the notice period provided in Section B.4.a. of this Article;

ii. In a court of competent jurisdiction; and

iii. By the State or by a person whose rights are adversely affected by the proposed use, transfer, or change of use.

In any such case, the Tribe shall have the burden of proving by a preponderance of the evidence that it has satisfied the requirements of Section B.4.b. of this Article. A Tribal notice that conforms to the requirements of Section B.4.b. of this Article shall be prima facie evidence of its contents.

5. Off-Reservation Uses Outside Tongue and Rosebud Basins.

Except as provided in Section B.4. of this Article, no person may initiate an off-Reservation use, transfer, or change of use of the Tribal Water Right without first applying for and receiving authorization for the use, transfer, or change of use pursuant to Montana law in effect at the time of the application.

C. State Administration.

1. The State shall administer all rights to the use of surface water and groundwater within the Reservation which are not a part of the Tribal Water Right. The State shall have the final and exclusive jurisdiction to resolve all disputes between users of rights established under state law.

2. Within one year after ratification of this Compact, the State shall notify the Tribe of all existing uses of surface and groundwater for which a permit has been issued by the State in the Tongue River or Rosebud Creek basins. The notice shall state:

a. The person authorized to make the diversion;

b. The amount of water authorized to be diverted annually;

c. The amount of water authorized for annual consumption;

d. The point of diversion;

e. The period of use;

f. The place of use;

g. The uses for which the water may be diverted; and

h. The priority date of the use.

3. The State shall notify the Tribe within sixty days after the end of each quarter year of all new uses of surface and groundwater for which a permit has been issued by the State in the Tongue River or Rosebud Creek basins during the preceding quarter year and of all new uses of water actually commenced pursuant to the laws of the State during that quarter year on each of these sources. The notice shall be in the same format as that prescribed in Section C.2. of this Article.

D. Operation of Tongue River Reservoir.

1. To provide for Tongue River Reservoir operation procedures that are consistent with the purposes of this Compact, a reservoir operation plan shall be developed by a five-member advisory committee. The committee shall have representatives from the State of Montana, the Tongue River Water Users Association, the Northern Cheyenne Tribe, the United States, and a fifth member to be selected by the other four. The advisory committee shall annually agree upon a reservoir operation schedule setting forth proposed uses of storage and direct flow for the year. The Department of Natural Resources and Conservation or its successor shall thereupon be responsible, consistent with the terms of this Compact and other applicable law, for the daily operation of the Reservoir and for implementation of the reservoir operation plan.

2. The reservoir operation plan shall provide for the operation of the project for fish and wildlife purposes depending on the availability of water on an annual basis. This provision shall not create an operational preference for fish and wildlife purposes relative to other project purposes.

3. The Secretary of the Interior shall pay annually to the State an amount to cover the proportionate share of the annual operation, maintenance and replacement (OM&R) costs for the Tongue River Dam allocable to the Tribe's stored water in the Reservoir.

Article IV

Northern Cheyenne-Montana Compact Board

A. Establishment of Board.

There is hereby established the Northern Cheyenne-Montana Compact Board. The Board shall consist of three members: one member appointed by the Governor of the State of Montana; one member appointed by the Northern Cheyenne Tribal Council; and one member selected by the other two members. All members shall be appointed within six months of the ratification date of this Compact and within thirty days of the date any vacancy occurs. Each member shall serve a five-year term and shall be eligible for reappointment. The initial term of each member shall be staggered with one member serving a five-year term, one a four-year term, and one a three-year term. The initial term of each member shall be chosen by lot. Expenses of the members appointed by the State and the Tribe shall be borne by the entity appointing the member. The expenses of the third member and all other expenses shall be borne equally by the Tribe and the State, subject to the availability of funds.

B. Membership.

Should the two appointed members fail to agree on the selection of a third member within sixty days of the ratification date of this Compact or within thirty days after any vacancy occurs, the following procedure shall be utilized:

1. Within five days each member shall nominate three persons to serve as a member of the Board;

2. Within fifteen days thereafter each member shall reject two of the persons nominated by the other member;

3. The chief judge of the United States District Court for the District of Montana shall select the third member of the Board from the remaining two nominees. If the chief judge declines for any reason to select the third member, the chief justice of the Montana Supreme Court shall make the selection from the remaining two nominees.

C. Quorum and Vote Required.

Two members of the Board shall constitute a quorum if reasonable notice has been provided in advance to the absent member. All Board decisions shall be by a majority of the Board, shall be in writing and, together with any dissenting opinions, shall be served on all parties in the proceeding before the Board, and on the parties to this Compact.

D. Jurisdiction of the Board.

The Northern Cheyenne-Montana Compact Board shall have jurisdiction to resolve controversies over the right to the use of water between users of the Tribal Water Right on the one hand and users of state water rights on the other hand. Such controversies shall include, but shall not be limited to, disputes as to the meaning of this Compact, and disputes concerning the operation of the Tongue River Reservoir as it affects the Tribal Water Right.

E. Powers and Duties.

The Board shall hold hearings upon notice in proceedings before it and shall have the power to administer oaths, take evidence and issue subpoenas to compel attendance of witnesses or production of documents or other evidence. The Tribe, the State, and the United States shall enforce the Board's subpoenas in the same manner as prescribed by the laws of the Tribe, the State, or the United States for enforcing a subpoena issued by its courts in a civil action. The parties to the controversy may present evidence and cross examine any witnesses. The Board shall determine the controversy based on the evidence, and grant any appropriate relief, except money damages. All decisions of the Board shall be by majority and in writing. The Board shall adopt necessary rules and regulations to carry out its responsibilities within six months after its first meeting. All records of the Board shall be open to public inspection except for privileged information.

F. Review and Enforcement of Board Decisions.

1. Decisions by the Board shall be effective immediately, unless stayed for a period of time prescribed by the Board. Any party before the Board may appeal any final decision by the Board to a court of competent jurisdiction within thirty days of such decision. The notice of appeal shall be filed with the Board and served personally or by registered mail upon the Tribe, the State, the United States and all parties to the proceeding before the Board, and all such persons shall thereafter have the right to participate in the appeal.

2. In any appeal, the Board's decision shall be presumed to be valid, and may be vacated by the court only on one of the following grounds:

a. The decision is not supported by substantial evidence;

b. The decision was procured by corruption, fraud or undue means;

c. There was evident partiality or corruption by the Board or by any member;

d. The Board was guilty of misconduct in refusing to hear the dispute, or in refusing to hear evidence pertinent and material to the controversy, or any other clear misbehavior by which the rights of any party have been substantially prejudiced;

e. The Board exceeded its authority under the terms of this Compact; or

f. The decision is contrary to law.

3. Unless an appeal is timely filed as provided in paragraph F.1. of this Article, any decision of the Board shall be confirmed or enforced by any court of competent jurisdiction on petition of the Board, the Tribe, the State, the United States, or any party before the Board in the proceeding in which the decision was made.

4. A court of competent jurisdiction in which a timely appeal is filed pursuant to paragraph F.1. of this Article, or in which a petition to confirm or enforce is filed pursuant to paragraph F.3. of this Article, may order such temporary or permanent relief as it considers just and proper.

5. Any appeal may be taken from any decision of the court in which a timely appeal is filed pursuant to paragraph F.1. of this Article, or in which a petition to confirm or enforce is filed pursuant to paragraph F.3. of this Article, in the manner and to the same extent as from orders or judgments of the court in a civil action.

6. In any appeal or petition to confirm or enforce the Board's decision, the Board shall file with the court the record of the proceedings before the Board.

G. Waiver of Immunity.

The Tribe, the United States and the State hereby waive their respective immunities from suit, including any defense the State shall have under the Eleventh Amendment of the Constitution of the United States, in order to permit the resolution of disputes under this Compact by the Northern Cheyenne-Montana Compact Board, and the appeal or judicial enforcement of Board decisions as provided herein, except that such waivers of sovereign immunity by the Tribe, the United States, or the State shall not extend to any action for money damages including costs and attorneys' fees.

Article V

Finality and Effectiveness of Compact

A. Ratification and Effectiveness of Compact.

1. Upon ratification by the Northern Cheyenne Tribal Council and the Legislature of the State of Montana, the terms of this Compact may not be altered, voided, or modified in any respect without the consent of the parties; provided, that except as set forth in Section A.2. of this Article, this Compact shall not become effective until ratification by the United States Congress and the completion date occurs, notwithstanding the provisions of Section 85-2-702(2), MCA. If the completion date does not occur on or before December

31, 1997, or any later date agreed to in writing by the parties, this Compact, including all provisions that become effective on the ratification date, shall become null and void without further action by any party. Notwithstanding the provisions of Section 85-2-702(3), MCA, this Compact shall not be included in any preliminary decree or final decree in any State water court proceeding unless and until this Compact becomes effective as set forth in this Article.

2. As between the State and the Tribe, all of the provisions of this Compact shall become effective upon the ratification date except insofar as they:

a. Quantify or provide for the administration of the Tongue River Tribal Water Right;

b. Provide for the management or operation of the Tongue River Reservoir; or

c. Require Congressional authorization.

All of the provisions that do not become effective upon the ratification date shall become effective on the completion date, unless Congress provides otherwise.

B. Incorporation Into Decrees and Disposition of Federal Suits.

Within sixty days after the completion date, the parties shall petition for incorporation of this Compact into a decree in any appropriate State court proceeding commenced in accordance with 43 U.S.C. 666. Upon the issuance of a final decree by the State water court, or its successor, and the completion of any direct appeals therefrom, or upon the expiration of the time for filing any such appeal, the United States, the Tribe, and the State shall within thirty days execute and file joint motions pursuant to Rule 41(a), Fed. R. Civ. P., to dismiss the Tribe's claims, and any claims made by the United States as trustee for the Tribe, in Northern Cheyenne Tribe of the Northern Cheyenne Reservation v. Adsit, et al., No. 75-6-BLG (D. Mont.); United States v. Big Horn Low Line Canal Company, et al., No. 75-34-BLG (D. Mont.); and United States v. Tongue River Water Users Association, et al., No. 75-20-BLG (D. Mont.), (hereinafter collectively referred to as "the federal suits"), with prejudice. This Compact shall be filed as a consent decree in the federal suits only if, prior to the dismissal of the federal suits as provided in this Article, it is finally determined in a judgment binding upon the State of Montana that the State courts lack jurisdiction over, or that the State court proceedings are inadequate to adjudicate, some or all of the water rights asserted in the federal suits.

Article VI

General Provisions

A. Nothing in this Compact shall be so construed or interpreted:

1. To establish the nature, extent, or manner of administration of water rights of any Indian reservation or other federal reservation other than the Northern Cheyenne Reservation;

2. To preclude the acquisition or exercise of a right to the use of water by the Tribe or any individual Indian outside the Reservation by purchase of such right or by acquisition of land, or by application to the State;

3. To preclude the acquisition or exercise of an appropriative right to the use of water under state law by the Tribe or any individual Indian within the Reservation:

a. By purchase of such right or by purchase of land; provided, that water rights acquired by such purchase after the ratification date of this Compact shall be in addition to and shall become part of the Tribal Water Right and shall be governed by this Compact; or

b. By application to the State. Except for applications for non-alluvial groundwater pursuant to Article II.A.4.b., and applications for storage appropriations authorized by paragraph A.8. of this Article, any such application shall not be granted by the State until the Tribal Water Right in the basin where the diversion that is the subject of the application is located has been fully utilized;

4. To determine the relative rights inter sese of persons using water under the authority of the State or the Tribe;

5. To limit in any way the rights of the parties or any other person to litigate any issues or questions not resolved by this Compact;

6. To authorize the taking of a water right which is vested under state or federal law;

7. To create or deny substantive rights through headings or captions used in this Compact;

8. To preclude or to discourage the Tribe from establishing the right to, or contracting for, water from any further enlargements of the Tongue River Dam, or from any future storage facilities that may be built within the Tongue River or Rosebud Creek basins, or in any other water basins;

9. To address or prejudge whether, in any interstate apportionment, the Tribe's water right shall be counted as part of the waters apportioned to the State; or

10. To alter or amend any provisions of the Yellowstone River Compact, Act of October 30, 1951, ch. 629, 65 Stat. 663 (1951).

11. To prohibit the Tribe or the United States from challenging any claims to water in any general adjudication of the Tongue River or Rosebud Creek basins.

B. The parties expressly reserve all rights not granted, recognized or relinquished in this Compact.

C. The Secretary of the Interior shall comply with all aspects of the National Environmental Policy Act, 42 U.S.C. 4331-4335, and the Endangered Species Act, 16 U.S.C. 1531, et seq., and other applicable environmental acts and regulations in implementing this Compact.

Article VII

Tribal Relinquishment of Other Water Claims

A. With the exception of the Tribe's claim to non-alluvial groundwater in paragraph B. of this Article and any rights to water which may exist with respect to land held by the Tribe or a Tribal member outside the present Reservation, the Tribe and the United States as trustee for the Tribe hereby relinquish forever any and all claims, in existence on the ratification date of this Compact, to water within the State of Montana. The relinquishment includes, but is not limited to, any claim for water derived from aboriginal use of land or water, any Indian treaties, any Act of Congress, and any executive act of the United States.

B. The parties intend that the water right as confirmed to the Tribe in Article II is in full satisfaction of its federal reserved water right based on Winters v. United States, 207 U.S. 564 (1908). Notwithstanding the provisions of paragraph A. of this Article, the Tribe retains the right to assert a claim that it has a right, not based on the federal reserved water rights doctrine, to the use of any non-alluvial groundwater underlying the Reservation. In any such action, the Tribe shall be estopped to assert that its right to non-alluvial groundwater is a federal reserved water right, that the Tribal Water Right confirmed in Article II is inadequate to satisfy the purposes for which the Reservation was created, or from collaterally attacking this Compact in any manner. Any right to non-alluvial groundwater established by the Tribe under this paragraph is not subject to this Compact. Nothing in this Compact shall be construed to waive any defenses of the State or any water user to a Tribal claim for non-alluvial groundwater.

Article VIII

Binding Effect

Upon the effectiveness of any provision of this Compact, its terms will be binding:

A. Upon the State and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the State to the use of water in the State of Montana; provided, that for purposes of consent, ratification, or authorization, the validity of consent, ratification, or authorization is to be determined by Montana law;

B. Upon the Tribe and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right to the use of the Tribe's water right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribe, or any right arising under tribal law; provided, that for purposes of consent, ratification, or authorization, the validity of consent, ratification or authorization is to be determined by tribal law; and

C. Upon the United States and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the United States to the use of water in the State of Montana; provided, that for purposes of consent, ratification, or authorization, the validity of consent, ratification or authorization is to be determined by federal law, and further provided that nothing contained in this Compact affects any claim of any Indian tribe, or of persons claiming water through that tribe, or the right of any Indian tribe, or persons claiming water through that tribe, to pursue a claim to any water from any source based on any theory of right or entitlement.

Article IX

Contributions to Settlement

A. The United States agrees to provide $31,500,000 to repair the Tongue River Dam and spillway and to raise the Tongue River Dam spillway crest to secure the Tribe's existing contract water under Article II.A.2.e. and to provide additional storage capacity to secure the Tribe's storage and exchange water right under Article II.A.2.b.

The Provisions of this Article are subject to the separate Letter of Agreement dated April 17, 1991, between the State and the United States explaining in detail the allocation of the costs of the project. The State and the United States will enter into a further agreement providing for the expenditure of the contributions and loans of the United States hereunder.

D. The United States agrees to provide $10,000,000 for a Tribal Development Fund payable in equal amounts of $2,000,000 each fiscal year for five years. These funds shall not be distributed on a per capita basis to members of the Tribe and shall only be used for land and natural resources administration, planning and development within the Northern Cheyenne Reservation or for land acquisition by the Tribe within the Northern Cheyenne Reservation.

E. Federal financial contributions to paragraph A of this Article will be budgeted for, subject to the availability of funds, by October 1 of the year following the ratification of this Compact by Congress and the authorization by Congress of the Tongue River Dam project. Federal financial contributions to paragraph D of this Article will be budgeted for, subject to the availability of funds, by October 1 of the second year following the ratification of this Compact by Congress and the authorization by Congress of the Tongue River Dam project.

F. The Tribe and the United States agree to pursue through the normal Bureau of Indian Affairs and Department of the Interior budget process such additional sums as are necessary to implement the terms of this Compact, to develop a Tribal water code, and to provide increased agricultural development on the Reservation. The State agrees to support the efforts of the Tribe and the United States in this regard.

Article X

87-1-215. Wild buffalo as species in need of management — policy — department duties. (1) The legislature finds that the management through hunting of wild buffalo or bison is not appropriate but that significant potential exists for the spread of contagious disease to persons or livestock in Montana and damage to persons and property by wild buffalo or bison.

Therefore, it is the purpose of this section to designate wild buffalo or bison, which have not been reduced to captivity, as a species in need of management and to set out specific departmental duties for management of the species.

(2) The department:

(a) is responsible for and shall develop rules to implement the management of wild buffalo or bison in this state that threaten persons or property other than through the transmission of contagious disease;

(b) shall develop rules to manage and reduce the number of wild buffalo or bison that leave Yellowstone national park.

(3) The department of livestock shall, within its statutory authority, regulate wild buffalo or bison in this state that pose a threat to persons or livestock in Montana through the transmission of contagious disease.

(4) The department of fish, wildlife, and parks and the department of livestock are strongly urged to enter into an agreement with the national park service for the long-term management of the Yellowstone national park herd. If the national park service does not proceed in good faith in a timely manner to enter a long-term management agreement that in the determination of the department of fish, wildlife, and parks and the department of livestock responds adequately to the needs of Montana, the departments are strongly urged to take appropriate court action. The department of fish, wildlife, and parks and the department of livestock shall prepare a joint report to the 53rd legislature regarding the present state of bison management in Montana and any progress on an agreement for the long-term management of the Yellowstone national park herd.

87-1-248. Qualification of upland game bird enhancement projects. (1) A project eligible for funding under the pheasant release program must contain the proper combination of winter cover, food, nesting cover, and other pheasant habitat components determined necessary by the department to provide for a viable permanent pheasant population.

(2) Habitat enhancement efforts must include assistance to applicants in the establishment of suitable nesting cover, winter cover, and feeding areas through cost-sharing programs, leases, and conservation easements.

(3) No project containing hunting preserves or any commercial hunting enterprise or wherein hunting rights are leased or paid for is eligible for funding.

(4) Preference must be given for project applications submitted by youth organizations, 4-H clubs, sportsmen's groups, and other associations of sufficient size to guarantee completion of all project requirements. However,

individual landowners may also apply, so long as the land in the project area remains open to public hunting in accordance with reasonable use limitations imposed by the landowner.

87-1-255. Purpose. The legislature finds that the conservation of rivers and their fisheries is of vital social and economic importance to Montana. The legislature further finds that some of our state's rivers and fisheries are diminished in value by water pollution, water shortages, and riparian erosion and that there is a need for a program to promote the beneficial use and productivity of our river systems. The legislature further finds that establishment of a river restoration program, funded by anglers from across the state and nation, is a sound and proper method to help ensure that the rivers and fisheries that anglers and others have treasured for Montana's first 100 years will continue to serve the state and its people.

87-1-304. Fixing of seasons and bag and possession limits. (1) The commission may fix seasons, bag limits, possession limits, and season limits; open or close or shorten or lengthen seasons on any species of game, bird, fish, or fur-bearing animal as defined by 87-2-101; and declare areas open to the hunting of deer, antelope, elk, moose, sheep, and goat by bow and arrow permit holders and designate times when only bows and arrows may be used to hunt deer, antelope, elk, moose, sheep, and goat in those areas. It may declare areas open to deer or elk or both deer and elk hunting where only bow and arrow or shotguns or both may be used to hunt or kill deer or elk. In areas where deer or elk or both deer and elk hunting is open to the use of shotguns, the commission shall authorize the use of muzzleloaders with restrictions as necessary for safety. It may declare areas open to special license holders only and issue special licenses in a limited number when it determines, after proper investigation, that such a season is necessary to assure the maintenance of an adequate supply of game birds, fish, or animals or fur-bearing animals. It may declare a special season and issue special licenses when game birds or animals or fur-bearing animals are causing damage to private property or when written complaint of such damage has been filed with the commission by the owner of that property. In determining to whom those licenses shall be issued, it may, when more applications are received than the number of animals to be killed, award permits to those chosen under a drawing system. The procedures used for awarding the permits from the drawing system shall be determined by the commission.

(2) The commission may adopt rules governing the use of livestock and vehicles by archers during special archery seasons.

(3) It may divide the state into fish and game districts and create fish, game, or fur-bearing animal districts throughout the state. It may declare closed season for hunting, fishing, or trapping in any of those districts and later may open those districts to hunting, fishing, or trapping.

(4) It may declare a closed season on any species of game, fish, game birds, or fur-bearing animals threatened with undue depletion from any cause. It may close any area or district of any stream, public lake, or public water or portions thereof to hunting, trapping, or fishing for limited periods of time, when necessary to protect a recently stocked area, district, water, spawning waters, spawn-taking waters, or spawn-taking stations or to prevent the undue depletion of fish, game and fur-bearing animals, and game and nongame birds. It later may open the area or district upon consent of a majority of the property owners affected.

(5) The commission may authorize the director to open or close any special season upon 12 hours' notice to the public.

(6) It may declare certain fishing waters closed to fishing except by persons under 13 years of age. The purpose of this subsection is to provide suitable fishing waters for the exclusive use and enjoyment of juveniles under 13 years of age, at times and in areas the commission in its discretion considers advisable and consistent with its policies relating to fishing.

(2) The commission may establish game refuges in which game and fur-bearing animals, game or nongame birds may breed and replenish. These refuges shall be established by order of the commission upon petition and proper showing that the action is, in judgment of the commission, necessary and in the best interest of the wildlife within the area to be included in the refuge. The purpose of this provision is to establish small refuges rather than large preserves or rather than close large areas to hunting or trapping.

(3) The commission may designate and protect certain areas as resting, feeding, and breeding grounds for migratory birds, in which hunting and molestation are forbidden. The purpose of this provision is not to interfere unduly with the hunting of waterfowl but to provide havens in which they can rest, feed, and breed without molestation.

(4) After a petition has been duly filed with the secretary of the commission requesting that an area be set aside as a game refuge, the secretary shall immediately publish a notice in a paper of general circulation in the county in which the area is located. The notice shall state that a hearing on the matter will be held at a designated place in the county not less than 15 days after first publication, at which time and place all interested parties may appear and be heard.

87-2-806. Taking fish or game for scientific purposes. (1) It is lawful for the duly accredited representative of an accredited school, college, university, or other institution of learning or of any governmental agency, who may be investigating a scientific subject making it necessary, to take, kill, capture, and possess for that purpose any birds, fish, or animals protected by Montana law or state fish and game rule. He may take, kill, and capture protected or unprotected birds, fish, or animals in any way except by the explosion of dynamite. No more of the birds, fish, or animals may be taken than are necessary for the investigation.

(2) A person who desires to engage in the scientific investigation shall apply to the director for a permit. The director may set qualifications for persons to whom permits are issued and may place special authorizations or special requirements and limitations on any permit. If the director is satisfied of the good faith and qualifications of the applicant, he shall issue a permit which shall place a time limit on the collections and may place a restriction on the number of birds, fish, or animals to be taken and shall require a report of the numbers and species of animals taken by collection areas.

(3) The permittee shall pay $5 for the permit.

(4) The permittee may not take, have, or capture any other or greater number of birds, fish, or animals than are mentioned in the permit.

(5) Any representative of an accredited school, college, university, or other institution of learning who may have various students or associates assisting him throughout the year may apply to have his permit issued to himself and his associates. The associates, when carrying a copy of the permit, shall have the same authorizations and restrictions as the original applicant. The original applicant shall keep a record of all associates to whom he issued a copy of his permit and of the times for which each associate is issued a copy. The original applicant is responsible for his associates' use of the permit or copies of the permit, including their reports of species and numbers of animals collected.

87-2-902. Bond or security of agent and preferred claim of state for license money. Acceptance of late payments with interest does not preclude the department from summarily revoking the appointment of a license agent under 87-2-904.

(3) The department may:

(a) deny a permit if it determines that there is substantial potential that the proposed operation may harm a fishery or conflict with existing recreational uses of the waters;

(b) condition a permit to restrict the method of taking, the location of the taking, and the quality and quantity of harvest, to prevent overharvest or conflict with existing fishing and recreational uses of the waters; or

(c) require a permittee to submit harvest data to the department.

(4) A permit may be revoked for a violation of the conditions of the permit.

(5) The department may adopt rules for the regulation of commercial taking of aquatic fish food organisms, including but not limited to the setting of seasons, methods of taking, quantities of harvest, size limitations, and reporting requirements for a particular aquatic fish food organism, in order to prevent overharvest or conflict with fishing and recreational uses of the waters.

Application for a permit shall be made to the director on a form prescribed by him. The annual permit fee for five or less animals shall be $10. The annual permit fee for more than five animals shall be $25. Permits shall expire on December 31 but may be renewed upon payment of the annual fee. This section shall not apply to the United States, the state of Montana, or any county or city. (2) No permit shall be granted by the department until it has satisfactorily verified that the provisions for housing and caring for such animals and for protecting the public are proper and adequate and in accordance with the standards established by the department.

(3) A permit is not transferable to another person unless the roadside menagerie or zoo to which it pertains is also transferred to the same person. The director's approval must be obtained prior to such permit transfer and prior to a transfer of any wild animals held under the permit.

History: En. Secs. 2, 3, Ch. 130, L. 1969; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-1206(1), 26-1207.

A game propagating permit is required to propagate and sell game birds and game animals for commercial purposes. A fur-farming permit is required to propagate and sell fur-bearing animals. All offspring of game animals, game birds, or fur-bearing animals are the property of the state wherein the menagerie is located and must be disposed of by the state.

History: En. Sec. 5, Ch. 130, L. 1969; R.C.M. 1947, 26-1209.

Nongame and Endangered Species

87-5-101. Short title. This part shall be known and may be cited as "The Nongame and Endangered Species Conservation Act".

History: En. Sec. 1, Ch. 461, L. 1973; R.C.M. 1947, 26-1801.

87-5-102. Definitions. As used in this part, the following definitions apply:

(1) "Account" means the nongame wildlife account established in 87-5-121.

(2) "Ecosystem" means a system of living organisms and their environment, each influencing the existence of the other and both necessary for the maintenance of life.

(3) "Endangered species" means any species or subspecies of wildlife actively threatened with extinction due to any of the following factors:

(a) the destruction, drastic modification, or severe curtailment of its habitat;

(b) its overutilization for scientific, commercial, or sporting purposes;

(c) the effect on it of disease, pollution, or predation;

(d) other natural or man-made factors affecting its prospects of survival or recruitment within the state; or

(e) any combination of the foregoing factors.

(4) "Management" means the collection and application of biological information for the purposes of increasing the number of individuals within species and populations of wildlife up to the optimum carrying capacity of their habitat and maintaining such levels. The term includes the entire range of activities that constitute a modern scientific resource program including but not limited to research, census, law enforcement, habitat improvement, and education. Also included within the term, when and where appropriate, is the periodic or total protection of species or populations as well as regulated taking.

(5) "Nongame wildlife" means any wild mammal, bird, amphibian, reptile, fish, mollusk, crustacean, or other wild animal not otherwise legally classified by statute or regulation of this state. Animals designated by statute

or regulation of this state as predatory in nature are not classified as nongame wildlife for purposes of this part.

(6) "Optimum carrying capacity" means that point at which a given habitat can support healthy populations of wildlife species, having regard to the total ecosystem, without diminishing the ability of the habitat to continue that function.

(7) "Person" means any individual, firm, corporation, association, or partnership.

(8) "Take" means to harass, hunt, capture, or kill or attempt to harass, hunt, capture, or kill wildlife.

(9) "Wildlife" means any wild mammal, bird, reptile, amphibian, fish, mollusk, crustacean, or other wild animal or any part, product, egg, or offspring or the dead body or parts thereof.

History: En. Sec. 2, Ch. 461, L. 1973; amd. Sec. 12, Ch. 417, L. 1977; R.C.M. 1947, 26-1802(3), (part (4)), (5) thru (10); amd. Sec. 1, Ch. 627, L. 1983.

87-5-103. Legislative policy. The legislature finds and declares all of the following:

(1) that it is the policy of this state to manage certain nongame wildlife for human enjoyment, for scientific purposes, and to insure their perpetuation as members of ecosystems;

(2) that species or subspecies of wildlife indigenous to this state which may be found to be endangered within the state should be protected in order to maintain and to the extent possible enhance their numbers;

(3) that the state should assist in the protection of species or subspecies of wildlife which are deemed to be endangered elsewhere by prohibiting the taking, possession, transportation, exportation, processing, sale or offer for sale, or shipment within this state of species or subspecies of wildlife unless such actions will assist in preserving or propagating the species or subspecies.

History: En. Sec. 3, Ch. 461, L. 1973; R.C.M. 1947, 26-1803.

87-5-104. Investigations by department. The department shall conduct investigations on nongame wildlife in order to develop information relating to population, distribution, habitat needs, limiting factors, and other biological and ecological data to determine management measures necessary for their continued ability to sustain themselves successfully. The department shall conduct ongoing investigations of nongame wildlife.

History: En. Sec. 4, Ch. 461, L. 1973; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-1804(part).

87-5-105. Regulations to manage nongame wildlife. (1) On the basis of the determinations made pursuant to 87-5-104, the department shall issue management regulations. Such regulations shall set forth species or subspecies of nongame wildlife which the department deems in need of management pursuant to 87-5-104 through 87-5-106, giving their common and scientific names by species and subspecies. The department may from time to time amend such regulations on the approval of the legislature by adding or deleting therefrom species or subspecies of nongame wildlife.

(2) The department shall by such regulations establish proposed limitations relating to taking, possession, transportation, exportation, processing,

sale or offer for sale, or shipment as may be deemed necessary to manage such nongame wildlife. The department may make such changes in the proposed regulations as are consistent with effective management of nongame wildlife as designated by the legislature.

History: En. Sec. 4, Ch. 461, L. 1973; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-1804(part).

Part Cross-References

Importation, introduction, or transplantation of wildlife — unlawful, 87-3-105.

87-5-701. Purpose. The legislature finds that in order to protect the native wildlife and plant species of Montana and to protect the agricultural production of Montana, it is necessary to provide for the control of the importation for introduction and the transplantation or introduction of wildlife in the state. Serious threats, known and unknown, to the well-being of native wildlife and plant species and to agricultural production, resulting from the introduction of wildlife into natural habitats, necessitate the prohibition of the importation for introduction and the transplantation or introduction of wildlife into natural habitats unless it can be shown that no harm will result from such transplantation or introduction. Any importation for introduction or the transplantation or introduction permitted must be conducted in a manner to assure that the introduced or transplanted population can be controlled if harm arises from unforeseen effects.

History: **En. Sec. 2, Ch. 624, L. 1985.**

87-5-702. Definitions. For purposes of this part, the following definitions apply:

(1) "Feral" means the appearance in a natural habitat of an animal that has escaped domestication and become wild.

(2) "Importation" means the act of bringing into the state any wildlife.

(3) "Introduction" means the release of or attempt to release, intentional or otherwise, wildlife from outside the state into natural habitats of the state.

(4) "Natural habitat" means any area in which the introduction of wildlife species may result in an uncontrolled, naturally reproducing population of that species becoming established.

(5) "Transplantation" means the release of or attempt to release, intentional or otherwise, wildlife from one place within the state into natural habitats in another part of the state.

(6) "Wildlife" means any wild mammal, bird, reptile, amphibian, fish, mollusk, crustacean, or other wild animal or the egg or offspring thereof.

History: **En. Sec. 3, Ch. 624, L. 1985.**

87-5-703. Applicability to other provisions for importation or introduction of wildlife. Sections 87-5-701 through 87-5-704, 87-5-711, 87-5-713 through 87-5-716, and 87-5-721 do not apply to the importation of wildlife for the commercial pet trade or to the provisions on importation or introduction of wildlife contained in the following laws:

(1) Except as otherwise provided, the importation for introduction or the transplantation or introduction of any wildlife is prohibited unless the commission determines, based upon scientific investigation and after public hearing, that a species of wildlife poses no threat of harm to native wildlife and plants or to agricultural production and that the transplantation or introduction of a species has significant public benefits.

Part 1

Planning and Economic Development

90-1-101. Declaration of necessity and public policy. (1) It is hereby declared to be a necessity and the public policy of the state to promote, stimulate, and encourage the planning and development of the economy of the state in order to provide for the social and economic prosperity of its citizens. Such promotion and development of industry, commerce, agriculture, labor, and natural resources of the state require that cognizance be taken of the continuing migration of people to the urban areas in search of job opportunities and the fact that Montana is making a needed transition to a diversified economy. Community planning, greater diversification of industry and attraction of additional industry, accelerated development of natural resources, expansion of existing industry, creation of new uses for agricultural products, greater emphasis on scientific research, development of new markets for the products of the state, and the attainment of a proper balance in the overall economic base are all necessary in order to create additional employment opportunities, increase personal income, and promote the general welfare of the people of this state.

(2) The legislature recognizes that consistency and continuity in the adoption and application of environmental rules are essential to the protection and enhancement of Montana's economic well-being, that consistency and continuity are particularly important to those persons who have made a financial commitment after completing an application for an environmental permit based on the existence of certain environmental rules, and that those persons are entitled to a reasonable expectation that requirements in such a permit will not be changed to their detriment. Therefore, when a person makes a financial commitment after having completed an application for an environmental permit, it is the policy of the state not to change the requirements for such permit to the detriment of the applicant or permittee without having first taken into account and given consideration to previous expenditures made by the applicant or permittee.

(3) The department of commerce shall be regarded as performing a governmental function in carrying out the provisions of 90-1-102 through 90-1-109.

Part 1

Renewable Resource Development Loans, Grants, and Bonds

90-2-101. Policy and purpose. (1) In the development of the natural resources of the state, it is essential to distinguish between those which are and those which are not renewable; to make proper charges through taxation and otherwise for the depreciation of nonrenewable resources; and to invest a proper proportion of the tax and other revenues from nonrenewable resources in the replacement thereof with developments of renewable natural resources that will preserve for the citizens the benefit of the state's natural heritage and to ensure that the quality of existing public resources such as land, air, fish, wildlife, and recreational opportunities are not significantly diminished by developments supported by this part.

(2) In order to finance such developments, it is necessary to borrow in anticipation of the receipt of the revenues so that replacement will not lag behind consumption. The purpose of this part is to provide a procedure for borrowing in the most economical way for this purpose, to authorize the creation of debt to finance the first stage of the program, and to describe the types of projects, loans, and grants to be included in the program.

(1) The department of natural resources and conservation may recommend to the governor that grants from the renewable resource development account provided for by this part be made to any department, agency, board, commission, or other division of state government or to any political subdivision of state government.

(2) The department shall solicit and consider in its evaluation of proposed projects the views of interested and affected departments, boards, agencies, and other subdivisions of state and federal government and of other interested and affected persons.

(3) The governor shall submit those grant proposals having his approval to the legislature by the 20th day of any legislative session. Those grant proposals approved by the legislature shall be administered by the department.

(4) The grants provided for by this section may be made for the purchase, lease, or construction of projects for the conservation, management, utilization, development, or preservation of the land, vegetation, fish, wildlife, recreational, and other renewable resources in the state, including projects that provide research and demonstration of farming practices that reduce agricultural chemical use; for the purpose of feasibility and design studies for

such projects; for development of plans for the rehabilitation, expansion, or modification of existing projects; and for such other and further similar purposes as the legislature may approve.

(5) In recommending grants under this section, the department and the governor shall consider the special requirements and benefits of proposals that provide for the long-term compilation and management of information on the natural resources of Montana. These proposals contribute to the efficient management of renewable resources, benefit a variety of public and private users, and require a continuing commitment of resources to maintain currency and utility. In consequence of these values and conditions, projects providing for the long-term compilation and management of natural resource information may be considered for funding in consecutive funding cycles and may not be penalized for having received funds previously from the renewable resource development program.

(6) An amount equal to 25% of the money available for grants from the renewable resource development program must be transferred to the water storage state special revenue account created in 85-1-631.

(7) The department may adopt rules as required to govern the terms and conditions for making grants pursuant to this section.

(1) Within the limits authorized by 90-2-127 and within the further limitations in this section, the board of examiners may issue and sell bonds of the state in such manner as it considers necessary and proper to finance the renewable resource development program. The full faith and credit and taxing powers of the state shall be pledged for the prompt and full payment of all bonds so issued and interest and redemption premiums payable thereon according to their terms.

(2) Each series of such bonds shall be issued by the board of examiners upon request of the board of natural resources and conservation in such denominations and forms, whether payable to bearer with attached interest coupons or registered as to principal or as to both principal and interest, with such provisions for conversion or exchange and for the issuance of notes in anticipation of the issuance of definitive bonds, bearing interest at such rate or rates, maturing at such time or times not exceeding 30 years from date of issue, subject to optional or mandatory redemption at such earlier times and prices and upon such notice, with such provisions for payment and discharge by the deposit of funds or securities in escrow for that purpose, and payable at the office of such banking institution or institutions within or outside the state, as the board shall determine subject to the limitations contained in this section.

Such bonds and any interest coupons appurtenant thereto shall be signed by the members of the board of examiners, and the bonds shall be issued under the great seal of the state of Montana. The bonds and coupons may be executed with facsimile signatures and seal in the manner and subject to the limitations prescribed by law. All proceeds of refunding bonds shall be deposited in the debt service fund and applied to the payment and redemption of outstanding bonds issued hereunder as directed by the board, whether at maturity or on any previous date on which they may be prepaid according to their terms.

It may also issue refunding bonds to refund outstanding bonds before maturity for the purpose of reducing the interest cost or the total amount of principal and interest payable thereon.

(2) No refunding bonds may be issued and sold more than 3 months before all bonds refunded thereby mature or are called for redemption unless the proceeds thereof, with any other funds in the debt service fund which are needed and available for the purpose, or securities purchased from such proceeds and other funds, are deposited with a suitable banking institution within or outside the state, in escrow for the retirement of the refunded bonds at maturity or at a prior date or dates on which they have been called for redemption in accordance with their terms, in an amount and in a manner sufficient under the provisions securing the refunded bonds so that the state's obligation to pay the same, from sources other than the escrow fund, is discharged.

90-3-101. Short title — findings — purpose. (1) This chapter may be cited as the "Montana Science and Technology Financing Act".

(2) The legislature finds and declares that:

(a) it is the policy of the state of Montana to promote the health, safety, and general welfare of all the people of the state;

(b) this policy will be furthered through strengthening and diversifying the state's economy by facilitating a public sector-private sector partnership to encourage scientific and technological development within the state in order to keep pace with a changing economic structure and to create new jobs and expand business opportunities;

(c) this strengthening and diversification will be fostered by assisting in the acceleration of development of technology in the state through participation with the private sector in the financing of science and technology development projects that have significant potential for commercialization in Montana;

(d) the permanent coal tax trust fund created by Article IX, section 5, of the Montana constitution is the appropriate source for providing financing programs for the development of new and expanding businesses in Montana; and

(e) the Montana science and technology development board has demonstrated success in forging a partnership among the private sector, the university community, and government, and this success should be continued through an ongoing legislative commitment to the board's programs.

(3) The purposes of this chapter are to:

(a) strengthen and diversify Montana's economy by establishing a public-private sector partnership to encourage scientific and technological development within the state in order to keep pace with a transforming economic structure and to create new jobs and expand small business opportunities;

(b) provide a funding source for the board to make seed capital project loans;

(c) provide a mechanism for the board to use in making seed capital project loans; and

(d) provide a mechanism and a funding source for the board to use in making research and development project loans.

1991 Amendments: Chapter 589 at beginning of (2)(d) substituted "permanent coal tax trust fund created by Article IX, section 5, of the Montana constitution" for "in-state investment fund created through adoption of Initiative Measure No. 95 by the voters of Montana in 1982". Amendment effective July 1, 1991.

Chapter 594 deleted former (2)(e) that read: "(e) the Science and Technology Development Board Seed Capital Bond Act contained provisions that were found to be unconstitutional by the Montana supreme court, and the 51st legislature of the state of Montana must remedy those defects through legislation"; in (3)(d), after "mechanism", inserted "and a funding source" and after "loans" deleted "the funding source of which will be provided by separate legislation"; and made minor changes in style. Amendment effective April 24, 1991.

Coordination Instruction — Code Commissioner Change: Section 12, Ch. 594, L. 1991, a coordination section, provided: "If Senate Bill No. 26 is passed and approved, if it includes a section that amends 17-6-308, and if it includes amendments that replace references to the "in-state investment fund" with "permanent coal tax trust fund", then in [this act], the code commissioner shall make similar changes." Senate Bill No. 26 was approved April 24, 1991, as Ch. 589, L. 1991, and included amendments replacing references to the funds as contemplated in the coordination instruction. The Code Commissioner has therefore substituted "permanent coal tax trust fund" for "in-state investment fund" in subsection (2)(d).

Investments — Appropriations

90-3-301. Appropriation authority and funding — matching funds. (1) The board has authority to accept and expend all funds received by it as grants, donations, or other private or public income. These funds are statutorily appropriated as provided in 17-7-502.

(3) A loan may not be made for a seed capital project for which matching funds have not been received. Matching funds are required prior to any expenditure of board funds for all seed capital projects. The board may accept as matching funds those received by the loan recipient within 1 year prior to the execution of the loan agreement. The board may require additional matching funds, depending on the capital need and the degree of risk encountered in the seed capital project.

(4) A loan may not be made for a research and development project for which matching funds have not been received unless the matching fund requirements are waived by the board pursuant to this section. Matching funds, when required, must be received before expenditure of board funds for a research and development project loan may be made. The board may accept as matching funds those received by the loan recipient within 1 year prior to the execution of the loan agreement. The board may require additional matching funds depending on the capital need in the research and development project.

90-3-524. Research and development project loan agreement — specific requirements — payback. In addition to the loan agreement provisions described in 90-3-522, a research and development project loan agreement must be structured as contracted debt with the following terms:

(1) The agreement must include provisions calling for a payback of at least two times the original loan amount paid as a percentage of the income stream derived from the sale or other commercialization of products or processes developed with the board's financing. This percentage rate may not exceed 5%.

(2) The payback on a research and development project loan for a technology transfer and assistance project may be made pursuant to subsection (1) or may be realized in terms of indirect benefits related to the goals and criteria of the program. No more than 10% of the board's annual allocation of research and development funds may be used for technology transfer and assistance projects. The payback on a research and development project loan for a technology transfer and assistance project made from the permanent coal tax trust fund may not be repaid in terms of indirect benefits.

1991 Amendment: Near beginning of (1), before "two", inserted "at least"; and inserted third sentence of (2) disallowing repayment of payback on a research and development project loan in terms of indirect benefits. Amendment effective April 24, 1991.

Coordination Instruction — Code Commissioner Change: Section 12, Ch. 594, L. 1991, a coordination section, provided: "If Senate Bill No. 26 is passed and approved, if it includes a section that amends 17-6-308, and if it includes amendments that replace references to the "in-state investment fund" with "permanent coal tax trust fund", then in [this act], the code commissioner shall make similar changes." Senate Bill No. 26 was approved April 24, 1991, as Ch. 589, L. 1991, and included amendments replacing references to the funds as contemplated in the coordination instruction. The Code Commissioner has therefore substituted "permanent coal tax trust fund" for "in-state investment fund" in the third sentence of subsection (2).

Intellectual Property Assessment — Report and Recommendations Required: Section 11, Ch. 594, L. 1991, provided: "The university system shall conduct an assessment of its intellectual property management programs and policies. Based on the assessment, the board of regents shall consider the adoption of a system of intellectual property management that will provide a coordinated and effective method of meeting payback requirements for research and development project loans made to organizations, individuals, and other entities within the university system. The assessment must be coordinated with the Montana board of science and technology development, and a final report and recommendations must be presented to the board by January 1, 1992."

90-3-525. Deposit of payback — seed capital and research and development project loans. (1) The payback of principal and earnings on a seed capital project loan executed under this chapter or on a research and development project loan from the Montana permanent coal tax trust fund or the payback of principal and earnings on a research and development project loan from a source other than the Montana permanent coal tax trust fund must be deposited to the state special revenue fund to the credit of the science and technology development account created in 90-3-305.

(2) All paybacks of principal and earnings to the board from any agreements executed by the board between July 1, 1985, and March 31, 1989, must be deposited to the state special revenue fund to the credit of the science and technology development account created in 90-3-305 for use by the board. The paybacks include all those received after January 1, 1989.

90-4-101. Purpose. The purposes of this part are to stimulate research, development, and demonstration of energy conservation and of energy sources which are harmonious with ecological stability by virtue of being renewable, thereby to lessen that reliance on nonrenewable energy sources which conflicts with the goal of long-range ecological stability and to provide for the funding and administration of such research. Furthermore it is the purpose of this part to stimulate the commercialization of alternative renewable energy and to allow the department to make loans through financial institutions in Montana for this purpose.

Energy Supply Emergency Powers

90-4-301. Legislative findings and intent. (1) The legislature finds that energy in various forms is increasingly subject to possible shortages and supply disruptions, to the point that there may be foreseen an emergency situation, and that without the ability to gather information, regularly monitor energy supplies and demand, formulate plans, and institute appropriate emergency measures to reduce or allocate the usage of energy through a program of mandatory usage curtailment or allocation, a severe impact on the health, safety, and general welfare of our state's citizens may occur. The prevention or mitigation of the effects of such energy shortages or disruptions is necessary for preservation of the public health and welfare of the citizens of this state.

(2) It is the intent of this part to:

(a) establish necessary planning, information gathering, and energy emergency powers for the governor and define the conditions under which such powers are to be exercised;

(b) provide for the regular monitoring of energy supplies and demand; however, nothing in this part may be construed to authorize the establishment of an independent state energy forecasting program; and

(c) provide penalties for violations of this part.

(a) implement such programs, controls, standards, priorities, and quotas for the production, allocation, conservation, and consumption of energy, including plans for the curtailment of energy; provided that in so doing, the governor shall impose controls, quotas, or curtailments according to the nature of the end use to be made of the energy consistent with existing transmission and distribution systems serving the geographic area affected by the energy emergency;

(b) suspend and modify existing pollution control standards and requirements or any other standards or requirements affecting or affected by the use of energy, including those relating to air or water quality control; and

(c) establish and implement regional programs and agreements for the purposes of coordinating the energy programs and actions of the state with those of the federal government and of other states, localities, and other persons.

(5) Nothing in this part means that any program, control, standard, priority quota, or other policy created under the authority of the emergency powers authorized by this part has any continuing legal effect after the cessation of a declared state of energy emergency.

(6) Because of the emergency nature of this part, all actions authorized or required hereunder or taken pursuant to any order issued by the governor are exempted from all requirements and provisions of the Montana Environmental Policy Act of 1971, including but not limited to the requirement for environmental impact statements.

Compiler's Comments

1991 Amendment: At end, deleted "This money is statutorily appropriated as provided in 17-7-502". Amendment effective April 23, 1991.

Stripper-Well Payments — Definition — Appropriation — Priority: Section 1, Ch. 571, L. 1991, provided: "(1) There is reappropriated from the stripper-well payments contained in the federal special revenue fund to the department of natural resources and conservation $400,000 to fulfill duties authorized by 90-4-605 and 90-4-607. This appropriation is a biennial appropriation.

(2) (a) "Stripper-well payments" means the oil overcharge payments made to the United States treasury for distribution to the state of Montana as the result of the final settlement agreement in the United States district court for the district of Kansas, Cause No. M.D.L. 378, and any interest accrued on the payments.

(b) The term does not include stripper-well payments that have been expended or legally obligated or have been incorporated into any of the existing federal energy programs as the result of prior appropriations by the legislature.

(3) The stripper-well payments appropriated in this section have a higher priority than any other appropriation of stripper- well payments for fiscal years 1992-93."

Approval of Projects — 1992-93 Biennium: Section 2, Ch. 571, L. 1991, provided: "(1) Pursuant to Title 90, chapter 4, part 6, the legislature approves the following energy conservation projects for fiscal years 1992-93:

FACILITY
University of Montana
Central Heating Plant
Health Science Building
Chemistry/Pharmacy Building
Math Building
Mansfield Library
Science Complex
Pharmacy/Psychology Building
Music Building
Eastmont Human Services Center
Pine Hills School Campus
Cogswell Building, State Capitol Complex

(2) In addition to the projects listed in subsection (1), the department of natural resources and conservation may expend funds appropriated under [section 3] [not codified, see 1991 compiler's comment] to respond to unanticipated situations that provide an opportunity to finance, acquire, construct, or install energy-saving equipment, systems, or improvements in a state facility in circumstances in which the opportunity will be lost whenever the department is delayed in providing the necessary funds until specific legislative approval can be obtained."

Temporary Bond Authorization — 1992-93 Biennium: Section 3, Ch. 571, L. 1991, provided: "(1) The board of examiners may, pursuant to 90-4-611, issue and sell bonds of the state in an aggregate principal amount not to exceed $3 million for fiscal years 1992-93. The bonds are general obligations for which the full faith and credit and taxing powers of the state are pledged for payment of the principal and interest on the bonds. The bonds must be issued as provided by Title 17, chapter 5, part 8.

(2) The proceeds of the bonds, other than any premiums and accrued interest received, must be deposited in the energy conservation program account established by 90-4-612. Premiums and accrued interest must be deposited in the debt service fund established in 17-2-102. Proceeds of bonds deposited in the energy conservation program account may be used to pay the costs of issuing the bonds and to fund the projects approved by the legislature in [section 2] [not codified, see 1991 compiler's comment]. For purposes of 17-5-803 and 17-5-804, the energy conservation program account constitutes a capital projects account. The bond proceeds must be available to the department of natural resources and conservation and may be used for the purposes authorized in this section without further budgetary authorization."

Withdrawal of Authorization for Previously Authorized Bonds: Section 6, Ch. 571, L. 1991, provided: "The authorization granted by section 10, Chapter 473, Laws of 1989, for the issuance of up to $3 million in bonds to provide money for fiscal years 1990-91 energy conservation program is withdrawn."

Requirements for Approval of State Debt: Section 7, Ch. 571, L. 1991, provided: Because [section 3] [not codified, see 1991 compiler's comment] authorizes the creation of a state debt, a vote of two-thirds of the members of each house is required for enactment of [section 3]."

(1) Any bonds issued under the provisions of this part and at any time outstanding, including, without limitation, short-term bonds issued in anticipation of the issuance of long-term bonds, may at any time and from time to time be refunded by a municipality or county by the issuance of its refunding bonds in such amount as the governing body may deem necessary but not exceeding an amount sufficient to refund the principal of the bonds to be so refunded, together with any interest thereon and any premiums and commissions necessary to be paid in connection therewith. An issue of refunding bonds may be combined with an issue of additional revenue bonds on any project when the combined total meets the requirements of 90-5-106(1).

(2) Any such refunding may be effected whether the bonds to be refunded shall have then matured or shall thereafter mature, either by sale of the refunding bonds and the application of the proceeds thereof for the payment of the bonds to be refunded thereby or by exchange of the refunding bonds for the bonds to be refunded thereby. The holders of any bonds to be so refunded shall not be compelled without their consent to surrender their bonds for payment or exchange prior to the date on which they are payable by maturity date, option to redeem, or otherwise, or, if they are called for redemption, prior to the date on which they are by their terms subject to redemption by option or otherwise. Any refunding bonds issued under the authority of this part shall be subject to the provisions contained in 90-5-103 and may be secured in accordance with the provisions of 90-5-105.

(3) The principal proceeds from the sale of any refunding bonds may be applied only as follows, either:

(a) to the immediate payment and retirement of the bonds being refunded; or

(b) to the extent not required for the immediate payment of the bonds being refunded, such proceeds shall be deposited in trust to provide for the payment and retirement of the bonds being refunded and to pay any expenses incurred in connection with such refunding, except that provision may be made for the pledging and disposition of any surplus, including, without limitation, to the payment of the principal of and interest on any issue or series of refunding bonds.

(4) Money in a trust fund under subsection (3) may be invested in direct obligations of the United States government, obligations the principal of and interest on which are guaranteed by the United States government, or obligations of any agency or instrumentality of the United States government.

(5) Nothing in this section may be construed as a limitation on the duration of any deposit in trust for the retirement of bonds being refunded but that have not matured and that are not presently redeemable or, if presently redeemable, have not been called for redemption.

(1) The proceeds from the sale of any bonds issued under authority of this part shall be applied only for the purpose for which the bonds were issued or to discharge any existing indebtedness secured by a lien against a hospital or long-term care facility or higher education facility leased or owned by a nonprofit corporation. However, if the project is not a hospital or long-term care facility or higher education facility leased or owned by a nonprofit corporation, the proceeds from the sale of bonds may not be used to discharge indebtedness without an improvement to the project.

(2) Any accrued interest and premium received in any such sale shall be applied to the payment of the principal of or the interest on the bonds sold. If for any reason any portion of such proceeds shall not be needed for the purpose for which the bonds were issued, then such unneeded portion of said proceeds shall be applied to the payment of the principal of or the interest on said bonds.

90-5-201. Western interstate nuclear compact adopted — text. The Western Interstate Nuclear Compact is entered into and adopted as follows:

WESTERN INTERSTATE NUCLEAR COMPACT

Article I. Policy and Purpose

The party states recognize that the proper employment of scientific and technological discoveries and advances in nuclear and related fields and direct and collateral application and adaptation of processes and techniques developed in connection therewith, properly correlated with the other resources of the region, can assist substantially in the industrial progress of the west and the further development of the economy of the region. They also recognize that optimum benefit from nuclear and related scientific or technological resources, facilities, and skills requires systematic encouragement, guidance, assistance, and promotion from the party states on a cooperative basis. It is the policy of the party states to undertake such cooperation on a continuing basis. It is the purpose of this compact to provide the instruments and framework for such a cooperative effort in nuclear and related fields, to enhance the economy of the west and contribute to the individual and community well-being of the region's people.

Article II. The Board

(1) There is hereby created an agency of the party states to be known as the "western interstate nuclear board", hereinafter called the board. The board shall be composed of one member from each party state designated or appointed in accordance with the law of the state which he represents and serving and subject to removal in accordance with such law. Any member of the board may provide for the discharge of his duties and the performance of his functions thereon, either for the duration of his membership or for any lesser period of time, by a deputy or assistant, if the laws of his state make specific provisions therefor. The federal government may be represented without vote if provision is made by federal law for such representation.

(2) The board members of the party states shall each be entitled to one vote on the board. No action of the board shall be binding unless taken at a meeting at which a majority of all members representing the party states are present and unless a majority of the total number of votes on the board are cast in favor thereof.

(3) The board shall have a seal.

(4) The board shall elect annually, from among its members, a chairman, a vice-chairman, and a treasurer. The board shall appoint and fix the compensation of an executive director who shall serve at its pleasure and who shall also act as secretary, and who, together with the treasurer and such other personnel as the board may direct, shall be bonded in such amounts as the board may require.

(5) The executive director, with the approval of the board, shall appoint and remove or discharge such personnel as may be necessary for the performance of the board's functions irrespective of the civil service, personnel, or other merit system laws of any of the party states.

(6) The board may establish and maintain, independently or in conjunction with any one or more of the party states or their institutions or subdivisions, a suitable retirement system for its full-time employees. Employees of the board shall be eligible for social security coverage in respect of old age and survivors insurance provided that the board takes such steps as may be necessary pursuant to federal law to participate in such program of insurance as a governmental agency or unit. The board may establish and maintain or participate in such additional programs of employee benefits as may be appropriate.

(7) The board may borrow, accept, or contract for the services of personnel from any state or the United States or any subdivision or agency thereof, from any interstate agency, or from any institution, person, firm, or corporation.

(8) The board may accept for any of its purposes and functions under this compact any and all donations and grants of money, equipment, supplies, materials, and services, conditional or otherwise, from any state or the United States or any subdivision or agency thereof, or interstate agency, or from any institution, person, firm, or corporation, and may receive, utilize, and dispose of the same. The nature, amount, and conditions, if any, attendant upon any donation or grant accepted pursuant to this paragraph or upon any borrowing pursuant to paragraph (7) of this article, together with the identity of the donor, grantor, or lender, shall be detailed in the annual report of the board.

(9) The board may establish and maintain such facilities as may be necessary for the transacting of its business. The board may acquire, hold, and convey real and personal property and any interest therein.

(10) The board shall adopt bylaws and rules for the conduct of its business and shall have the power to amend and rescind these bylaws and rules. The board shall publish its bylaws and rules in convenient form and shall file a copy thereof, and shall also file a copy of any amendment thereto, with the appropriate agency or officer in each of the party states.

(11) The board annually shall make to the governor of each party state a report covering the activities of the board for the preceding year and embodying such recommendations as may have been adopted by the board, which report shall be transmitted to the legislature of said state. The board may issue such additional reports as it may deem desirable.

Article III. Finances

(1) The board shall submit to the governor or designated officer or officers of each party state a budget of its estimated expenditures for such period as may be required by the laws of that jurisdiction for presentation to the legislature thereof.

(2) Each of the board's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states. Each of the board's requests for appropriations pursuant to a budget of estimated expenditures shall be apportioned equally among the party states. Subject to appropriation by their respective legislatures, the board shall be provided with such funds by each of the party states as are necessary to provide the means of establishing and maintaining facilities, a staff of personnel, and such activities as may be necessary to fulfill the powers and duties imposed upon and entrusted to the board.

(3) The board may meet any of its obligations in whole or in part with funds available to it under Article II, paragraph (8) of this compact, provided that the board takes specific action setting aside such funds prior to the incurring of any obligation to be met in whole or in part in this manner. Except where the board makes use of funds available to it under Article II, paragraph (8) hereof, the board shall not incur any obligation prior to the allotment of funds by the party jurisdictions adequate to meet the same.

(4) Any expenses and any other costs for each member of the board in attending board meetings shall be met by the board.

(5) The board shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the board shall be subject to the audit and accounting procedures established under its bylaws. All receipts and disbursements of funds handled by the board shall be audited yearly by a certified or licensed public accountant, and the report of the audit shall be included in and become a part of the annual report of the board.

(6) The accounts of the board shall be open at any reasonable time for inspection to persons authorized by the board and duly designated representatives of governments contributing to the board's support.

Article IV. Advisory Committees

The board may establish such advisory and technical committees as it may deem necessary, membership on which may include but not be limited to private citizens, expert and lay personnel, representatives of industry, labor, commerce, agriculture, civic associations, medicine, education, voluntary health agencies, and officials of local, state, and federal government and may cooperate with and use the services of any such committees and the organizations which they represent in furthering any of its activities under this compact.

Article V. Powers

The board shall have power to:

(1) encourage and promote cooperation among the party states in the development and utilization of nuclear and related technologies and their application to industry and other fields;

(2) ascertain and analyze on a continuing basis the position of the west with respect to the employment in industry of nuclear and related scientific findings and technologies;

(3) encourage the development and use of scientific advances and discoveries in nuclear facilities, energy, materials, products, byproducts, and all other appropriate adaptations of scientific and technological advances and discoveries;

(4) collect, correlate, and disseminate information relating to the peaceful uses of nuclear energy, materials, and products, and other products and processes resulting from the application of related science and technology;

(5) encourage the development and use of nuclear energy, facilities, installations, and products as part of a balanced economy;

(6) conduct or cooperate in conducting programs of training for state and local personnel engaged in any aspects of:

(a) nuclear industry, medicine, or education, or the promotion or regulation thereof;

(b) applying nuclear scientific advances or discoveries and any industrial commercial or other processes resulting therefrom;

(c) the formulation or administration of measures designed to promote safety in any matter related to the development, use, or disposal of nuclear energy, materials, products, byproducts, installations, or wastes, or to safety in the production, use, and disposal of any other substances peculiarly related thereto;

(7) organize and conduct, or assist and cooperate in organizing and conducting, demonstrations or research in any of the scientific, technological, or industrial fields to which this compact relates;

(8) undertake such nonregulatory functions with respect to nonnuclear sources of radiation as may promote the economic development and general welfare of the west;

(9) study industrial, health, safety, and other standards, laws, codes, rules, regulations, and administrative practices in or related to nuclear fields;

(10) recommend such changes in or amendments or additions to the laws, codes, rules, regulations, administrative procedures and practices or local laws or ordinances of the party states or their subdivisions in nuclear and related fields as in its judgment may be appropriate. Any such recommendations shall be made through the appropriate state agency with due consideration of the desirability of uniformity but shall also give appropriate weight to any special circumstances which may justify variations to meet local conditions.

(11) consider and make recommendations designed to facilitate the transportation of nuclear equipment, materials, products, byproducts, wastes, and any other nuclear or related substances, in such manner and under such conditions as will make their availability or disposal practicable on an economic and efficient basis;

(12) consider and make recommendations with respect to the assumption of and protection against liability actually or potentially incurred in any phase of operations in nuclear and related fields;

(13) advise and consult with the federal government concerning the common position of the party states or assist party states with regard to individual problems where appropriate in respect to nuclear and related fields;

(14) cooperate with the atomic energy commission, the national aeronautics and space administration, the office of science and technology, or any agencies successor thereto, any other officer or agency of the United States, and any other governmental unit or agency or officer thereof, and with any private persons or agencies in any of the fields of its interest;

(15) act as licensee, contractor, or subcontractor of the United States government or any party state with respect to the conduct of any research activity requiring such license or contract and operate such research facility or undertake any program pursuant thereto, provided that this power shall be exercised only in connection with the implementation of one or more other powers conferred upon the board by this compact;

(16) prepare, publish, and distribute, with or without charge, such reports, bulletins, newsletters, or other materials as it deems appropriate;

(17) ascertain from time to time such methods, practices, circumstances, and conditions as may bring about the prevention and control of nuclear incidents in the area comprising the party states, to coordinate the nuclear incident prevention and control plans and the work relating thereto of the appropriate agencies of the party states and to facilitate the rendering of aid by the party states to each other in coping with nuclear incidents. The board may formulate and, in accordance with need from time to time, revise a regional plan or regional plans for coping with nuclear incidents within the territory of the party states as a whole or within any subregion or subregions of the geographic area covered by this compact. Any nuclear incident plan in force pursuant to this paragraph shall designate the official or agency in each party state covered by the plan who shall coordinate requests for aid pursuant to Article VI of this compact and the furnishing of aid in response thereto. Unless the party states concerned expressly otherwise agree, the board shall not administer the summoning and dispatching of aid, but this function shall be undertaken directly by the designated agencies and officers of the party states. The plan or plans of the board in force pursuant to this paragraph shall provide for reports to the board concerning the occurrence of nuclear incidents and the requests for aid on account thereof, together with summaries of the actual working and effectiveness of mutual aid in particular instances. From time to time, the board shall analyze the information gathered from reports of aid pursuant to Article VI and such other instances of mutual aid as may have come to its attention, so that experience in the rendering of such aid may be available.

(18) prepare, maintain, and implement a regional plan or regional plans for carrying out the duties, powers, or functions conferred upon the board by this compact;

(19) undertake responsibilities imposed or necessarily involved with regional participation pursuant to such cooperative programs of the federal government as are useful in connection with the fields covered by this compact.

Article VI. Mutual Aid

(1) Whenever a party state or any state or local governmental authorities therein request aid from any other party state pursuant to this compact in coping with a nuclear incident, it shall be the duty of the requested state to render all possible aid to the requesting state which is consonant with the maintenance of protection of its own people.

(2) Whenever the officers or employees of any party state are rendering outside aid pursuant to the request of another party state under this compact, the officers or employees of such state shall, under the direction of the authorities of the state to which they are rendering aid, have the same powers, duties, rights, privileges, and immunities as comparable officers and employees of the state to which they are rendering aid.

(3) No party state or its officers or employees rendering outside aid pursuant to this compact shall be liable on account of any act or omission on

their part while so engaged or on account of the maintenance or use of any equipment or supplies in connection therewith.

(4) All liability that may arise either under the laws of the requesting state or under the laws of the aiding state or under the laws of a third state on account of or in connection with a request for aid shall be assumed and borne by the requesting state.

(5) Any party state rendering outside aid pursuant to this compact shall be reimbursed by the party state receiving such aid for any loss or damage to or expense incurred in the operation of any equipment answering a request for aid and for the cost of all materials, transportation, wages, salaries, and maintenance of officers, employees, and equipment incurred in connection with such requests; provided that nothing herein contained shall prevent any assisting party state from assuming such loss, damage, expense, or other cost or from loaning such equipment or from donating such services to the receiving party state without charge or cost.

(6) Each party state shall provide for the payment of compensation and death benefits to injured officers and employees and the representatives of deceased officers and employees in case officers or employees sustain injuries or death while rendering outside aid pursuant to this compact, in the same manner and on the same terms as if the injury or death were sustained within the state by or in which the officer or employee was regularly employed.

Article VII. Supplementary Agreements

(1) To the extent that the board has not undertaken an activity or project which would be within its power under the provisions of Article V of this compact, any two or more of the party states, acting by their duly constituted administrative officials, may enter into supplementary agreements for the undertaking and continuance of such an activity or project. Any such agreement shall specify the purpose or purposes, its duration, and the procedure for termination thereof or withdrawal therefrom, the method of financing and allocating the costs of the activity or project, and such other matters as may be necessary or appropriate. No such supplementary agreement entered into pursuant to this article shall become effective prior to its submission to and approval by the board. The board shall give such approval unless it finds that the supplementary agreement or activity or project contemplated thereby is inconsistent with the provisions of this compact or a program or activity conducted by or participated in by the board.

(2) Unless all of the party states participate in a supplementary agreement, any cost or costs thereof shall be borne separately by the states party thereto. However, the board may administer or otherwise assist in the operation of any supplementary agreement.

(3) No party to a supplementary agreement entered into pursuant to this article shall be relieved thereby of any obligation or duty assumed by said party state under or pursuant to this compact, except that timely and proper performance of such obligation or duty by means of the supplementary agreement may be offered as performance pursuant to the compact.

(4) The provisions to this article shall apply to supplementary agreements and activities thereunder but shall not be construed to repeal or impair any

authority which officers or agencies of party states may have pursuant to other laws to undertake cooperative arrangements or projects.

Article VIII. Other Laws and Relations

Nothing in this compact shall be construed to:

(1) permit or require any person or other entity to avoid or refuse compliance with any law, rule, regulation, order, or ordinance of a party state or subdivision thereof now or hereafter made, enacted, or in force;

(2) limit, diminish, or otherwise impair jurisdiction exercised by the atomic energy commission, any agency successor thereto, or any other federal department, agency, or officer pursuant to and in conformity with any valid and operative act of congress or limit, diminish, affect, or otherwise impair jurisdiction exercised by any officer or agency of a party state, except to the extent that the provisions of this compact may provide therefor;

(3) alter the relations between the respective internal responsibilities of the government of a party state and its subdivisions;

(4) permit or authorize the board to own or operate any facility, reactor, or installation for industrial or commercial purposes.

Article IX. Eligible Parties, Entry into Force and Withdrawal

(1) Any or all of the states of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming shall be eligible to become party to this compact.

(2) As to any eligible party state, this compact shall become effective when its legislature shall have enacted the same into law, provided that it shall not become initially effective until enacted into law by five states.

(3) Any party state may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall take effect until 2 years after the governor of the withdrawing state has given notice in writing of the withdrawal to the governors of all other party states. No withdrawal shall effect any liability already incurred by or chargeable to a party state prior to the time of such withdrawal.

(4) Guam and American Samoa or either of them may participate in the compact to such extent as may be mutually agreed by the board and the duly constituted authorities of Guam or American Samoa, as the case may be. Such participation shall not include the furnishing or receipt of mutual aid pursuant to Article VI, unless that article has been enacted or otherwise adopted so as to have the full force and effect of law in the jurisdiction affected. Neither Guam nor American Samoa shall be entitled to voting participation on the board, unless it has become a full party to the compact.

Article X. Severability and Construction

The provisions of this compact and of any supplementary agreement entered into hereunder shall be severable and if any phrase, clause, sentence, or provision of this compact or such supplementary agreement is declared to be contrary to the constitution of any participating state or of the United States or the applicability thereof to any government, agency, person, or circumstance is held invalid, the validity of the remainder of this compact or such supplementary agreement and the applicability thereof to any government, agency, person, or circumstance shall not be affected thereby. If this compact or any supplementary agreement entered into hereunder shall be held contrary to the constitution of any state participating therein, the compact or such supplementary agreement shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters. The provisions of this compact and of any supplementary agreement entered into pursuant thereto shall be liberally construed to effectuate the purposes thereof.

State building code, Title 50, ch. 60, part 2.

90-6-111. Bonds and notes. (1) The board may by resolution, from time to time, issue negotiable notes and bonds in a principal amount as the board determines necessary to provide sufficient funds for achieving any of its purposes, including the payment of interest on notes and bonds of the board, establishment of reserves to secure the notes and bonds, including the reserve funds created under 90-6-119, and all other expenditures of the board incident to and necessary or convenient to carry out this part.

(2) The board may by resolution, from time to time, issue notes to renew notes and bonds to pay notes, including interest, and whenever it deems refunding expedient, refund any bonds by the issuance of new bonds, whether the bonds to be refunded have or have not matured, and issue bonds partly to refund bonds outstanding and partly for any of its other purposes.

(3) Except as otherwise expressly provided by resolution of the board, every issue of its notes and bonds shall be obligations of the board payable out of any revenues, assets, or moneys of the board, subject only to agreements with the holders of particular notes or bonds pledging particular revenues, assets, or moneys.

(4) The notes and bonds shall be authorized by resolutions of the board, shall bear a date, and shall mature at times as the resolutions provide. A note shall not mature more than 10 years and a bond shall not mature more than 50 years from the date of its issue. The bonds may be issued as serial bonds payable in annual installments or as term bonds or as a combination thereof. The notes and bonds shall bear interest at a rate or rates, be in denominations, be in a form, either coupon or registered, carry registration privileges, be executed in a manner, be payable in a medium of payment, at places within or without the state, and be subject to terms of redemption as provided in resolutions. The board shall designate whether interest payments on the bonds are taxable or tax exempt. The notes and bonds of the board may be sold at public or private sale at such prices, which may be above or below par, as are determined by the board.

(5) The total amount of notes and bonds outstanding at any time, except notes or bonds as to which the board's obligation has been satisfied and discharged by refunding or for which reserve for payment or other means of payment have been otherwise provided, may not exceed $975 million. The issue price of bonds sold at a discount, not the face amount of the bonds, counts against this statutory ceiling.

90-6-119. Reserve funds and appropriations. (1) The board shall pay into the capital reserve account:

(a) any funds appropriated and made available by the state for the purpose of the account;

(b) any proceeds of sale of notes or bonds to the extent provided in the resolutions or indentures of the board authorizing their issuance; and

(c) any other funds which may be available to the board for the purpose of the account from any other source.

(2) All funds held in the capital reserve account shall be used solely for the payment of the principal of bonds secured in whole or in part by the account or of the debt service payments with respect to the bonds, the purchase or redemption of the bonds, the payment of interest on the bonds, or the payment of any redemption premium required to be paid when the bonds are redeemed prior to maturity. Funds in the account shall not be withdrawn at any time in an amount which reduces the amount of the account to less than the sum of minimum capital reserve requirements established for the account, except, with respect to bonds secured in whole or in part by the account, for the purpose of making payment, when due, of principal, interest, redemption premiums, and debt service payments for the payment of which other moneys pledged are not available. Any income or interest earned by or incremental to the capital reserve account due to its investment may be transferred to other accounts of the board to the extent it does not reduce the amount of the capital reserve account below the sum of minimum capital reserve requirements for the account.

(3) The board may not issue bonds secured in whole or in part by the capital reserve account unless the board deposits in the account from the proceeds of the bonds issued or from any other sources an amount not less than the minimum capital reserve requirement for these bonds. For the purposes of this section, the term "minimum capital reserve requirement" means, as of any particular date of computation, an amount of money, as provided in the resolution or indenture of the board authorizing the bonds or notes, equal to not more than the greatest of the respective amounts for the current or any future fiscal year of the board of annual debt service on the bonds of the board secured in whole or in part by the account. The annual debt service for any fiscal year is the amount of money equal to the aggregate of

all interest and principal payable on the bonds during the fiscal year, calculated on the assumption that all the bonds are paid at maturity. If any amount of the bonds is required to be redeemed on an earlier date by the operation of a debt service fund, then that amount is considered payable on those bonds during the year they are to be redeemed for the purposes of this calculation.

(4) In computing the amount of the capital reserve account, securities in which all or a portion of the account shall be invested shall be valued at par or, if purchased at less than par, at their cost to the board.

The governor shall include in the executive budget submitted to the legislature the sum required to restore the capital reserve account to the sum of minimum capital reserve requirements. All sums appropriated by the legislature shall be deposited in the capital reserve account.

(2) All amounts appropriated to the board by the legislature under this section constitute advances to the board and, subject to the rights of the holders of any bonds or notes of the board, shall be repaid to the state's general fund without interest from available operating revenues of the board in excess of amounts required for the payment of bonds, notes, or other obligations of the board, for maintenance of the capital reserve account, and for operating expenses.

90-6-206. Basis for awarding grants or loans. (1) Grants and loans shall be awarded on the basis of:

(a) need;

(b) degree of severity of impact from the coal development;

(c) availability of funds; and

(d) degree of local effort in meeting these needs.

(2) In determining the degree of local effort, the board shall review the millage rates levied for the present fiscal year in relation to the average millage rates levied during the 3 years immediately preceding coal development in that area or 1970, whichever is later, which impacts the local government unit applying for assistance.

(3) Millage rates for the present fiscal year which are lower than the average millage rate levied during the 3 years immediately preceding coal development in that area or 1970, whichever is later, shall be deemed by the board to indicate the lack of local effort. The application under such circumstances may be rejected.

(4) Further, in determining the degree of local effort, the board shall consider the possibility of requiring that local government unit to increase its bonded indebtedness to provide all or part of the governmental service or facility which is needed as a direct consequence of coal development.

(5) To the extent funds are needed to evaluate and plan for the impact needs caused by coal development, consideration of bond issues and millage levies may be waived.

(a) any local governmental unit extends to and includes as a designated unit the county in which it is located; and

(3) No loan or grant to an Indian tribe under 90-6-205 may be approved by the board unless, with respect to that loan or grant:

(a) the governing body of the tribe has agreed:

(i) to waive its immunity from suit on any issue specifically arising from the transaction of a loan or grant obtained under this part; and

(ii) to the adjudication of any dispute arising out of the loan or grant transaction in the district court of the first judicial district of the state of Montana; and

(b) approval of the transaction has been obtained from the secretary of the United States department of the interior whenever such approval is necessary.

90-6-301. Declaration of necessity and purpose. The large-scale development of mineral deposits in the state may cause an influx of people directly related to the area of the development. This influx of people and the corresponding increase in demand for local government facilities and services may create a burden on the local taxpayer. There is a significant lag time between the time when additional facilities and services must be provided and the time when additional tax revenue is available as a result of the increased tax base. In addition, local government units in whatever jurisdiction the development is not located may receive substantial adverse economic impacts without benefit of a major increased tax base in the future. There is therefore a need to provide a system to assist local government units in meeting the initial financial impact of large-scale mineral development.

90-6-302. Definitions. In this part the following definitions apply:

(1) "Board" means the hard-rock mining impact board established in 2-15-1822.

(2) "Bonds" include bonds, notes, warrants, debentures, certificates of indebtedness, temporary bonds, temporary notes, interim receipts, interim certificates, and all instruments or obligations evidencing or representing indebtedness or evidencing or representing the borrowing of money or evidencing or representing a charge, lien, or encumbrance on specific revenues, special assessments, income, or property of a political subdivision, including all instruments or obligations payable from a special fund.

(3) "Facility" means a facility that is owned, operated, or maintained by a local government unit and that, under the impact plan submitted under the provisions of 90-6-307, can be expected to have increased capital and operating costs as a result of the large-scale mineral development.

(4) "Local government unit" means a county, city, town, school district, or any of the following independent special districts:

(a) rural fire district;

(b) public hospital district;

(c) refuse disposal district;

(d) county water and sewer district;

(e) county water district;

(f) county sewer district; or

(g) park district.

(5) "Large-scale mineral development" means the construction or operation of a hard-rock mine and the associated milling facility for which a permit is applied for under 82-4-335 on or after May 18, 1981, and for which the average number of persons on the payroll of the mineral developer and of contractors at the mineral development exceeds or is projected to exceed 75 for any consecutive 6-month period. A mining operation that would qualify as a large-scale mineral development under this subsection is not a large-scale mineral development if the mine owner and operator are small miners as defined in 82-4-303.

90-6-307. Impact plan to be submitted. (1) After an application for a permit for a large-scale mineral development is made under 82-4-335, the person seeking the permit shall submit to the affected counties and the board an impact plan describing the economic impact the large-scale mineral development will have on local government units and shall file proof of such submission to the counties with the board. Whenever an environmental impact statement on the permit application is prepared under 75-1-201, the lead agency shall cooperate to the fullest extent practicable with the affected local government units to eliminate duplication of effort in data collection. The governing bodies of the affected counties shall publish notice of the submission of an impact plan at least once in a newspaper of general circulation in the county. The mineral developer and the affected local government units shall ensure that the impact plan includes:

(a) a timetable for development, including the opening date of the development and the estimated closing date;

(b) the estimated number of persons coming into the impacted area as a result of the development;

(c) the increased capital and operating cost to local government units for providing services which can be expected as a result of the development;

(d) the financial or other assistance the developer will give to local government units to meet the increased need for services.

(2) In the impact plan, the developer shall commit itself to pay all of the increased capital and net operating cost to local government units that will be a result of the development, as identified in the impact plan, either from tax prepayments, as provided in 90-6-309, special industrial local government facility impact bonds, as provided in 90-6-310, or other funds obtained from

the developer, and shall provide a time schedule within which it will do so. The plan may provide for funding from other revenue sources or funding mechanisms if the developer guarantees that the amount to be provided from these sources will be paid.

(3) Upon request of the governing body of an affected unit of local government, the mineral developer, prior to the end of the 90-day review period, shall provide financial or other assistance as necessary to prepare for and evaluate the impact plan. The governing body of the affected county must contract with the developer to obtain the requested financial assistance for each unit of local government within the county. Any disbursements to a unit of local government under this subsection shall be credited against future tax liabilities, if any.

(4) The governing body of the county where the fiscal impacts on local government units are forecasted in the impact plan to be most costly shall, within 90 days after receipt of the impact plan from the developer, conduct a public hearing on the impact plan.

(5) An affected local government unit that has not been identified in an impact plan submitted to the board as being likely to experience increased capital and operating costs for providing services which can be expected as a result of the development may object to the impact plan under the provisions of this section if the local government unit clearly demonstrates that it is likely to experience increased capital and operating costs from the mineral development.

(6) An affected local government unit shall, within 90 days after receipt of the impact plan from the developer, notify the board in writing if that local government unit objects to the impact plan, specifying the reasons why the impact plan is objected to. During the 90-day period, an affected local government unit may petition for one 30-day extension by submitting a written request to the board stating the need and justification for the extension. The board shall grant the extension unless it finds there is no reasonable basis for the request. If no objection is received within the 90-day period or any extension thereof, the impact plan is approved without any review by the board. An approved plan is binding and may only be altered under the amendment provisions of 90-6-311.

(7) If objections are received from a local government unit, the board shall, within 10 days, notify the developer and forward a copy of the local government unit's objections to the developer. The local government unit and the developer have 30 days, or a longer period if both the local government unit and the developer request an extension, to resolve the objection. If the objections are not resolved, the board shall conduct a hearing on the validity of the objections, which shall be held in the affected county or, if objections are received from local government units in more than one county, shall be held in the county which, in the board's judgment, is more greatly affected. The provisions of the Montana Administrative Procedure Act shall apply to the conduct of the hearing. The impact plan filed by the developer shall carry no presumption of correctness at the hearing.

(8) Following the hearing, the board shall, within 60 days, make findings as to those portions of the impact plan which were objected to and, if

appropriate, amend the impact plan accordingly. The findings and impact plan, as amended, shall be served by the board upon all parties. Any local government unit or the developer, if aggrieved by the decision of the board, is entitled to judicial review, as provided by Title 2, chapter 4, part 7, in the district court in and for the judicial district in which the hearing was held.

(9) The developer shall, within 30 days of receipt of the approved impact plan, provide the board with a written guarantee that the developer will meet the increased costs of public services and facilities as specified in the approved impact plan and according to the time schedule contained in the approved impact plan.

(10) The developer may make payments as specified in the approved impact plan directly to a local government unit or to the board. The governing body of a local government unit receiving payments shall deposit the payments into an impact fund. The developer and the affected governing body shall each issue to the board written verification of each payment and its intended use in compliance with the impact plan. The board shall deposit payments received from a developer into the hard-rock mining impact account established by 90-6-304.

(11) The board shall notify the department of state lands of its receipt of the written guarantee of payment and of any failure of the developer to comply with this section.

(12) Upon receipt of evidence that an affected local government unit identified in the approved impact plan is providing or is preparing to provide an additional service or facility provided for in the approved impact plan, the board shall, if the hard-rock mining impact account is used to deliver payments to the local government unit, pay to that local government unit, in one sum or in parts, the money from the hard-rock mining impact account identified in the plan as the increased cost to the local government unit of providing that public service or facility.

(13) If it is determined that an objection filed by an affected local government unit under subsections (5) and (6) or 90-6-311(3) is valid and it results in some remedial order by the board or court of competent jurisdiction, the local government unit shall be awarded and the developer shall pay reasonable costs and attorney fees associated with any administrative or judicial appeals filed under this section. Any attorney fees and costs awarded shall be in addition to any amounts paid by the developer under this part.

(14) Upon a determination by the department of state lands that a permittee under 82-4-335 has become or will become a large-scale mineral developer, the permittee may petition the board for a waiver of the impact plan requirement. The board may grant a waiver or conditional waiver of this requirement only if it has provided notice and opportunity for hearing to the permittee and to all affected local government units. The board shall adopt criteria under which a waiver may be granted. A waiver issued by the board may be revoked as provided in the conditional waiver or if the permittee and contractors at the mineral development increase their payrolls from the date of the waiver by 75 or more persons, provided the revocation is requested by an affected local government unit and notice and opportunity for hearing are

given to the permittee and all affected local government units. The board shall notify the board of land commissioners of any waiver that has been revoked.

(15) When a person who holds an operating permit under 82-4-335 and who has filed an impact plan fails to comply with the review and implementation requirements in this part and part 4 of this chapter, the board shall certify to the board of land commissioners that the failure to comply has occurred and shall certify when a permittee who has previously failed to comply comes into compliance.

90-6-309. Tax prepayment — large-scale mineral development. (1) After permission to commence operation is granted by the appropriate governmental agency, and upon request of the governing body of a county in which a facility is to be located, a person intending to construct or locate a large-scale mineral development in this state shall prepay property taxes as specified in the impact plan. This prepayment shall exclude the 6-mill university levy established under 20-25-423 and may exclude the mandatory county levies for the school foundation program established in 20-9-331 and 20-9-333.

(2) The person who is to prepay under this section is not obligated to prepay the entire amount established in subsection (1) at one time. Upon request of the governing body of an affected local government unit, the person shall prepay the amount shown to be needed from time to time as determined by the board.

(3) The person who is to prepay shall guarantee to the hard-rock mining impact board, through an appropriate financial institution, as may be required by the board, that property tax prepayments will be paid as needed for expenditures created by the impacts of the large-scale mineral development.

(4) When the mineral development facilities are completed and assessed by the department of revenue, they are subject during the first 3 years and thereafter to taxation as all other property similarly situated, except that in each year after the start of production, the local government unit that received

a property tax prepayment shall provide for repayment of prepaid property taxes in accordance with subsection (5).

(5) A local government unit that received all or a portion of the property tax prepayment under this section shall provide for tax crediting as specified in the impact plan. The tax credit allowed in any year may not, however, exceed the tax obligation of the developer for that year, and the time period for tax crediting is limited to the productive life of the mining operation.

90-6-310. Local government facility impact bonds. (1) When the need for the construction, renovation, improvement, or acquisition of local government facilities as a result of the large-scale mineral development is determined under 90-6-307, the owners of a large-scale mineral development may enter into a written agreement with the local government unit having the burden for the increased capital and operating costs expected to be incurred by the facilities. The local government unit may execute a written agreement with the owner of a large-scale mineral development for the issuance of any special industrial local government facility impact bonds provided for in this section.

(2) The agreement with the owners of a large-scale mineral development shall provide for a payment guarantee, in addition to the taxes imposed by the local government unit on property owners generally, of the principal and interest on the bonds provided for in this section. Payment will then be made by an annual special tax levy on the property of the large-scale mineral development sufficient to retire the principal and interest on these special impact bonds. The bonds shall not be an obligation of the local government unit, but shall be special obligations limited to the revenue derived from the special tax levy. A local government unit shall establish a levy and, to the extent bonds are issued as provided in this section, shall pledge the special fund and all revenues of the special tax levy to the repayment of the bonds.

(3) The debt limits set forth in 7-7-2203, 7-7-4201, and 20-9-406 do not apply to bonds issued in accordance with this section. The interest on such bonds shall not be subject to state taxes.

(4) The impact bonds shall be authorized by the governing body of the local government unit by a resolution that states:

(a) the facility for which the bonds are issued;

(b) the amount of the bonds;

(c) the rate of interest the bonds bear;

(d) the date of the bonds and the maturity date or dates of the bonds;

(e) the dates interest is payable on the bonds;

(f) the redemption options, if any, with respect to the bonds; and

(g) the manner of execution of the bonds.

(5) The impact bonds shall be:

(a) in registered form as to principal and interest;

(b) payable in installments and at times not exceeding 30 years from their date of issuance; and

(c) payable at a place or places and be evidenced in a manner the governing body determines is in the best interest of the local government unit.

(6) Any impact bonds issued under the authority of this section may be sold at public or private sale in a manner, at a time or times, and at a price above or below par as may be determined by the governing body of the local government unit. All expenses, premiums, and commissions that the local government unit considers necessary or advantageous in connection with the authorization, sale, and issuance of the bonds may be paid by the governing body of the local government unit from the proceeds of the sale of the bonds.

(7) If more than one local government unit adopts a resolution to issue impact bonds, the local government units may enter into an interlocal agreement under 7-11-101 through 7-11-105, 7-11-107, and 7-11-108, providing for the issue of impact bonds of the local government units to be combined in a single offering, if the governing body of each local government unit authorizing the bonds determines that the pooling of bonds:

(a) is in the best interest of the local government units;

(b) will facilitate the sale of the bonds under more advantageous terms;

(c) will lower the interest rates; or

(d) will lower the cost of issuance.

(8) In addition to the specific requirements of 7-11-105, the interlocal agreement shall provide:

(a) that the bond titles shall denote that impact bonds of different local government units have been pooled and shall refer to each local government unit executing the interlocal agreement;

(b) for a single debt service fund, to be held by a qualified trust company, to which each local government unit shall pledge and pay the annual special tax levies levied against the large-scale mineral development; and

(c) that the bonds are payable solely from and against the debt service funds under the interlocal agreement.

(a) employment at the large-scale mineral development is forecast to increase or decrease by at least 75 persons, as determined under 90-6-302(5), over or under the employment levels contemplated by the approved impact plan; or

90-6-401. Declaration of necessity and purpose. The commencement of new large-scale hard-rock mineral developments often results in revenue disparities among adjacent local government units. This occurs primarily when a mine that locates in one taxing jurisdiction causes population influxes in neighboring jurisdictions. The result can be that some jurisdictions will experience a need to increase expenditures and receive no corresponding increase in revenue, while others will experience an increase in revenue and receive no comparable increase in expenditures. There is therefore a need to allocate the increase in property tax base resulting from the development and operation of new large-scale mines so that property tax revenues will be equitably distributed among affected local government units.

History: En. Sec. 1, Ch. 635, L. 1983.

90-6-402. Definitions. As used in this part, the following definitions apply:

(1) "Affected local government unit" means a local government unit that will experience a need to increase services or facilities as a result of the commencement of large-scale mineral development or within which a large-scale mineral development is located in accordance with an impact plan adopted pursuant to 90-6-307.

(2) "Board" means the hard-rock mining impact board established in 2-15-1822.

(3) "Mineral development employee" means a person who resides within the jurisdiction of an affected local government unit as a result of employment with a large-scale mineral development or its contractors or subcontractors.

(4) "Mineral development student" means a student whose parent or guardian resides within the jurisdiction of an affected local government unit as a result of employment with a large-scale mineral development or its contractors or subcontractors.

(5) "Jurisdictional revenue disparity" means property tax revenues resulting from a large-scale hard-rock mineral development that are inequitably distributed among affected local government units as finally determined by the board in an approved impact plan.

(6) "Large-scale mineral development", for the purposes of this part, is defined in 90-6-302.

(7) "Local government unit", for the purposes of this part, means a county, municipality, or school district.

(8) "Taxable valuation" of a mineral development means the total of the gross proceeds taxable percentage specified in 15-6-132(2) when added to the taxable percentages of real property, improvements, machinery, equipment, and other property classified under Title 15, chapter 6, part 1.

History: En. Sec. 2, Ch. 635, L. 1983; amd. Sec. 88, Ch. 11, Sp. L. June 1989.

90-6-403. Jurisdictional revenue disparity — conditioned exemption and reallocation of certain taxable valuation. (1) When an impact plan for a large-scale mineral development approved pursuant to 90-6-307 identifies a jurisdictional revenue disparity, the board shall promptly notify the developer, all affected local government units, and the department of revenue of the disparity. Except as provided in this section and 90-6-404, the increase in taxable valuation of the mineral development that occurs after the issuance and validation of a permit under 82-4-335 is not subject to the usual application of county and school district property tax mill levies. This increase in taxable valuation must be allocated to local government units as provided in 90-6-404. The increase in taxable valuation allocated as provided in 90-6-404 is subject to the application of property tax mill levies in the local government unit to which it is allocated.

(2) The total taxable valuation of a large-scale mineral development remains subject to the statewide mill levies and basic county levies for elementary and high school foundation programs as provided in 20-9-331 and 20-9-333.

(3) The provisions of subsection (1) remain in effect until the large-scale mineral development ceases operations or until the existence of the jurisdictional revenue disparity ceases, as determined by the board.

History: En. Sec. 3, Ch. 635, L. 1983; amd. Sec. 5, Ch. 311, L. 1987.

90-6-404. Allocation of taxable valuation for local taxation purposes. When property of a large-scale mineral development is subject to the provisions of 90-6-403, the increase in taxable valuation must be allocated by the department of revenue as follows:

(1) If the board determines that the local government unit in which the ore body or the mineral deposit being mined is located is not affected by the development and if this determination is shown on the impact plan, 20% of the total increase in taxable valuation of the gross proceeds must be allocated to that local government unit. This provision is intended to establish a minimum allocation for the units and does not prohibit proof by a unit that actual direct impacts would exceed 20% of the total impacts of the development.

(2) The remaining increase in taxable valuation of the mineral development must be allocated between affected counties and affected municipalities according to the following formula based on the place of residence of mineral development employees:

(a) A portion, not to exceed 20%, to affected municipalities, based on that percentage of the total number of mineral development employees that reside within municipal boundaries. The taxable valuation allocated to affected municipalities must be distributed to each municipality according to its percentage of the total number of mineral development employees who reside within municipal boundaries. That portion of the taxable valuation distributed to a municipality pursuant to this section is subject to the same county mill levy as other taxable properties located in the municipality.

(b) The remaining portion of the taxable valuation must be distributed to each affected county according to its percentage of the total number of mineral development employees that reside within the county.

(3) The increase in taxable valuation equal to that subject to subsection (2) must be distributed pro rata among each affected high school district according to the percentage of the total number of mineral development high school students that reside within each district.

(4) The increase in taxable valuation equal to that subject to subsection (2) must be distributed pro rata among each affected elementary school district according to the percentage of the total number of mineral development elementary school students that reside within each district.

(5) The distribution formula specified in subsections (2) through (4) may be modified by an impact plan approved as provided in 90-6-307 or amended as provided in 90-6-311, if the modification is needed in order to ensure a reasonable correspondence between the occurrence of increased costs resulting from the mineral development and the allocation of taxable valuation resulting from the mineral development.

History: En. Sec. 4, Ch. 635, L. 1983; amd. Sec. 1, Ch. 760, L. 1991.

Compiler's Comments

1991 Amendment: Inserted (1) requiring that if Board determines that local government unit in which ore body or mineral deposit being mined is located is not affected by development as shown on impact plan, 20% of total increase in taxable valuation of proceeds must be allocated to local government unit and providing that provision does not prohibit proof by unit that impacts would exceed 20% of total developmental impacts; at beginning of (2) substituted "remaining" for "total"; in (3) and (4), at beginning before "increase", deleted "total" and after "valuation" inserted "equal to that subject to subsection (2)"; and inserted (5) authorizing modification of distribution formula by approved or amended impact plan if needed to ensure reasonable correspondence between costs of mineral development and allocation of taxable valuation from development.

Retroactive Applicability: Section 3, Ch. 760, L. 1991, provided: "[This act] applies retroactively, within the meaning of 1-2-109, to all large-scale mineral developments required to comply with 90-6-307 that did not have an impact plan approved pursuant to 90-6-307, as of December 31, 1990."

90-6-405. Employee surveys. (1) Each large-scale mineral development subject to the provisions of 90-6-403 and 90-6-404 shall, on or before May 1 of each year, conduct a survey of its employees and promptly submit a report of its findings to the department of revenue. The report must include:

(a) the number of mineral development employees residing within each affected county;

(b) the number of mineral development employees residing within each affected municipality;

(c) the number of mineral development students residing in each affected high school district; and

(d) the number of mineral development students residing in each affected elementary school district.

(2) The initial allocation of the increase in taxable valuation made as provided in 90-6-403 and 90-6-404 shall be made on the basis of the place of residence of employees and the district of enrollment of students as projected in the approved impact plan for that period of time between the issuance and validation of the permit and the submission of an employee survey as provided for in this section.

Part 5

Reverse Annuity Mortgage Loan

90-6-501. Short title. This part may be cited as the "Reverse Annuity Mortgage Loan Act".

History: En. Sec. 1, Ch. 178, L. 1989.

90-6-502. Purpose. Many elderly citizens in Montana own their own homes and have little or no remaining mortgage debt. Many of these homeowners are persons of lower income who would benefit from an additional income source from the use of the equity in their homes. The legislature finds that reverse annuity mortgage loans would enable elderly homeowners to provide more substantially for their own in-home support and specialized care. The purpose of this part is to:

(1) establish a reverse annuity mortgage loan program within the board of housing;

(2) authorize the board to make reverse annuity mortgage loans;

(3) counsel, assist, and protect elderly homeowners who wish to obtain a reverse annuity mortgage loan; and

(4) administer a reverse annuity mortgage loan program that does not jeopardize the mortgagor's eligibility for medicaid and other means-tested programs.

History: En. Sec. 2, Ch. 178, L. 1989.

90-6-503. Definitions. As used in this part, unless the context requires otherwise, the following terms apply:

(1) "Mortgage" means a mortgage as defined in 90-6-103.

(2) "Mortgagee" means the holder of a mortgage or its assignee.

(3) "Mortgagor" means a person:

(a) of lower income as determined by the board. In its determination of lower income, the board shall take into consideration the criteria in 90-6-103(16).

(b) 68 years of age or older;

(c) who is the owner and occupant of a single-family dwelling that is unencumbered by any prior mortgage, lien, or pledge; and

(d) who has completed a reverse annuity mortgage counseling program approved by the board.

(4) "Reverse annuity mortgage loan" means a loan in which loan proceeds are advanced to the mortgagor to provide a monthly tax-free cash payment for 10 years.

(5) "Single-family dwelling" means a one- to four-family living unit, excluding a condominium as defined in 70-23-102.

History: En. Sec. 3, Ch. 178, L. 1989.

90-6-504. Reverse annuity mortgage loan program. The board may make reverse annuity mortgage loans that are secured by a single-family dwelling located in this state. The loans must be made under terms and conditions adopted by the board pursuant to its authority under 90-6-104.

History: En. Sec. 4, Ch. 178, L. 1989.

90-6-505. Mortgage requirements. (1) Any mortgage securing payments made by a mortgagee to a mortgagor pursuant to a reverse annuity mortgage loan must be sufficiently definite, certain, and valid to secure all money actually advanced pursuant to and in accordance with its terms. The mortgage must secure money advanced at or subsequent to closing of the loan, up to but not exceeding the full amount of the loan. A reverse annuity mortgage has the same priority as if all money had been advanced at the time the mortgage was delivered. The mortgage must include but not be limited to the following:

(a) a statement that it is a reverse annuity mortgage loan;

(b) the full amount of the loan authorized;

(c) a statement of the dates on which advancements are to be made and the amounts of such advancements; and

(d) the events that will give rise to the maturity of the loan.

(2) The mortgagee and the mortgagor may modify the advancement dates in the mortgage by a statement signed by all parties to the mortgage and properly recorded with the original mortgage instrument. The modification may not limit or otherwise affect the priority of the mortgage.

History: En. Sec. 6, Ch. 178, L. 1989.

90-6-506. Repayment or termination of reverse annuity mortgage loan. (1) The mortgagor shall repay the reverse annuity mortgage loan as provided in this section.

(2) Repayment of any part of the reverse annuity mortgage loan is not required prior to the maturity of the loan and while the mortgagor resides on the secured property. The mortgagor may pay the outstanding loan balance in full at any time without penalty.

(3) The reverse annuity mortgage loan matures, advances under a reverse annuity mortgage loan terminate, and the entire unpaid balance of the loan plus accrued interest becomes due and payable only upon the occurrence of any of the following events:

(a) the death of the last surviving mortgagor;

(b) the sale or other transfer of the secured property to a person other than any of the original mortgagors;

(c) vacation of the secured property by the mortgagor, whether voluntarily, involuntarily, or pursuant to legal process; or

(d) any other occurrence that materially decreases the value of the property securing the loan or that will have the likely effect of causing the loan to not be repaid.

(4) Any occurrence allowing the termination of a loan as provided in subsection (3)(d) must be clearly recited in the mortgage, deed of trust, or trust indenture.

(5) Payment of the reverse annuity mortgage loan may not be required from any source other than the secured property.

History: En. Sec. 5, Ch. 178, L. 1989.

90-6-507. Rulemaking authority. The board shall adopt all procedural and substantive rules necessary for the administration of this part, including rules required to secure, implement, and administer the reverse annuity mortgage loan program.

History: En. Sec. 7, Ch. 178, L. 1989.

The authority may borrow money for necessary expenses of organization and operation. Such borrowed money must be repaid within a reasonable time after the authority receives funds provided for under this chapter.

(2) When an application is made to the authority by any participating health institution for financial assistance to provide for its facilities, the application may be accompanied by an initial planning service fee in an amount determined by the authority. Such initial planning service fee may be included in the cost of the facilities to be financed and is not refundable by the authority, whether or not any application is approved. In addition to the initial fee, an annual planning service fee may be paid to the authority by each participating health institution in an amount determined by the authority. The annual planning service fee may be paid on such dates or in installments as may be satisfactory to the authority. The fees must be used for:

The lease must provide for rentals adequate to pay the principal and interest due on bonds and to create and maintain such reserves and accounts for depreciation as the authority determines necessary.

(2) The lease may contain terms and conditions that the authority considers proper. The lease may be terminated upon failure of the participating health institution to comply with any obligation under the lease. The lease may include a renewal or an option to purchase provision upon such terms or conditions as the authority considers desirable.

(3) Upon payment of all indebtedness incurred by the authority for financing a facility, the authority may convey any or all of the facility to the lessee, with or without consideration.

History: En. Sec. 8, Ch. 703, L. 1983.

90-7-220. Montana developmental center loan. (1) The department of corrections and human services may enter into a loan agreement with the Montana health facility authority for the purpose of financing the costs of acquiring, constructing, and equipping facilities for the developmentally disabled at the Montana developmental center in Boulder, including the establishment of reserves and the payment of costs of the financing. The maximum principal amount of the loan may not exceed $8,665,000 for construction and related costs, plus the necessary amounts for capitalized interest, debt service reserves, and financing costs, and the loan must be payable over a term of not to exceed 30 years and must bear interest and contain other terms and provisions with respect to prepayment or otherwise as are not inconsistent with this section and as the department approves.

(2) The loan may be secured by a mortgage on the Montana developmental center facility, including the land on which it is located. The loan constitutes a special limited obligation of the department, and the principal and interest payments required by that agreement are payable solely from the facility revenues obtained by the department from the ownership and operation of and the provision of services at the Montana developmental center, including payments or reimbursements from private users, insurers, and the federal government. All facility revenues obtained from services provided by the Montana developmental center must be deposited in a special revenue fund and must be applied to the payment of the principal and interest payments as due under the loan agreement. Principal and interest payments constitute a statutory appropriation within the meaning of 17-7-502. Whenever the foregoing facility revenues exceed the amount and terms specified and required to repay the loan and maintain required reserves, the excess must be deposited to the general fund. As long as the loan remains outstanding and the department provides services for the developmentally disabled, the department shall use the Montana developmental center for those purposes or for other purposes as permitted by the loan agreement and state law, except when foreclosure occurs under the agreement or the mortgage. Notwithstanding 77-2-302(1) and upon foreclosure of a mortgage given to secure the loan agreement, there must be paid to the board of land commissioners as a first and prior claim against the mortgaged land an amount equal to the full market value of the land as determined by the board prior to the execution of the mortgage and after appraisal by a qualified land appraiser. The loan agreement may contain other provisions or agreements that the department

determines are necessary and that are not inconsistent with the provisions of Title 90, chapter 7.

(3) The obligations of the department under the agreement are special limited obligations payable solely from the facility revenues and do not constitute a debt of the state or obligate the state to appropriate or apply any funds or revenues of the state, except the facility revenues as provided in this section.

Part 1

General Provisions

90-8-101. Short title. This chapter may be cited as the "Montana Capital Company Act".

History: En. Sec. 1, Ch. 554, L. 1983.

90-8-102. Declaration of policy. (1) The legislature finds and declares that:

(a) economic insecurity due to unemployment is a serious menace to the health, safety, and general welfare of not only the affected people but of the people of the entire state;

(b) involuntary unemployment, with its resulting burden of indigency, falls with crushing force upon unemployed workers and ultimately on the state itself in the form of public assistance and unemployment compensation payments; and

(c) unemployment causes a migration of Montana workers and families seeking jobs and establishing homes elsewhere, which deprives the state of its most valuable resource, its people, and reduces the tax base of local governments, impairing their ability to provide basic services.

(2) (a) The legislature further finds that the best method of combating unemployment and protecting Montana against the loss of its people is by promoting, stimulating, developing, rehabilitating, and revitalizing the business prosperity and economic welfare of the state and its citizens.

(b) To accomplish this goal, the legislature seeks to encourage the formation of venture and equity capital in Montana for use in diversifying, strengthening, and stabilizing the Montana economy by increasing Montana employment and business opportunities while protecting the people's constitutional right to a clean and healthful environment.

(3) The legislature further finds that:

(a) private investment of venture and equity capital in the Montana economy will be encouraged and promoted by making tax credits available to taxpayers investing in a Montana capital company or in a Montana small business investment capital company;

(b) demands on state revenues restrict the financial ability of the state to make unlimited tax credits available for investment purposes and require that the state place reasonable limits on the total amount of tax credits to be made available for investment incentive;

(c) establishment of a rational tax credit program that gives priority to investments in capital companies in the order in which they are qualified or in a Montana small business investment capital company will encourage prompt private investment in Montana businesses.

(4) The legislature further finds that use of money from the Montana permanent coal tax trust fund to purchase debentures issued by a capital company or a Montana small business investment capital company will promote the business prosperity and economic welfare of the state and its citizens.

90-8-103. Purpose. (1) The purpose of this chapter is to promote the development of the human resources and the diversification of the economy of Montana. (2) This chapter is aimed at:

(a) increasing the availability of development capital in order to encourage and assist in the creation, development, and expansion of small businesses based in Montana;

(b) aiding those businesses to which risk and equity financing are not readily or fully available through traditional sources, including those owned and operated by women and minorities;

(c) developing, preserving, diversifying, expanding, and strengthening the agricultural, industrial, and business base of Montana's economy, particularly for those small businesses utilizing the state's technical, managerial, and research resources in domestic and international markets; and

(d) providing the residents of Montana with greater opportunities to invest and participate in the economic development and potential of the state.

90-11-101. Legislative policy. (1) Whereas, a considerable portion of the citizens of the state of Montana are members of the Indian race; and

(2) Whereas, in the course of the past 80 years these Indian citizens of the state of Montana have been driven from their native valleys and plains and are at present living and residing upon reservations set apart for such purposes by the United States of America, and by virtue of that isolation and of supervision by the federal government, great problems of economic and social significance have arisen and presently exist, and no suitable progress has been made to solve such problems by reason of the fact that the Indians and those who are attempting to aid them in the solution of their problems have never been able to present a coordinated and united effort in solving such problems; and

(3) Whereas, it is hereby declared that it is the legislative policy of this state that the best interests of the Indians will be served by the fostering of a program which is designed to establish and place our Indian citizens in a position to take their rightful place in our society and assume the rights, duties, and privileges of full citizenship and as Indians, it is therefore necessary that a state office of the coordinator of Indian affairs be established so that the problems of the Indians of Montana can be approached and reconciled from a state level in cooperation with the United States of America; and

(4) Whereas, agencies of the federal government retain jurisdiction on Indian reservations in the state of Montana of the administration of economic, social, health, education, and welfare programs for Indians; and

(5) Whereas, Indians who reside off reservations generally qualify for participation in federal programs but are often prohibited from voting on tribal affairs and for tribal officers; and

(6) Whereas, there are sizeable numbers of off-reservation Indians residing in our state of both enrolled and unofficial tribal descent (landless) whose needs for environmental assistance are borne by state and local agencies, and these needs are derived from problems shared by all Indians, whether they reside on reservations or not, and in consideration of their desire for official voice and representation in seeking solutions to their problems; and

(7) Whereas, programs of the state of Montana should not duplicate those supported by agencies of the federal government as regards jurisdiction of Indian people, and since state responsibility is effected with off-reservation

Indians and since those Indians require assistance to coordinate their affairs with various tribal groups and federal agencies where they have no official recognition;

(8) Then therefore, let it be resolved that the coordinator of Indian affairs should assess the problems of all Indians to include those who reside off known reservations and who seek ways and means of communicating their opinions and needs to agencies of responsibility and that the coordinator should actively assist them in organizing their efforts and that he act as representative and spokesman for organized bodies of Indian people, whether reservation or off-reservation classification, whenever his assistance is required.

90-11-102. Duties and assistance. (1) It shall be the duty of the state coordinator of Indian affairs to carry out the legislative policy set forth in 90-11-101.

(2) He shall acquaint himself with the problems confronting the Indians of Montana, and he shall advise the legislative and executive branches of the state of Montana of those problems and shall make recommendations for the alleviation thereof. He shall also serve the Montana delegation in the federal congress as an adviser and intermediary in the field of Indian affairs and shall act as spokesman for representative Indian organizations and groups, public and private, whenever his support is solicited.

(3) All executive and legislative agencies of state government may within the area of their expertise and authority provide assistance to tribal councils or their official designees requesting such assistance on any matter relating to coal development on Indian reservation lands and may make an appropriate charge therefor.
